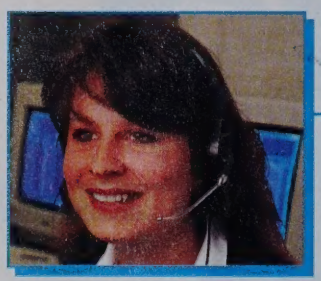
Service

Service and Selection

At Newark, you'll find the quality you need, from the people you trust. We have a huge product selection–Newark is the largest electronics catalog distributor in North America.



Ordering

Eight Fast Ways to Order

It couldn't be easier!

1) Phone
2) Fax
3) Internet
4) Intranet
5) CD-ROM
6) Newark CONNECT™
7) EDI
8) Mail

Shipping

Get It When You Need It

Just call your order in to us by 5:00 p.m. C.S.T. and we'll ship in-stock items out the same day. Overnight shipment is also available anywhere, anytime. And, you can order 24 hours a day on the Internet.

Payment

Four Payment Methods

We make it easy to get what you need.

1) Purchase order
2) Major credit cards accepted
3) Corporate purchasing cards
4) C.O.D.

All with no minimum order*

*Any order under $25.00 is subject to a $5.00 service charge.

Newark CONNECT™ Stockroom & Order Management Software

Automatically tracks and reorders stock, so you save time, paperwork, and problems.

Newark CONNECT™

Newark CONNECT™ takes care of your inventory, so you can take care of business.

Our new stockroom and order management software, **Newark CONNECT™**, is a powerful tool that makes sure you have the components you need, when you need them. Just enter your inventory information, including the minimum and maximum levels needed, then tell **Newark CONNECT™** when you want to reorder parts and what the quantity should be. The rest is up to **Newark CONNECT™**. When the stock of any item reaches the minimum reorder level, **Newark CONNECT™** will automatically consolidate your requirements into one convenient purchase order, and transmit that order to Newark. Then Newark's fast, same-day shipping of in-stock products refills your stock within 24 hours in most cases. For more information, call 1-800-4-NEWARK (1-800-463-9275) or visit www.newark.com.

No One Stocks More Than Newark!

At right is a broad overview of the kinds of products we carry, together with the number of products stocked and the number of manufacturers represented in each category. Please note that our manufacturers may be listed in multiple categories. For a more detailed listing of our products, please see the Product Index at the back of this catalog. For help in locating products, call 1-800-4-NEWARK (1-800-463-9275).

Special Order Items

Don't see what you need? If you need something we don't stock, we can special order virtually any product from nearly all name-brand electronic component manufacturers, and ship it to you directly and quickly.

Newark Electronics® is Preparing for the Year 2000

At Newark, we're looking forward to the new century. We've been preparing for it for some time. We began to address this issue in the fall of 1996. We formed a systems team of dedicated personnel led by our CIO, and we received full support and funding from our CEO and the Board of Directors. In 1998, we formed over 20 teams of people to support each major function of our business. These committees are responsible for identifying century date risks and developing solutions. We anticipate that our systems will be compliant so that all our customers will continue to receive the superior service they expect from Newark Electronics®. We expect to accomplish our Year 2000 objectives before the end of 1999, so that our customers will experience a smooth transition to the new century.

For more details on Newark's Year 2000 plans: See **page 1662** of this catalog for our Year 2000 Readiness Disclosure.
See the Y2K section of our Web site, **www.newark.com**, for more information and FAQs.

Overview of our inventory, by product group:

Product Type	Manufacturers Carried	Part Numbers Stocked
Audio	7	700

Three Great Ways to Order: Catalog, Web, or CD

Visit Newark on the Net
www.newark.com

Use our Web site to choose from over 150,000 products from over 300 top manufacturers. It's fast and friendly! You'll find datasheets, diagrams, and photos to help you select the right product the first time. Order with your Newark account or a credit card and don't forget to look for monthly values and discounts.

www.newark.com

Our complete Catalog 117 is available on Newark's CD 3.0, and it interfaces directly to our Internet site. Don't have Internet access? Just use the Internet Service Provider on the CD. This is the easy way to check product availability, place orders, and receive product updates. Our user-friendly CD puts the largest inventory in electronics right at your fingertips. To order just call.

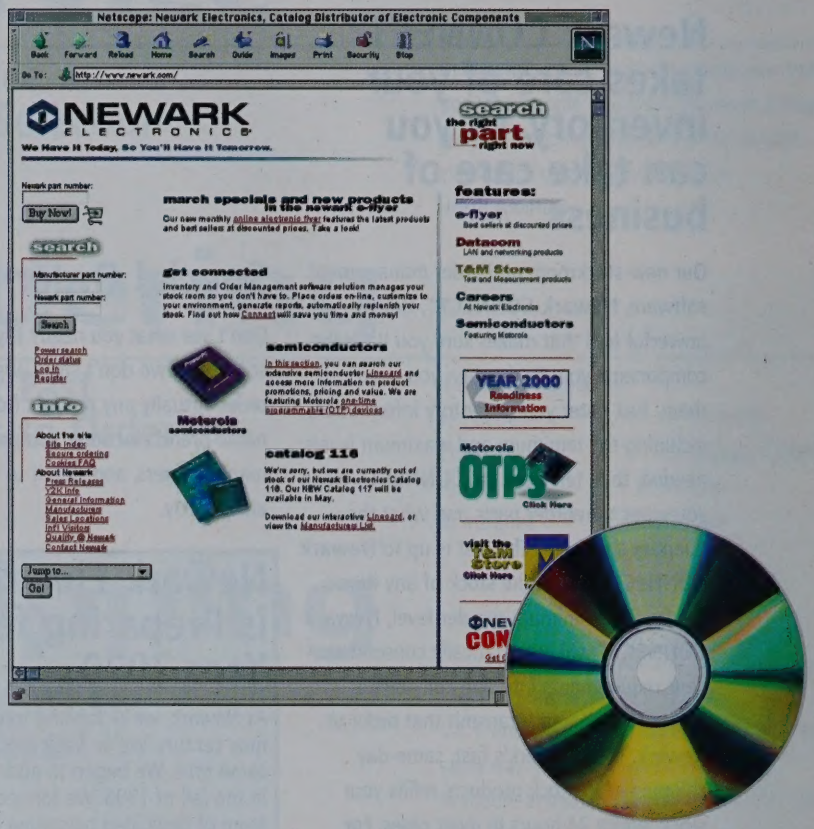
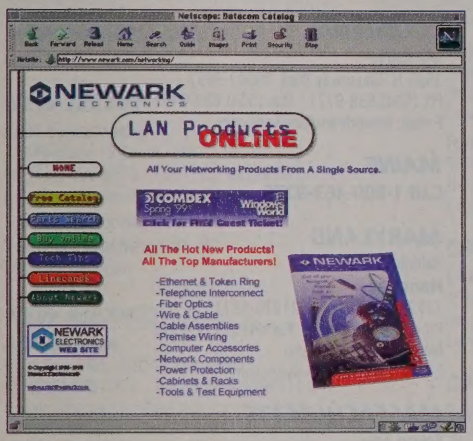
(1-800-463-9275)



Value-Added Services

Technical Help Line	**1-800-NEWARK-T (1-800-639-2758)** Have questions about Newark's Internet site, the CD catalog or the **Newark CONNECT™** program?
Custom Cut Cable	We'll cut Belden® and Olflex® flexible cable to your specifications.
Bagging & Tagging	Individual parts can be placed in bags and labeled to your specifications.
Kitting	Groups of parts will be supplied in convenient manufacturing or engineering kits.
Assembly	We'll perform basic assembly of compatible components.
Tape-On-Reel	Surface mount and through-hole passive components and semiconductors are available in less-than-reel quantities.



Datacom Catalog and Web Site

Our Datacom Catalog features thousands of products for networking, telephones, premise wiring, and power protection. You'll also find computer accessories, cable assemblies, and fiber optics and cable. Visit our LAN Web site for the latest news, product search, and tech tips.

www.newark.com/networking

Farnell Catalog and Web Site

Our U.S. Farnell catalog has a huge selection of European electronic components, as well as thousands of new products. Ask your Newark sales rep for your copy today. And visit the Farnell Web site at **www.farnell.com** for more information on the company and products.

Scheduled Orders	We'll schedule your orders for future shipments when you need them.
Blanket Orders	Reduce administrative costs and paperwork by placing a blanket order against which your staff can order products as needed.
JIT Programs	We can arrange "just-in-time" shipments for your inventory needs.
Part Numbers and Special Information	We can add your part numbers and special receiving information about the products in your order to your shipping/packing slip.
Bar-coded Shipments	Do you use bar coding to track items? We can add it to the products in your order.

International Ordering Information/Terms

IMMEDIATE SHIPMENT
With Newark's state-of-the-art computerized order entry and shipping system, Newark can quickly ship your order to virtually any country in the world. Newark's service level is one of the highest in the electronics industry.

INQUIRIES
Please call or fax the appropriate sales office location from the listing above. To assure fast and accurate replies to your RFQ, please be sure to use the Newark stock number and/or the manufacturer's name and part number. Newark will also quote price and delivery on products available for export but not listed in the catalog. These products are sold on a noncancellable and non-returnable basis.

PRICING
Everything listed in the catalog is available, and all specifications and descriptions are current, as of the time of publication. Product listings, specifications, availability, and pricing are subject to change without notice. Where trade literature is provided to customers, it is considered to be for reference only. Exact product specifications can be obtained from suppliers upon request. Prices are net F.O.B. shipping point and do not include insurance, freight, duty or taxes. Orders are filled at the prices in effect on the date of shipment. Please contact the appropriate Newark sales office listed above to obtain the current prices.

MINIMUM ORDER
Newark's minimum export order is U.S. $250.00 (F.O.B. Newark Warehouse).

TERMS OF SALE
Shipments are on the basis of D.D.U. (named place of destination) with Newark separately charging for the costs, insurance, and freight to bring the goods to the named place of destination. Export orders requiring special handling, packaging, and documentation are subject to additional charges. The terms and conditions on pages **1663-1664** of this catalog relating to precious metal surcharges, large quantity quotations, shipment damage, and warranty and disclaimer apply equally to export sales unless the order originates from a country for which Newark publishes a separate catalog, in which case the terms and conditions in such other catalogs apply. The rules of the United Nations Convention on Contracts for the International Sale of Goods shall not apply to any orders or contracts for purchases of products from Newark.

PAYMENT TERMS
Export orders are accepted on the basis of payment in advance of shipment by a check in U.S. funds, wire transfer, international money order, credit card, or letter of credit. Open accounts (net 30 days) may be granted when three U.S. trade references, name and location of bank, plus appropriate financial data are supplied. All requests require 21 days for processing and are subject to Newark's prior approval.

LETTERS OF CREDIT
Payment may be made by irrevocable confirmed L/C provided that the total invoice value of the export order is more than U.S. $500.00. Multi-line L/C orders must allow for two partial shipments and be valid for a period of at least one hundred fifty (150) days.

EXPORT LICENSE
International customers purchasing products requiring a U.S. Department of Commerce Export License will be contacted for end use information for Newark to apply for the appropriate license. An additional fee may be applied to any export order that requires Newark to make Export License application.

ACKNOWLEDGEMENTS
All export orders are acknowledged via fax or telex.

SAFE, RELIABLE DELIVERY
To assure the on-time damage-free delivery of your merchandise, Newark reserves the right to select the shipping methods for all export orders, with all routing and documentation handled by Newark.

For Newark U.S. Terms of Sale, see pages 1663–1664.

NEWARK ELECTRONICS®

14 new manufacturers

Berk-Tek

Brady®

Bulgin Components

ELNA® America, Inc.

Klockner Moeller

Meritec

MGE UPS Systems

Micrel Semiconductor

Newport Components

Semikron International

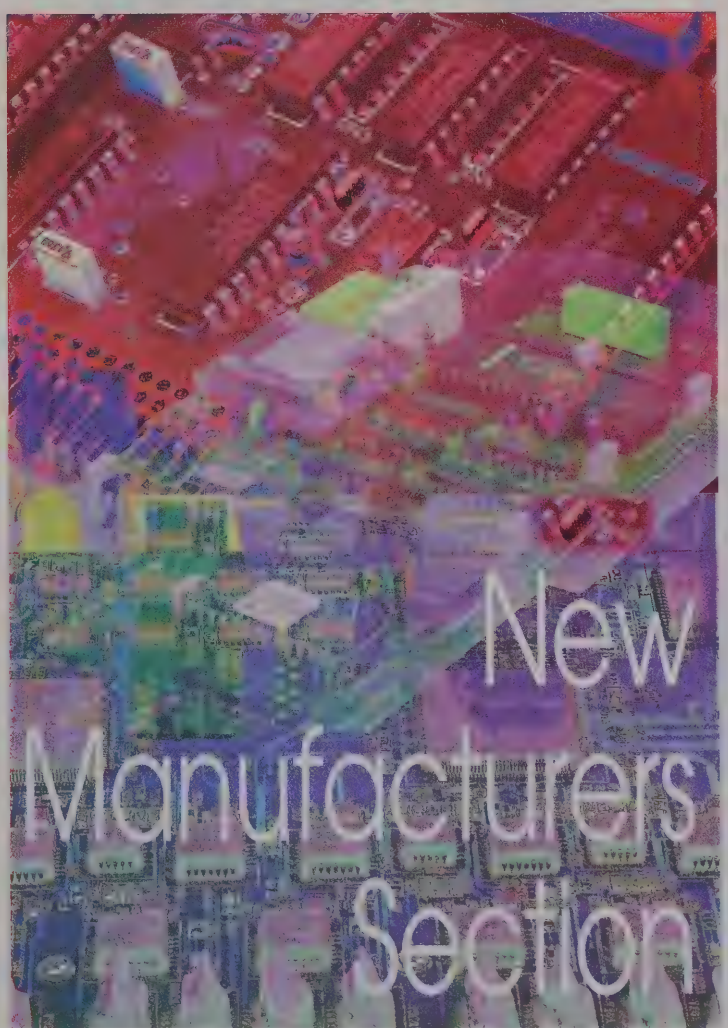
Sure Seal®

Tech Spray

Trompeter Electronics



When you need breadth and depth of inventory, choose Newark Electronics®! We're constantly expanding the range of the manufacturers and products we offer you, and we're proud to present these 14 new manufacturers in our catalog. Over the next few pages, you can read all about these new manufacturers and see the indicated pages for product descriptions. If you need more information or want to place an order, call us at **1-800-4-NEWARK (1-800-463-9275)** or visit our Web site at **www.newark.com**.

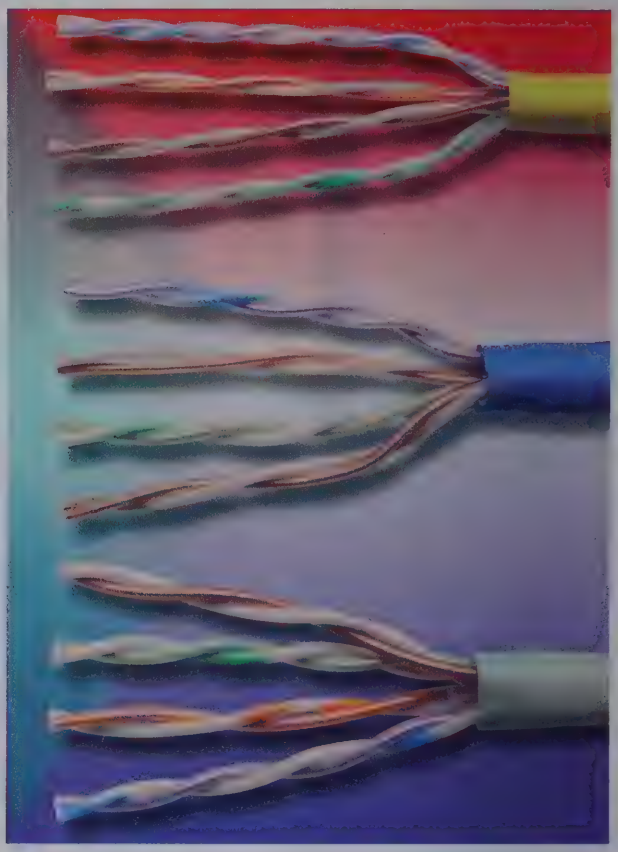
NEWARK ELECTRONICS

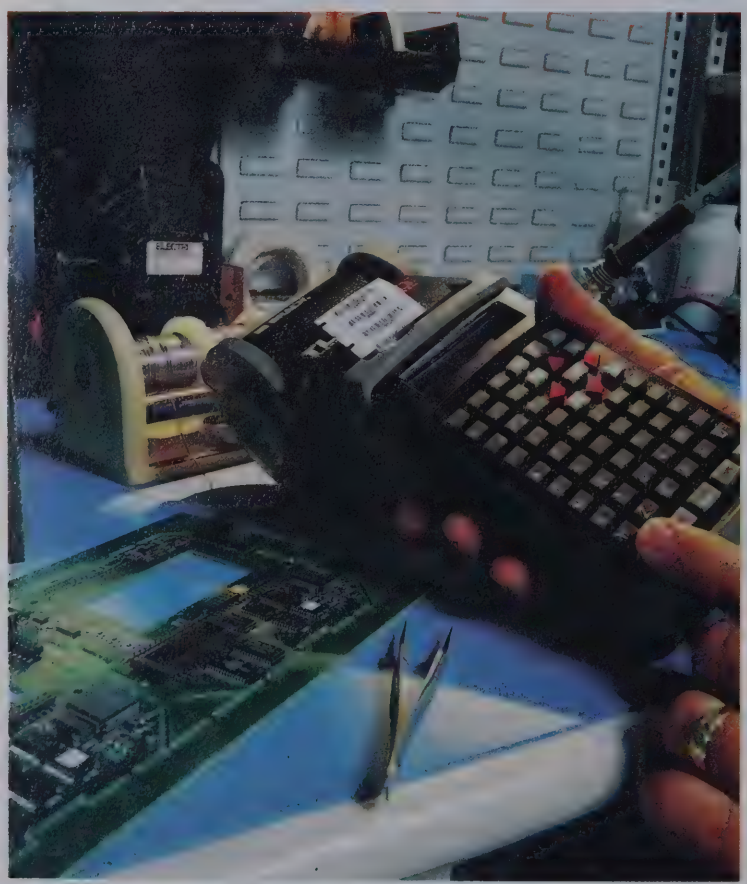
Berk-Tek

AN ALCATEL COMPANY

Berk-Tek is a leading manufacturer of high-performance copper and fiber-optic cable in North America. Products are used in high-performance premise networking, factory automation, computer electronics, and telecommunications applications. Berk-Tek is a member of the Alcatel Data Cable Division, the world's largest producer of cable.

See page 1214.





BRADY®

Brady® is an international manufacturer and marketer of identification, safety, materials, and graphics solutions. Products include high-performance labels, signs, tapes, and printers. Brady® products are ideal for use in markets like manufacturing, electronics, telecommunications, transportation, education, government, and commercial graphics. Newark features Brady® ID printers, labels, and marker books and cards.

See pages 1519–1521.

BULGIN

Electrical + Electronic Components

Bulgin Components offers a unique line of switches that are vandal-resistant, making them superior choices for all security applications. Bulgin also features the Buccaneer® range of sealed connectors for use in harsh environments where water, dust, salt spray, and chemicals can render other connectors useless. Bulgin Components is ISO-9002 certified.

See pages 287 and 997.

ELNA®

ELNA® America, Inc. offers a broad line of aluminum electrolytic, tantalum, and double-layer capacitors. These high-quality products are manufactured at its ISO-9001 or QS-9000 certified factories. ELNA® America, Inc. is your source for capacitors, including general-purpose, radial, low-ESR, surface mount, long-life, high-temperature, 100-farad, and more.

See pages 82 and 83.

NEWARK ELECTRONICS

Klockner MOELLER

Industrial Electrical/Electronic Controls & Systems.

The name Klockner Moeller stands for excellence in the fields of motor control and electronic automation products. Since 1899, Klockner Moeller has been supplying a complete range of industrial electrical controls. Products include relays, contactors, motor protectors, circuit breakers, starters, PLCs, pushbuttons, and custom motor control systems.

See pages 1435, 1493, and 1502.

MERITEC®

A DIVISION OF ASSOCIATED ENTERPRISES

Through Newark, Meritec offers four innovative growth products: PCI connectors, SCSI adapters, flash memory sockets, and flat flex cable assemblies. These products have wide appeal to a variety of markets for many applications, including instrumentation, computer, telecommunication, flat panel display, and industrial control.

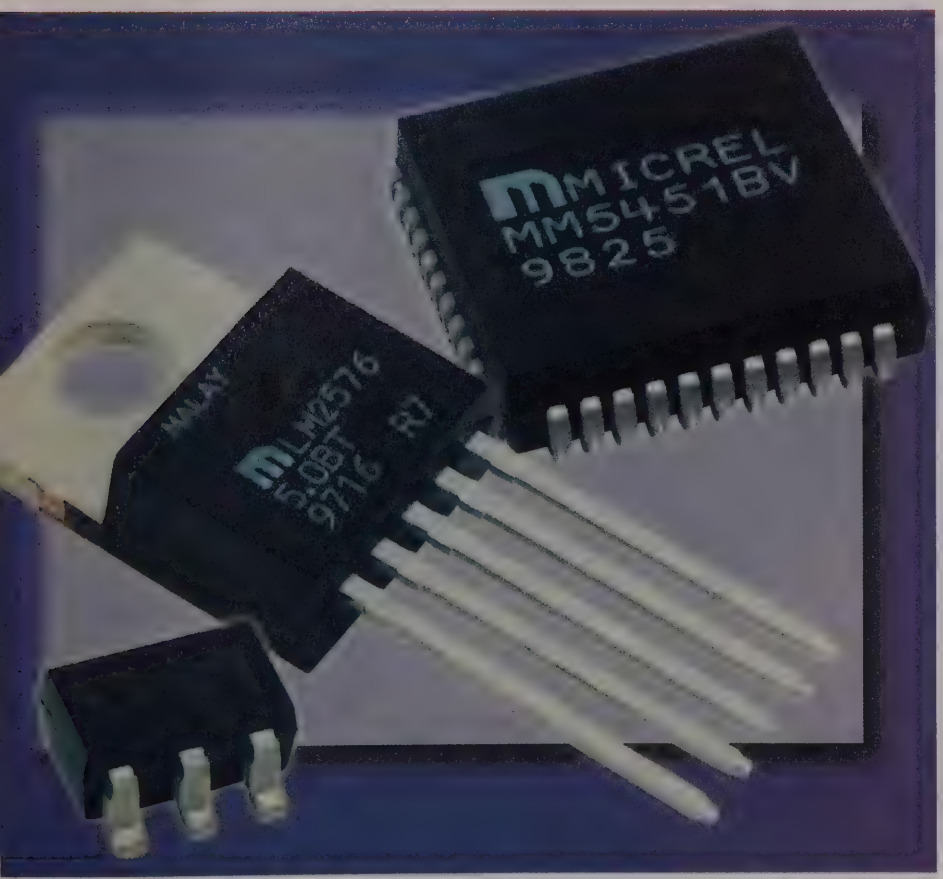
See page 270.

MGE

UPS SYSTEMS

MGE UPS Systems is one of the world's largest manufacturers of power protection equipment, delivering uninterruptible power supplies (UPSs) and large commercial inverters. These units provide protection for computers, workstations, networks, mainframes, plant floors, broadcasting equipment, and virtually every other enterprise requiring clean, constant electric power.

See pages 657 and 658.



MICREL SEMICONDUCTOR

Micrel Semiconductor designs, develops, and manufactures high-performance analog power integrated circuits. Micrel Semiconductor products are used in computers, peripherals, electric vehicles, ABS systems, industrial power tools, battery backup systems, cellular phones, and more. Products include low drop-out regulators, PCMCIA interface switches, MOSFET drivers, and PWM controllers.

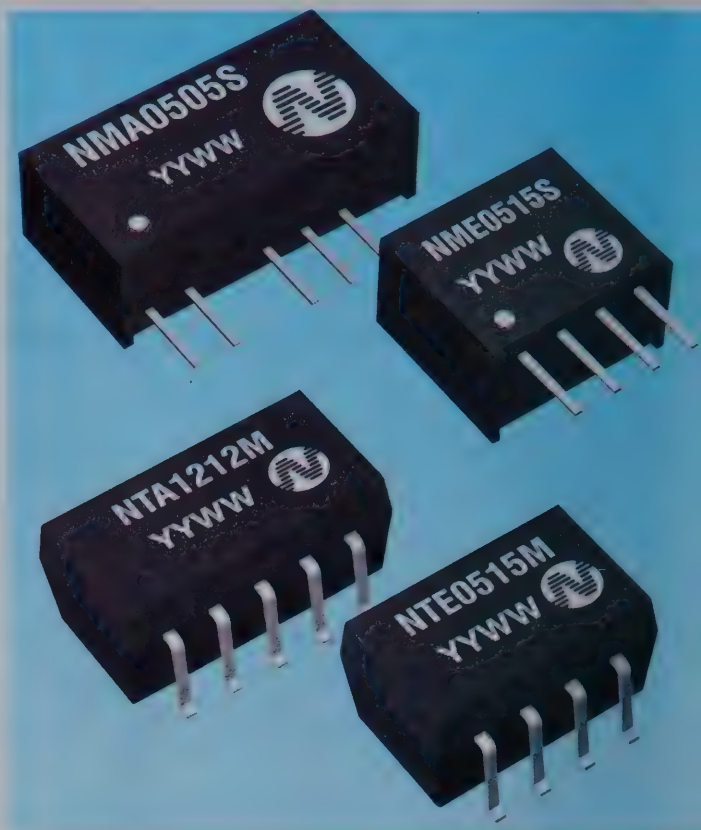
See pages 918–920.

NEWARK ELECTRONICS

newport components

Newport Components offers a comprehensive range of DC-to-DC converters. Products are designed for optimum thermal stability and high-power efficiency and are available with power ratings from 0.25W to 25W. Miniature surface mount converters are complemented by a series of thru-hole mount devices. Newport Components is a division of Newport Technology Group.

See page 631.



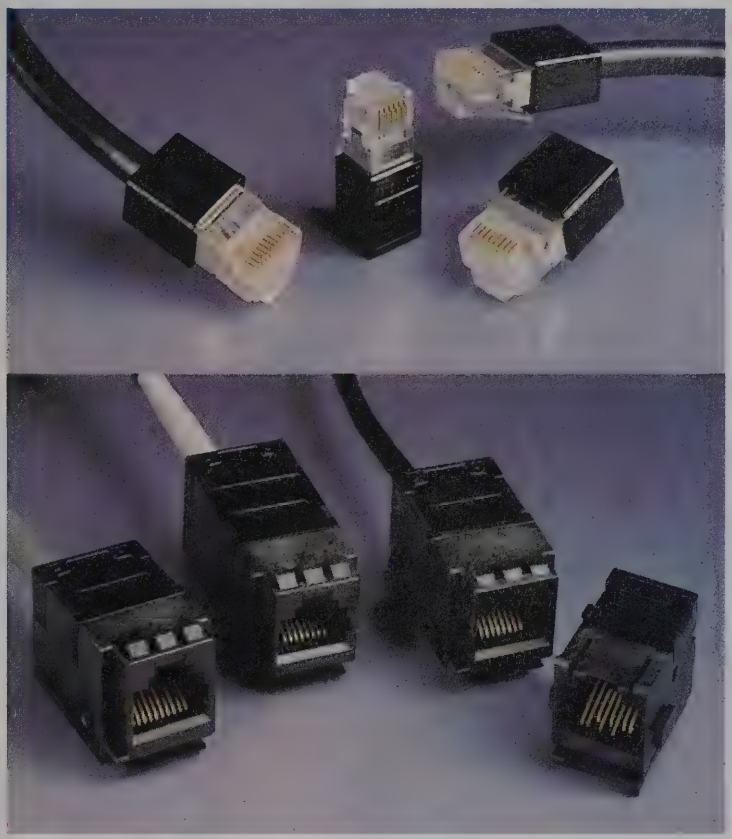
SEMIKRON

innovation + service

Semikron International is a leader in innovation in today's semiconductor industry. Products include thyristors, varistors, power chips, rectifiers, Semipack® fast diode modules, and SKiiP® (**S**EMI**K**RON **I**ntegrated **I**ntelligent **P**ower) and MiniSKiiP® modules. Original equipment manufacturers (OEMs), semiconductor module manufacturers, and system manufacturers use Semikron International products.

See pages 934 and 935.

Stewart Connector



Stewart Connector, an ISO-9001 certified manufacturer, is well-known for a tradition of design firsts, including pioneering the development of a fully-shielded modular jack. The company also introduced jacks with enhanced shields for single-row and double-row harmonica jack designs, Category 5 plugs, and low-profile space-saving connectors such as the MagJack single- and multiport line connectors with integrated magnetics.

See pages 337 and 1313.

SURE SEAL CONNECTIONS

Manufacturer of high quality environmental connectors & accessories

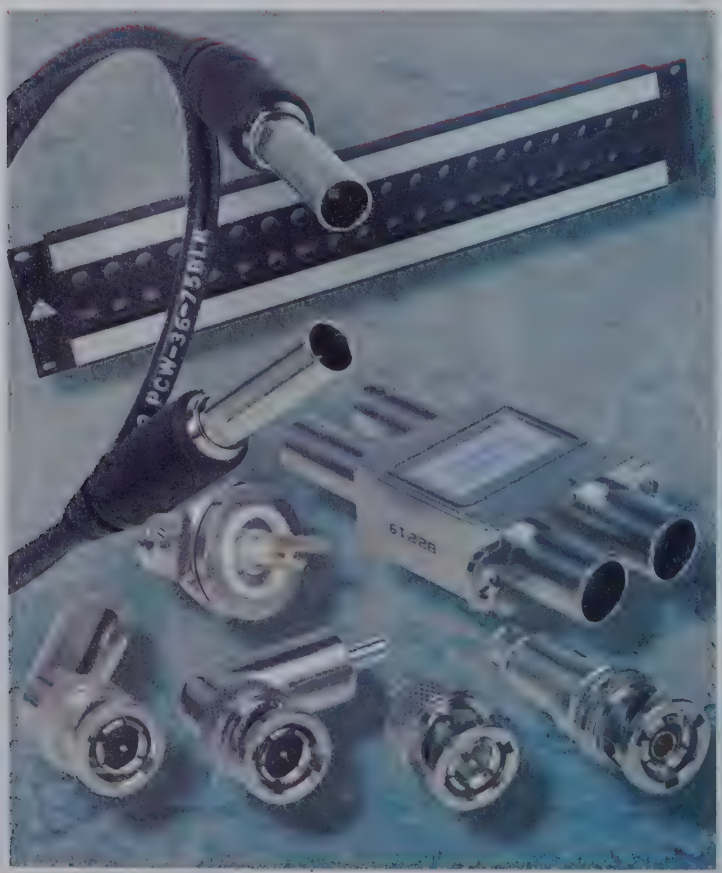
Each Sure Seal® connector has a simple one-piece molded body that mates with multiple resilient seals which are seamlessly integrated into the body. Connectors can withstand complete submersion in up to 3 feet of a 5% water/saline solution. They meet the requirements of IP67 and DIN400 50 and are used in a broad range of environmental applications.

See page 283.

TECH SPRAY™

Tech Spray is a leading producer of chemical cleaners and antistatic solutions, including solvent, static control, desoldering, swab, and lubricant products. The desoldering line includes two innovative braid products. One braid is based on Type R flux, and the other leaves an inert and nonconductive residue, eliminating the need for board rinsing.

See page 110.



TROMPETER® ELECTRONICS, INC.

Trompeter Electronics manufactures high-value wireline coaxial, triaxial, and twinaxial transmission line connectors, patch panels, and cable assemblies. Trompeter's complete line of 75-ohm BNC connectors supports the growing industry demand for higher frequencies. Products are primarily used in telecommunications, broadcasting, military, and aerospace applications.

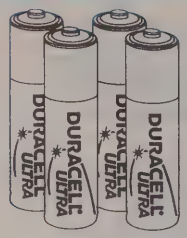
DURACELL® ULTRA BATTERIES



- Special Carbon Can-Coating Improves Conductivity Delivering Higher Power
- Additional Electrolyte Facilitates Current Flow to Ease Power Delivery
- Finer Graphite Increases Conductivity in the Cathode Improving Cell Efficiency
- New, Thinner Separator Material Increases Current Delivered to High-Drain Devices

High performance alkaline batteries designed to meet today's (and tomorrow's) most demanding high-drain devices. AA available in 8 pack or bulk; AAA available in 4 pack or bulk.

SEALED NICKEL CADMIUM RECHARGEABLE BATTERIES

Nickel cadmium cells have a normal voltage of 1.2V. Standard and Gemax™ cells have a temperature range of up to +50°C; Goldtop® cells are up to +70°C. Brief excursions to temperatures higher than specified may be tolerated. Cell life is decreased by heat from overcharging or ambient sources. Battery cells vent no acid or acid vapor, which eliminates corrosion of the terminals. All cells are sealed. Life in float applications is typically 8 to 10 years at 23°C. Sizes shown in tables below are maximum overall bare cell dimensions.

VALUMAX™ NICKEL CADMIUM CELLS

Standard construction nickel cadmium cells.

Stock No.	Type	Fig.	Case Size	Capacity	Height	Diameter	1-9	10-24	25-49	50-99

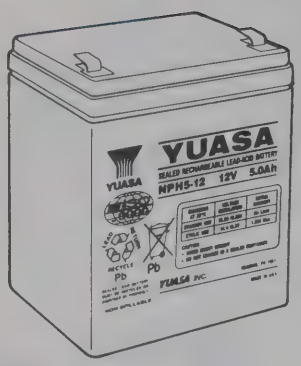
YUASA

RECHARGEABLE LEAD-ACID BATTERIES

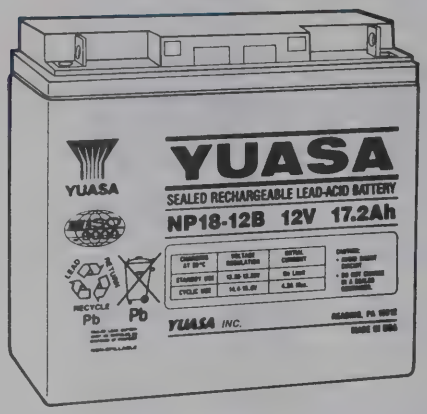
SEALED RECHARGEABLE LEAD-ACID BATTERIES

MADE IN USA

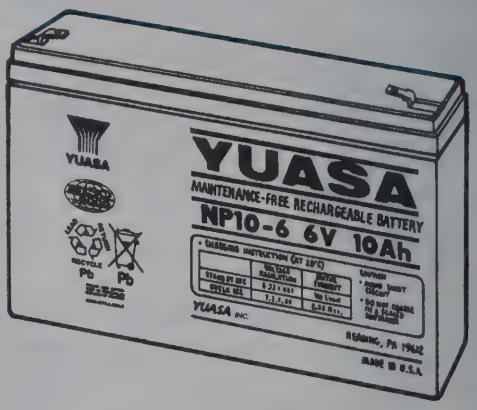
ISO 9000



NPH5-12



NP18-12B



NP10-6

NP Applications:

- UPS
- Security
- Electric Mobility
- Telecommunications
- Panels
- Emergency Lights
- Computers
- Medical
- Backup Power Applications

Features:

- Non-Spillable, Use in any Position
- Use in Float or Cyclic Applications
- Long Life, 5-Year Float Design Life
- UL94-V0 Flame-Retardant Case Available on Most Models

Yuasa Inc., a leader in backup energy, offers a complete line of rechargeable batteries for a wide variety of applications. Use as a supply of backup energy, or as a portable power source. The **NP series** can be stored, charged, or operated in any position without leakage. Qualified to non-spillable UN2800 standards. Standard housing is ABS resin. A flame-retardant version (to UL94-VO) is also available. *Contact your local Newark sales office for details.*

DYNASTY® SEALED, MAINTENANCE-FREE RECHARGEABLE BATTERIES

JOHNSON CONTROLS

Compact rechargeable batteries feature AGM mats in the **UPS** and **TEL Series** or gelled electrolyte in the **GC Series**. Maintenance-free. Operate, store or charge in any position. 500+ charge/discharge cycles. Self-discharge 2-3% per month. Protective self-sealing relief valves prevent excess cell pressure buildup. Not affected by memory or previous use history. Charged operating temperature: –76° to +140°F. Batteries rated at 77°F. Capacities slightly increase above 77°F and decrease below 77°F. **UPS Series** are ideal for lighting, security and supervisory backup power systems and portable equipment. **TEL Series** are designed for telecom applications. Low-profile, low-maintenance threaded terminals. 10-year life. FR = Flame Retardant.

POWERSCAN® BATTERY CHARGERS

Powerscan®

Universal dual voltage chargers for use with sealed lead-acid batteries. **M** and **CDM Series** have switchable "fast" or "float" charging. In "fast" mode, fully discharged batteries recharge in 12 to 16 hours. In "float" mode, charging takes up to 36 hours. Connection reversal annunciation. All models voltage regulated except **FX-6** and **FX-12**. Short-circuit and reverse polarity protection. Operating temperature: –4° to +122°F.

POWERSCAN® RECHARGEABLE BATTERY PACKS

Powerscan®

Self-contained packs provide power for radios, TVs, depth finders, boat lights, emergency lights, communications and test equipment. Operate by connecting appliance via standard automobile cigarette lighter appliance plug. Battery pack uses self-contained charger which plugs into standard wall outlet. Charging time for 12V pack: 16-20 hours. Operating temperature: –76° to +140°F. Includes carrying case and charger.

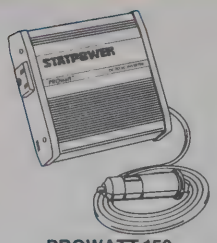
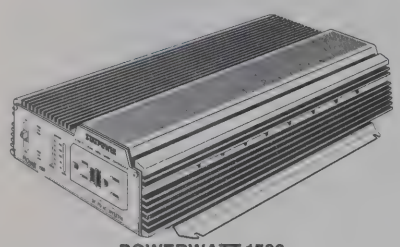
INVERTERS AND BATTERY CHARGERS



PROWATT 150



POWERWATT 1500

DC-TO-AC POWER INVERTERS

PROWATT® series power inverters plug in for instant portable AC power to run laptops, printers, or fax machines. Convert battery power to standard AC power. Provide extra-long battery running time without recharging. Inverters can be plugged into cigarette lighter or any 12-volt battery pack for portable AC power. Compatible with AC adapter/charger found on computers. Surge to power levels far beyond their continuous ratings for short periods of time. Ideal for running loads with high start-up requirements. Internal circuits protect equipment from spikes and voltage fluctuations. Automatically shut down if overloaded or overheated. *Order inverter accessory products separately on this page.*

PROSINE™ INVERTERS AND INVERTER/CHARGER

PROsine™ Inverters deliver true sine wave AC output; a clean, reliable electric power, often times better than grid power supplied by local electric companies. PROsine inverters include the following protection features: automatic overload, short circuit, over temp., reverse polarity fuses and AC backfeed and over/under voltage protection. PROsine 1000s and 1800s dimensions: 4.5H x 11.0W x 15.4″D. PROsine 2.5 dimensions: 5.5H x 15.0W x 20.0″D. Approvals: CE (230V models), CSA NRTL/C (120V models), UL458, UL1741 CSA 107.1, designed to meet KKK-A-1822D.

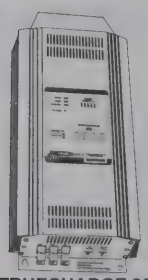
TRUECHARGE 10 CLI



TRUECHARGE 20

TRUECHARGE™ SERIES BATTERY CHARGERS

Truecharge™ series battery chargers provide a fast, accurate charge for any marine, industrial, or RV deep-cycle battery. Microprocessor-controlled to maintain correct charging voltage. Quick setup for different battery types and charging conditions. No line "buzz" common to some chargers. Built-in surge protectors keep the charger and the DC circuits safe from surges and spikes on the AC power line. **Type Truecharge 10HW** offers 10-amp continuous duty, multistage battery charging. Multistage charging (bulk charge, absorption charge, float charge) provides the fastest recharge times and properly delivers the correct current and voltage given the battery's condition. Features battery-type selector switch, dual battery charging, and battery status LED indicators. *Order* **Truecharge™ series** *accessory items below.* **Type Truecharge Temp S** temperature sensor automatically adjusts charger output according to the temperature of the battery electrolyte. **Types Truecharge 20 REM** and **Truecharge 40 REM** remote display panels feature LED voltage indicators and plug into "remote panel" jack on DC output side of **type Truecharge 20** and **type Truecharge 40** battery chargers.

CALCULATING WATTAGE TO DETERMINE INVERTER SIZE.

To determine the correct inverter first determine the wattage draw of the electrical product being operated. Often times the wattage draw is stamped on the back panel of the product. Otherwise calculate the wattage amount by multiplying volts by amps. Statpower has a variety of units, if you don't see what you need here; *contact your local Newark sales office.*

(30873) (ne30873)

WHAT IS A POWER INVERTER?

Inverters are electronic devices that convert battery power (12-volt DC) to standard electric power (115-volt AC). It allows you to run business and household electrical items when a conventional electrical source is not available. Statpower incorporates cutting edge technology to create an advanced line of inverters that are smaller, lighter and easier to use.

UPS INVERTERS WITH AUTO TRANSFER

APS series feature automatic switchover and charger. Automatically sense and switch AC output between AC power and DC battery power. Electronic overload shutdown and input polarity protection. Perfect for mobile lab needs where power source other than vehicle's batteries are used. Also ideal for use as a mobile power system or stationary UPS/Emergency power supply. A fully regulated battery charger is available; *contact your local Newark sales office.* Add additional batteries for virtually unlimited run times, *contact your local Newark sales office.* **APS series** can be used as a mobile battery power source. All models are peak power rated and frequency controlled.

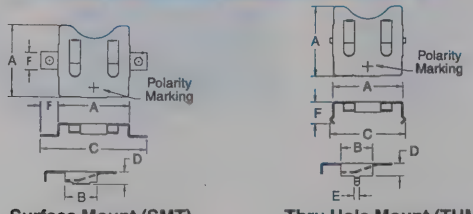
COIN CELL RETAINER CONTACTS



Surface Mount (SMT) Thru Hole Mount (THM)

3000 series contacts retain cell securely and withstand shock and vibration. Designed for quick and easy battery installation and replacement. Suitable for memory backup applications, soldering and reflow operations. Balanced and lightweight with stable thru mount legs. Solder tail design for joint strength. Polarity is clearly marked. Surface and thru hole mount retainer contacts are available for 12mm to 24mm lithium coin cell batteries.

2198

Corrosion-resistant holders with fully-insulated, stainless steel contacts recommended for shock or severe vibration environment. NI-cad, alkaline, mercury, carbon zinc or lithium cells held under tension to assure low contact resistance. Resin-impregnated, fiber-insulating washers are moisture proof.

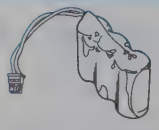
LAYFLAT PVC HEAT-SHRINK TUBING



Layflat PVC heat-shrink tubing is a thin-wall, low-cost material offering good electrical mechanical characteristics. When exposed to heat in excess of 275°F for a few seconds, the specially formulated polyvinyl chloride material will shrink rapidly and uniformly, conforming to the shape of the object to be covered. Available in diameters from 19mm to 72mm. Applications include: insulating and jacketing batteries, capacitors and similar objects; protective covering of precision machine parts and cutting tools; wire and cable identification; industrial equipment production, toys, sporting goods, electronics, medical and consumer products. A heat gun can be used for shrinking most applications. Shrink ratio: up to 50%. Dielectric strength (0.004) 2400 volts/mil. Operating temperature: 100°C to –20°C. Color: white. **Sold in spools of 100′.**

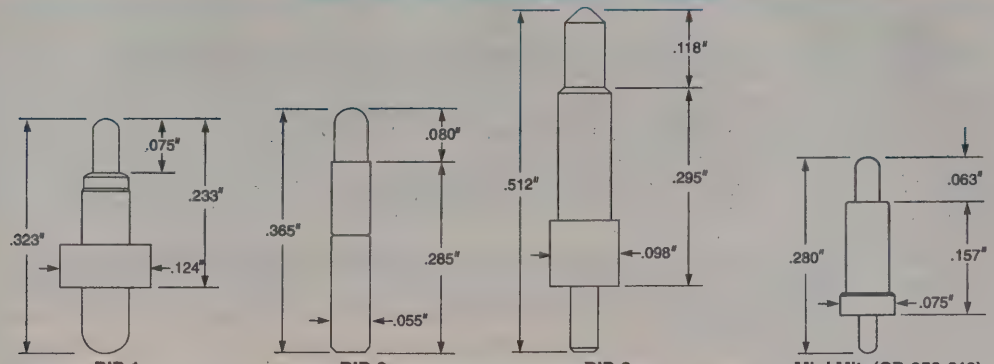
BATTERY CHARGER POGO® CONTACTS

BATTERY INTERCONNECT PROBES



BIP-1 BIP-2 BIP-3 Mini Mite(CP-059-013)

Spring-loaded interconnect probes for use in applications such as battery charger or electronic device applications, including camcorders, circuit board-to-board docking stations, cellular and cordless phones, 2-way radios, computer docking stations, chargers, ink-jet printers, notebook and laptop computers and AC/DC power supplies. Probes offer low resistance (average 16 milliohms) and better contact than nickel-plated strip contacts, are less susceptible to damage, can accommodate up to 0.025", and have significantly longer life than conventional interconnects. Plunger finish for all battery interconnect probes is gold-plated; barrel finish: (*) Brass, (+) Nickel Silver. Spring finish: (†) Silver-plated, (‡) Music wire. Electrical: static conditions; 5 amps DC maximum. Mini-Mite high current probe, **type CP-059-013**, plunger, barrel, and spring finish are all gold-plated. Electrical: static conditions; 10 amps.

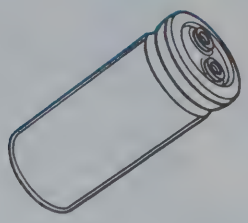
36DX SERIES POWERLYTIC® ALUMINUM ELECTROLYTIC CAPACITORS



Improved version of Sprague **36D series** with up to 50% more capacitance in a given case size. Designed for operating life in excess of ten years in standard applications. Outer plastic film insulation, low screw-insert terminals. Operating temperature: –40°C to +85°C. Pressure safety vent. Tolerance: 10 to 100WVDC: –10%, +75%; 200-450 WVDC: –10%, +50%. *Order terminal bushings separately on this page or contact your local Newark sales office.*

36D SERIES POWERLYTIC® ALUMINUM ELECTROLYTIC CAPACITORS

Used in power supply filters and other high-energy applications. High ripple current capability and excellent load life. Low ESR, low leakage current. Have a pressure relief vent in the case cover, outer-plastic insulation and low screw inserts. Operating temperature: –40°C to +85°C. Capacitance tolerance: 10 to 100WVDC is +75%, –10%; 200 to 450 WVDC is +50%, –10%. Equivalent series resistance at 25°C: 0.012 to 2.8 ohms maximum at 120Hz, depending on capacitance and voltage. Ripple current at 85°C: 0.53 - 19.87 amps at 120Hz, depending on capacitance and voltage. Load life capability: 100 hrs. at +85°C. Operational life in excess of ten years in normal circuit conditions. *Order terminal bushings separately on this page.*

TERMINAL BUSHINGS FOR POWER SUPPLY ELECTROLYTIC CAPACITORS

Converts low screw insert terminals to high screw insert terminals on **36D** and **36DX series** aluminum electrolytic capacitors. Aluminum construction. The additional 0.188″ (4.78) length on the terminals is often required for bus board applications. **Sold in multiples of 10.**

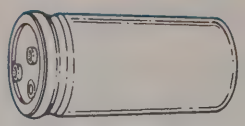
ALUMINUM ELECTROLYTIC CAPACITORS

36DE SERIES POWERLYTIC® ALUMINUM ELECTROLYTIC CAPACITORS



Computer designed, large, cylindrical case, low voltage aluminum capacitors. Feature a pressure relief vent in the case cover, outer plastic-film insulation and low screw inserts. Operating temperature: –40°C to +95°C. Equivalent series resistance at +25°C; 0.004 to 0.1415 ohms maximum at 120Hz; 0.0036 to 0.0646 ohms maximum at 20-40Hz depending on capacitance and voltage.

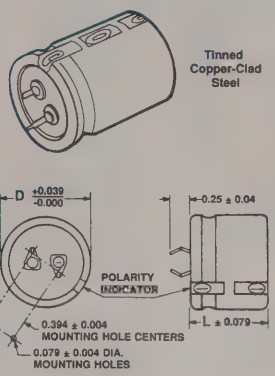
80D SERIES SNAP MOUNT ALUMINUM ELECTROLYTIC CAPACITORS



Snap-mount capacitors are suited for use as input and output filter capacitors in switching power supplies and other industrial/commercial applications. Snap-lock terminals lock into PC boards for economical solder assembly. High frequency characteristics and parametric stability thru 100kHz. Metal encased, with thermoplastic outer insulating sleeve end polymer seal. Operating temperature: –40°C to +85°C. Tolerance –10%, +30%. Life validation test: 2000 hours at +85°C.

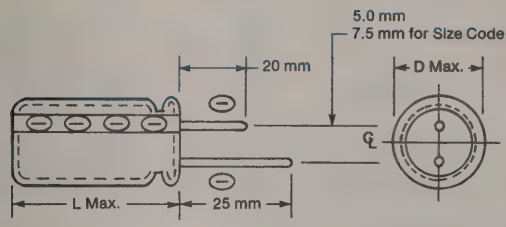
678D SERIES ALUMINUM ELECTROLYTIC CAPACITORS



678D series are ultra-low ESR miniature radial-leaded aluminum electrolytic capacitors that offer exceptional CV efficiency. High ripple current capability, stable performance and high reliability. Life validation test: 3000 hours at +105°C (Size code CC, CD, CG); 4000 hours at +105°C (Size code DG, DM, DS, EK, FV). PVC sleeve with resin seal. Terminal: 2 leads standard. Capacitance tolerance: ±20%. Operating temperature range: –55°C to +105°C.

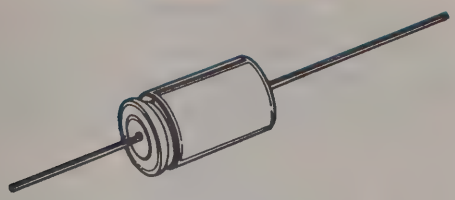
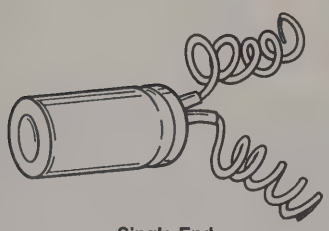
ALUMINUM ELECTROLYTIC CAPACITORS

TVA SERIES ATOM® ALUMINUM ELECTROLYTIC CAPACITORS



Double-End



Single-End

Standard tubular axial lead capacitors are ideal for many consumer electronics applications. Case is metal construction with thermoplastic outer sleeve. Ideal for speaker crossover networks. Capacitors rated at 100WVDC or less operate at –40° to +85°C; above 100 WVDC –20°C to +85°C. **Type TVA1720** is single-end, flexible 8″ leads. Operating temperature for 16V to 100V is –40°C to +85°C. Operating temperature for 150V to 600V is –20°C to +85°C.

TE SERIES ALUMINUM ELECTROLYTIC CAPACITORS

Exact replacement of **type 30D.** Metal-encased, plastic outer insulating sleeve. Axial lead. Operating temperature range: –40° to +105°C. Terminal connections are welded. Tolerance: 100V to 150WVDC: +50%, –10%, 6V to 50V: +75%, –10%.

53D SERIES POWERLYTIC® ALUMINUM ELECTROLYTIC CAPACITORS

Aluminum electrolytic capacitors recommended for new equipment designs. Replace **series 39D.** Feature tinned copper leads and maximum volumetric efficiency. Service life ten years or more in normal circuit applications. PVC sleeve. Operating temperature range: –40°C to +85°C. Capacitance tolerance:16 to 63WVDC, –10%, +75%; 200 and 400WVDC, –10%,+50%.

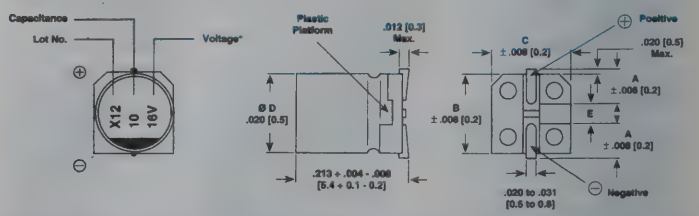
518D SERIES ALUMINUM ELECTROLYTIC CHIP CAPACITORS

SMD



518D series capacitors are ideal for surface mounting on high-density PC boards. Chip-type capacitors have 0.217″ (5.5mm) height and are applicable to automatic insertion machine using carrier tape. Operating temperature: –40°C to +85°C. Load life of 2000 hours at +85°C.

173D SERIES TANTALUM CAPACITORS

Solid tantalum capacitors are designed for auto, industrial and consumer electronic equipment. Made of precision-molded thermosetting flame-retardant epoxy resin. Supplied lead taped. Operating temperature: –55° to +85°C. Capacitance tolerance: ±10%. Leakage current: Type suffix **U**, 0.5µA; type suffix **V**, 0.7 to 1µA; type suffix **W**, 1.4 to 2µA; type suffix **X**, 2.4 to 5µA. Dissipation factor: (A+ 25°C) 6 through 20 WVDC capacitors, 4 to 6%; 25 through 50 WVDC capacitors, 3 to 4%.

94SM SERIES OS-CON® SURFACE MOUNT SOLID ALUMINUM CAPACITORS

94SM series OS-CON® organic semiconductor electrolyte capacitors can be soldered by reflow and mounted by carrier taping. Ideal for use in products such as switching power supplies, VCRs, and other products in which surface mount designs are necessary. **Sold in bags of 50, reels of 200, and 13″ reels.**

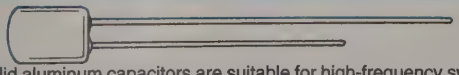
OS-CON® TYPE 94 SOLID ALUMINUM CAPACITORS



Type 94SA solid aluminum capacitors are suitable for high-frequency switching power supplies. **Type 94SC** capacitors can be used in bypass and filtering application and switching power supplies. **Type 94SL** capacitors are ideal for use in VCRs, car stereos, and other products in which a compact design is important.

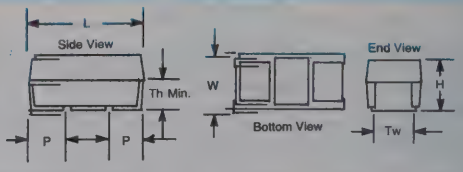
593D SERIES SOLID TANTALUM CHIP CAPACITORS

SMD



Commerical-grade solid tantalum chip capacitors are ideal for switch mode power supplies and converters. Low ESR, DF, DCL. High ripple current capability. Compatible with popular "high volume" automatic pick-and-place equipment. Operating temperature: –55°C to +85°C. Tolerance: ±10%. $T_{H(Min.)}$: 0.039″ (1.0). **Case code D sold in reels of 500; case code E sold in reels of 400.**

293D SERIES SOLID TANTALUM CHIP CAPACITORS

SMD

Surface mount molded cases compatible with all popular high-volume automatic pick-and-place equipment. Case size compatible with EIA 535BAAC and QC300801/US0001. Optical character recognition qualified. 60/40 SnPb compliant terminals. Operating temperature: –55°C to +85°C. Tolerance: ±10%. Additional sizes and values available; *contact your local Newark sales office.*

TANTALUM ELECTROLYTIC CAPACITORS

150D SERIES COMMERCIAL-GRADE TANTALUM ELECTROLYTIC CAPACITORS

Subminiature axial-lead tubular solid tantalum electrolyte capacitors. Plastic film insulating sleeve. ±10% tolerance. Hermetically sealed. Withstand test of 2000 hours at 85°C at rated DC voltage.

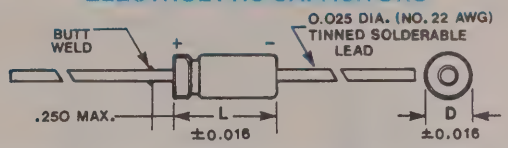
109D SERIES SINTERED-ANODE TANTALEX® TANTALUM ELECTROLYTIC CAPACITORS



109D series tantalum electrolytic capacitors fill the basic requirements for applications in the industrial, automotive, and telecommunications fields. Meet MIL-C-39006, Style CLR65 (E Seal). Tolerance: ±10%. Outer plastic film insulaton. Lead length: **suffix C2** = 1.50″; **suffix F2, K2,** and **T2** = 2.25″.

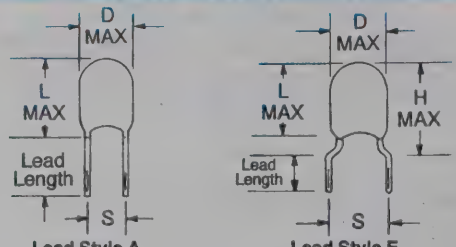
WITH SO MUCH IN STOCK, YOU HAVE THE COMPONENTS YOU NEED AT YOUR FINGERTIPS.

SERIES 199D TANTALUM ELECTROLYTIC CAPACITORS



Ideal for use in entertainment and commercial equipment. Flame-retardant, moisture-resistant epoxy encapsulant will not chip or crack under temperature extremes. Last two digits of type numbers indicate lead style/spacing code. Operating temperature: –55°C to +125°C. Other lead spacings available on special order; *contact your local Newark sales office for information.*

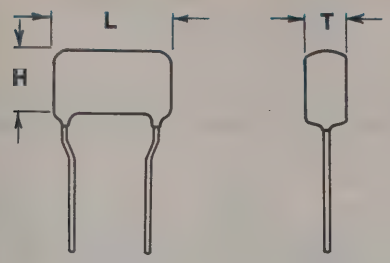
ORANGE DROP® FILM CAPACITORS

225P SERIES ORANGE DROP® METALIZED POLYESTER FILM CAPACITORS



Wound from polyester film and thin-gauge foil, these capacitors have a epoxy conformal coating to protect against moisture. Radial leads facilitate PC board insertion. Operating temperature: –55°C to +85°C. Tolerance: ±10%. Leads are 20 AWG tinned copper-clad steel. Lead diameter: 0.032″ (0.813).

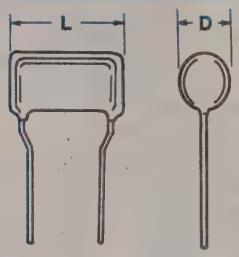
TYPE 715P ORANGE DROP® POLYPROPYLENE FILM CAPACITORS



High AC current-carrying polypropylene film capacitors feature extremely low dissipation factor. Ideal for applications such as snubbers, CRT deflection for RF generators, pulse-forming networks. Epoxy conformal coating protects against moisture. Temperature coefficient is negative and virtually linear at 180ppm/°C. Operating temperature: +25°C to +105°C. Leads are 20 AWG tinned copper-clad steel. Lead diameter: 0.032″ (0.81).

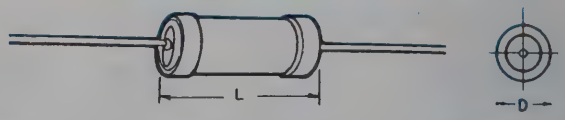
192P SERIES WRAP-AND-FILL METALIZED POLYESTER FILM/FOIL CAPACITORS



High-frequency performance capacitors wound with ultra-thin polyester film, dielectric and thin gauge foil; have rugged outer sleeve with epoxy endfill. Controlled dimensions allow automated installation on PC boards. Operating temperature: –55°C to +85°C. Capacitance tolerance: ±10%.

HYPERCON® HIGH CAPACITANCE CERAMIC DISC CAPACITORS

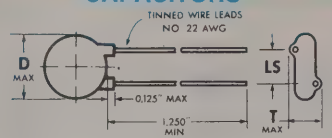

Fig. 1

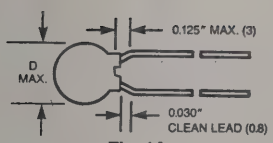

Fig. 1A

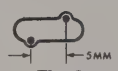

Fig. 2

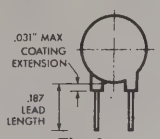

Fig. 3

HYPERCON® construction forms dielectric barrier layer at each electrode surface and connects layers through titanate substrate, using conductive property of material. Thin dielectric layer produces high capacitance, temperature stability. Industry standard EIA 198C Class IV, Y5R and Y5S.

125L SERIES

Continuous voltage rating 250AC, 2KV, DC. Dielectric strength 1500AC. Maximum service temperature: 105°C. Typical EIA characteristic: Z5U/Y5U. UL recognized, CSA certified, VDE approved.

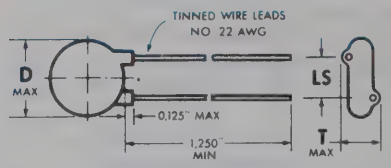
562C SERIES CERAMIC DISC CAPACITORS



General purpose capacitors designed for telephones and lighting ballasts to withstand transient voltage and energy surges in accord with FCC and IEEE standards. **Type 10TS** capacitors are temperature and voltage stabilized.

TYPE 1C, 2C, 3C MONOLYTHIC® CERAMIC CAPACITORS

Available in three EIA temperature characteristics: Z5U (for bypass and filtering), X7R (for bypass and decoupling in radio and TV receivers, computers and servo systems), and C0G (for precision timing circuits and RF oscillators). Tolerance: Z5U, ±20%; X7R, ±10%; C0G, ±5%. Operating temperature: Z5U, +10°C to +85°C; X7R and C0G, –55°C to +125°C. Voltage coded as last three numbers.

GENERAL-APPLICATION TYPE Z5U

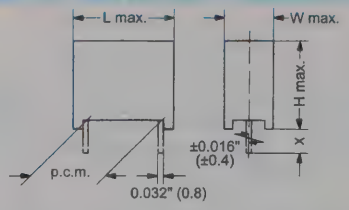
AC SUPPRESSION AND DC FILM CAPACITORS

F1710 POLYESTER FILM AC SUPPRESSION CAPACITORS



Class "Y" interference suppressor AC capacitors for across-the-line, antenna coupling, and line bypass components. 250VAC, 50/60Hz. Radial, tinned copper wire leads. Plastic can, epoxy resin sealed, flame-retardant coating, 20% tolerance. Approvals: VDE, SEV, DEMKO, SEMKO, NEMKO, SETI, UL recognized, IMQ, OVE.

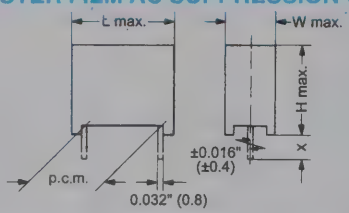
(7304) (de02769)

F1772 POLYESTER FILM AC SUPPRESSION CAPACITORS



Class "X" AC capacitors for across-the-line components. 250VAC, 50/60Hz. Plastic can epoxy resin sealed, flame-retardant coating. Radial, tinned copper wire leads. Tolerance: ≤0.1µF ±20%; UL recognized; CSA approved; also, VDE, DEMKO, SEMKO, NEMKO, SETI, IMQ, OVE, and all but **F1772522-2000** are SEV approved.

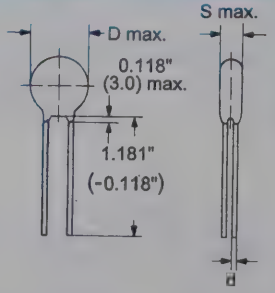
(7305) (de02770)

WKO CERAMIC DISC AC SUPPRESSION CAPACITORS



Class "Y" line-to-ground AC capacitors are epoxy resin dipped, insulated type, 20% tolerance. 400VAC, 50/60Hz. Operating temperature: –40° to +85°C. All are 0.295" (7.5mm) lead spacing except **WKO472MCPEJOK** is 0.492" (12.5mm). Lead diameter (d) = 0.024" (0.6) on all except **WKO472MCPEJOK**, which is 0.031" (0.8). Approvals: UL recognized, VDE, BSI, SEV, SEMKO, NEMKO, SETI, CSA certified.

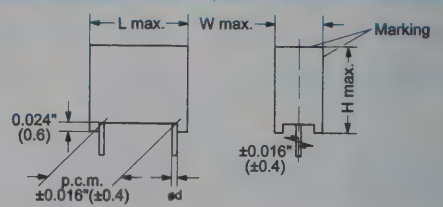
MKP1841 METALIZED POLYPROPYLENE FILM CAPACITORS



Radial lead capacitors for high voltage, high current, and high pulse operations. Internal series construction. Tinned wire leads. Operating temperature: –55°C to +85°C, with voltage derating 1.25% per °C. 5% tolerance. Voltages: 2000 for type suffix x **-204**; 1600 for **-134**; 630 for **-634**; and 250 for **-254**. Related document: IEC 384-17.

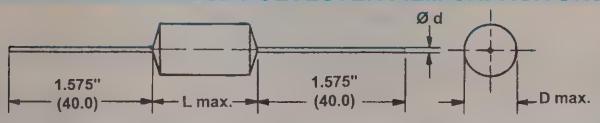
POLYESTER FILM CAPACITORS

MKT1813 METALIZED POLYESTER FILM CAPACITORS



Used in blocking, bypassing, filtering, timing, coupling and low pulse operations. Dielectric: polyester film. Plastic-wrapped, epoxy resin sealed. Tinned wire leads. Operating temperature: –55°C to +100°C. Capacitance tolerance: 5%.

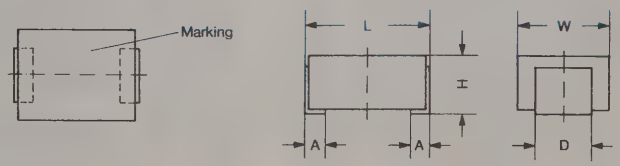
MKT1824 SURFACE MOUNT METALIZED POLYESTER FILM CAPACITORS

SMD



Used in high frequency coupling and decoupling for fast digital and analog ICs and interference suppression in low voltage applications. Dielectric: polyester film. Flame retardant molded black plastic case. Contacts: tinned nickel silver tape. Dimension "A" = 0.039±0.012″. Dimension "D" = 0.118±0.008″. Dimensions: 0.267W x 0.157H x 0.283″L. Operating temperature: –55°C to +100°C. Capacitance tolerance: 5%.

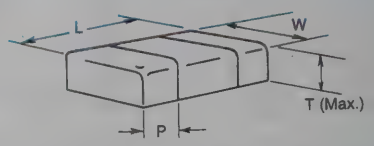
VJ0603 SERIES MONOLITHIC CERAMIC CHIP CAPACITORS

SMD



Proprietary "wet fabrication" process for manufacturing ceramic chip capacitors results in maximum capacitance per unit area. Standard EIA 0603 chip size. 50 V. Dimensions: 0.063 x 0.031 x 0.033" (1.60 x 0.80 x 0.84). Term. (P): 0.015" (0.38). Operating temperature: NPO and X7R types: –55° to +125°C; Z5U type: +10°C to +85°C. Meet MIL-C-56681 and MIL-STD-202. **Sold in reels of 4000.**

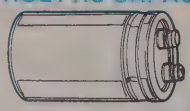
ALUMINUM ELECTROLYTIC CAPACITORS

CGS SERIES COMPUTER-GRADE CYLINDRICAL ALUMINUM ELECTROLYTIC CAPACITORS



CGS Series are plastic-sleeved units. Expected operating life in excess of 10 years. Pressure safety vent; 0.219″ (5.56) high terminal posts with 10-32 screws. Tolerance: 16-150WVDC, –10%, +75%; 200WVDC and up, –10%, +50%. Operating temperature: –40° to +85°C. *Mounting hardware available separately on page 44 or contact your local Newark sales office.*

CGR SERIES COMPUTER-GRADE CYLINDRICAL ALUMINUM ELECTROLYTIC CAPACITORS

Used as an output capacitor in high-frequency switching regulator power supplies. Ripple capability to 37.5A at 20kHz at +105°C. Operating temperature: –55°C to +85°C. Tolerance: –10% to +75% (7.5 to 50WVDC); –10% to +50% (75 and 100WVDC). Come with 0.219″ (5.56) high post terminals. *Mounting hardware available separately on page 44.*

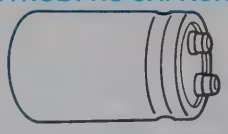
ALUMINUM ELECTROLYTIC CAPACITORS

CGH SERIES COMPUTER-GRADE ALUMINUM ELECTROLYTIC CAPACITORS



CGH series high capacitance, high ripple, high reliability capacitors suitable for most drive and ups applications. Operating temperature: –40°C to +85°C.

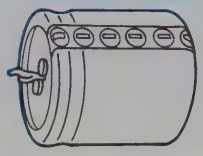
LPX SERIES RADIAL SNAP-IN ALUMINUM ELECTROLYTIC CAPACITORS



LPX series high capacitance, snap-in capacitors. Ideal as input filter in switch mode power supplies. Tolerance: ± 20% at +20°C 120 Hz. Operating temperature: –40° C to +85°C. The snap-in 10mm lead spacing allows for fast and easy mounting onto PC boards.

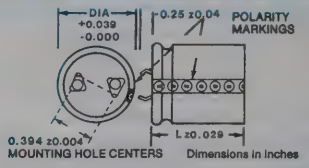
LP SERIES SNAP MOUNT ALUMINUM ELECTROLYTIC



Designed for quick snap-in insertion in PC board power supplies. Standard CV ratings are available in small diameter, low profile configurations that meet height and PC board space restrictions. Designed specifically for switching power supply applications. Can be used in other applications that require high CV in minimum size. Offers low ESR, high ripple capability over a temperature range of –40°C to +105°C. Tolerance: ± 20%.

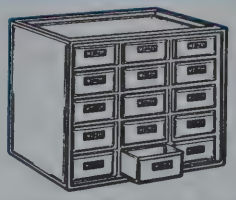
ALUMINUM ELECTROLYTIC CAPACITOR ASSORTMENTS



Type TCG151 contains 30 tubular computer-grade aluminum electrolytics 10µF to 10,000µF. Voltages from 10 to 450 WVDC. Housed in a Mallobin® 15-drawer stackable cabinet.

81F9280 Type TCG151 KIT. **Each** **187.34**

Type SK151 is a 135-pc. selection of radial lead aluminum electrolytic capacitors with voltages to 100WVDC. Values 1µF to 6800µF. Housed in a Mallobin® 15-drawer stackable cabinet.

60F2296 Type SK151-KIT. **Each** **86.75**

TC151A. Assorted **type TC** axial leaded aluminum electrolytics to 450WVDC. Values 20µF to 5000µF. Housed in a Mallobin® 15-drawer stackable cabinet.

81F9282 Type TC151A KIT. **Each** **124.20**

VPR151 Assortment of vertical-mount aluminum electrolytics. 100WVDC. Capacitances 130-5900µF. Housed in a Mallobin® 15-drawer stackable cabinet.

81F9279 Type VPR151 KIT. **Each** **155.25**

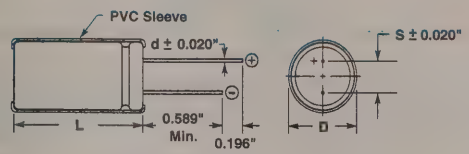
ALUMINUM ELECTROLYTIC CAPACITORS

SK/SKR SERIES ALUMINUM ELECTROLYTIC CAPACITORS



Miniaturized aluminum electrolytic single-ended capacitor. Offers maximum capacitance in low profile case sizes at operating voltages to 100WVDC. Low leakage, low ESR. Polarity encoded leads. Operating temperature: –40°C to +85°C. Tol.: ±20%.

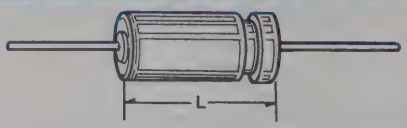
ALUMINUM AND TANTALUM CAPACITORS

SKA SERIES ALUMINUM ELECTROLYTIC CAPACITORS



SKA series is an axial leaded aluminum electrolytic capacitor protected by an insulating sleeve. Tolerance: ± 20%. Operating temperature: –40°C to +85°C.

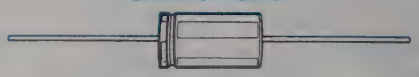
TC SERIES TUBULAR ALUMINUM ELECTROLYTIC CAPACITORS



Industrial-grade capacitors are single section, metal tubulars with plastic insulating sleeves. Etched cathode construction. Leads 1.25″ (31.75) min. Temperature range: –40°C to +85°C. Tolerance: 16-350 WVDC: –10%, +75%; 450 WVDC: –10%, +50%.

T491 SERIES TANTALUM SURFACE MOUNT CAPACITORS

Precision molded surface-mount chip capacitors. Suitable for filtering, bypassing, coupling, blocking, and RC timing circuit applications. Low DF. Low DC leakage. ± 10% tolerance. Operating temperature: –55°C to +125°C.

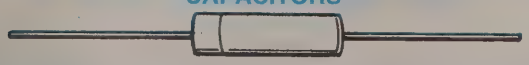
TANTALUM ELECTROLYTIC CAPACITORS

MTP SERIES WET SLUG TANTALUM ELECTROLYTIC CAPACITORS



Higher capacity-voltage per unit volume than conventional wet slug, foil or solid tantalum electrolytic capacitors. Sealed in silver case. Desirable for applications with thin film, micro-electronic circuits. Low and stable DCL characteristic. Operating temperature: –55°C to +85°C. Tolerance: ±20%.

TLS SERIES WET SLUG TANTALUM ELECTROLYTIC CAPACITORS

Commercial version of MIL-C-3965/4. Can be used as replacement for applications in field where cancelled mil-spec CL64/65 was used in original equipment. Low DCL. Mylar-insulated sleeves. Tolerance: ±10%.

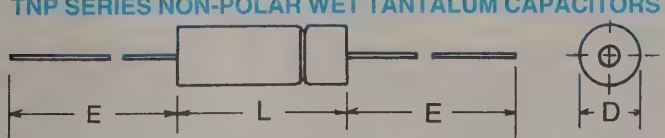
TNP SERIES NON-POLAR WET TANTALUM CAPACITORS



Hermetically sealed capacitors ideal for high ripple voltage bypass, phase splitting for low voltage motors, crossover networks. Miniature size. Non-polar operation. Low DCL, ESR. Mylar sleeve. Operating temperature: –55°C to +105°C. Tolerance: ±20%.

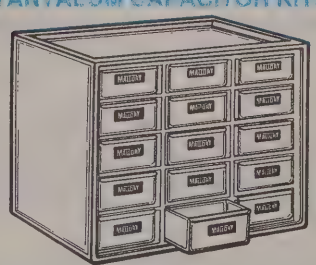
TANTALUM CAPACITOR KITS



Type TDC151A kit has a selection of popular value epoxy dipped, radial lead solid tantalum capacitors. Packaged in a Mallobin® stackable, 15 drawer plastic cabinet to keep parts neatly organized and fully identified. Contents include 5 each of the following: 10V-220µF; 15V-150µF; 20V-100µF; 25V-10.0µF; 22.0µF; 35V-2.2µF, 4.7µF, 47.0µF; 50V-.10µF, .33µF, .47µF, .68µF, 1.0µF, 10.0µF, and 22.0µF.

81F9276 Type TDC151A KIT. **Each** **165.60**

Type T491KIT kit has an assortment of surface mount tantalum chip capacitors. 14 ratings, 280 capacitors. Includes Mallobin® 15-drawer stackable cabinet. Contents include 20 each of the following: 6V-68.0µF; 10V-33.0µF; 16V-1.0µF; 10.0µF, 22.0µF, 33.0µF, 20V-22.0µF; 25V-.47µF, 4.7µF, 10.0µF, 15.0µF, 35V-1.0µF, 2.2µF, 4.7µF.

92F5677 Type T491KIT. **Each** **257.26**

81F9278 Type TAC151A. **Each** **199.52**

Type TAC151 kit has an assortment of 21 different molded, axial lead solid tantalum capacitors with values from 0.1µF to 47µF. Voltages from 10WVDC. Two Mallobin® 15-drawer stackable cabinets included.

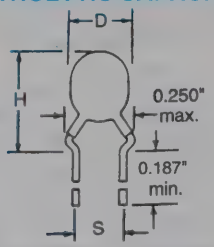
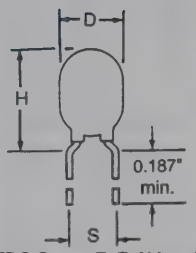
TANTALUM ELECTROLYTIC CAPACITORS

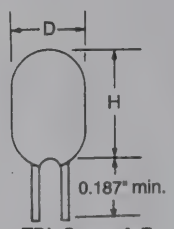
TDC AND TDL SERIES EPOXY-DIPPED SOLID TANTALUM ELECTROLYTIC CAPACITORS



TDC Cases E, F, G; W Lead



TDC Cases E, F; N Lead



TDL Cases A-E

TDC and **TDL series** capacitors, used for bypass, coupling, timing and filter circuits in consumer and industrial electronic equipment. Tolerance: **M** in type number = ±20%; **K** in type number = ±10%. Tough epoxy coating provides uniform lead spacing and protection against mechanical damage and moisture. Operating temperature: –55°C to +125°C (with proper derating). **TDC** offers high CV product in 4 mini-case sizes with radial stand-off lead spacing of 0.125″ and 0.250″. Replaces **196D, T350,** and **DNS series. TDL** in 6 low height case sizes with radial straight lead spacing of 0.100″ (2.54) and 0.200″ (5.08).

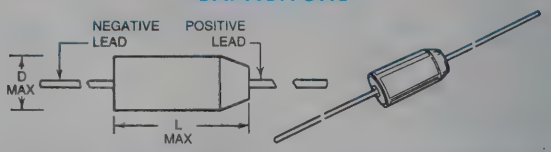
TAC SERIES MOLDED SOLID TANTALUM ELECTROLYTIC CAPACITORS



Same dry electrolyte sintered tantalum anode as in high reliability military type capacitors. Fully molded in high impact resistant epoxy cases specifically designed for automatic insertion devices. Cases tapered at positive end for polarity identification. Lead wires high purity nickel with solder coating. Operating temperature: –55°C to +125°C (with proper derating).

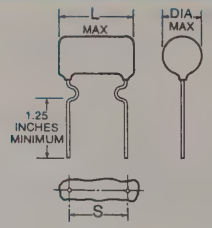
FILM CAPACITORS

TYPE PVC POLYPROPYLENE FILM/FOIL CAPACITORS



Conformally coated with flame-resistant epoxy. Outside foil identified by black stripe. Suitable for bypass and coupling applications. Tolerance: ±10%. Temperature range: –55°C to +125°C (100V-1kV); –55°C to +105°C (1600V).

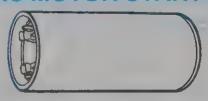
AC CAPACITORS AND BLEEDER RESISTORS

PSU SERIES AC MOTOR START CAPACITORS



Provide torque to start AC motors, other intermittent AC applications. Moisture, oil resistant molded plastic cases. With two quick disconnect terminals. Replacement motor start capacitors designed in accordance with EIA RS-463, Type 2. Mount using **PL** plastic end cap and **HB** metal snap-in bracket or **VR** clamp bracket *(order separately on this page)*. Operating freq. 50/60Hz. Power factor: 10%. Temp. range: –40°C to +65°C.

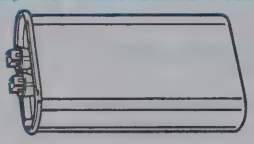
MPF/MSF SERIES AC METALIZED FILM CAPACITORS



MPF Series are motor run capacitors and are metalized polypropylene. **MSF series** are power supply capacitors and are metalized paper-polypropylene. **MPF** are 370 VAC and 440 VAC. **MSF** are 660 VAC. Operating temperature: –40°C to +70°C. 50 to 60 Hz. Tolerance: ±10%, except flat oval/660V, which is ±6%. UL recognized. *Order mounting hardware separately on this page.*

FILM/FOIL AND CERAMIC CAPACITORS

DMF SERIES METALLIZED POLYESTER FILM CAPACITORS

DMF series radial lead capacitors are suitable for general purpose applications such as bypass, decoupling and arc suppression. Non-polar, noninductively wound. Tinned, copper-clad steel leads. Flame-retardant epoxy powder coating. Operating temperature: -40°C to +100°C with voltage derating above 85°C. Lead length: 35mm. Lead dia.: 0.6±0.02mm.

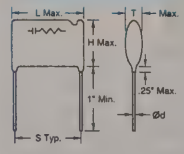
Q/QRL SERIES QUENCHARC® METALLIZED POLYESTER FILM CAPACITOR ARC SUPPRESSOR/SNUBBER NETWORKS



Quencharc® is a metallized polyester film capacitor in series with a carbon composition resistor. Applications include noise and arc suppression, RC snubber network, relay contact protection, controller/driver noise reduction, and EMI/RFI reduction. Operating temperature: –55°C to 85°C at full rated voltage. Capacitance tolerance: ±20%. Resistance tolerance: ±10%. Resistor power rating: 1/2 watts. Dielectric withstand voltage: 1.6 times the DC voltage rating. Dimension "L": 1.080″ (except **type 105M02QB47**, 1.450″). Lead diameter: 0.032″. **Type QRL** is UL recognized, CSA approved.

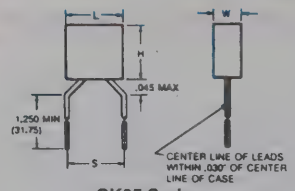
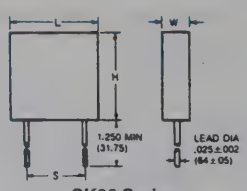
CK05 AND CK06 SERIES GENERAL PURPOSE MOLDED CERAMIC CAPACITORS



CK05 Series



CK06 Series

For general purpose bypass and coupling applications in telecommunications and instrumentation equipment. All tests per MIL-C-11015. Tolerance: type **suffix K** = ±10%, **suffix M** = ±20%. Dielectric strength: 250% of rated working voltage with 50mA maximum charging current. EIA X7R temperature characteristic. Operating temperature: –55°C to +125°C.

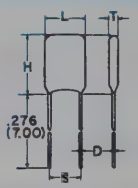
M SERIES MULTI-LAYER CERAMIC CAPACITORS



Stable-dipped ceramic capacitors are conformally coated. Uniform dielectric thickness, excellent electrode integrity, and electrode-to-termination continuity assured. Encapsulation consists of a multi-layer moisture and shock resistant coating. Meet UL Standard 94 flame test requirement. Tolerances: type number **suffix K** = ±10%; **suffix M** = ±20%. Type numbers whose 4th digit is "**G**" are EIA C0G (NP0) temperature characteristic; "**R**" are EIA X7R temperature characteristic; those with "**U**" are EIA Z5U temperature characteristic. The first three digits of type number denotes the case code dimensions (see table).

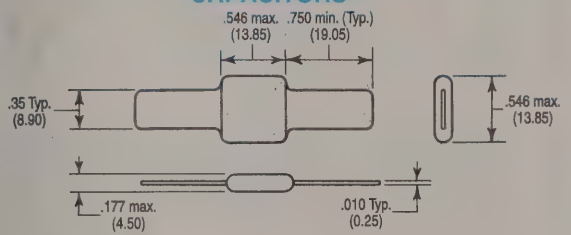
MHP SERIES HIGH FREQUENCY POWER CERAMIC CAPACITORS

SMD



Designed specifically for high voltage and high RF current applications, these ceramic capacitors are glass-encapsulated for protection against corona, contaminants and humidity. Wide, fine silver terminations brazed to monolithic element for minimum inductance and high RF current (12A rms) rating. Operating temperature: -55°C to +125°C. Tolerance: ±5%.

87F3690 Type SMTCER KIT. **Each**..... **207.39**
(7218) (ne08279)

SURFACE MOUNT CERAMIC CHIP CAPACITORS

Surface mount capacitors in C0G(NPO), X7R, and Z5U dielectric formulations. Standard EIA case sizes: 0805, 1206, 1210. Feature Tin-plated nickel barrier solder terminations. **Sold individually or in reels of 4000. * indicates 2,500 pieces for reels.**

100 VOLTS, ±5% TOLERANCE

COG(NPO) offer lower dielectric loss, stable electrical characteristics in precision applications. Temperature range –55°C to +125°C.

MONOLITHIC CERAMIC CAPACITOR ASSORTMENT

Contains 30 different monolithic ceramic capacitors. Values from 100pF to 1µF. Voltages to 200WVDC. Capacity tolerances: ±5%, ±10% and ±20%. Housed in a Mallobin® 15-drawer cabinet. Cabinet size: 7.500H x 9.125W x 6.500″D.

81F9283 Type MONO 151A KIT. **Each**..... **191.48**

PIEZOELECTRIC INDICATORS

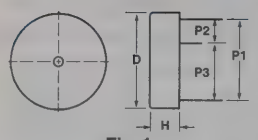

Fig. 1

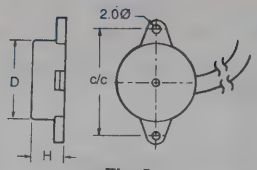

Fig. 2

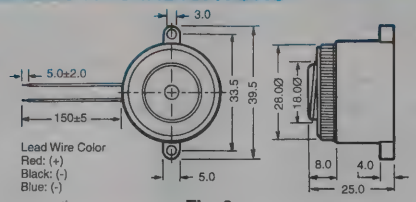

Fig. 3

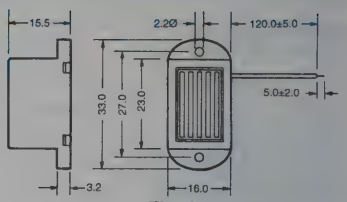

Fig. 4

Indicators have internal drive circuitry built in and require only DC source voltage for operation. Feature low current consumption and high sound output. Have extremely clear and penetrating sound. Small and lightweight. No EMI or RFI. Applications include computer, office and communications equipment, home appliances, alarms, and vehicles. Types **PK-21A31P, PF-21A31P,** and **PL-20A35EW** are sealed units.

BLACK MOLDED PLASTIC CASE
6-32 x 1/4 SCREWS
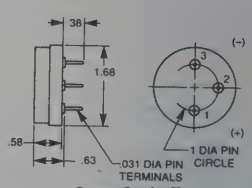
TERMINALS PARALLEL TO LOCKING FLATS WITHIN ± 15°
* .03 PROJECTION IS NOT ON 4500 Hz MODELS

Case Style D



Case Style F

Signals produce an audible tone when voltage from 1 to 250V is applied (depending on model). A piezoelectric transducer, operating substantially at resonance in a solid-state oscillator, converts electrical power to sound. Can be powered by many electrical sources, ranging from single-cell battery to industrial power lines. Because of low power requirements, they can be turned on or off with a transistor, SCR, or integrated circuit. No mechanical wear. Salt spray resistant. Operating temperature: –30°C to +65°C. Some units sound at voltages lower than minimum specified. Continuous tone.

SONALERT CROSSWALK AUDIBLE SIGNAL DEVICES

Type VSB110-1 features a cuckoo sound for North-South crossings, and repeats approximately every 1.5 seconds. **Type VSB110-2** features a chirp sound for East-West crossings, and repeats approximately every 1 second. Rated voltage: 110/120VAC @ 60Hz. Current: 30mA max. @ 120VAC. Operating and storage temperature: –40°C to 85°C. Black molded plastic case covered with 0.015" thick PVC plastic sleeve.

MULTI-TONE SONALERTS®

Type SC616WY tone patterns are pulsate-high-frequency, pulsate-low-frequency, and warble. **Type SC616WXY** has two additional tones, continuous high and low frequency. Operating modes determined by connection of two control wires. Both employ solid state circuitry. Listed tone frequency is ±300Hz.

Stock No.	Type	Voltage Min.	Voltage Max.	Current @ Min. V	Current @ Max. V	Tone Frequency High	Tone Frequency Low	1-9	10-24

TANTALUM AND CERAMIC CHIP CAPACITOR ENGINEERING KITS

SMD

Surface mount chip capacitor engineering kits meet design needs. These kits contain 20 pieces of each value listed. Carrier tape mounted. Tapes are clearly labeled with Kemet part number, human readable and bar coded. All kits include a catalog with outline drawings, dimensions, marking format, recommended mounting pad dimensions, and ordering information.

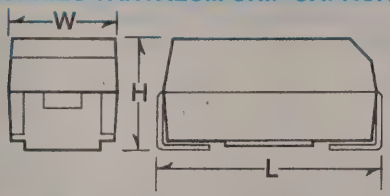
SURFACE MOUNT CAPACITORS

T491 SERIES TANTALUM CHIP CAPACITORS

SMD



T491 series are industrial-grade surface mount molded tantalum chip capacitors. Feature the anode permanently attached to the solder-coated lead frame. Suitable for filtering, bypassing, coupling, blocking, and RC timing circuit applications. Capacitance tolerance: ±10%. Packaged in 8mm and 12mm plastic tape on 7″ (177.80) reels in accordance with EIA RS-481A. Case codes A & B are packaged in 8mm tape on a 7″ reel of 2000. Case codes C, D, and X are packaged in 12mm tape on a 7″ reel of 500. Case sizes listed are per EIA/IECQ code. **Also available in tape and reel quantities. Minimums may apply.**

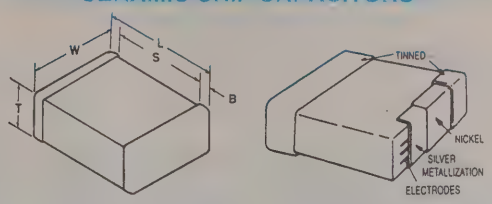
CERAMIC CHIP CAPACITORS

SMD



Feature a unique barrier layer of nickel in end metalization. Available with COG (NPO), X7R, Z5U and Y5V temperature characteristics and a variety of tolerances. 0603, 0805, 1206, 1210, 1812, 1825, and 2225 case sizes. **Sold individually or in full reel quantities.** Additional types not listed are available; *contact your local Newark sales office.* **Minimums apply.**

T322 SERIES MOLDED SOLID TANTALUM ELECTROLYTIC CAPACITORS

T322 series offers a complete line of extended range molded solid tantalum capacitors designed for high-speed automatic-insertion applications. Offers an extremely high capacitance-to-volume ratio while maintaining excellent performance characteristics. Low impedance at high frequencies makes this especially suitable for decoupling required by high-speed computers. Tolerance: ±10%. Operating temperature:-55°C to +85°C.

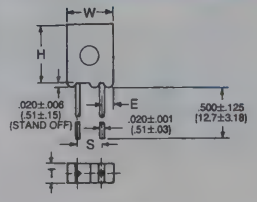
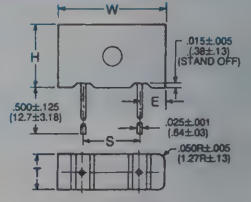
T330 SERIES MOLDED TANTALUM ELECTROLYTIC CAPACITORS



A Case



C Case

T330 series polar-type, radial-lead rectangular precision-molded tantalum (PMT) capacitors are primarily designed for applications that demand full use of the premium space available in printed circuitry and high density packaging. **T330 series** capacitors are highly reliable and exhibit performance characteristics typical of military test standards. They feature exceptionally low DC leakage and dissipation factor characteristics. They are ideal for bypass, coupling, and timing applications in computers, military ordinance, industrial, entertainment, and consumer electronic equipment. Tolerance: ±10%.

Case Size	H	W	T	E	S

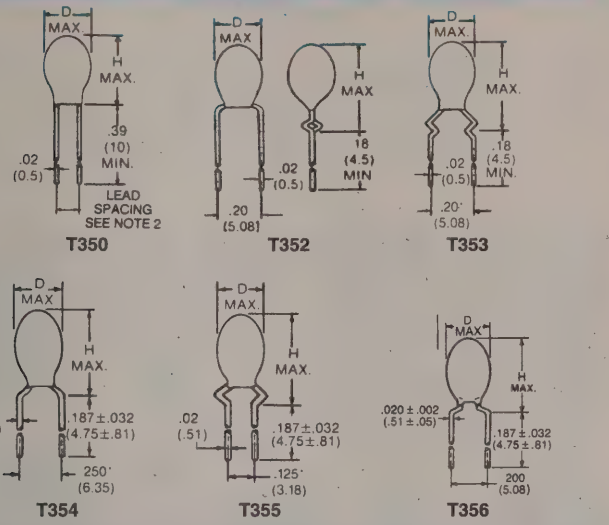
TANTALUM ELECTROLYTIC CAPACITORS

T35X SERIES TANTALUM ELECTROLYTIC CAPACITORS



T350, T353, T354, T355 and **T356 series** are miniature, dipped, solid tantalum capacitors. They provide compactness plus low leakage and low DF performance characteristics for filtering, bypassing, coupling, blocking, and RC timing circuit applications. Self-insulating cases are resistant to shock and vibration. Low DCL, ESR, and impedance. Excellent temperature stability. Operating temperature: -55°C to +125°C. Tolerance: ±10%. Additional types available; *contact your local Newark sales office.*

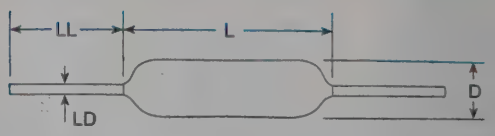
C4XX SERIES CONFORMALLY COATED/CERAMIC CAPACITORS



Axial line maximum range capacitors in three dielectrics—COG ultra-stable; X7R and Z5U general purpose. Encapsulated in moisture- and shock-resistant epoxy conformal coating that meets flame requirements of UL94V-0. Type numbers with 9th digit **K** are ±10% tolerance; **M** are ±20% tolerance. Popular values available on tape and reel.

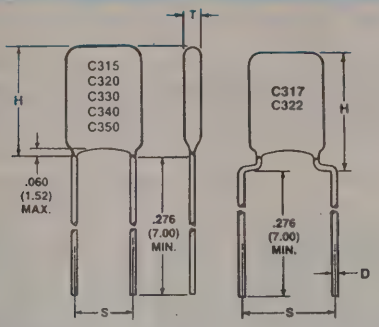
CONFORMALLY COATED CERAMIC CAPACITORS

C3XX SERIES CERAMIC DIPPED RADIAL CAPACITORS



Conformal-coated capacitors in three dielectrics: C0G (NP0) ultra-stable (**G** in type number), X7R stable (**R** in type number), and Z5U general purpose (**U** in type number). Meets flame requirements of UL94V-0. Tolerances are as follows: **J** in the 9th digit, ±5%; **K**, ±10%; **M**, ±20%; **Z** –20, +80%. Operating temperature: –55°C to +85°C. Additional capacitance values available. *Contact your local Newark sales office.*

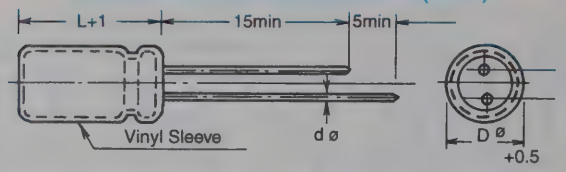
ALUMINUM ELECTROLYTIC CAPACITORS

GENERAL-PURPOSE RADIAL LEAD ALUMINUM ELECTROLYTIC CAPACITORS (85°C)



General-purpose aluminum electrolytic capacitors suitable for many consumer and industrial electronics applications. Operating temperature: –40°C to +85°C. Capacitance tolerance: ±20%. Lead diameter is 0.5mm for 5-8mm dia. capacitors, 0.6mm for 10-13mm dia. capacitors, and 0.8mm for 16mm dia. capacitors. Load life: 2000 hours @ 85°C.

GENERAL-PURPOSE RADIAL LEAD ALUMINUM ELECTROLYTIC CAPACITORS (105°C)

High-temperature aluminum electrolytic capacitors suitable for many consumer and industrial electronics applications. Operating temperature: –40°C to +105°C. Tolerance: ±20%. Lead diameter: 0.5mm for 5-6mm dia. capacitors, 0.6mm for 8-13mm dia. capacitors, and 0.8mm for 16-18mm dia. capacitors. Load life: 1000 hrs. @ 105°C.

CAPACITOR ASSORTMENT

GENERAL-PURPOSE CAPACITOR KITS

Capacitor kits come fully assembled with lid label showing type, capacitance and voltage range. Tolerance: ±20%. If a quantity in the Qty. per Value colum is not shown, they vary from 3 to 30 pieces. *Contact your local Newark sales office for exact value ranges.*

CAPACITOR TYPES IN KIT

Type 1–Aluminum electrolytic-axial Lead	Type 3–Ceramic disc	Type 5–Polyester film
Type2–Aluminum electrolytic-radial lead	Type 4–Metalized film	Type 6–Tantalum electrolytic-radial lead

Stock No.	Type	Case Style	Cap. Type	Capacitance Range	WVDC Range	No. of Values	Qty. per Value	Kit Quantity	Each

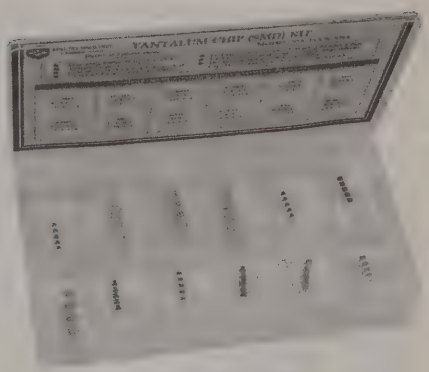
Case Style A

ALUMINUM ELECTROLYTIC CAPACITOR ASSORTMENTS

Aluminum electrolytic capacitor kits come fully assembled with lid label showing type, capacitance and voltage range. Kit includes radial-lead capacitors in reduced sizes: miniature, ±10% tolerance (1), super miniature, ±20% tolerance (2) and super miniature, ±20% tolerance, with very low leakage current (0.1CV and 0.002CV)(3). PVC-insulated sleeving, tinned copper-ply wire leads. Operating temperature: –40°C to +85°C. *Contact your local Newark sales office for exact value ranges.*

Stock No.	Type	Case Style	Cap. Size	Capacitance Range	WVDC Range	No. of Values	Qty. per Value	Kit Quantity	Each
46N7791	AECK-4110	A	1	0.1µF to 100µF	10V to 50V	27	10	270	
			2,3	1.0µF to 4.7µF	16V to 50V	8	10	80	**149.99**
95N3719	AECK-4110A	D	1	10V to 50V	10V to 50V	12	10	120	**72.40**

(7275) (de01855)



Case Style D

TANTALUM ELECTROLYTIC CAPACITOR ASSORTMENTS

Tantalum electrolytic capacitor kits come fully assembled with lid label showing type, capacitance and voltage range. Low leakage current limited to 0.007CV/0.005µA. Humidity proof, resistant to heat shocks and flame retardant. Pin spacing: 0.098". *Contact your local Newark sales office for exact value ranges.*

Stock No.	Type	Case Style	Capacitance Range	WVDC Range	No. of Values	Qty. per Value	Kit Quantity	Each
95N3714	SAC-1512	D	0.1µF to 47µF	16V to 35V	12	5	60	**99.95**

44N6424	SAC-3030	A	0.1µF to 47µF	10V to 35V	27	10	270	**403.60**

(7276) (de01856)

SMD

Case Style C

SURFACE MOUNT CAPACITOR KITS

Capacitor kits comes fully assembled with lid label showing type, capacitance and voltage range. Ultra-small sizes. High soldering heat resistance. Excellent reliability. Operating temperature: –55°C to +125°C. Ceramic chip kits have NPO, X7R and Z5U temperature dielectrics. **Type SAC-5410-8A** is EIA size 0805. **Type SAC-5410-12A** is EIA size 1206. Tolerance: ±5% (NPO); ±10% (X7R); +80%, –20% (Z5U). Dielectric withstanding voltage: 100V. Tantalum electrolytic capacitor kits have tolerance of ±20%. *Contact your local Newark sales office for exact value ranges.*

Stock No.	Type	Case Style	Capacitor Type	WVDC Range	No. of Values	Qty. per Value	Kit. Qty.	Each

(7380) (ne02960)

CERAMIC CHIP CAPACITOR ASSORTMENTS

Kits are fully assembled with lid lable showing type, capacitance and voltage range. **Type SAC5410-12** is EIA size 1206; **type SAC5410-8** is EIA size 0805. Operating temperature: –55°C to +125°C (NPO and X7R); –10°C to 85°C (Z5U). NPO, X7R, and Z5U temperature dielectrics. Working voltage: 50V. Dielectric withstanding voltage: 100V. *Contact your local Newark sales office for exact value ranges.*

Stock No.	Type	Case Style	EIA Size	Capacitance Range	No. of Values	Qty. per Value	Kit Quantity	Each
46N7716	SAC-5410-8	C	0805	10pF to 0.1µF	30	10	300	**199.99**
46N7717	SAC-5410-12	C	1206	10pF to 0.1µF	30	10	300	**199.99**

SMD

Combination Kit

COMBINATION RESISTOR AND CAPACITOR KIT

This 756-piece general kit is ideal for R & D labs, schools, and maintenance needs. Kit contains 630 carbon film resistors ranging from 0.5 to 4.7MΩ (42 each in ⅛W, ¼W, ½W), 5% tolerance and 126 capacitors in 42 values. Kit has 3 of each type: polyester film, metallized film, ceramic, radial and axial lead tantalum electrolytic capacitors. *Contact your local Newark sales office for exact value ranges.*

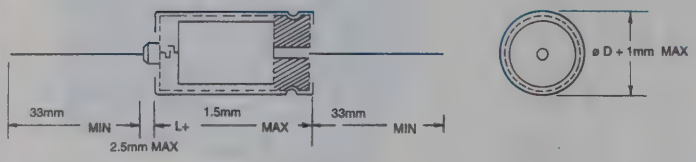
AXIAL ALUMINUM ELECTROLYTIC CAPACITORS

HIGH-TEMPERATURE AXIAL LEAD ALUMINUM ELECTROLYTIC CAPACITORS



General-purpose aluminum electrolytic capacitors suitable for high-temperature industrial equipment applications. Operating temperature: –40°C to +105°C. Capacitance tolerance: ±20%. Lead dia. 0.6mm for 5-13mm dia. capacitors, 0.8mm for 16-25mm dia. capacitors.

GENERAL-PURPOSE AXIAL LEAD ALUMINUM ELECTROLYTIC CAPACITORS

General-purpose aluminum electrolytic capacitors offer very high performance and compact size. Operating temperature: –40°C to +85°C. Capacitance tolerance: ±20%. Lead dia. 0.6mm for 5-13mm dia. capacitors, 0.8mm for 16-25mm dia. capacitors.

Electronic Terms and Measurements

Resistance
Opposition to current flow. Basic unit is the ohm (Ω).

1 kilohm – kΩ	1,000 or $1x10^3$ ohms
1 Megohm – MΩ	1,000,000 or $1x10^6$ ohms

Voltage
Electromotive force. Basic unit is the volt (V).

1 millivolt – mV	1/1,000 or $1x10^{-3}$ volt
1 microvolt – µV	1/1,000,000 or $1x10^{-6}$ volts

Current
Movement of electricity. Basic unit is the ampere (A).

1 milliampere – mA	1/1,000 or $1x10^{-3}$ ampere
1 microampere – µA	1/1,000,000 or $1x10^{-6}$ ampere

Frequency
Number of cycles per second. Basic unit is the hertz (Hz).

1 kilohertz – kHz	1,000 or $1x10^3$ hertz
1 Megahertz – MHz	1,000,000 or $1x10^6$ hertz
1 Gigahertz – GHz	1,000,000,000 or $1x10^9$ hertz

Time
Basic unit is the second (s).

1 millisecond – ms	1/1,000 or $1x10^{-3}$ second
1 microsecond – µs	1/1,000,000 or $1x10^{-6}$ second
1 nanosecond – ns	1/1,000,000,000 or $1x10^{-9}$ second

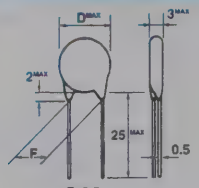
CERAMIC DISC CAPACITORS

CLASS I TEMPERATURE COMPENSATION CAPACITORS



Class I, NPO ceramic disc capacitors feature linear temperature coefficent of capacitance, high stability, and low loss at wide range of frequency. Insulation resistance: 10,000 MΩ min. Test voltage: 3X rated voltage. Operating temperature :-25°C to +85°C. **Sold in multiples of 10.**

HIGH-VOLTAGE CERAMIC DISC CAPACITORS

Capacitors are rated 1000WVDC. Test voltage: 2.5X rated voltage. Insulation resistance: 10,000MΩ or 200MΩμF, whichever is smaller. **Sold in multiples of 10.**

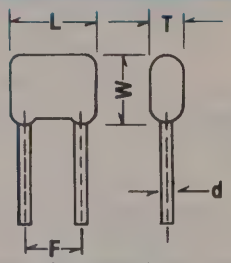
NEW

MULTILAYER CERAMIC CAPACITORS

RADIAL LEAD MULTILAYER CERAMIC CAPACITORS



Compact capacitors ideal for use where space is at a premium. Internal electrodes are resin sealed for reliabilty. Ceramic properties make these capacitors suitable for high-frequency applications. Epoxy powder coating resists solder build-up, solvents, and humidity. Nonpolar. Lead dia.(d): 0.020″ (0.508). **Sold in multiples of 25.**

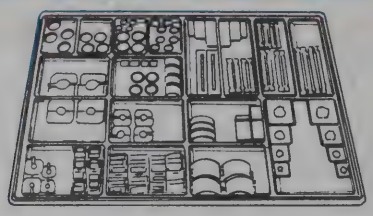
EMI SUPPRESSION ENGINEERING DESIGN KIT

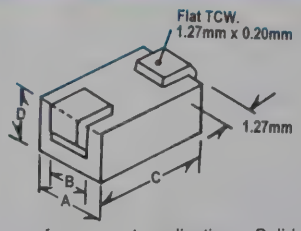


Kit is designed to allow engineers and laboratories to select the right ferrite. Ideally suited for design work, prototyping, and parts testing. Kit contains 90 parts in 35 different sizes.

50N673 Type SPC5307 Engineering Kit. **Each** **399.99**
(35673) (ne35673)

SURFACE MOUNT FERRITE BEAD INDUCTORS

SMD



Chip beads are ideal for surface mount applications. Solid, flat, oxygen-free tinned copper conductor. **Sold in reels of 500.**

SPLIT SLEEVE EMI SUPPRESSION CORES WITH PLASTIC CASE

Suppression cores for round cables attenuate any form of EMI emission. Nylon case for easy assembly. Ideal for use in equipment where retrofit and test are a necessity. Impedance values based on single-turn measurements.

Type	Dimensions (mm) A	B	C	D	Impedance 25MHz	100MHz	Cable Diameter (mm) From	To

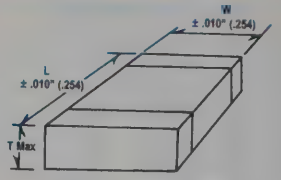
(35537) (ne35537)

CERAMIC SURFACE MOUNT CHIP CAPACITORS

SMD



Chip capacitors available in standard EIA sizes. NPO (COG), X7R, Z5U temperature coefficients, 50V. NPO, Class I, offer stable capacitor dielectric. Typical capacitance change with life less than ±0.1%. Temperature coefficient: 0 ±30ppm/°C from –55°C to +125°C. X7R, Class II, are the most temperature stable. Suitable for bypass and decoupling applications, filtering, frequency discrimination, DC blocking, and voltage suppression. Temperature coefficient: ±15% Δ°C from –55°C to +125°C. Z5U, Class III, are useful in bypass and decoupling. Temperature coefficient: +22% to –56% Δ°C max. from +10°C to +85°C. **Sold in multiples of 25.**

*50 WVDC

CY SERIES GENERAL PURPOSE

Offer epoxy coating, high capacitance, miniature size. Ideal for PC board installations in noncritical bypass, coupling and filtering applications. Working voltage: 50VDC. Y5V temperature characteristic (+22 to –82% max. capacitance change over range of –30°C to +85°C). Tolerance ±20%, except **P suffix** +100, 0% (GMV). Lead spacing 0.1″ (2.54), except * 0.2″ (5.08). **Sold in multiples of 25.**

UK SERIES LOW-VOLTAGE CERAMIC DISC CAPACITORS

• Semiconductor Design

These reduced titanite devices provide 50 to 100 times greater capacitance than standard ceramic discs. Excellent for bypass and coupling applications in power supply, audio, IF and other low voltage circuits. Phenolic coated. Operating temperature: –30°C to +85°C. Lead length 1.0″(25.40) min. Capacitance characteristics @ +25°C. **Sold in multiples of 25.**

TEMPERATURE CHARACTERISTIC

First Digit is Lower Temperature	Second Digit is Highest Temperature	Third Digit is Percent Change Allowed
Y –30°C	5 +85°C	P ±10%
Z +10°C		S ±22%
		U +22/–56%
		V +22/–82%

DDA SERIES LOW-VOLTAGE GENERAL PURPOSE CERAMIC DISC CAPACITORS

Designed to fulfill most solid-state circuitry demands including non-critical bypass and coupling. Operating temperature range: +10°C to +85°C. Durez coated. Tinned wire leads. 1.0″(25.40) min. length. Dielectric Strength: 250% of rated working voltage. **Sold in multiples of 25.**

CK SERIES LOW-VOLTAGE GENERAL PURPOSE CERAMIC DISC CAPACITORS

Designed for high capacity low voltage demands of transistor circuitry. #22 tinned leads. 1.0″ (25.40) minimum length. Power factor: 3% max. Insulation: phenolic vacuum. Operating temperature: +10°C to +80°C. Working voltage: 50VDC. Tolerance: +80%, –20%. Temperature coefficient: Z5V. **Sold in multiples of 25.**

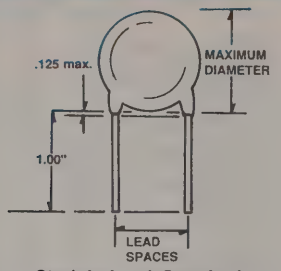
CERAMIC DISC AND FILM CAPACITORS

DD SERIES 1000WVDC CERAMIC DISC



Straight Lead, Standard

Use in non-critical coupling, bypass, and filter applications. High dielectric units offer small size, tight tolerance, humidity-resistant coating. Operating temperature: –55°C to +85°C. Tolerance: ±10% unless noted. **Sold in multiples of 25.**

METALIZED POLYESTER FILM GENERAL PURPOSE CAPACITOR KIT

Series 370/371/372 general purpose capacitor kit contains approximately 300 pieces. Metalized polyester film capacitors for coupling/decoupling. Pitches 5, 7.5 and 10mm. Rated capacitance range 1 to 2200nF. Tolerance: ±10%, ±5%. Rated voltage (DC): 63V, 100V, 250V, 400V. Rated temperature: 85°C.

95F3701 Type 8204-110-64211. **Each** **79.99**

(7303) (de02598)

DD30/60 SERIES CERAMIC DISC CAPACITORS

High-voltage capacitors for filtering, blocking, voltage-multiplier applications. **Type DD30** are 3000VDC; **type DD60** are 6000VDC. Tolerance: 20%. Operating temp: –55°C to +125°C. **Sold in multiples of 25.**

POLYPROPYLENE FILM CAPACITOR KIT

Series 460 to 464 Polypropylene film capacitors. Precision capacitors for filtering, tuning and timing. Rated capacitance range: 47 to 62000pF. Tolerance: 2% (1% also available; *contact your local Newark sales office*). Rated voltage: 63 V, 160 V, 250 V, 400 V, 630 V. Rated temperature: 85°C.

95F3702 Type 8204-110-64201. **Each** **82.97**

(7310) (de02834)

INTERFERENCE SUPPRESSION FILM CAPACITOR KIT

NEW

Kit has **MKP336 series** polypropylene film capacitors with rated voltages of 63V to 630V. Tolerance: ±20%. Rated capacitance range: 1nF to 1µF. Rated temperature: 100°C.

48F4889 Type 8204-110-64431. **Each** **72.00**

(34779) (ne34779)

NEWARK: YOUR ONE-STOP SHOP.

ALUMINUM ELECTROLYTIC CAPACITORS

36DA SERIES LARGE CAN ALUMINUM CAPACITORS

36DA Series large can aluminum capacitors are ideal for high wattage power supplies and energy storage applications. Operating temperature:–40°C to +95°C @ 6.3-100VDC;–40°C to +85°C @ 125-500VDC. PVC insulating sleeve.

LXF SERIES ALUMINUM ELECTROLYTIC CAPACITORS

Low impedance and ESR at high frequency. Operating temperature: –55°C to +105°C. Load Life: 2000 to 15,000 hrs @ 105°C. Capacitance tolerance: ±20%. VDC range: 10-63. Capacitance range: 10µF to 8200µF. Lead spacing: 5mm = 2.00, 6.3mm = 2.5, 8mm = 3.5, 10mm = 5.0, 12.5 = 5.0, 16 = 7.5. For information about the **LVX series** *contact your local Newark sales office.*

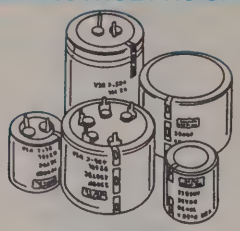
ALUMINUM ELECTROLYTIC CAPACITORS

82DA SERIES SNAP-MOUNT ALUMINUM ELECTROLYTIC CAPACITORS



Type 82DA snap-mount aluminum electrolytic capacitors feature a frequency range of –55Hz and maximum acceleration of 10g. Operating temperature: –40°C to +85°C. General purpose design. Wide voltage range, Maximum CV. Capacitance tolerance: ±20%. Capacitance: 47µF - 120,000µF. Case size: 0.87″D x 1.00″L to 1.58″D x 3.18″L.

KMH SERIES SNAP-MOUNT ALUMINUM ELECTROLYTIC CAPACITORS

KMH series high-temperature capacitors feature snap-in terminal. Load life guaranteed with the rated ripple current applied. Not solventproof. Operating temperature: –25°C to +105°C. Case size (Dia. x L in mm) indicated in type number just before **suffix T2**.

SMH SERIES SNAP-MOUNT ALUMINUM ELECTROLYTIC CAPACITORS

Very high ripple current capabilities make these ideal for use in power supply filter circuits. Load life is 2000 hours at 85°C with ripple current applied. Not recommended when halogenated cleaning solvents are used. Case size (Dia. x L in mm) indicated in type number just before **suffix T2**.

CEAUF/CEAWF/CECWP SERIES ALUMINUM ELECTROLYTIC CAPACITORS

CEAUF series are snap-mount. For switching power supplies. Operating temperature: –25°C to +105°C. Tolerance: ±20%. **CEAWF series** are snap mount. For power supplies. Operating temperature: –25°C to +85°C. Tolerance: ±20%. **CECWP series** are screw terminal. Computer grade. Operating temperature: –25°C to +85°C. Tol: ±20%.

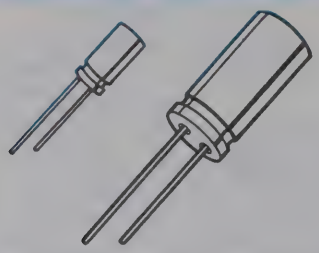
ALUMINUM AND CERAMIC CAPACITORS

SME SERIES MINIATURE LEADED CAPACITORS



Miniaturized **SME series** aluminum electrolytic capacitors for 85°C maximum operating temperature. Small case sizes. Operating temperature: –40°C to +85°C. Load Life: 2000 hrs. at 85°C. Capacitance tolerance: ±20%. Dimensions, in millimeters, are indicated at end of type number. Suffix **"VB"** in type number indicates radial leads.

ALUMINUM ELECTROLYTIC CAPACITORS

KME SERIES MINIATURE RADIAL LEAD CAPACITORS

General-purpose aluminum electrolytic capacitors have a rated lifetime of 1,000 hours @ +105°C. Operating temperature: –55°C to +105°C for 6.3V to 100V types; –40°C to +105°C for 160V to 400V types. Tolerance: ±20%. Solvent-proof design, except 350V and 400V types, withstand HCFC cleaning agents for 5 minutes by ultrasonic, vapor or immersion.

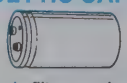
DCM SERIES COMPUTER GRADE ALUMINUM ELECTROLYTIC CAPACITORS



Screw-terminal can. For power supply filters and energy storage applications such as welding equipment and computer hold-up power where high capacitance, low ESR and the ability to handle large ripple currents are required. Tolerance: –10%, +75% (**T** in type number); –10%, +50% (**U** in type number). Operating temperature: –40°C to +85°C.

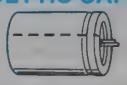
381LX SERIES SNAP-MOUNT CAN ALUMINUM ELECTROLYTIC CAPACITORS



381LX series provides 105°C capability and long life. Ideal for really high-ripple applications. Terminal spacing: 10mm. Fit 2mm dia. holes. Welded connections. Operating temperature: –40°C to +105°C. Additional values available, *contact your local Newark sales office.*

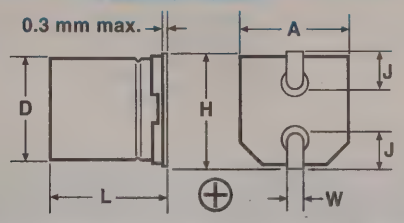
AVS SERIES SURFACE MOUNT ALUMINUM ELECTROLYTIC CAPACITORS

NEW SMD



AVS series capacitors are packaged in a vertical, cylindrical style to facilitate automatic mounting and reflow soldering. Tolerance: ±20%. Rated life: 2000 hours @ +85°C. Operating temperature: –40°C to +85°C. Case code size found in type number. **Sold in reel quantities**. Additional values are available, *contact your local Newark sales office.*

NEWARK MAKES IT EASY.
MORE PAYMENT OPTIONS! USE YOUR MAJOR CREDIT CARD, CORPORATE PURCHASING CARD, PUT IT ON YOUR ACCOUNT, OR PLACE A C.O.D. ORDER.

OPERATING LIFE FOR CAPACITORS

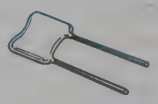
Where operating life is given at a certain temperature, for every drop of 10°C life expectancy will double.

- If life expectancy is 1,000 hours at 105°C this would double to 2,000 hours at 95°C and double again to 4,000 hours at 85°C

(38575) (Filler04)

MICA AND FILM CAPACITORS

STANDARD DIPPED MICA CAPACITORS



Feature coating to meet rigid humidity requirements. Conform to EIA specs. Classes 203.01, 203.02. Tinned copperweld leads. Meet 10-2000 cycle vibration tests. Temperature range: –55°C to +125°C. Tolerance denoted in type no: **J**: ±5%; **G**: ±2%; **F**: ±1%; **D**: ±½pF. 500 WVDC except (*) 300V and (**) 100V. Other ratings available; *contact your local Newark sales office.* MIL-C-5 equivalents also available as indicated; *contact your local Newark sales office.*

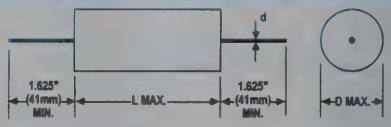
940C SERIES AXIAL LEAD FILM CAPACITORS

NEW



Type 940C round, axial lead film capacitors use polypropylene film and dual metallized electrodes for both self-healing properties and high peak current carrying capability (dV/dt). Tolerance: ±10%. Operating temperature: –55°C to +105°C. Most popular values listed. Other values available, *contact your local Newark sales office.*

FILM CAPACITORS

WMF SERIES POLYESTER FILM CAPACITORS

Axial leaded polyester film/foil capacitors, extended foil non-inductive: wound section. Epoxy end sealed and sealed outer wrapper. Tolerance: ±10%. Temperature range: –55°C to +85°C full rated voltage, up to 125°C with 50% voltage derating. Other ratings available; *contact your local Newark sales office.*

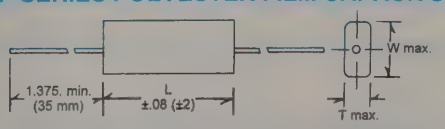
MMP SERIES POLYESTER FILM CAPACITORS



Low profile, flat, oval, axial lead configuration. Non-inductive winding and self healing capabilities. Tolerance: ±10%. Temperature range: –55°C to +85°C (derate 50% at 125°C). Working voltage: **MMP2** = 250VDC; **MMP4** = 400VDC, **MMP6** = 630VDC.

DME SERIES RADIAL LEAD POLYESTER FILM CAPACITORS

Tolerance: ±10%. Working voltage: **DME2** = 250VDC (160VAC); **DME4** = 400VDC (200VAC); **DME6** = 630VDC (250VAC). Full rated voltage at +85°C, derate linearly to 50% rated voltage at +125°C. Operating temperature: –55°C to +125°C. Additional values available, *contact your local Newark sales office.*

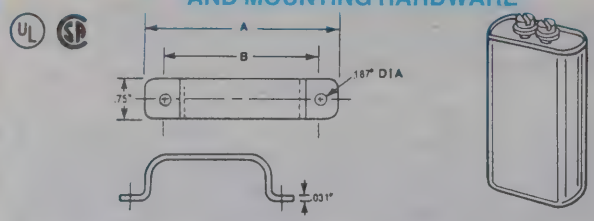
K SERIES METALIZED POLYPROPYLENE AC CAPACITORS AND MOUNTING HARDWARE



Type SM are oval-cased capacitors designed for motor-run and similar applications. Polypropylene dielectric AC capacitors have metalized electrodes that are vacuum deposited on both sides of a paper substrate. They are smaller, lighter, and perform better than conventional paper-dielectric oil metalized film types. Ratings at 70° case temperature. UL listed, file E56959, CSA certified, file LRO75387. *Other ratings available; contact your local Newark sales office.*

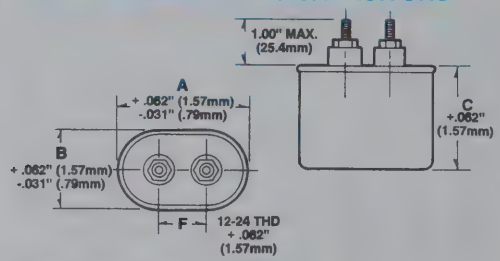
SCR COMMUTATING CAPACITORS



- **For Power Semi Applications**
- **Meet EIA RS-401**

Suited for fast rise times and high pulse repetition rates, SCR capacitors are made of a non-PCB paper/film dielectric to provide a thermal balance with the operating environment. Internal connections are made with heavy tinned-copper braid conductors soldered between extended aluminum foil and internal studs. Rated for case temperature operation at +80°C. Rated for minimum of 95% survival after 40,000 hours operation at maximum rating conditions of voltage, current, case temperature, voltamperes.Other ratings available; *contact your local Newark sales office.*

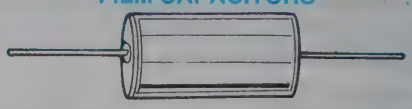
935 SERIES METALIZED POLYPROPYLENE FILM CAPACITORS



Designed for 20-100kHz switching power supply input filtering, DC blocking, and output filter applications where high current, high capacitance, and low ESR values are important. Metalized polypropylene dielectric has ability to heal if transient high voltage causes dielectric breakdown. Units sealed with flame retardant outer wrap and epoxy end seals. Temperature range: –55°C to +105°C with voltage derating. Tolerance: ±10% . UL approved for construction only.

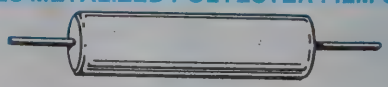
MMWA SERIES METALIZED POLYESTER FILM CAPACITORS



Type MMWA axial-leaded metalized polyester film capacitors incorporate compact, non-inductive extended foil windings with epoxy end seals to offer excellent moisture resistance and capacitance stability over the operating temperature range. Metallized polyester provides self-healing characteristics that help prevent permanent shorting due to high voltage transient. Operating temperature: –55°C to +85°C. Tolerance: ±10% (except **type MMWA05W5M**, ±20%).

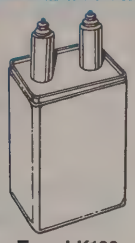
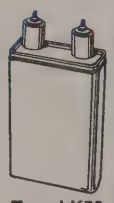
CAPACITORS AND DC POWER PACKS

LK SERIES MYLAR PAPER FILTER CAPACITORS



Type LK100



Type LK50

Oil-impregnated, oil-filled capacitors feature exceptional electrical characteristics in small size. Specifically designed for filter, bypass and coupling applications in the low frequency range. Operate in any position. Feature twice the life of MIL-C-25C capacitors. Impregnant is a highly-refined, purified and inhibited mineral oil. Threaded stud terminal is supplied with nut and solder lug. Hermetically sealed. Tolerance: ±10%. Operating temperature: –55°C to +85°C. Include foot brackets. **LK-ND series** for energy storage discharge also available; *contact your local Newark sales office.*

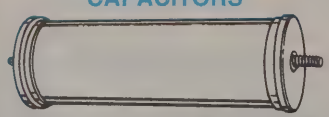
OF SERIES 85°C GLASS CAP PLASTIC FILM DC FILTER CAPACITORS



Plastic dielectric capacitors are impregnated with a highly purified and inhibited mineral oil. Designed to pass tests and exceed requirements of MIL-C-25D (Characteristic E) except for high altitude flashover. Mount in any position. **Types OF20-OF60** are extended foil, non-inductively wound for energy storage. Operating temperature: –55°C to +85°C. Terminals are 8-32 x ⅜″ long. Tolerance: ±10%.

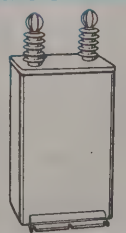
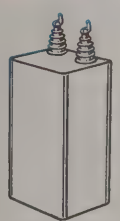
HV SERIES COMPACT DC POWER PACKS



HV500-502M



HV200-502M

Small size power packs mount in any position and feature long-life silicon rectifiers. Low ripple characteristics. Withstand vibration and shock. Output voltage set by adjusting input voltage. To assure a true hermetic seal, units have solder seal terminals. Either the positive or negative terminal may be grounded. Steel containers are lacquer-coated. Standard line input voltage is 0-120VAC at frequencies of 50-500Hz. Output current (max.): **HVxx-103M**, 10.0µA; **HVxx-502M**, 5.0mA. Operating temperature: –55°C to +85°C. Other ratings available: 1.5, 5, 10, 15mA up to 100KVDC; center-tap (dual output); 220, 230, 240VAC input versions for Europe; *contact your local Newark sales office.*

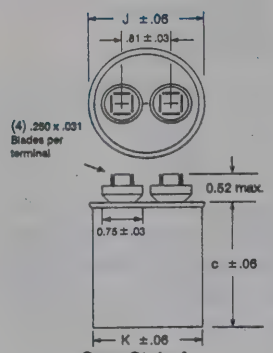
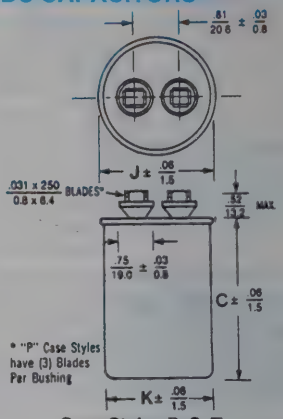
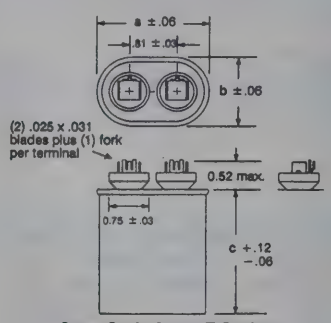
GENERAL PURPOSE DC CAPACITORS



Case Style A



Case Styles P, S, T



Case Style for 26F Series

General purpose DC capacitors are used in DC filter circuits for voltages, frequencies, or life greater than the capabilities of electrolytic style capacitors. Operating life: 60,000 hours with 94% survival. **97F5000/9000 series** are designed for use in motor-run applications. Dual-rated 440VAC, 1000VDC. **97F** capacitors feature tolerance ±6% and operating temperature –30°C to +70°C. **26F series** capacitors feature tolerance ±10% and operating temperature –30°C to +70°C. *Order mounting brackets for these capacitors separately on page 81.*

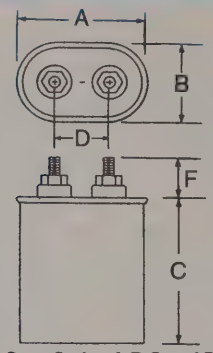
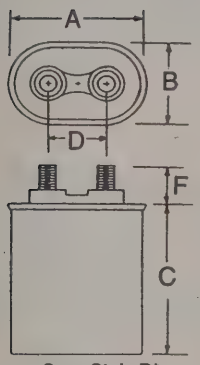
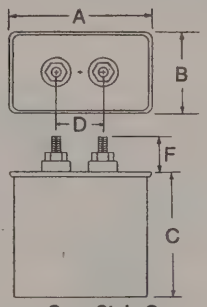
97F7500/A97F8600 SERIES SCR COMMUTATION CAPACITORS



Case Styles A,B,C and D



Case Style D*



Case Style G

For SCR commutation, snubbers for SCR's and other power semiconductors. Also for any other circuits where combination of frequency and voltage results in high RMS currents. **97F7500 series** special purpose line designed for applications where large µF value at low voltage is required in small sizes. **A97F8600 series** have all-film dielectric. Terminal length: 0.72″ (case D*); 0.58″ (all others). Case material, styles A through D, aluminum; style G, steel. All units are unpainted case and cover. *Order brackets for capacitors separately on page 81.*

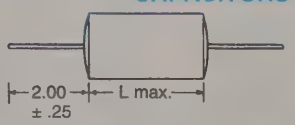
40L SERIES SNUBBER AND HIGH-CURRENT DC CAPACITORS



Extended electrode, metal spray and contacts. Electroplated solid copper leads welded to contacts. Units wrapped in flame-retardant tape and end-potted with polyurethane. Operating temperature: –55°C to +105°C. Tolerance: ±10%. Dissipation factor: 0.1% max. at 25°, 1kHz. 400VDC and 600VDC units available. Lead size: 20AWG except (*) are 18AWG. *Order mounting accessories separately on page 81.*

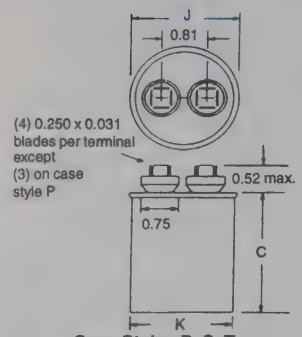
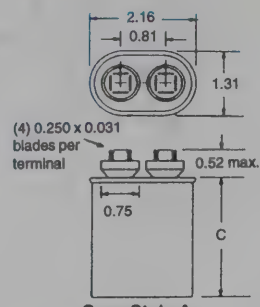
97F GEM SERIES AC POWER SUPPLY AND MOTOR RUN CAPACITORS



Case Styles P, S, T



Case Style A

97F8000 series metalized capacitors designed for AC power supplies and filtering applications offer low dielectric loss, inherent self-healing property, and increased microfarad per volume. Tolerance: ±10%. Leakage current: 30µA max. Frequency: 60Hz nominal. Operating temperature: –40° to +70°C. Operating life: 60,000 hours with 95% survival. Dissipation factor: 0.1% max. UL recognized pressure sensitive interrupter. *Order mounting brackets separately on page 81.* **97F5000/9000 series** same except for motor run applications and ±6% tolerance. *Order mounting brackets separately on page 81.*

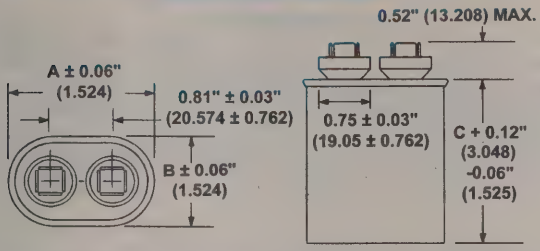
97F8200 SERIES METALIZED POLYPROPYLENE FILM AC CAPACITORS



580 volt capacitors are specially designed for general purpose AC applications in power supplies and power conversion equipment. Operating temperature: –40°C to +70°C. Tolerance: ±6%. Dissipation factor: 0.1% maximum. Operating life: 60,000 hours with 94% survival. Four 0.250 x 0.031″ (6.35 x 0.787) blades per terminal. *Order mounting brackets separately on this page.*

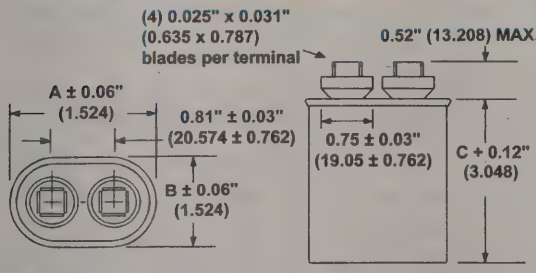
27L6000 SERIES METALIZED POLYPROPYLENE FILM AC CAPACITORS



Metalized film capacitors are designed for general purpose AC applications in power supplies, UPS and power conversion equipment. These capacitors may be used in AC applications where the voltage waveform is non-sinusoidal. Tolerance: ±6%. Rated 660VAC. Operating Temperature: –40°C to +70°C. Operating life: 60,000 hours with 94% survival. *Mounting accessories sold separately on this page.*

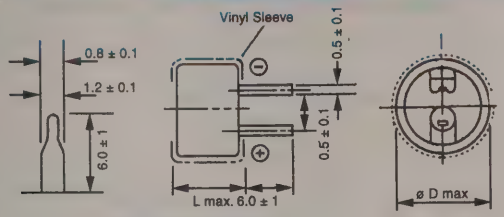
DOUBLE LAYER ELECTROLYTIC CAPACITORS

DYNACAP™ DOUBLE-LAYER ALUMINUM ELECTROLYTIC CAPACITORS

NEW



DynaCap™ **DB, DK,** and **DH series** double-layer capacitors are ideal for a wide range of applications and devices. Electric double layer formed between high-density solid electrodes and liquid (nonaqueous) electrolyte allows rapid charging and discharging at high currents. Flat spring technology enhances reliability of coin cells. Plated lead terminals. Tolerance: –20% to +80%. Operating temperature: –25°C to +70°C. **DH series** operating temperature: –25°C to +85°C.

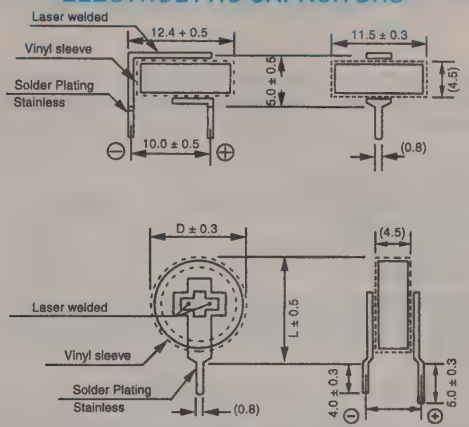
DYNACAP™ DX SERIES DOUBLE-LAYER ALUMINUM ELECTROLYTIC CAPACITORS

NEW



DynaCap™ **DX series** double-layer radial lead capacitors are specifically designed for backing up IC memories and related devices. Electric double layer formed between high-density solid electrodes and liquid (nonaqueous) electrolyte allows rapid charging and discharging at high currents. Combines two coin cells for a rated voltage of 5.5V. Plated lead terminals. Available in horizontal or vertical terminal styles. Tolerance: –20% to +80%. Operating temperature: –25°C to +70°C. Dimensions: 11.5 dia. x 15.5mmL. **Type DX-5R5V105** is 19.0 dia. x 20.5mmL.

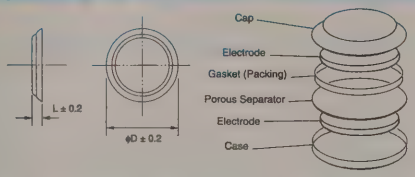
DYNACAP™ DC AND DCK SERIES DOUBLE-LAYER ALUMINUM ELECTROLYTIC CAPACITORS

NEW



DynaCap™ **DC** and **DCK series** double-layer, coin-shaped memory back-up capacitors are ideal for low-profile miniature and subminiature applications. Electric double layer formed between high-density solid electrodes and liquid (nonaqueous) electrolyte allows rapid charging and discharging. Tolerance: –20% to +80%. **DC series** operating temperature: –25°C to +70°C. **DCK series** operating temperature: –10°C to +60°C.

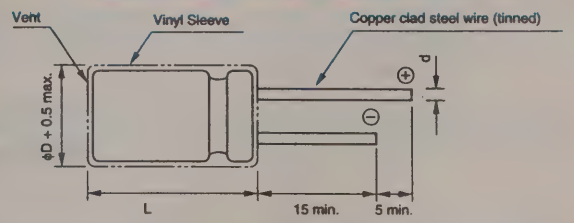
DYNACAP™ DZ SERIES DOUBLE-LAYER ALUMINUM ELECTROLYTIC CAPACITORS

NEW



DynaCap™ **DZ series** high-current radial lead capacitors have extremely low internal resistance. Ideal for use as a CMOS backup or power supply. Tolerance: –20% to +80%. Operating temperature: –40°C to +70°C. Lead dia.(d): 0.6mm. Type **DZ-2R5D106** has lead dia.of 0.8mm. Types **DZ-2R5D506** and **DZ-2R5D107** have PC board lug terminals.

CAPACITOR REFERENCE PAGE

CAPACITOR REFERENCE PAGE

CHOOSING A CAPACITOR

It can be difficult to select the proper capacitor to fill your needs. If you can provide the following specifications, Newark can help you select the right capacitor:

- Nominal Voltage
- Case Size or Dimensions
- Required Capacitance in picofarads (pF) or microfarads (μF)
- Dielectric or Material
- Leaded or Surface Mount Package
- Tolerance Range

In most applications a higher voltage capacitor can be substituted for one with the same capacitance. This may result in a slightly larger case size, but usually offers better performance.

ENGINEERING PROTOTYPE CHIP CAPACITOR KITS

JOHANSON DIELECTRICS

Each kit contains a popular selection of standard surface mount chips individually packaged in labeled vials housed in a handy vinyl binder for convenient storage and access. Kits have 50 each of key values plus 25 each of the common values from the indicated capacitance range of each kit in NPO, X7R, Z5U and Y5V dielectrics (standard voltage and tolerance). All chips have nickel-barrier terminations.

SIZE 0603 SURFACE MOUNT CHIP CAPACITOR KIT

850 piece kit contains 10 each of key values plus 14 each of common values between 1.0pF and 0.1µF in NPO, X7R, Z5U, and Y5V dielectrics.

48F4894 Type S603A EIA 0603. **Each** **138.65**

SIZE 0805 SURFACE MOUNT CHIP CAPACITOR KIT

1050 piece kit has 14 key values plus 14 common values between 1.0pF to 0.10µF in NPO, X7R and Z5U dielectrics.

48F4895 Type S805A EIA 0805. **Each** **121.10**

HIGH-FREQUENCY CERAMIC CHIP CAPACITORS

JOHANSON TECHNOLOGY

NEW

Developed for high-volume RF wireless applications. Surface mount capacitors exhibit low ESR and high Q at frequencies to 6GHz. Ideal for use in cellular, CATV, wireless LAN, and similar applications. EIA sizes. Barrier terminations.

HIGH-FREQUENCY CERAMIC CHIP INDUCTORS

JOHANSON TECHNOLOGY

NEW

Multilayer ceramic chip (SMD) inductors for use in many high-frequency applications. Exhibit good RF characteristics at frequencies up to 6.0GHz. Barrier terminations.

HIGH-FREQUENCY CHIP INDUCTOR KITS

JOHANSON TECHNOLOGY

NEW

EIA SIZE 0603 INDUCTOR KIT

Type L603 SMD kit has 200 pieces: 20 each of popular values between 1.5nH and 27nH.

48F4890 Type L603 EIA Size 0603. **Each**..... **96.53**

EIA SIZE 0805 INDUCTOR KIT

Type L805 SMD kit has 200 pieces: 20 each of popular values between 1.8nH and 47nH.

48F4891 Type L805 EIA Size 0805. **Each**..... **96.53**

(35376) (ne35376)

HIGH-FREQUENCY CHIP CAPACITOR KITS

JOHANSON TECHNOLOGY

NEW

EIA SIZE 0603 CAPACITOR KIT

Type C603 SMD kit has 200 pieces: 20 each of 10 popular values between 0.5pF and 47pF.

48F4892 Type C603 EIA Size 0603. **Each** **96.53**

EIA SIZE 0504 CAPACITOR KIT

Type C504 SMD kit has 300 pieces: 20 each of 15 popular values between 1.8pF and 47pF.

48F4893 Type C504 EIA Size 0504. **Each** **108.81**

VARIABLE CAPACITORS AND TOOLS

AIR DIELECTRIC VARIABLE CAPACITORS

Fig. 2 P.C.

Fig. 3 Turret

Fig. 4 P.C.

Fig. 6 Vertical

Fig. 8 Vertical

250VDC, MIL-C-14409 qualified capacitors feature 1-piece, self-locking constant-torque drive mechanism to assure uniform torque, high Q, low dynamic tuning noise. Standard models are for RF applications and VHF thru microwave. Miniature models are size-reduced versions of standard. Temperature range: –65°C to +125°C. *Order tuning tools* **types 8764, 8766, 8777** *separately on this page.*

STANDARD AIR DIELECTRIC VARIABLE CAPACITORS

Stock No.	Type	Fig.	Min. Q @ 100MHz	Capacitance Range (pF)	L x D	1-24	25-49

(7243) (de00852)

27000 SERIES GHz VARIABLE CAPACITORS

Fig. 1

Fig. 2

Fig. 3

500VDC MIL-C-14409 trimmers for fine tuning RF and microwave applications offer fixed length, higher Q, essentially zero tuning noise and reduced solder flux intrusion. Withstand soldering heat and excessive tuning. High breakdown voltage. Temperature range: –65°C to +125°C. Self-lock constant torque drive mechanism. *Order tuning tool* **types 8766, 8777** *separately on this page.*

SEAL-TRIM® VARIABLE CERAMIC CAPACITORS

Square drive tuning mechanism eliminates backlash problems of screwdriver type adjustment slots. Moisture-proof housing resists dirt, dust, solder flux, cleaning agents. 250VDC. MIL-C-81. High Q–ideal for higher frequencies. Temperature range: –20°C to +85°C. *Order tuning tool* **type 4192** *for* **9620 series; type 4193** *for* **9610 series**; *and* **type 2190** *for* **9690 series** *separately on this page.*

VARIABLE AND TRIMMER CAPACITORS

9341 AND 9349 SERIES VARIABLE CAPACITORS

The **9341** and **9349 series** are among the smallest variable capacitors available. Their unique design offers a wide range of capacitance values, high Q and excellent temperature coefficients. Both series are ideal for applications where extremely small size is a design criterion. The **9341 series** have a diameter of 0.118″ and a height of 0.080″ and incorporate silver ribbon leads. The **9349 series** have a diameter of 0.090″ and a height of 0.047″ and incorporate gold ribbon leads. Q = 200 @ 1MHz. **9349 series** available, *contact your local Newark sales office.*

Stock No.	Type	Capacitance Range (pF)	Temp. Coeff. ppm/°C	1-49	50-99	100-499

(7300) (de02412)

9343 SERIES VARIABLE CAPACITORS

SMD

The **9343 series** offers a wide range of capacitance values in an extremely small size. Unique design allows them to be used in applications where reflow soldering is part of the manufacturing procedure. Size: 0.177″L x 0.125″W x 0.118″H. Q = 300 @ 1 ± 0.1MHz. Also available in tape & reel; *contact your local Newark sales office.*

Stock No.	Type	Capacitance Range (pF)	Temp. Coeff. ppm/°C	1-99	100-249	250-499

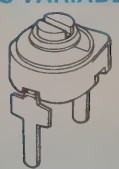
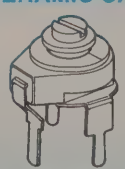
9300 SERIES VARIABLE CERAMIC CAPACITORS



9371-9376



9301-9328

Designed for broadband applications, from audio to 500MHz. Economical and ideal for wide variety of applications, including test equipment, CATV amplifiers, crystal oscillators, impedance matching and LC filters. **Types 9301 thru 9328** have three legs and 0.410D x 0.315″H (10.41 x 8.00). **Types 9371 thru 9376** are two-legged and 0.200D x 0.240″H (5.08 x 6.10). *Order tuning tool* **type 8777** *separately on page 86.*

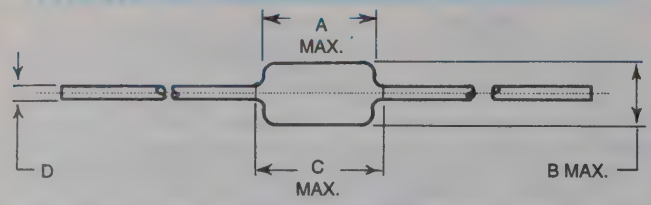
TYPE IR EPOXY CONFORMAL COATED INDUCTORS



Uniform roll coated. Tinned copper leads. Insulation resistance: 1000MΩ minimum per MIL-STD-202, method 302, test condition B. Dielectric strength: 1000VAC per MIL-STD-202, method 301. Tolerance at end of type number. Temperature (**IR-2**): –55°C to +105°C (below 1.0µH, 55°C to +125°C); (**IR-4**): –55°C to +125°C (from 5.6 to 240µH, –55°C to +125°C). Core (**IR-2**): for 0.10 to 1.0µH, phenolic; for 1.2 to 27.0µH, iron; for 33.0 to 1000.0µH, ferrite. Core (**IR-4**): for 0.15 to 4.7µH, phenolic; for 5.6 to 1800.0µH, iron. Additonal inductance values available; *contact your local Newark sales office.*

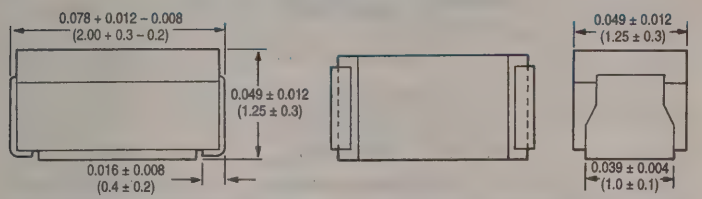
IMC-0805 SERIES HIGH-FREQUENCY MOLDED INDUCTORS

SMD



IMC-0805 series inductors feature high self-resonant frequency values and high Q values at higher frequencies. Wirewound, molded construction for superior strength and moisture resistance. Inductance tolerance: ±20% for 3.9-8.2nH; ±10% for 6.8-1000nH; ±5% for 33-1000nH. Operating temperature: –40°C to +85°C at full rated current. Compatible with vapor phase and reflow soldering. Non-magnetic core. Inductance value (nH) is indicated in type number. **Sold in reels of 3000.**

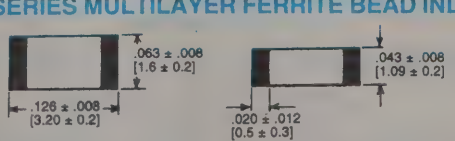
ILB-1206 SERIES MULTILAYER FERRITE BEAD INDUCTORS

SMD



ILB-1206 series ferrite bead inductors are used to clean up spikes which cause noise on digital and analog keyboards. Tolerance: ±25%. Temperature range: –55°C to +125°C. Thermal shock: 50 cycles, –55°C to +125°C. Humidity: 90% RH @ –40°C with 200mA DC current, 500 hrs. Load life: +90°C @ full rated current for 2000 hrs. Solderability: 95% coverage after 5 second dip in +230°C solder following a 60-second pre-heat @ +120°C and unactivated flux dip. Resistance to solder heat: 10 seconds in +260°C solder after pre-heat and flux dip. **Sold in bulk packs of 100, and in reels of 2500.**

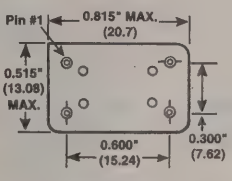
XO-52



XO-43/XO-54

Hybrid crystal clock oscillators are HCMOS, CMOS, NMOS, TTL, LS-TTL, S-TTL compatible. 0.01% frequency accuracy. 60/40 symmetry. Resistant to isopropyl alcohol, trichloroethane and Freon TMC. Operating temperature: 0°C to +70°C. Input voltage (V_{DD}): +5.0 ±0.5 VDC. Input current: 5 to 50mA. Minimum enable input voltage: 3.5V. Maximum enable input current: 10µA. Frequency accuracy: 0.01%. Enable/disable: #1 pin open. Symmetry: Standard 60/40 except those marked (*) which are 55/45. Terminal solderability: Per MIL-STD-202, Method 208C.

FERRITE EMI SUPPRESSORS

EMI SUPPRESSION EVALUATION KITS

Expanded Cable and Connector EMI Suppressor Kit. Specifically designed to attenuate EMI in all types of cable-connected systems. Features 82 components, including a variety of shield beads, one- and two-piece cable suppressor cores and multi-hole suppressor plates for connectors. Made of "Type 43" material, which provides high impedance over a wide frequency range. Includes nylon cases and steel clips for assembly of split cable suppressor cores.

95F755 Type 0199000005. **Each**..... **126.07**

Suppressor Retro Kit. 40-component kit contains ten different split cable suppression cores in "Type 43" material. For application in systems using round or flat cable. Includes nylon cases.

95F756 Type 0199000008. **Each**..... **126.07**

Expanded Bead-on-Lead Kit. 140-component kit contains 24 wired beads in three basic design configurations. For use in designs that require automatic component insertion in PC boards. Includes three different suppressor materials, "Type 73" , "Type 43", and "Type 61".

95F757 Type 0199000010. **Each**..... **126.07**

Bead, Balun and Broadband Kit II. 276-component kit has assortment of small shield beads and multi-aperture cores in three different materials (Types 73, 43, 61 and 65) for balun and broadband transformer designs.

95F758 Type 0199000011. **Each**..... **126.07**

Surface Mount Bead Suppression Core Kit. Contains an assortment of ten surface mount beads and two common mode beads in appropriate materials to provide maximum attenuation over a wide frequency range.

16F001 Type 0199000014. **Each**..... **84.05**

Chip Beads Kit. Surface mount beads in 4 EIA standard package sizes. Assorted current chip beads are suitable for wave and reflow solder processes. Ideal for suppressing EMI in computers, cellular phones, digital communications, pagers, TV and VCRs. 100% controlled impedance and DCR.

83F7366 Type 0199000018. **Each**..... **81.20**

(7340) (de51996)

EMI SUPPRESSION CORES WITH CASES

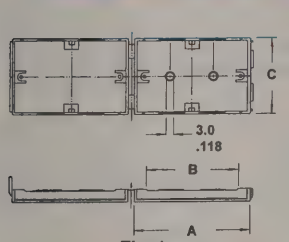

Fig. 1

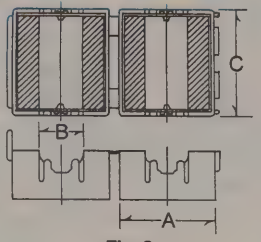

Fig. 2

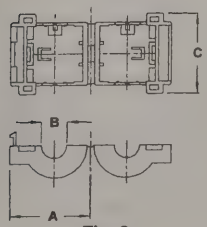

Fig. 3

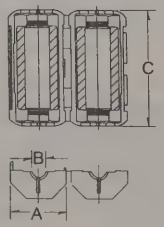

Fig. 4

Attenuate EMI from ribbon and round cable with cores that accommodate a range of sizes and conductors. Flat cases have serrated teeth to grip and center cable. Feature combination case and two ferrite parts. "Type 43" or "Type 44" materials, polypropylene. Flammability: UL 94-V0. **Sold in packages of 2.**

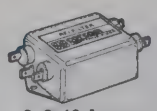
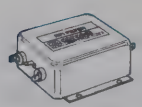
S, V, W SERIES RFI FILTERS

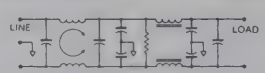


3, 6, 10 Amps



20 Amps

V Series



W Series

S Series

These RFI filter series combine line-to-ground interference rejection filters with additional circuitry designed to reduce low frequency line-to-line noise and add a balance N = 3 ("PI") line-to-line filter with high rejection at low frequency to the N = 2 ("L") and N = 3 ("T") sections to eliminate line-to-ground. Particularly effective when applied in equipment using switching type power supplies. SCR and TTL circuits. Maximum leakage current, line-to-ground at 120VAC/60Hz, 0.5mA; at 250VAC/50Hz, 1.0mA. UL recognized, CSA certified, VDE approved.

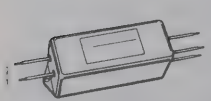
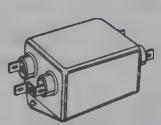
EP SERIES RFI FILTERS

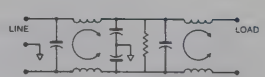
EP7



EP3



EP1



Reduce conducted noise to acceptable limits for equipment to comply with VDE 0871 requirements and FCC specifications. Filters provide high insertion losses for line-to-ground and line-to-line emissions throughout frequency range. 120/250V, 50/60Hz AC. UL recognized, CSA certified, VDE and SEV approved.

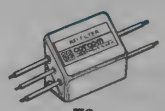
T SERIES RFI FILTERS

T1



T3

T6

15T1

3ET & 6ET

15ET & 15VT

T series ET and **VT models** provide superior common-mode and differential-mode attenuation in a small package. These filters are effective for very noisy equipment that must meet the emission limits of FCC Parts 15 and 18, or VDE 0871 A-level. In some instances, these filters can help bring equipment into compliance with VDE 0871 B-level. Meets the low leakage current requirements of SEV, VDE portable equipment, and (120 volt) UL544 non-patient medical equipment. Maximum leakage current line-to-ground for **ET models** at 120VAC/60Hz is 0.30mA; at 250VAC/50Hz is 0.50mA. For **VT models** at 120VAC/60Hz is 0.75mA (10A) and 1.25mA (15A); at 250VAC/50Hz is 1.25mA (10A) and 2.10mA (15A). Use for both line-to-ground (2250VDC hipot rating) and line-to-line (1450VDC hipot rating) application. UL recognized, CSA certified, VDE approved and SEV approved except all 15A models and style T7, and VT models. Medical version available. *Contact your local Newark sales office.*

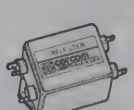
Q SERIES FILTERS

3VQ/3EQ Models, 3 amps



Q1

Q3

6EQ Models, 6 amps

Q8 6 amp

Q8 3 amp

Developed specifically for switching power supplies and to be all the power line filtering required to control conducted emissions down to 10kHz. High attenuation provided for both common mode and differential mode interference throughout the frequency range, with no degradation of performance due to the large peak current drawn by switching power supplies. Maximum leakage current, line-to-ground for **VQ models** at 120VAC/60Hz is 1mA; at 250VAC/50Hz is 1.25mA. For **EQ models** at 120VAC/60Hz is 0.30mA; at 250VAC/50Hz is .50mA. Hipot rating line-to-ground, 2250VDC; line-to-line, 1450VDC. UL recognized, CSA certified, VDE approved, and only **EQ types** are SEV approved. Medical version available; *contact your local Newark sales office.*

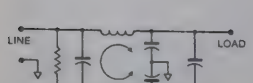
X AND Z SERIES PC BOARD-MOUNTABLE RFI FILTERS



3EX1, 3EZ1

Compact components designed to consume minimal board space. **X, Z series** are ideal for emission-control applications and are designed to bring switching power supplies into compliance with FCC Part 15J conducted emission limits. **Z series** also enable compliance with VDE 0871, Level A requirements. Max. leakage current for **X, Z series,** line to ground at 120VAC/60Hz, 0.30mA; at 250VAC/50Hz, 0.50MA. UL recognized, CSA certified. VDE approved.

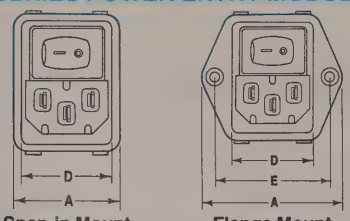
C SERIES POWER ENTRY MODULES



C series 2-function power entry modules combine a double-insulated DPST switch and IEC 320 power line connector. Compact size for smaller panel cutout. Faston terminals. Filtered models have maximum leakage current, line-to-ground: 0.25mA @ 120VAC, 0.40mA @ 250VAC. Hipot rating (1 minute): 2250VAC line-to-ground; 1450VDC line-to-line. Rated current: 10A @ 120VAC; 10A @ 250VAC. Rated voltage: 120/250VAC. UL recognized, CSA certified.

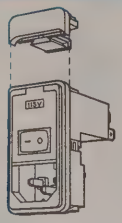
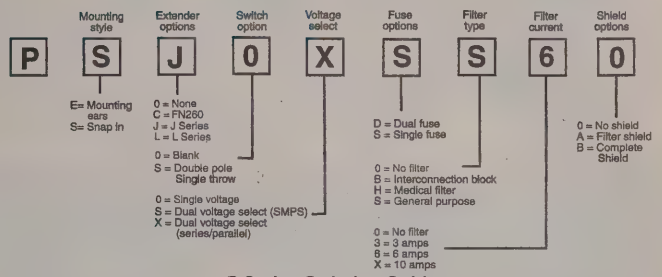
P SERIES CHAMELEON ADAPTABLE POWER ENTRY MODULES





P Series Ordering Guide

Lets user select power entry features without altering panel cut-out. With adapters, *sold separately,* unit will fit any standard panel cut-out. IEC power line connector, North American and European fusing capabilities, optional DPST on/off switch. 50/60 Hz. Two voltage selection: rated, 120/250VAC; operating, 115/230VAC. Rated current: 10A @ 120VAC, 10A @ 250VAC. Dimensions: 1.93L x 1.24W x 2.31" H *except* **type PSJ:** 2.72" H. Shields **(suffix A)** expand width of panel cutout for snap-in versions. Filtered versions also available in 3, 6 and 10 amps; *contact your local Newark sales office.*

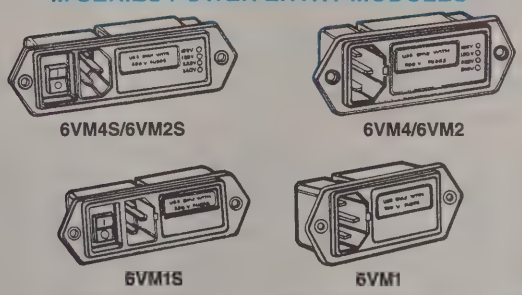
M SERIES POWER ENTRY MODULES



One component provides capability of interfacing multi-voltage power supply to any common voltage or fusing scheme in the world, without modification. IEC connector. Selectable fuse holder allows use of either single or dual European fuses, or a single North American fuse. DPST on/off switch, available on **types 6VM4S, 6VM2S** and **6VM1S,** breaks both sides of the line and is labeled with international I/O markings. Voltage selector, available on **types 6VM4S, 6VM2S, 6VM4** and **6VM2,** permits changing transformer primary connections; **"2"** or **"4" suffix** denotes optional voltage configuration. **Type ZM** is filtered, ideal for digital equipment. Rated 6 amps at 120V. UL recognized, CSA certified, VDE approved.

K & SK SERIES RFI FILTERS AND B SERIES GENERAL PURPOSE FILTERS

Fig. 1

Fig. 2

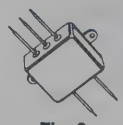

Fig. 3

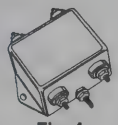

Fig. 4

Fig. 5

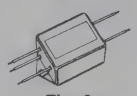

Fig. 6

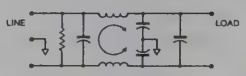
Fig. 7



K series general purpose, common- and differential-mode filters effectively control line-to-line and line-to-ground RFI interference. Ideal for uses where pulsed, continuous, and/or intermittent RFI interference is present. Maximum leakage: **K** Series: 0.5mA @ 120VAC/60Hz; 1.0mA @ 250VAC/50Hz; **EK** Series: 0.25mA @ 120VAC/60Hz; 0.40mA @ 250VAC/50Hz. **SK series** high-performance, power line filters significantly outperform **K models**. Ideal for equipment with high line-to-ground and line-to-line conducted emissions. **SK Series** maximum leakage: for 3, 6 and 10 amp units, 0.5mA @ 120 VAC, 60 Hz; 1.0mA @ 250 VAC, 50 Hz; for 20 and 30 amp units, 0.3mA @ 120 VAC, 60 Hz; 0.5mA @ 250 VAC, 50 Hz. Both **K** and **SK series** are UL recognized, CSA certified, and VDE approved.

B SERIES GENERAL PURPOSE FILTERS

B series compact, common-mode filters economically provide effective RFI control of line-to-ground noise. Maximum leakage current: 0.5mA @ 120VAC/60Hz; 1.0mA @ 250VAC/50Hz. Hipot rating: 2250VDC line-to-ground; 1450VDC line-to-line; UL recognized, CSA certified, VDE approved.

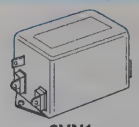
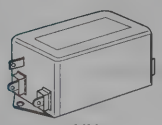
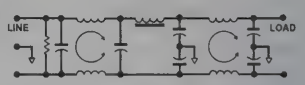
N SERIES RFI FILTERS FOR SWITCHING POWER SUPPLY



6VN1



10VN1



N series high-performance, common-mode, and differential-mode filters are ideal for digital equipment. Max. line-to-ground leakage @ 120VAC/60Hz: 1.25mA; @ 250VAC/50Hz: 2.10mA. Complies with emission limits of VDE0871 Level B and FCC Part 15J, Class B requirements. UL recognized. CSA certified. VDE approved.

Stock No.	Type	H x W x D	Amps	1-24	25-59	50-99

(33078) (ne33078)

R SERIES DUAL T SECTION RFI POWER LINE FILTERS

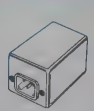

Fig. 1

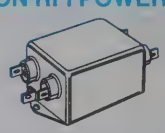

Fig. 2

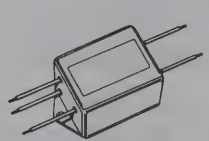

Fig. 3

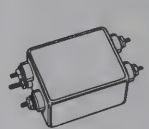

Fig. 4

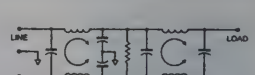

Well-suited for low impedance loads where noisy RFI environments are present. Units control pulsed, continuous and/or intermittent interference, assuring protection of equipment from power line noise while also protecting the line from equipment noise. In addition, these filters provide low leakage current without deterioration of insertion loss characteristics. 120/250V, 50/60Hz AC. All are UL recognized, CSA certified; VDE approved.

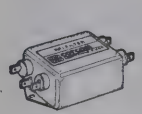
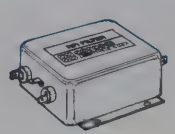
MV SERIES POWER LINE FILTER FOR MEDICAL EQUIPMENT



3, 6, 10 Amps



20 Amps

MV series filters aid compliance with requirements of UL2601, which limits leakage current for patient care equipment. **MV series** filters take advantage of the changed standard for leakage current and offers improved line-to-ground performance. Higher line-to-line performance is achieved through additional differential mode rod inductors. Maximum leakage current (line-to-ground): @ 120VAC/60Hz, 0.07mA; @ 250VAC/50Hz, 0.15mA. UL recognized. CSA certified, VDE approved.

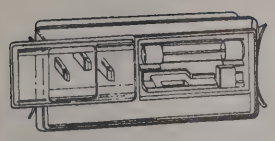
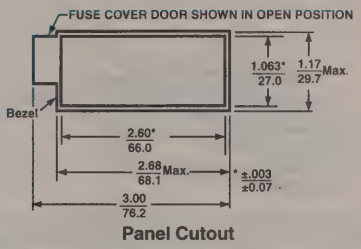
(7404) (ne08799)

J SERIES VOLTAGE SELECTING AND FUSED CONNECTORS





Panel Cutout

Enable equipment to operate anyplace in the world without modification when installed. Includes internationally approved connector, fuseholder and voltage selector card. 6 amps, AC max. current: 50/60Hz. 100, 120, 220, 240VAC operating voltages. Accepts ¼" x 1¼" fuses *(not included, see product index)*. All models UL recognized. **Types 6VJ1, 6J4** CSA certified. **4 suffix** on type number denote available voltage selection for **J** models. All connectors are filtered except **type 6VJ1.**

Stock No.	Type	W x H x D	1-24	25-49	50-99	100-249

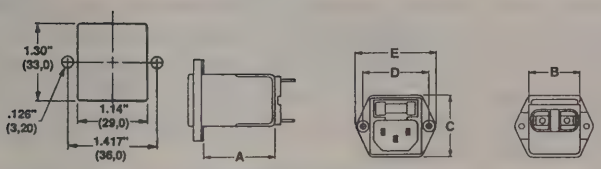
(7284) (de01913)

GG SERIES POWER ENTRY MODULES

GG1 Series



Filtered power entry modules combine general purpose RFI filter with IEC 320 power cord connector and single or dual metric fusing. 50/60 Hz. 0.250" (6.35) fast-ons (**GG1** in type number) for load side terminations. Models with ground choke to isolate equipment chassis from external ground at RF frequencies and wire lead models (**GG8** in type number) are available. *Contact your local Newark sales office.* UL recognized, CSA certified, VDE approved. Accept 5x20mm fuse(s) *(not included, see product index).*

L AND LA SERIES RFI FILTERED POWER ENTRY MODULES

EDL1S

EDL4C

EFLA/EZLA

L series can be specified with North American or European (**"M"** suffix) fusing capabilities; **LA series** has selectable North American and European fusing capabilities. Features IEC connector. DPST on/off switch (**"S"** suffix) is available. Voltage selector is available; **"2"** suffix denotes 120/240V, while **"4"** suffix denotes 100/120/220/240V. Numerical prefix (**"2"** through **"6"**) denotes amps rating at 120V. Flange mounting standard; **"C"** suffix denotes snap-in mounting. All units are UL recognized, CSA certified, VDE and SEV approved. All units (except unfiltered **EL series**) have RFI power line filters. All **EDL** have general-purpose RFI filters for controlling line-to-line and line-to-ground noise. All **EHL** have medical filters. **EFLA** has general-purpose filter for susceptibility applications. **ZLA** has premium performance filter designed to bring most digital equipment into compliance with VDE 0871, Level B (as well as FCC Part 15J, Class B) conducted emissions limits. **EL** are unfiltered.

SR SERIES AC CONNECTORS

6ESRM-P

6ESRF-3

6ESRFC3

6ESRM-3

6ESRMC2

AC receptacles available in flange mounted, snap-in or PC mounted models. Insulator material is thermoplastic UL-V-2 flame class. Prongs are solid brass, nickel-plated. Terminals are tin-plated brass. Rated 6 amps/250V. UL recognized, CSA certified. VDE and SEV approved. SEMKO approved except **types 6ESRF-3** and **6ESRFC-3.** **"M" suffix** indicates male connector, **"F"** denotes female connector and **"C"** indicates 0.059" (1.50) panel, snap-in mount. Models with **"P"** suffix in type number have PC terminals, *contact your local Newark sales office.*

Stock No.	Type	W x H x D	1-24	25-49	50-99

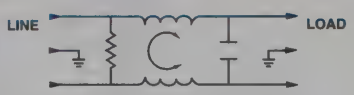
H SERIES RFI FILTERS

6EH1



Meets UL 544 specifications for patient care equipment. Also CSA certified, plus VDE and all except 10A models are SEV approved. **Type 10EH4C** implements a separate ground circuit inductor to isolate equipment chassis from power line ground at RF frequencies. *Contact your local Newark Sales office.*

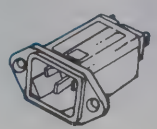
(7420) (de01895)

EEA SERIES RFI FILTERS



EEA1

Compact, cost-effective RFI filters have IEC socket package. All units maintain maximum line-to-ground leakage current of 0.25mA @ 120VAC/60Hz. At 250VAC/50Hz **EEA** units are capable of 0.42mA. UL recognized. CSA certified and VDE approved.

120/250 VAC, 50/60 Hz AC

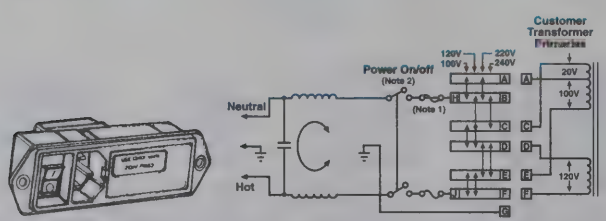
MODULES FOR HEALTH CARE EQUIPMENT



EHM types combine fully configured **M series** of power entry modules with RFI power line filter to allow equipment to meet UL544 specs for patient and nonpatient care equipment. Leakage current of 2μA at 120VAC, 60Hz. Rated 5A @ 120V. All have IEC connector, selectable fuse holder, RFI filter and are available with DPST on/off switch and/or voltage selector. UL recognized, CSA certified, VDE approved **"S"suffix** denotes DPST on/off switch; **"4"** indicates 4V selector.

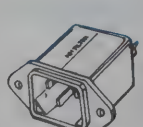
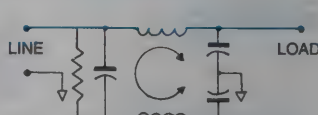
ED/EF SERIES RFI POWER LINE FILTERS

ED1, EF1F



EF1



ED series are high performance filters for use where line-to-line and low frequency line-to-ground noise must be controlled. Incorporate an IEC (International Electrotechnical Commission) connector and feature very low leakage current. Have 0.250″ faston terminals on load side. **ED2 series** have right angle faston terminals. UL recognized, CSA certified, VDE approved and SEV approved (all but 10A model). **EF series** meet low leakage requirements and have IEC power line connector. For RFI control of line-to-ground noise. Solder terminals on load side which can be soldered or crimp terminated. Types ending with **F** suffix have 0.250″ fastons and are SEMKO approved. UL recognized, CSA certified, VDE approved.

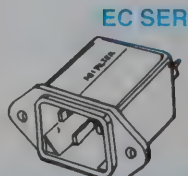
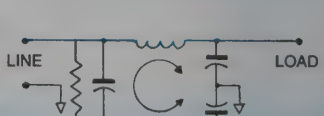
(7537) (ne01894)

EC SERIES RFI FILTERS



EC1



Provide highest attenuation for any standard filter available in a small package size. Combine high common mode inductance with high differential-mode capacitance and minimal parasitic elements, for effective attenuation of line-to-ground and line-to-line noise across the frequency range. VDE and CSA approved, and all but 10A model are SEV approved. UL recognized.

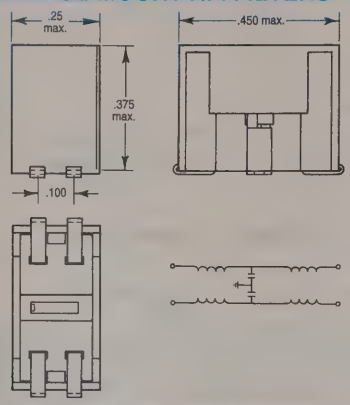
BLF SERIES SURFACE MOUNT RFI FILTERS



BLF series RFI filters eliminate noise on the signal line. Filter design features a U-shaped, high-resistivity nickel-zinc ceramic ferrite. Parallel first and second leg is surrounded by a grounding/shorting strap and a monolithic ceramic chip capacitor for each line. Board level filter attenuate signal line noise at the frequency range of 10 to 1000MHz. Max. attenuation: 40MHz to 400MHz. Withstands dielectric voltage of 1000VAC for 60 seconds. Inductance: 2µH. Tolerance: ±20%. UL recognized. CSA approved.

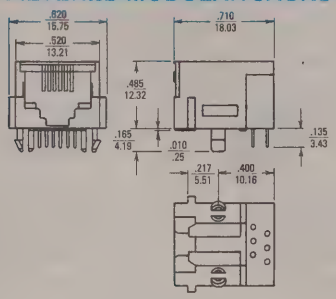
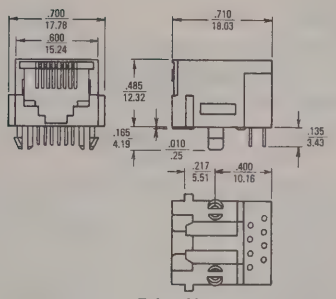
FILTERED MODULAR JACKS



RJ11 N



RJ45 N

Cost-effective, space-saving solutions to the problems of RFI on signal lines. "Signal Sentry" filtered modular jacks are ideal for telecommunications equipment, computers, terminals and peripherals. Inductive and optional capacitive elements effectively remove common-mode noise from incoming signals and limits unwanted signal line emissions. **N series** offer inductance and optional shielding plus a lower profile for board stacking applications. Type numbers with **S suffix** incorporate sleeve ferrites for handling crosstalk problems, while type numbers with **B suffix** incorporate block ferrites for higher performance. UL recognized and CSA certified.

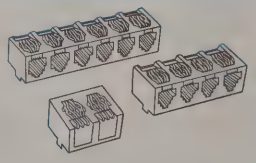
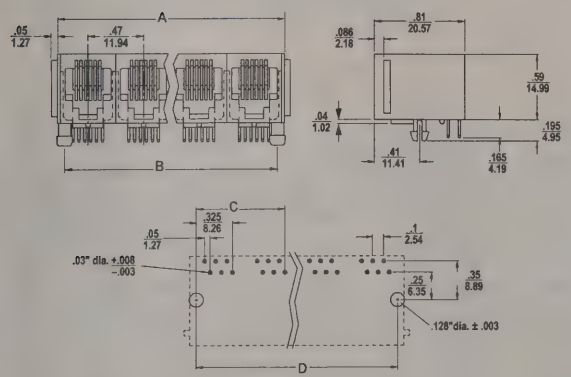
L SERIES FILTERED MODULAR GANG JACKS

NEW





Modular jacks combine capacitance with inductance for optimum filtering performance. High resistivity nickel-zinc ceramic ferrite block inductor. Phosphor bronze contacts with gold plating. PC board terminals. Glass-filled polyester housing. Dielectric withstanding voltage: 1000VAC for 60 sec.

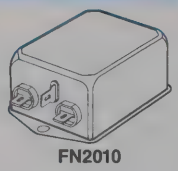
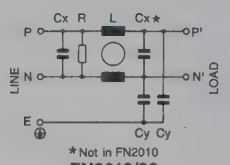
FN2000 SERIES COMPACT SINGLE-PHASE FILTERS

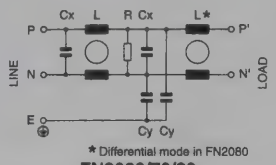


FN2010

FN2060



* Not in FN2010
FN2010/20



* Differential mode in FN2080
FN2060/70/80

For general-purpose filtering requirements. Compact form factor for applications in which space is at a premium including precision instrumentation, switched-mode power supplies and motor drives. All are provided in chassis-mount metal housings. **Type -06** has industry-standard size fast-on connection. UL recognized, CSA certified, VDE approved.

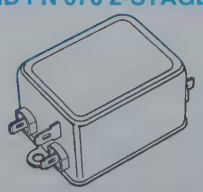
FN 660 AND FN 670 2-STAGE FILTERS

NEW



High-performance filters for tough EMI problems. **FN 660 series** is rated to 20A for large systems. Maximum leakage current is 0.5mA @ 220VAC/50Hz. **Type FN 670** has higher component values for high frequency common and differential mode attenuation. Industry-standard mounting with 0.250" faston I/O. UL listed, CSA certified, VDE approved.

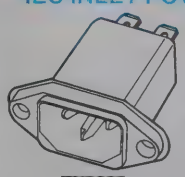
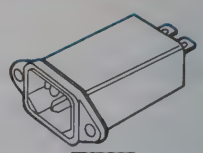
IEC INLET POWER LINE FILTERS



FN9223



FN9222

IEC inlet filters meet IEC 950 requirements. Output through 0.250" (6.3) faston/solder lug connectors. The **FN9223** is a compact moderate performance filter, 1.9" (8mm) deep. The **FN9222** is a higher performance filter rated to 15A. **FN9222-15/06** has IEC320 "HOT" inlet connector. **E Suffix** has standard IEC inlet connector. **B Suffix** are low leakage current for medical applications. **S suffix** are snap-in quick assembly. **FN9222** –10 Amp 2.0" (51mm) deep, 12A and 15A are 2.4" (60mm) deep. All ratings at 125/25VAC, 50/60 Hz.

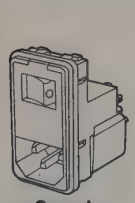
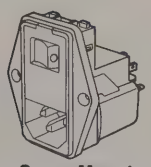
FILTERS

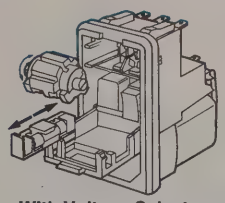
FUSED INLET FILTERS WITH SWITCH OR VOLTAGE SELECTOR



Snap-In



Screw Mount



With Voltage Selector

Flexible package combines an IEC 320 inlet, dual fuse holders, DPST switch or voltage selector, with moderate and higher performance filter. **FN37x** products have 4-position voltage selector. Units supplied with U.S. style 3 AG fuse holders. The fuse holder is for metric 5 x 20mm applications. **B** in type number indicates low-leakage medical version. Depth is 2.2″ (57mm) for moderate performance **FN372**, **FN378** and **FN388** products. **FN379** and **FN389** are 2.6″ (66.5) deep.

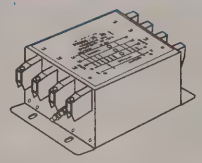
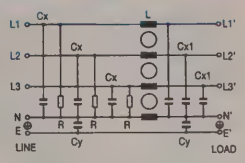
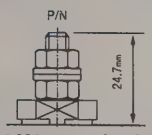
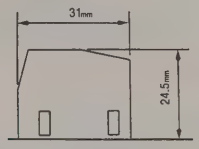
HIGH-CURRENT FILTERS







Type /24 M6 screw lead through



Type /33 safety terminal block for 10mm² or AWG6 cables

FN 356 series filters for high-current applications. Fully compliant with IEC 950, ideal for mainframe computer systems. Single-stage LCR circuit for each phase, neutral line provides high attenuation of symmetrical and asymmetrical interference. Max. voltage: 440VAC @ 40°C. Operating frequency: DC to 60Hz @ 40°C. UL recognized, CSA certified, VDE approved, SEV approved.

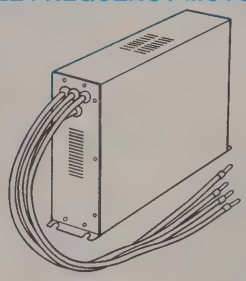
3-PHASE VARIABLE FREQUENCY MOTOR DRIVE FILTERS

NEW



3-phase filter designed for variable frequency motor drives. 480VAC rated two-stage design is optimized for drives with output cable lengths to 150′ (50m). Current ratings range from 7 to 180A. Use in applications to bring systems with variable frequency motor drives into compliance with EN55011 and EN55014.

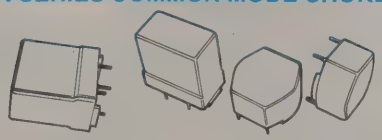
RN SERIES COMMON MODE CHOKES



PC mount common mode chokes for low level EMI problems or as part of a larger filter with capacitors. Highest attenuation at resonant frequency (F res). **RN112** is a horizontal mount package, 0.67 x 0.67 x 0.5″ (17 x 17 x 13) high. **RN212** is a vertical mount with a 0.35 x 0.7″ (9 x 18) footprint and 0.53″ (13.5) height. **RN122** is a horizontal mount, 1.1 x 1.1 x 0.65″ (28 x 28 x 16.5mm). **RN222** is a vertical mount, 0.71 x 1.22″ (18 x 31) footprint and 1.2″ (29.3) height. UL recognized and VDE approved.

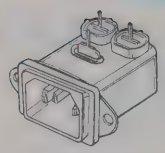
FN9226 SERIES IEC INLET FILTERS



FN9226 FN9226B

Compact inlet filters offer right-angle PC board mounting utilizing only 1.1 x 1.4″ of PC board space. Moderate performance filter above 1MHz in common and differential modes. Metal tab mounting ears help secure a solid chassis ground and minimizes board space. Rated 250VAC, 50/60 Hz. **Type FN9226B** is a version for medical applications.

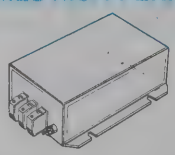
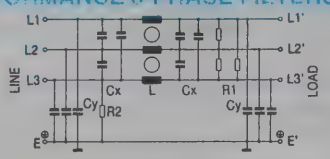
FN351 SERIES HIGH-PERFORMANCE 3-PHASE FILTERS

NEW





Ideal for variable frequency inverters and motor drives, these 3-wire filters feature high differential and common mode attenuation. Fully insulated safety contacts for blind installations. High leakage current to ground. Must be installed in a wired ground industrial environment. Rated 440VAC, 50/60Hz. UL recognized.

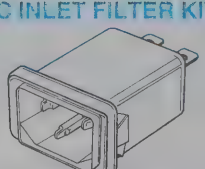
IEC INLET FILTER KITS



FN9223 FILTER

Design kits are ideal for test labs and prototype departments. Kits contain **types FN9222, FN9223** and **FN9260** IEC inlet filters. Kit 1 has all current ratings of **types FN9222** and **FN9223** filters in screw mount and snap-in versions. Kit 2 has all **type FN9222** and **FN9223** and **FN9260** in screw mount versions. Kit 3 has the medical versions of the popular inlet filter families.

COAXIAL CERAMIC BANDPASS FILTERS

BP series surface mount filters are constructed using highly stable coaxial ceramic dielectric resonators for a high in-circuit Q which results in low in-band insertion loss. Operating temperature: –30°C to +85°C.

Resonator Size	Width 2-Pole	Width 3-Pole	Height
3mm	0.300″ (7.63)	0.425″ (10.81)	0.155″ (3.94)

3-TERMINAL CERAMIC EMI FILTER CHIPS

SF series surface mount filter chips are well suited for EMI suppression in digital circuitry. Nickel barrier terminated for solder heat resistance. Non-polar. Temperature coefficient: X7R. Tolerance: +50/–20%. Operating temperature: –55°C to +125°C. Standard EIA sizes. **Sold in multiples of 10 or in reels of 4000. Type SF1806 sold in reels of 2000.**

NEWARK PROVIDES OPTIMUM SERVICE.
SAME-DAY SHIPMENT WHEN YOU PLACE YOUR ORDER BY 5:00 PM C.S.T.

Electronic Terms and Measurements

Resistance

Opposition to current flow. Basic unit is the ohm (Ω).

1 kilohm — kΩ	1,000 or $1x10^3$ ohms
1 Megohm — MΩ	1,000,000 or $1x10^6$ ohms

Voltage

Electromotive force. Basic unit is the volt (V).

1 millivolt — mV	1/1,000 or $1x10^{-3}$ volt
1microvolt — µV	1/1,000,000 or $1x10^{-6}$ volt

Current

Movement of electricity. Basic unit is the ampere (A).

1 milliampere — mA	1/1,000 or $1x10^{-3}$ ampere
1 microampere — µA	1/1,000,000 or $1x10^{-6}$ ampere

Frequency

Number of cycles per second. Basic unit is the hertz (Hz).

1 kilohertz — kHz	1,000 or $1x10^3$ hertz
1 Megahertz — MHz	1,000,000 or $1x10^6$ hertz
1 Gigahertz — GHz	1,000,000,000 or $1x10^9$ hertz

Time

Basic unit is the second (s).

1 millisecond — ms	1/1,000 or $1x10^{-3}$ second
1 microsecond — µs	1/1,000,000 or $1x10^{-6}$ second
1 nanosecond — ns	1/1,000,000,000 or $1x10^{-9}$ second

Temperature Conversion

°C	°F
100	212
80	175
60	140
40	105
35	95
30	85
25	75
20	70
15	60
10	50
5	40
0	32

Conversion Table

Metric to U.S.	U. S. to metric
1 centimeter = 0.39 inch	1 inch = 2.54 centimeters
1 millimeter = 0.039 inch	1 inch = 25.4 millimeters
1 meter = 3.28 feet	1 foot = 0.305 meter
1 gram = 0.035 ounce	1 ounce = 28.35 grams
1 kilogram = 2.2 pounds	1 pound = 454 grams
1 milliliter = 0.034 fl. ounce	1 pound = 0.45 kilogram
1 liter = 0.264 gallon	1 fl. ounce = 29.57 milliliters
	1 gallon = 3.79 liters

Operating Life for Capacitors

Where operating life is given at a certain temperature, for every drop of 10°C life expectancy will double.

If life expectancy is 1,000 hours at 105°C
this would double to 2,000 hours at 95°C
and double again to 4,000 hours at 85°C

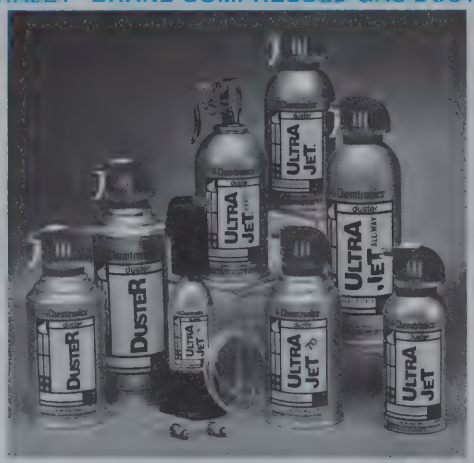
DUSTERS, DEGREASERS AND CLEANERS

ULTRAJET® BRAND COMPRESSED GAS DUSTERS



Ultrajet® brand dusters are the most powerful dusters on the market. Nonflammable dusters remove dry contaminants from many kinds of surfaces. Dusters are safe on plastics and leave no residue.

Type ES1020, the Ultrajet® Duster, provides the biggest blast to clean anything fast. 100% ultra-pure HFC-134a.
TypeES1620, the Ultrajet® All-Way Duster, provides the same power as **type ES1020** but it also sprays in any direction without the risk of dispensing a liquid spray that can freeze and damage sensitive surfaces. 100% ultra-pure HFC-134a.
Type ES1015, the Ultrajet® 70 Duster, provides a powerful cleaning blast at an economic price. 100% ultra-pure HFC-134a.
Type ES1020K, the Ultrajet® Duster System, has a precision surgical-grade chrome trigger for pinpoint control. The system sprays in any direction with a 36″ flex-extension tube. 100% ultra-pure HFC-134a.
Type ES1217, Duster, provides regular strength cleaning at an economical price. Nonflammable. Made with HFC-134a.

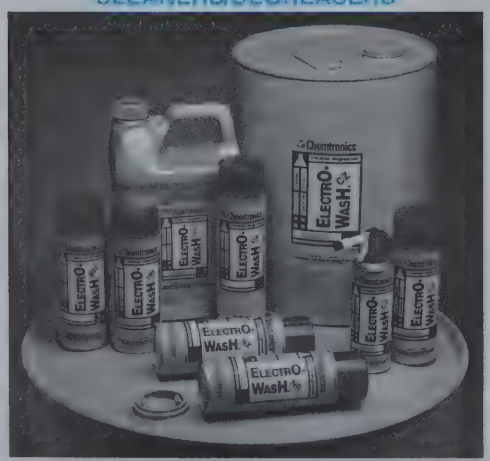
CLEANERS/DEGREASERS



These general purpose electronics and electrical cleaners remove a wide variety of contaminants including oil, grease, oxides, handling soils, plus flux and coatings from PC boards, cable splices, control systems, office equipment, and motors. All aerosol/BrushClean™ products feature the All-Way spray valve.

Type ES7100, Electro-Wash® CZ, is the non-ozone depleting, nonflammable cleaner safe for use on plastics. Contains CIROZANE™ CFC replacement chemistry based on HFE technology from 3M. Also available in 1, 5, and 55 gallon quantities, *contact your local Newark sales office for details.*

Type ES1675, Electro-Wash® PN, is a nonflammable cleaner/degreaser safe for use on plastics. Contains HCFCs.

CONTINUED

CLEANERS/DEGREASERS (CONT.)

Type ES1210, Electro-Wash® PX, is an extra strength universal cleaner/degreaser safe for use on plastics. Its flammable and ozone safe. Formerly CFC Free Electo-Wash 2000. Also available in 1, 5, and 55 gallon quantities, *contact your local Newark sales office for details.*

Type ES1603, Electro-Wash® PR, is a regular strength cleaner safe for use on plastics. Its flammable and ozone safe. Formerly Cleaner Degreaser, **type CV2116**.

Type ES1601, Electro-Wash® NX, is an extra strength nonflammable cleaner/degreaser. Test on plastics. Contains HCFCs. Formerly Electronics Cleaner Degreaser 2000.

Type ES1607, Electro-Wash® NXO, is an ozone safe, nonflammable, extra strength universal cleaner/degreaser. Test on plastics. Also available in 1, 5, and 55 gallon quantities, *contact your local Newark sales office for details.*

Type ES1604, Electro-Wash® NR, is a regular strength, nonflammable, cleaner/degreaser. Test on plastics. Contains HCFCs. Formerly No Flash Cleaner Degreaser, **type CV2216**.

Stock No.	Type	Description	Size	Each

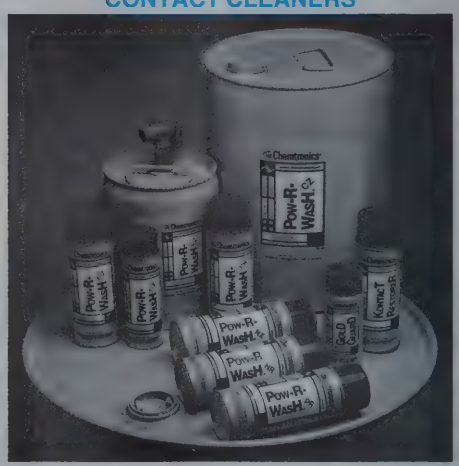
CONTACT CLEANERS



Contact cleaners remove oily carbon soils, greases, and oxides from contact surfaces. Use in all phases of electronics and electrical contact maintenance including metal contacts, plastic embedded contacts, relays, breakers, and controls. All aerosol/Brush-Clean™ products feature the All-Way spray valve.

Type ES7300, Pow-R-Wash™ CZ, is an ozone safe, nonflammable cleaner safe for use on powered-up contacts and surrounding plastics. Contains CIROZAINE™ CFC replacement chemistry based on HFE technology from 3M. Also available in 1, 5, and 55 gallon quantities, *contact your local Newark sales office for details.*

Type ES1674, Pow-R-Wash™ PN, is an nonflammable cleaner safe for use on powered-up contacts and surrounding plastics. Contains HCFCs.

Type ES2202, Pow-R-Wash™ NX, is an extra-strength, nonflammable contact cleaner that quickly removes soils from metal-to-metal contacts. Contains HCFCs. Test on plastics. Formerly Contact Clean 2000.

Type ES1606, Pow-R-Wash™ NR, is a regular strength, nonflammable contact cleaner. Contains HCFCs. Test on plastics. Formerly No Flash Contact Clean, **type CV1116**.

Type ES1605, Pow-R-Wash™ PR, is a regular strength, flammable contact cleaner safe for use on plastics. Ozone safe. Formerly Contact Cleaner, **type CV1016**.

Type ES1628, Kontact Restorer®, is a one step contact cleaner and lubricant. Prevents degradation of electrical signal. Contains HCFCs. Test on plastics.

Type ES601,Gold Guard™, is the cleaner lubricant for gold and other noble metal contacts and connectors.

Stock No.	Type	Description	Size	Each

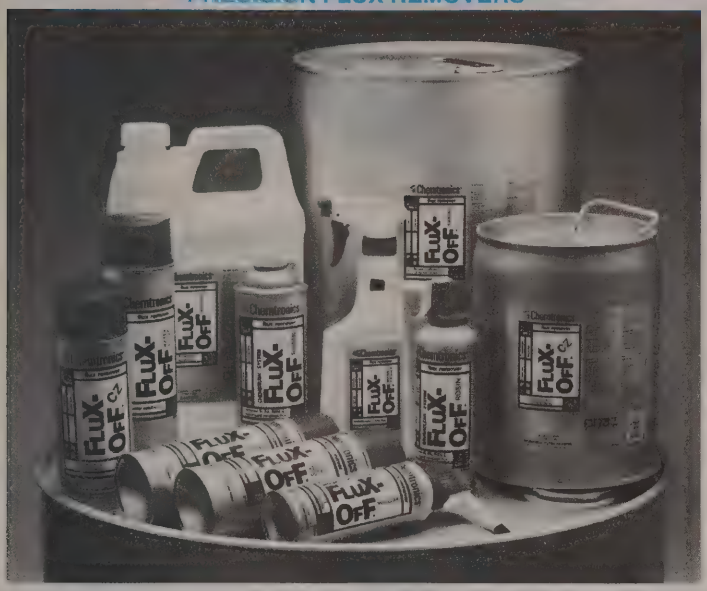
FLUX REMOVERS, CLEANERS AND FREEZE SPRAYS

PRECISION FLUX REMOVERS



Flux Removers are formulated to remove all types of rosin (type R, RA, and RMA), no-clean (both rosin and synthetic, type SA), and water soluble (type OA) flux. Removers available in aerosol, BrushClean™ System and liquid form for benchtop dispensor, vapor degreaser, ultrasonic, and dip tank applications. All aerosol/BrushClean™ products feature the All-Way spray valve.

Type ES7200,Flux-Off® CZ, is an ozone safe, nonflammable flux remover safe for use on plastics. Washes away types R, RMA, RA, SA, and OA fluxes.

Stock No.	Type	Description	Size	Each
00Z1593	ES7200	Flux-Off® CZ	12 oz.	37.01
00Z1594	ES7208B	Flux-Off® CZ BrushClean™	5 oz.	19.25

Type ES1035,Flux-Off® Rosin is an ozone safe flux remover safe for use on plastics. Washes away rosin and rosin-based no-clean fluxes. Formerly CFC Free Flux-Of 2000.

Stock No.	Type	Description	Size	Each
00Z1137	ES1035	Flux-Off® Rosin	10 oz.	16.23
00Z1197	ES1694T	Flux-Off® Rosin BrushClean™	5 oz.	13.70

Type ES1692, Flux-Off No Clean, is nonflammable. Test on plastics. Removes No Clean flux. Formerly Heavy Duty Flux-Off 2000.

Stock No.	Type	Description	Size	Each
00Z1199	ES1692	Flux-Off® No Clean	14.5 oz.	18.07

Type ES1530, Flux-Off® Water Soluble, is an ozone safe flux remover for cleaning water soluble flux from boards with water sensitive components. Safe to use on plastics. Formerly Flux-Off II and Flux-Off NR 2000.

Stock No.	Type	Description	Size	Each
00Z1083	ES1530	Flux-Off® Water Soluble	13.5 oz.	13.51
00Z1473	ES830B	Flux-Off® Water Soluble BrushClean™	6 oz.	9.78

Type ES1631, Flux-Off® Heavy Duty, removes encrusted rosin and synthetic-based (type SA), non-flammable, no-clean flux and rosin flux. Test on plastics. Can also be used to remove uncured epoxy from misprinted boards.

Stock No.	Type	Description	Size	Each
00Z1883	ES1631	Flux-Off® Heavy Duty	12 oz.	33.05

(7429) (de02627)

AUDIO/VIDEO CLEANERS

ES820L ES2400

These cleaners clean and protect optical, magnetic tape, and disk heads. Cleans most A/V equipment including: TVs, VCRs, movie cameras and projectors. Also cleans PC boards, contacts, switches, connectors, and scanner equipment.

Type ES820L, Head Cleaner™ II, effectively removes soils from magnetic and optical heads and disk drives. Safe for use on plastic. Flammable and ozone safe. Apply to head surfaces with Chamois Tips™ Swab sold separately.

Type ES2400,Tun-O-Wash® Cleaner, is the original fast drying cleaner for electro-mechanical and electronic tuners. Safe for use on plastic. Flammable and ozone safe.

Stock No.	Type	Description	Size	Each
00Z1420	ES820L	Head Cleaner™ II	8 oz. Liquid	10.22
00Z1193	ES2400	Tun-O-Wash®	12.5 oz. Aerosol	18.51

(7423) (de02390)

FREEZE SPRAYS

Freez-It® freeze sprays are circuit refrigerants used to locate malfunctioning components on PC boards. Sprays are extremely effective and easy to use plus they provide heat sink protection for sensitive components during soldering and desoldering. Ozone safe.

Type ES1050, Freez-It®, is a high-performance, pinpoint accurate freeze spray for isolating individual thermal intermittant/failed components on PC boards.

Stock No.	Type	Description	Size	Each
00Z1135	ES1050	Freez-It®	10 oz.	13.41
00Z1212	ES1550	Freez-It®	15 oz.	18.24

Type ES1551, Freez-It® Antistat, is a high-performance, pinpoint accurate freeze spray that safely cools individual static-sensitive components. Static dissipative. Ozone safe.

Stock No.	Type	Description	Size	Each
00Z1214	ES1551	Freez-It® Antistat	15 oz.	18.45

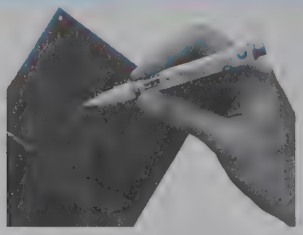
REPAIR/PROTOTYPING TOOLS

CIRCUITWORKS® REPAIR/PROTOTYPING TOOLS

CircuitWorks® brand's comprehensive line of conveniently packaged and precision dispensing rework and repair products make PC board repair and prototyping faster, easier, and more accurate. All are packaged in unique delivery systems to provide superior performance and pinpoint accuracy. The full range of products meets technicians needs for electronics rework and prototyping - repairing, cleaning, protecting, lubricating, bonding, and restoring electrical conductivity to PC boards and components.
(29681) (ne29681)

CIRCUITWORKS® CONDUCTIVE PEN



- **Quickly Creates Conductive Silver Traces on Most Surfaces**
- **Valved Pen Tip for Easy Application**
- **Can be Soldered at Low Temperatures**
- **Dries in Minutes at Room Temperature**
- **Choice of Microtip for Fine Lines or Standard Tip for Wider Lines**

Pen dispenser draws highly conductive silver traces jumpers and shielding with precision and control.

00Z1497 Type CW2200STP Standard Tip. **Each** **20.54**
00Z1498 Type CW2200MTP Microtip. **Each** **20.54**
(29682) (ne29682)

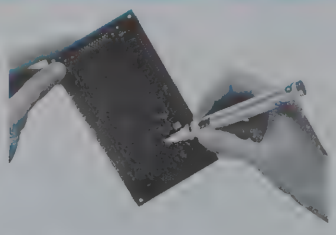
CIRCUITWORKS® OVERCOAT PEN

- **Protects Conductive Pen Traces**
- **Repairs Permanent Solder Mask**
- **Protects Against Shorting, Arcing, Abrasion and Moisture**
- **Dries in Minutes at Room Temperature**
- **Choice of Clear or Green Coating**

Pen dispenser provides precise application of a tough protective acrylic conformal coating.

00Z1543 Type CW3300C Clear. **Each** **18.00**
00Z1868 Type CW3300G Green. **Each** **18.00**
(29683) (ne29683)

CIRCUITWORKS® CONFORMAL COATING REMOVER PEN



- **Removes Most Types of Coatings in Seconds**
- **Spot Cleans Tight Tolerance Areas on Circuit Boards**
- **Marker Dispenser Provides Controlled and Exact Application**
- **Evaporates Quickly**
- **Provides Low Surface Tension for Superior Wetting**

Pen precisely removes silicone, acrylic and urethane coatings for PCBs.

00Z1869 Type CW3500. **Each** **12.91**
(29684) (ne29684)

CIRCUITWORKS® FLUX DISPENSING PENS

Common Features:
- **Chisel-Tip Marker Provides Exact Delivery of Flux to Surface**
- **Easily removed with Appropriate Flux Remover Pen or Flux-Off® Flux Remover**

No-Clean Flux Dispensing Pen:
- **Applies a Patented Noncorrosive, Halide Free, Organic No-Clean Flux**
- **Flux Meets Bellcore TR-NWT-000078 and IPC SF-818 for Surface Insulation Resistance**

Rosin Flux Dispensing Pen:
- **Applies a Noncorrosive Type R Flux**
- **Flux Meets MIL-F-14256 E+F Type R and RMA**

Pen applies flux with precision and control.

00Z1870 Type CW8100 No-Clean Pen. **Each** **7.25**
00Z1871 Type CW8200 Rosin Pen. **Each** **7.02**
(29685) (ne29685)

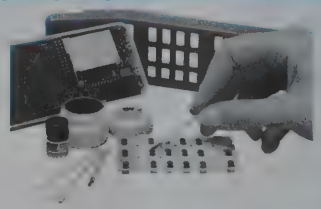
CIRCUITWORKS® FLUX REMOVER PEN

- **Completely Removes Flux in Seconds**
- **Spot Cleans Tight Tolerance Areas on Circuit Boards**
- **Marker Dispenser Provides Controlled and Exact Application**
- **Dries Fast**

Pen percisely removes flux from printed circuit boards.

00Z1872 Type CW9100 No-Clean Flux Remover Pen. **Each** **10.03**
00Z1873 Type CW9200 Rosin Flux Remover Pen. **Each** **9.60**
00Z1874 Type CW9300 Water Soluble Flux Remover Pen. **Each** **9.60**
(29686) (ne29686)

CIRCUITWORKS® RUBBER KEYPAD REPAIR KITS



- **Restores Electrical Conductivity to Worn Carbon Contacts**
- **Forms a Tough, Flexible, Wear-Resistant Surface**
- **Repairs Tested to 500,000 Keystrokes**

Choose from 2 conveniently-sized kits for permanent repair of rubber keypads. **Type CW2605** can be used for over 50 rubber button contact repairs. **Type CW2610** can be used for over 200 rubber button contact repairs.

00Z1875 Type CW2605 Single Pack. **Each** **14.52**
00Z1876 Type CW2610 Twin Pack. **Each** **36.43**
(29687) (ne29687)

CIRCUITWORKS® GOLD GUARD™ PEN

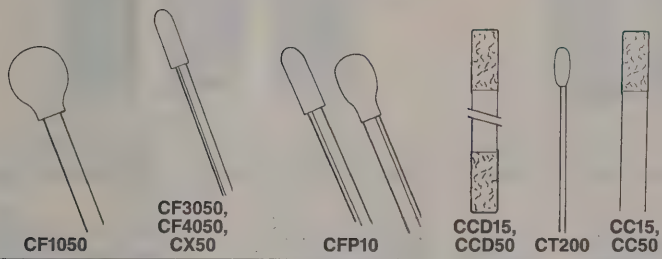
- **Cleans and Leaves Protective Lubricant in One Step**
- **Extends the Life of Noble Metal Contacts**
- **Chisel Tip Marker for Exact Delivery of Solvent to Surface**
- **Safe on Most Plastics**

Pen cleans and lubricates gold and other noble metal contacts and connectors.

00Z1879 Type CW7400. **Each** **12.05**
(29688) (ne29688)

SWABS, PADS AND ENCAPSULANTS

SWABS



Stock No.	Type	Description	Package	Per Pkg.
50F9489	CF4050	2¼″ Mini-swab w/Polypropylene Handle, Rigid Head	50	14.28
50F9490	CF2050	Rectangular Full-Size Swab, 5″ Polypropylene Handle	50	18.11
96F7727	CF15	Foam Over Cotton Bud Swab, 6″ Wooden Handle	15	6.21

PRESATURATED PADS

Pads are premoistened with high-purity cleaning solutions for convenience. **Type CSP20** are a 2-part, cleaning and static control system for CRT screens. Cleans and controls static. **Sold in boxes of 25.**

Stock No.	Type	Description	Each
00Z1516	CSP20	Screen Prep™	25.14

Type CP410 are premoistened lens-grade tissue for cleaning/polishing CRT screens and large optical surfaces. **Sold in boxes of 50.**

Stock No.	Type	Description	Each
00Z1512	CP410	Optic Prep™	23.38

Type CP400 are lint-free, nonabrasive pads presaturated with IPA for cleaning magnetic heads, defluxing PCBs and general-purpose precision cleaning. **Sold in boxes of 50.**

Stock No.	Type	Description	Each
00Z1513	CP400	Chempad™	23.38

CONTINUED

PRESATURATED PADS (CONT.)

Stock No.	Type	Description	Each

Type CP420E are presaturated pads for cleaning and lubircating gold-silver, platinum, and other noble metal contacts. Protects, cleans, and lubricates in one step. **Sold in boxes of 50.**

Stock No.	Type	Description	Each
00Z1514	CP420E	Gold Guard™	41.00

Type CS25 are lint-free urethane foam swabs presaturated with IPA. Contains 1 **type CF2050** foam tip. **Sold in boxes of 25.**

Stock No.	Type	Description	Each
00Z1515	CS25	Chemswab™	29.41

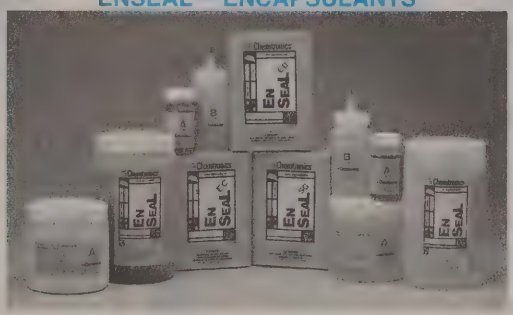
ENSEAL™ ENCAPSULANTS



Enseal™ Encapsulants seal and protect electronic components and printed circuit boards. Enseal™ products are offered in convenient packaging for precision applications. Products are available in 4 oz. squeeze bottles and 32 oz. jar kits. The Enseal™ product line consists of two part 1:1 mix ratio silicones and epoxies for hiding, sealing, and protecting electronics.

ENSEAL™ RTVG AND RTVC

Conveniently packaged silicone RTV encapsulant for protecting stress-sensitive electronic components. Reversion resistant. **G** in type number indicates gray color, **C** indicates clear color.

Stock No.	Type	Description	Size	Each
00Z2001 00Z2002	EN104G EN1032G	• **Thermally Conductive** • **Conceals Components Completely**	4 oz. Kit 32 oz. Kit	29.26 71.64

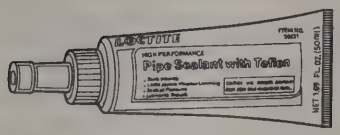
LOCTITE®

ADHESIVE PRODUCTS

ANAEROBIC ADHESIVES

272



Single-component adhesives cure only when confined between metal parts. Solvent resistant, low toxicity, non-flammable. For threadlocking, threadsealing, gasketing, retaining, bonding.

THREADLOCKERS

Lock nuts, bolts and studs to prevent vibration. Seal out moisture that causes corrosion. Seal against fluid leakage and prevent wear.

Small Screw Threadlocker 222 for fasteners under ¼". Low strength.

Stock No.	Type	Size	Each
00Z781	22221	10ml	27.80
00Z782	22231	50ml	58.04

Removable Threadlocker 242® for fasteners ¼" and larger. Removable with hand tools.

Stock No.	Type	Size	Each
00Z783	24221	10ml	27.80
00Z784	24231	50ml	58.04

Permanent Threadlocker 271™ for fasteners (studs) 1" and larger, severe applications or permanent assemblies. Heat required for removal.

Stock No.	Type	Size	Each
00Z785	27121	10ml	27.80
00Z786	27131	50ml	58.04

Hi-Temp/Hi-Strength Threadlocker 272™ for bolts ⅝" to 1" in diameter. Fast cure on most surfaces, including "as received" fasteners. Suited for temperatures up to 450°F. Heat and hand tools are needed to separate parts.

Stock No.	Type	Size	Each
00Z1830	27200	10ml Bottle	15.88

Threadlocker Adhesive Sealant 290 for use on preassembled parts. Ideal for adjustment screws, set screws or maintenance threadlocking. High strength.

Stock No.	Type	Size	Each
00Z787	29021	10ml	14.55
00Z788	29031	50ml	58.04

RETAINING COMPOUNDS

Bond cylindrical metal parts such as bearings, bushings, pulleys and keyways. Restore fit to slightly worn parts. Seal to prevent corrosion. **Type 60921** retaining compound is for filling gaps to 0.005" diametrical. 3000 psi sheer on steel.

Stock No.	Type	Size	Each
00Z803	60921	10ml	27.80

(7517) (de52832)

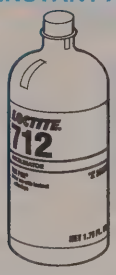
PRISM® THERMAL RESISTANT INSTANT ADHESIVES

Available in low viscosity, high viscosity, and gel formulations. Single-component product toughened with elastomers for high-impact/high-peel strength and improved resistance to heat, humidity, or damp environments. Maintain strength at elevated temperatures. Withstand temperatures up to 250°F.

Stock No.	Type	Size	Each
00Z1275	19757	3g	12.84

(7474) (de04081)

TAK PAK® INSTANT ADHESIVES



20420 TAK PAK® 382 ODC-Free Ultra Performance Tak Pak 382® Adhesive kit. High-temperature performance up to 223°F. Aerosol accelerator.

38240 ULTRA PERFORMANCE TAK PAK® is a high-temperature (to 223°F, intermittent to 250°F), high-viscosity, instant adhesive that withstands thermal cycling. Ideal for wire tacking and component-mounting applications.

18637 TAK PAK® 7452 ACCELERATOR Tak Pak® Accelerator 7452 ODC-Free for bond level applications (acetone). (Acetone may adversely affect some thermal plastic substrates). We recommend Tak Pak® Accelerator 712 for these materials.

TAK-PAK® 712 ODC-Free, with Isopropyl Alcohol (IPA) solvent carrier. Improves cure speed of Loctite cyanoacrylate adhesives. Used where an instant surface cure of cyanoacrylate is desired. Recommended for applications involving printed circuit board wire tacking, and tamper-proofing of adjustable components.

Stock No.	Type	Size	Each
00Z1272	20420	Kit	59.58
00Z789	38240	20ml	46.18

INSTANT ADHESIVES

404

Single-component, fast-setting adhesives for bonding a wide variety of substrates. They contain no solvents and have low toxicity and are non-flammable.

Quick Set™ 404 is a clear instant adhesive specially suited for bonding rubber. Applications: bond belts, bumpers, cushions, and o-rings.

Stock No.	Type	Size	Each
00Z1831	46548	4 fl.oz. Bottle	203.85

Locquic® Primer T 7471 ODC-Free improves cure speed and bond strength of Loctite adhesives. Speeds cure on active surfaces. Provides cure on inactive surfaces. Cleans bonding surfaces. Promotes cure at low temperatures.

Stock No.	Type	Size	Each
00Z1832	22477	4.5 oz. Aerosol Can	61.21
00Z1833	19267	1.75 fl. oz. Bottle	25.33

Retaining Compound 680 medium viscosity, fast-curing liquid. Fixtures in 10 minutes. Provides a shear strength of 4000 psi on steel. Seals and secures cylindrical assemblies up to 0.015" clearance. Authorized by U.S.D.A. Certified by NSF International to ANSI/NSF Standard 61.

Stock No.	Type	Size	Each

DL® PERMATEX® FAST ORANGE® CLEANERS

23116
25116

Type 23116 smooth lotion hand cleaner and **type 25116** fine pumice lotion hand cleaner deep clean the toughest dirt. Biodegradable, waterless, petroleum solvent-free hand cleaner that contains no harsh chemicals, mineral oils or ammonia that can sting cuts and abrasions. Pure, fresh-smelling natural citrus power does the cleaning. With aloe, lanolin, jojoba and Corn Huskers Lotion® for added skin conditioning and protection. Smooth formula gently deep cleans the toughest dirt. Works on laundry stains, greasy stoves, pet odors and other household cleaning needs.

Stock No.	Description	Each
00Z1835	15 fl. oz. Squeeze Bottle Smooth Lotion Hand Cleaner	10.73
00Z1836	15 fl. oz. Squeeze Bottle Fine Pumice Lotion Hand Cleaner	10.73

00Z764	10-8126	1 lb. Jar	70.95

SILICONE COMPOUND

Soft inert silicone grease (tube) with excellent dielectric properties. Also lubricant for rubber and plastics.

00Z579	10-8101	1 fl. oz.	9.86

SILICONE RUBBER ADHESIVE SEALANT

Excellent elastomer cures to a tough, rubbery solid. Resists weathering, vibration, and exposure to oil, moisture, ozone, and temperatures from sub-zero to 450°F. Cures in 24 hours, tack-free in 20 minutes. Clear

00Z486	10-150	3 fl. oz. Tube	7.43

ELECTRONIC GRADE SILICONE SEALANT/ADHESIVE

One-part non-corrosive, neutral cure electronic grad silicone sealant. Remains flexible from -70° to +300°F (-60° to +200°C). Works as an adhesive for many electrical and electronic applications where corrosion is a problem. Dielectric properties, high surface resistivity and resists electrical tracking. Meets the requirements MIL-A-46146A-Type 1; meets requirements of FDA status, FDA regulations #177.260.

00Z1554	19-155	3 fl. oz	6.38

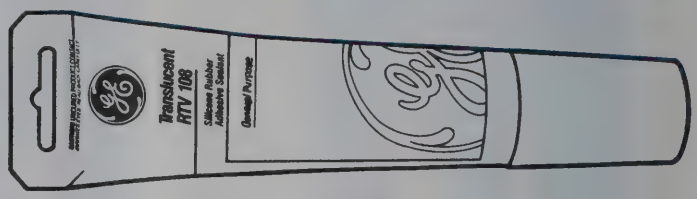
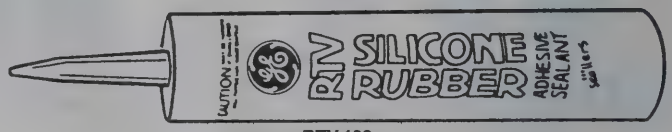
ONE-PART SILICONE SYSTEMS



RTV 108



RTV 102

One and two component rubber adhesives for an unlimited number of industrial applications. Packaged in collapsible plastic tubes and standard caulking cartridges. Cures to tough resilient rubber at room temperature. Will withstand temperatures from –70°F to 500°F. Resists moisture aging, ozone weathering. Will bond to most substrates without primer. Ideal for instant insulation. Available in 2.8 oz tube or 10.1 oz caulker as indicated below.

CLEANERS, LUBRICANTS AND ADHESIVES

ISOPROPYL ALCOHOL (ANHYDROUS)

Extremely pure alcohol cleans tape heads, disc drives, etc. Dissolves and removes oxides from recording heads, also is an excellent degreaser. Leaves no residue. Not an aerosol. Suggested for use with swabs, clean cloth, or by immersion or trigger sprayer.

Stock No.	Type	Description	Each
00Z1010	10-1507	Non-Aerosol Isopropyl Alcohol	6.81

(7569) (ne07178)

HF CONTACT CLEANER/DEGREASER

GC HF Electric is a petroleum/terpene-based cleaner with a flash point over 140°F. An alternative to chlorofluorocarbons in precision cleaning applications in which a higher flash point is desired. Effectively cleans grease, tar, varnish, oil, filling gels, silicones, fluxes, adhesives, and waxes. Non-residue, non-corrosive, non-conductive, non-freezing. Dielectric strength: 38,000V. Not for use on energized equipment. Authorized by USDA for use in federally inspected meat and poultry plants.

Stock No.	Type	Description	1-11	12-144
00Z1562	19-2007	10ml Pen Label Remover	4.48	4.14

(7573) (ne08124)

HYDROCARBON CLEANERS

Jiffy Bath is a contact cleaner/degreaser with silicone lubricant. NOTE: Hydrocarbon cleaners are flammable, use with caution. Safe for most plastics. Check for compatibility before using.

Stock No.	Type	Description	1-4	5-12
00Z1411	19-638	4 oz. Jiffy Bath	4.10	3.80

(7476) (de04249)

LUBRICANTS

GC COMPU-LUBE MOLY/PTFE LUBRICANT

Super low friction, low wear, low viscosity lubricant for the micro computer age. Effective from –60°F to +500°F. Applications: computers, CD and VCR units, printers and all high-speed mechanisms.

Stock No.	Type	Description	Each
00Z1530	19-832	0.5 fl. oz. Squeeze Tube	5.00

GC LUBIT HANDY OILER

Moly/PTFE lubricant super low friction, low viscosity lubricant for the home, work or hobby. Effective from –60°F to +500°F. Cleans, lubricates and prevents rust. Applications: industrial equipment, power tools, sewing machines, computers, CD and VCR units, printers and all high-speed mechanisms.

00Z1531	19-834	0.5 fl. oz. Squeeze Tube	5.00

GC 70 RUST PENETRANT AND LUBRICANT

Cleans most surfaces of grease, tar and grime. Contains a long-lasting lubricant. Use on dies and molds, tools, vending equipment, windows, doors, locks, rusted bolts or fittings, linkages, cables, cranks, electronics gear and battery terminals.

00Z1528	19-070	10 oz. Aerosol	3.46

REACH-ALL PEN OILER

High quality, nongumming instrument oil. Tube extends and retracts.

00Z026	10-984	½ fl. oz.	5.73

SILICONE COMPOUND

Soft inert silicone grease (tube) with excellent dielectric properties. Also lubricant for rubber and plastics.

00Z579	10-8101	1 fl. oz.	9.86

(7521) (de52867)

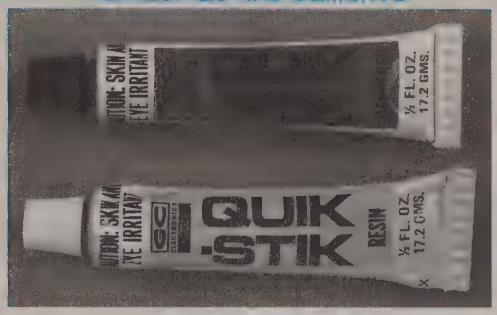
ADHESIVES AND CEMENTS



5-MINUTE EPOXY CEMENT

Clear, fast-curing two-part Epoxy. Handle in 8-12 minutes.

Stock No.	Type	Description	Each
00Z416	10-114	Two ½ oz. Tubes	5.73

5 HOUR SET EPOXY GLUE

Exceptionally hard and strong bond for use in Aerospace applications. Gray white in color.

00Z577	10-347	Two 2 oz. Tubes	17.92

MIRACLE ADHESIVE KIT

Kit contains Cyano-Prep for surface preparation before using adhesive, GR-R-RIP World Famous Super Adhesive and Cyano-Solv for releasing bonds or clean-up.

00Z1550	19-235	1 fl. oz. Cyano-Prep bottle 1 fl. oz Cyano-Solv Bottle 0.10 fl. oz. Gelwald tube 0.075 fl. oz. GR-R-RIP	11.71

CONDUCTIVE EPOXY

Electrically conductive two-part for attaching electrical components. Mix ratio: 1/3. Pot life: 40 minutes. Cure: 24 hours. Vol. res: 5.0 x 10-3 ohm-cm max.

00Z1551	19-2092	5 gm. Kit	21.18

GC POTTING EPOXY

Black opaque highly-filled epoxy is used for potting and encapsulating electronic circuits. Use to environmentally protect or conceal circuits. Working time: 1 hour. Temperature: –40° to +180°F. Volume resistivity: 10^{12} @ 300°F. Dielectric constant: 4.2 (10^4 CPS @ 77°F) Dissipation factor: 0.14 (10^4CPS @ 77°F)

00Z1392	19-823	9 oz. Net Weight	15.39

(7520) (de52866)

COATINGS

PRINT KOTE CONFORMAL COATING

For PC boards. Provides a protective shield to resist environmental contaminants.

Stock No.	Type	Description	Each
00Z442	22-203	2 fl. oz.	8.75
00Z452	22-245	11 oz. Aerosol	14.78

SILVER PRINT CONDUCTIVE PAINT

For PC repair or add-on circuit traces. Pure silver in lacquer-based carrier may be brushed on for either connectors or shielding.

00Z869	22-202	1 oz. Troy Bottle	58.58

NICKEL PRINT CONDUCTIVE PAINT

A quick-drying lacquer-based coating pigmented with powdered nickel.

00Z443	22-207	2 oz. Bottle	10.14

RED X CORONA DOPE

Thixotropic polyester-base red enamel is excellent insulator and corona- and spark-preventive coating. Moisture-proofs, too.

00Z311	10-5002	2 oz. Bottle	7.85

RED GLPT INSULATING VARNISH

Alkyd-base compound resists oils, water, most acids, and alkalis. Use for general insulation on coils, transformers, motors.

00Z012	10-9002	2 oz. Bottle	6.72

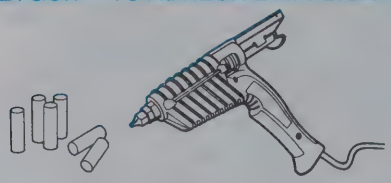
ACRYLIC PLASTIC

Transparent (glass-like) lacquer. Seals, protects, insulates, and tarnish-proofs any object. Coating has high dielectric strength and resists moisture, caustic solutions, and alcohols. Used to coat electronic component and connections as well as metal. Good for use on art objects to protect against tarnish and corrosion.

00Z495	10-8665	11 oz. Aerosol	6.72

(7523) (de52869)

POLYGUN™ TC ADHESIVE APPLICATOR



Hot-melt applicator has a convenient cartridge holder that speeds reloading and features "touch control" thumb-pressure feeding for precise, even flow. Glass-filled nylon body weighs 11 oz. 5-minute warm up, can be left on all day without burnout or backmelt. 390° operating temperature. 110-120VAC, 150W. Supplied with standard 0.090″ replaceable tip. One-year warranty. *Order glue sticks separately on this page.*

93F6941 Type POLYGUN TC. **Each** **87.17**
(7525) (de53289)

JET-MELT™ GLUE STICKS

Clear, high-performance adhesive is for use on many types of plastics, glass, and wood. Ideal for use on acrylic, polyolefins, polystyrene, polyester, and polycarbonate. Exhibits outstanding resistance to shock both at 72°F and 0°F (22.2°C and -18°C). **Sold in 1-lb. boxes.**

Stock No.	Type	1-4	5-9

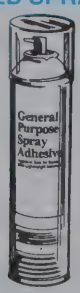
AEROSOL SPRAY ADHESIVES

Aerosol spray adhesives contain no methylene chloride, 1,1,1-trichloroethane or chlorofluorocarbons. **Type Spray 77** fast-drying transparent adhesive has high-tack, low-misting high coverage. For permanently attaching foils, carpeting, foams, paper, cardboard, etc., to painted or unpainted base materials. **Type Spray 90** high-strength contact-type adhesive has the fast contact strength buildup needed for laminates, yet only needs 1 to 2 minutes of drying time. Excellent for decorative laminates, particle board, polyethylene, polypropylene, and SBR rubber. VOC content does not comply with the aerosol adhesive limits in the following California rules: SCAQMD Rule 1168, Ventura County Rule 74.20, and BAAQMD Rule 51. Consult other air quality provisions that may regulate product use. **Sold in 24-oz. can.**

00Z1147 Type SPRAY 77. **Each** **10.68**
00Z1151 Type SPRAY 90. **Each** **13.34**
(7959) (ne09300)

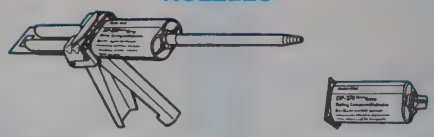
WATER-BASED SPRAY ADHESIVE



Type Spray 201 general-purpose spray adhesive provides bonding strength and heat resistance comparable to a solvent-based product. Reliably bonds a wide range of substrates including paper, fabric, plastics, wood, aluminum, etc. Complies with Southern California aerosol adhesive VOC limits. Nonflammable; stores at Level 1 Code for aerosols. VOC content: <25%. Temperature resistance: 71°C (160°F). Bonding range: 30 minutes (1 surface); 60 minutes (2 surfaces). **Sold in 16¼-oz. can.**

00Z1690 Type SPRAY201. **Each** **11.67**
(7960) (ne09301)

SCOTCH-WELD TYPE EPX ADHESIVE APPLICATOR AND NOZZLES



Scotch-Weld **type EPX** applicator simultaneously meters, mixes and applies 2-component adhesives and potting compounds. Duo-Pak cartridges, *order separately on this page*, snap into **type EPX** applicator. Squeezing trigger advances plunger, which forces the two components through patented nozzle that completely mixes them without introducing air. Sturdy metal construction. 90-day warranty.

93F6943 Type EPX APPLICATOR. **Each** **37.14**
93F6944 Type EPX NOZZLES. **Each** **1.01**
(7526) (de53296)

TYPE DP-100 CLEAR DUO-PAK EPOXY ADHESIVE

Fast-setting, room-temperature curing 2-part adhesive for bonding metals, ceramic wood, etc. Has 3-5 minute work life, develops handling strength in approximately 15 minutes. Low viscosity, ideal for filleting and potting. Meets corrosion requirements of MIL-S-46163. 1.7 oz. For use with **type EPX** applicator, *order separately on this page.*

00Z1161 Type DP-100 CLEAR. **Each** **7.54**
(7527) (de53298)

TYPE DP-190 GRAY DUO-PAK EPOXY ADHESIVE

Flexible 2-part adhesive cures at room temperature to bond rubber, metal, wood, most plastics, and masonry products with higher impact and shock resistance than traditional epoxy adhesives. 90-minute work life. 1.7 oz. For use with **type EPX** applicator, *order separately on this page.*

00Z1162 Type DP-190 GRAY. **Each** **9.12**
(7528) (de53299)

TYPE DP-270 ELECTRICAL GRADE DUO-PAK EPOXY ADHESIVE

Electrical-grade 2-part epoxy adhesive is designed for potting and bonding electronic components. Electrolytically non-corrosive to copper. Nonexothermic, high flow, with a 70-minute work life. Opaque black or clear. 1.7 oz. For use with **type EPX** applicator, *order separately on this page.*

00Z1164 Type DP-270 BLACK. **Each** **7.76**
00Z1163 Type DP-270 CLEAR. **Each** **7.76**
(7529) (de53300)

TYPE DP-605NS URETHANE DUO-PAK EPOXY ADHESIVE

Fast-setting, two-part urethane adhesive/sealant with non-sag properties to allow application to vertical surfaces. Excellent adhesion to wide variety of woods, plastics, primed metals. 5-minute work life. 1.7 ounces. For use with **type EPX** applicator, *order separately on this page.*

00Z1165 Type DP605NS OFF-WHITE. **Each** **9.12**
(7530) (de53301)

TYPE CA-4 "PRONTO" INSTANT ADHESIVE

One-component, high-strength, medium setting (5-40 seconds) cyanoacrylate adhesive. Cures at room temperature at very low pressure. Strong bonds to metals, plastics and rubber. Meets MIL-A-46050C. **Sold in 1-oz. bottle.**

00Z1166 Type CA-4. **Each** **12.47**

TYPE CA-8 "PRONTO" SHOCK-RESISTANT INSTANT ADHESIVE

Produces bonds with exceptional shock resistance when joining plastics, metal, rubber, etc. One-component, high strength, medium setting (5-40 seconds) cyanoacrylate adhesive. Meets MIL-A-46050C. **Sold in 1-oz. bottle.**

00Z1167 Type CA-8. **Each** **12.47**

TYPE CA-40H "PRONTO" HIGH-VISCOSITY INSTANT ADHESIVE

Bonds difficult-to-adhere materials such as aluminum, EPDM rubber, and flexible vinyl. Good resistance to soaps, isopropyl alcohol. One-component, medium setting (5-40 seconds) cyanoacrylate. **Sold in 1-oz. bottle.**

00Z1168 Type CA-40H. **Each** **12.47**

TYPE CA-50 "PRONTO" GEL INSTANT ADHESIVE

Surface-insensitive gel cyanoacrylate can be used in nonsag vertical applications and fills gaps up to 0.020″. Very slow cure rate (20-70 seconds) allows maximum time to reposition parts. **Sold in 0.7-oz. tube.**

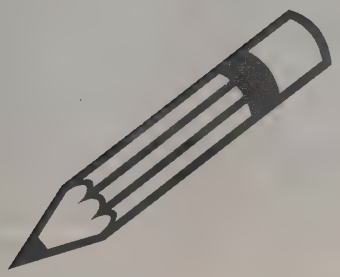
00Z1169 Type CA-50. **Each** **14.92**

TYPE CA-100 "PRONTO" HIGH-PEEL INSTANT ADHESIVE

Toughened cyanoacrylate material provides high T-peel and impact strength, thermal shock resistance, and excellent metal bonding. Relatively high viscosity provides gap-filling capability to 0.020″. Meets MIL-A-46050C, Type II. Class 3. **Sold in 1-oz. bottle.**

00Z1170 Type CA-100. **Each** **14.57**
(7524) (de53288)

NOTES



Value-Added Services

Newark now offers products tailored to your specifications, such as custom-cut cable, kitting, and light component assembly. Call 1-800-4-NEWARK (1-800-463-9275) for details about the special services we offer.

AMP-LATCH® IDC NOVO SOCKET CONNECTOR CABLE ASSEMBLIES

Socket Connector, Single-Ended

Socket Connector-to-Socket Connector

AMP-LATCH® cable assemblies available with Novo socket connector, single-ended or Novo socket connector-to-Novo socket connector configuration. Feature black thermoplastic housing and recessed cover, rated UL94V-0. Insulation displacement gold-plated phosphor bronze contacts on 0.100″ x 0.100″ (2.54 x 2.54) centers. Gray PVC insulated flat ribbon cable has 28 AWG tinned copper, 7/36 stranded conductors on 0.050″ (1.27) centers. UL recognized, CSA certified.

AMP-LATCH® DIP PLUG CONNECTOR CABLE ASSEMBLIES

0.100″ x 0.300″ Double-Ended, Upright/Flipped

0.100″ x 0.600″ Double-Ended, Upright/Flipped

AMP-LATCH® DIP plug double-ended cable assemblies feature one plug in an upright position and the other plug flipped over. This unique design makes these assemblies ideal for various PC board orientations. Available on 0.100″ x 0.300″ (2.54 x 7.62) or 0.100″ x 0.600″ (2.54 x 15.24) centers. Choice of pin 1 designation at top or bottom of plug. Feature black thermoplastic housing assembly and cover, rated UL94V-0. Phosphor bronze contacts with choice of gold or bright tin-lead plating over nickel underplating. Gray PVC insulated flat ribbon cable has 28 AWG tinned copper, 7/36 stranded conductors on 0.050″ (1.27) centers. Available in 6″, 18″, and 36″ lengths. UL recognized, CSA certified.

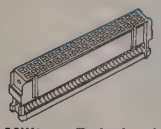
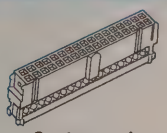
AMP-LATCH® CONNECTOR SYSTEM

AMP-LATCH® NOVO RECEPTACLES



Military-Polarized



Center- and Military-Polarized

Preloaded insulation displacement contacts on 0.100 × 0.100″ centers for mass termination of 0.050″ centerline ribbon cable. Novo dual mating beam design offers higher forces: mating 12.0 oz. max./unmating 1.5 oz. min. Dual beam phosphor bronze contacts are duplex plated with 30µ″ gold on mating end, tin-lead on termination end, with nickel underplate. Accept wire size range 28-26 AWG, solid or stranded. Receptacle consists of housing and cover, constructed of black, UL94V-0 rated thermoplastic. Black, UL94V-0 rated thermoplastic strain reliefs, *ordered separately below.* Available in military-polarized, or center- and military-polarized configurations. Mate with 0.025″ square or round pins. Current rating: 1A per contact max. UL recognized, CSA certified.

AMP-LATCH® ECONOLATCH™ RECEPTACLES

Military-Polarized

Center- and Military-Polarized

Preloaded insulation displacement contacts for mass termination of 0.050″(1.27) centerline ribbon cable. Single-mating beam design provides a high, normal force without high-mating forces. Offers uniform latching of contacts and housing with cover. Phosphor bronze contacts are duplex plated with 15µ″ gold on mating end, tin-lead on termination end, with nickel underplate. Accept wire size range 28-26 AWG, solid or stranded. Receptacle consists of housing and cover, constructed of black, UL94V-0 rated thermoplastic. The dual-recessed cover provides additional ribbon cable alignment during termination. Available in military-polarized or center- and military-polarized configurations. UL recognized, CSA certified. **Sold individually, except type 499997-1, which is sold in packages of 60.**

AMP-LATCH® EJECTION-STYLE PIN HEADERS

Straight-Thru

Right-Angle

Military center and dual-polarized universal ejection-style pin headers available with straight-thru or right-angle 0.025″ (0.64) square posts. 0.100 × 0.100″ (2.54 × 2.54) centers, 0.240″ (6.10) mating post length and 4-sided black thermoplastic housing, rated UL94V-0. Phosphor bronze contacts plated with 30µ″ gold on post/pin mating end, bright tin-lead on termination end. Contacts mate with 0.025″ (0.64) square or round pins with 0.245″ (6.22) maximum and 0.195″ (4.95) minimum lengths. Rated: 1 amp. Temperature range: –55°C to +105°C. UL recognized, CSA certified. *Order latches and polarizer separately below.* Mate with MOD IV center polarized double-row housings; *contact your local Newark sales office for details.*

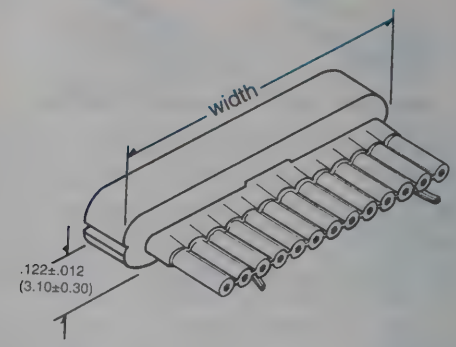
SHIELDED/JACKETED 0.050″ (1.27) CENTERLINE PLANAR RIBBON CABLE



100% shielded/jacketed IDC cable meets FCC EMI/RFI requirements and provides shielding from external electrical interference. Crosstalk attenuation is reduced. Thin, flexible extruded, black PVC jacket increases routing flexibility and allows easier termination. Features 28 AWG 7/36 tinned copper conductors and two drain wires near each edge. Aluminum/polyester/aluminum shield. Gray internal PVC insulation with red polarity stripe. Voltage rating: 300V RMS. Current rating: 1A. Impedance: 45 ohms. Temperature rating: –20°C to +105°C. UL recognized, CSA certified. **Sold in 100′ reels.**

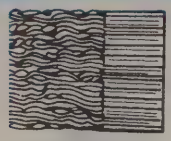
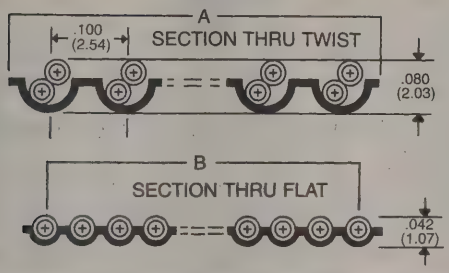
AMP-TWIST® 0.050″ (1.27) CENTERLINE TWIST-TO-FLAT CABLE





Color-coded twist-to-flat PVC insulated IDC ribbon cable features 18″ sections of twisted pairs followed by 2″ sections of flat cable. Twisted pair lengths reduce crosstalk; each adjacent pair is twisted in opposite direction. Flat sections allow mass termination. 28 AWG 7/36 tinned copper conductor. Voltage rating: 300Vrms. Current rating: 1A. Impedance: 115 ohms. 11-color repeat. Temperature rating: –20°C to +105° C. UL listed. **Sold in 100′ reels.**

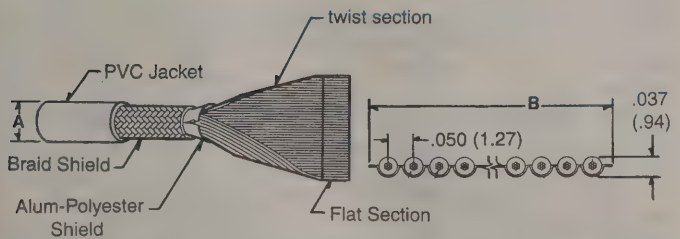
AMP-TWIST® 0.050″ (1.27) CENTERLINE ROUND-TO-FLAT CABLE



Color-coded round-to-flat PVC insulated cable offered in shielded and unshielded configurations terminates easily while providing the flexibility and air flow advantage of round cable. Features 18″ non-laminated twist lengths followed by 2″ laminated flat sections. 28 AWG 7/36 tinned copper conductor. Voltage rating: 300Vrms. Current rating: 0.5A. Impedance (balanced): 125 ohms unshielded, 110 ohms shielded. 11-color repeat. Temperature rating: –20°C to +105° C. UL listed. **Sold in 100′ reels.**

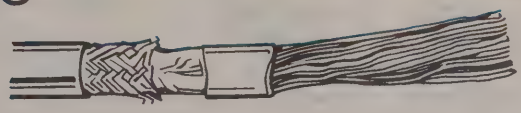
HIGH PERFORMANCE MULTI-PAIR SCSI CABLE



57500-1, 57513-1

Provides the high signal performance necessary for the most complex I/O interface applications. SCSI (Small Computer System Interface) cable is offered in impedances ranging from 65-ohm single ended/105-ohm differential to 90-ohm single ended/144-ohm differential. Choose 25 or 34 color-coded, twisted pairs as well as 28 AWG 7/36 and 30 AWG 7/38 tinned copper sizes. Extra flexible configurations also available to increase routing flexibility in space-restrictive applications. Solid or foam polyolefin insulation buffer tape controls impedances for low crosstalk and reduced propagation delay delta (skew). Shield no.1: aluminum/polyester tape and shield no. 2: #36 tinned copper braid. Polyvinyl chloride jacket. UL recognized, CSA certified. **Sold in 500′ reels.**

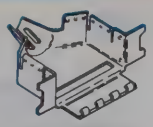
NEWARK ELECTRONICS® IS AN ISO 9002 COMPANY

CHAMP® IDC CONNECTORS

SHIELDED CABLE CONNECTOR KITS

Outside Shield

Bail- or Screw-Lock Assembly



Inside Shield

Kit includes 1 CHAMP® IDC plug (choice of screw- or bail-lock model), 1 outside shield, 1 inside shield. Preloaded contacts available in B-Slot for 24 AWG and 26 AWG solid or 24 AWG 7-strand wire; or E-slot for 26-28 AWG 7-strand wire.

SHIELDED PLUG KITS

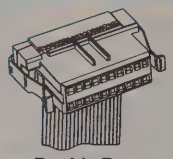
RIBBON CABLE CONNECTORS

AMP-LATCH® SYSTEM 50 RIBBON CABLE-TO-BOARD CONNECTORS



Double Row Receptacle Connector

0.025″ (0.635) centerline spacing in high-density connectors for ribbon cable connections to printed circuit boards. Stainless steel latches. Contacts are copper alloy, plated gold over nickel with tin-lead in termination area. Current rating: 0.5A per contact. Insulation resistance: 5,000 megohms. Housing is black thermoplastic, UL94V-0 rated. UL recognized, CSA certified.

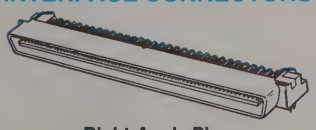
CHAMP® 0.050 I SERIES INTERFACE CONNECTORS

Vertical Plug



Right-Angle Plug

For VESA Advanced Feature Connector (VAFC) and VESA Media Channel (VMC) applications. Ideal for desk-top PC's, multimedia graphic adapters and video devices. VAFC transfers video pixel data up to 150 MB/sec. VMC transfers video streams vs raw pixels up to 132 MB/sec. All feature high temperature, black polyester (LCP) housing, rated UL94V-0. Phosphor bronze terminals with 30μ″ plating in contact area, tin-lead on terminating area and nickel underall. Voltage rate: 250V alternating current. Current rate: 1A max. for signal applications. Operating temperature: –55°C to +85°C. Use receptacle with 0.025 centerline ribbon cable for point-to-point or daisy chain connections; on 0.031″ to 0.063″ thick PC board, choose vertical or right-angle plug depending on application.

FOR VAFC APPLICATIONS: 80-POSITION

CHAMP® IDC CONNECTORS

Plug

Receptacle

Insulation displacement connectors terminate unstripped solid and 7-strand wire, multi-conductor cable, and ribbon and laminated cable. Accommodate wire with soft insulation types in diameters to 0.045″ (1.14). For cable-to-cable and cable-to-panel connector applications. Requires one bail or screw lock hardware kit per assembly; *order separately on this page.*

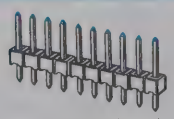
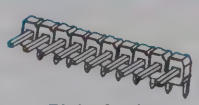
AMPMODU® CONNECTORS

UNSHROUDED BREAKAWAY HEADERS



Vertical



Right-Angle

Full-stick headers break to any size needed. Unshrouded vertical and right-angle versions available in 40-position single and 80-position double row configurations. All feature a flame-retardant, black thermoplastic housing, 94V-0 rated. Copper alloy, drawn wire 0.025″ (0.635) square posts. Choice of 3 platings on contact area: 30μ″ gold, 15μ″ gold or tin-lead. All posts feature tin-lead on solder area with nickel underall. Post lengths include 0.230″ (5.84) and 0.318″ (8.08) for connector mating; 0.110″ (2.79), 0.120″ (3.05) and 0.125″ (3.18) for PC board soldering 3.984″ (0.156) long.

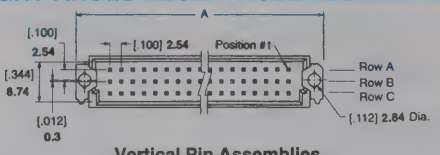
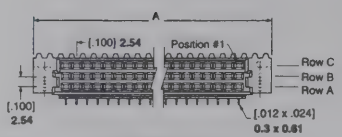
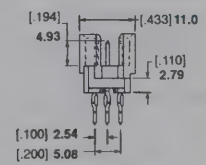
EUROCARD TYPE R VERTICAL PIN AND RIGHT-ANGLE RECEPTACLE ASSEMBLIES



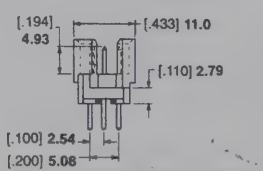
Vertical Pin Assemblies



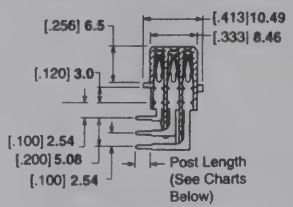
Right-Angle Receptacle Assemblies



Solder Posts



ACTION PIN®



Without Boardlocks

Two-piece 0.100″ x 0.100″ (2.54 x 2.54) pin and receptacle connector assemblies meet DIN 41612 (Level II) and IEC 603-2 requirements. **Type R** vertical pin assemblies feature brass solder posts or 0.025″ (0.64) square phosphor bronze ACTION PIN® solderless, press-fit posts for PC board thicknesses of 0.093″ (2.36) and above. Easily installed with seating tools, *order separately below.* **Type R** right-angle receptacle assemblies feature phosphor bronze solder posts. Flame retardant, gray polyester polarized housings, rated UL94V-0. Voltage rating: 250VAC. Dielectric rating: 1000VAC. Temperature rating: –55°C to +125°C. UL recognized, CSA certified. Intermateable with **type C** assemblies, *contact your local Newark sales office for details.*

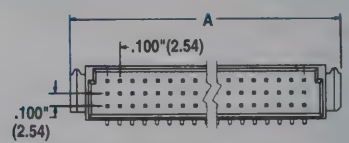
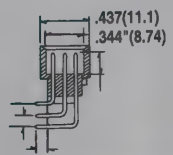
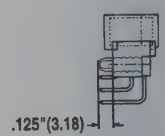
EUROCARD TYPE C RIGHT-ANGLE PIN AND VERTICAL RECEPTACLE ASSEMBLIES



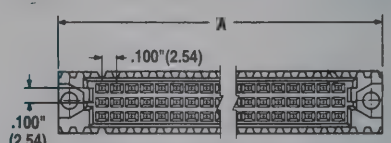
Right-Angle Pin Assemblies



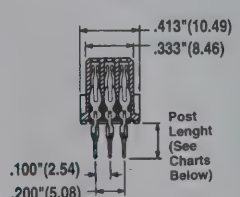
Without Boardlocks



With Boardlocks



Vertical Receptacle Assemblies



Action Pin™

Two-piece 0.100″ x 0.100″ (2.54 x 2.54) pin and receptacle connector assemblies meet DIN 41612 (Level II) and IEC 603-2 requirements. **Type C** right-angle pin assemblies feature brass solder posts with or without brass boardlocks. **Type C** vertical receptacle assemblies feature solderless, press-fit Action Pin™. Easily installed with seating tools, *ordered separately.* Flame retardant, gray polyester polarized housings, rated UL94V-0. Voltage rating: 250VAC. Dielectric rating: 1000VAC. Temperature rating: -55°C to +125°C. UL recognized, CSA certified. Intermateable with **type R** assemblies, *ordered separately on this page.*

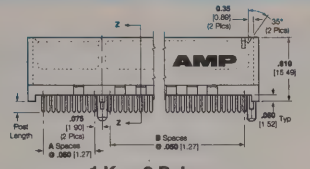
STANDARD EDGE 0.050″ SERIES CONNECTORS



1 Key-2 Pylons

Ideal for high count daughterboard and data bus applications. High density 0.050″ (1.27) centerline spacing of dual row phosphor bronze contacts, plated 30μ″ gold over nickel in contact area; tin-lead over nickel on solder posts. White polyphenylene sulfide housing, rated UL94V-0. Accept 0.054″ (1.37) to 0.070″ (1.78) thick daughter boards. Polarizing web for positive board-to-connector registration. Current rating: 1A. Contact resistance: 30 milliohms. UL recognized. CSA certified.

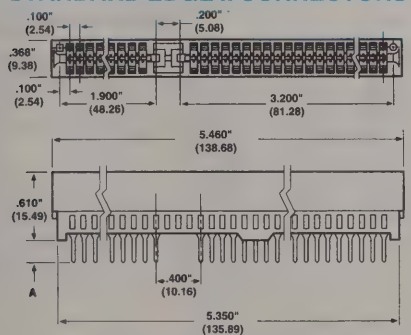
STANDARD EDGE II CONNECTORS



Special 18/31 Dual Combination Vertical Solder Posts

Standard Edge II vertical and right-angle connectors without mounting ears accept 0.054″-0.070″ (1.27-1.78) thick double-side PC boards. Contact arrangements available on: 0.100″ (2.54) centerline with 0.200″ (5.08) row-to-row spacing or 0.125″ (3.18) centerline with 0.250″ (6.35) row-to-row spacing. 0.125″ (3.18) long vertical solder posts. Retention feature on special 18/31 dual combination version. Black, glass-filled polyester housing, rated UL94V-0. Phosphor bronze contacts plated with 30μ″ gold over nickel in contact area (except where noted below); tin over nickel on posts. Contact rating: 3 (UL)/2.5 (CSA) amps. Contact resistance: 10 milliohms maximum. Operating temperature: –55°C to +85°C. UL recognized, CSA certified.

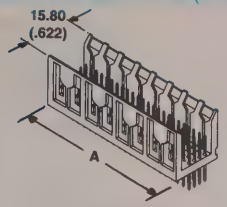
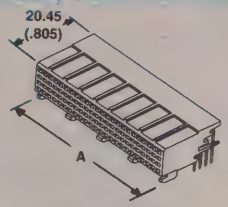
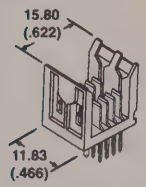
Z-PACK 2mm FB (FUTUREBUS+) CONNECTORS



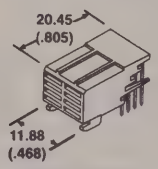
Single Module, Vertical Pin



Single Module, Angle Receptacle



Power Module, Vertical Pin



Power Module, Angle Receptacle

Two-piece module connector system for signal and power high-density connections; four-row, 2mm x 2mm (50.80 x 50.80″) circuit grid. Complies with Futurebus+, EIA IS 64 and IEC1076-4-OX(48B) specifications. Liquid crystal polymer housing. Choice of solder or solderless, compliant press-fit leads, both duplex plated gold flash over palladium-nickel mating surface, tin-lead on solder lead with nickel underall. Vertical pin assemblies feature phosphor bronze contacts. Right-angle receptacle assemblies feature copper alloy 18C contacts. Signal modules are end-to-end stackable. Current rating at 70°C in air: signal/3A power contacts.

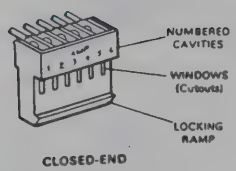
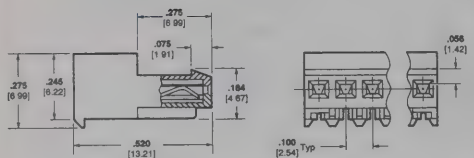
AT NEWARK, YOUR ORDER IS OUR FIRST PRIORITY.



CLOSED-END



MTA-100 IDC RECEPTACLES—CLOSED END

Closed-end receptacles available with 0.100″ (2.54) centers. Accepts UL style 1007 and 1061 wire styles with PVC insulation, tin plated solid, fused stranded, concentric stranded 7, 10, 16, 19 strands. Accept wire outside diameter of 0.050″ (1.27) max, when mass terminating; current/voltage range: 250VAC at 4 amps max. Operating temperature range: -55°C to +105°C, thermoplastic housing, 94V-2 rated and color-coded with wire size for easy identification: 22 AWG red, 24 AWG natural, 26 AWG blue, and 28 AWG green. Tin-plated phosphor bronze contacts.

AMPLIMITE® D-SUB CONNECTORS

HD-20 METAL-SHELL POSTED CONNECTORS

Right-Angle Plug

Right-Angle Receptacle

Straight Plug

Board mount connectors available in right-angle or straight versions. Brass pin and phosphor bronze socket contacts are duplex plated on mating end with **"A"** 30µ" gold or **"B"** gold flash; both have tin-lead on termination end with nickel under all. Shells are tin-plated steel except type numbers with (+) are zinc-plated. Black thermoplastic housing, rated UL94V-0. PC board mounting: **"1"** has standard 0.120" (3.05) dia. holes; **"2"** has 4-40 zinc threaded inserts. PC board footprint: (●) 0.318"; (■) 0.590"; (◆) 0.545". (†) With boardlocks. (‡) With screwlocks. (*) Plugs with grounding indents. UL recognized, CSA certified.

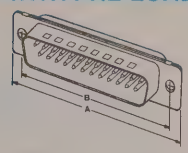
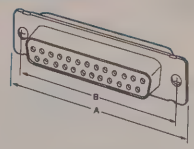
HDP-20 SOLDER CUP CONNECTORS WITH PRE-LOADED CONTACTS



Plug with Grounding Indents



Receptacle

Steel shells have either tin or zinc plating. Connector inserts are UL94V-0 rated black thermoplastic. Pre-loaded non-removable solder cup contacts are phosphor bronze with duplex plated gold flash on mating end; tin-lead on solder cup. Accept 20 AWG or smaller solid or stranded wire. Fit 0.062" (1.57) thick PC board. UL recognized file E28476, CSA certified.

Plug Assembly

PC board receptacles available with or without tin-plated brass front shield. Feature black nylon housing, rated UL94V-0, 0.063″ diameter x 0.250″ deep mounting holes, and tin-plated brass contacts. Plugs are interchangeable/intermateable with other DIN standard connectors, and meet or exceed DIN specification 41524 for 5-position and 45322 for 6-position plug. A complete plug assembly requires: one black nylon plug housing with tin-plated brass shield, rated UL94V-0; tin-plated brass ferrule for reliable termination; black thermoplastic polymer cord guard; and 50µ″ tin-over-nickel plated copper alloy crimp, snap-in contacts, *all ordered separately below.* 100µ″ silver-over-copper plated pin contacts available; *contact your local Newark sales office for details.* Application tools, including ferrule tool to crimp ferrule to shield, *ordered separately below.* UL recognized, CSA certified.

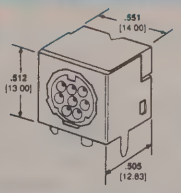
SHIELDED MINIATURE CIRCULAR DIN RECEPTACLES



Right-angle units feature integral 1-piece tin-lead over nickel-plated copper alloy shield, built-in keying and polarization, registration notch controlled datum surfaces, and contact locations for robotic pick-up and placement. UL94V-0 rated black thermoplastic housing withstands rigors of reflow soldering. Phosphor bronze socket contacts are duplex plated with gold flash in mating area, tin-lead on solder tail, all over nickel underplating. Stand-off design prevents shield damage to PC board traces and enhances solder clean-up. PC board thickness: 0.062″ (1.57). UL recognized, CSA certified.

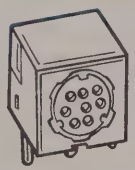
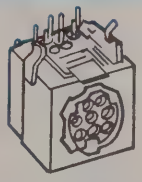
FILTERED MINIATURE CIRCULAR DIN RECEPTACLES





Quiet Line ferrite block, filtered, right-angle DIN receptacles eliminate unwanted EMI/RFI. Matched PCB footprints offer "drop-in" replacement of non-filtered connectors. Feature industry standard interface. Available in 6- and 8-position configurations with or without hold-downs. SMT compatible housing constructed of black thermoplastic, rated UL94V-0. Tin-over-copper plated steel shell. Brass eyelets plated tin-over-copper flash. Copper alloy boardlocks plated tin-lead over nickel. Zinc inserts with clear chromate plating. Phosphor bronze socket contacts are duplex plated 0.000120″ (0.00304) gold on mating end, tin-lead on solder end with nickel underplating. 4-40 threaded inserts. Operating voltage: 30VDC max. Dielectric withstanding voltage: 250VDC. Insulation resistance: 100 megohms, min. UL recognized, CSA certified.

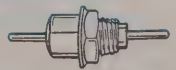
QUIET LINE STANDARD LOOSE-PIECE FILTERS

Eyelet Style

#8-32 Bolt Style



#12-32 Bolt Style

Distributed element filters are suited to the requirements of commercial electronic equipment. Available in three styles and a wide range of capacitance. Eyelet style features gold-over-nickel plated copper alloy contact and eyelet with a ferrite and ceramic filter. The #8-32 and #12-32 bolt styles feature silver-over-nickel plated copper alloy contact and body with a ferrite and ceramic filter, and are supplied with lockwasher and nut except where noted with (†). The bolt-type filters are suited to physically demanding applications.

Fig. 1

Fig. 2

Fig. 3

Fig. 4

Fig. 5

Fig. 6

Series 1 lightweight, plastic connectors permit the use of multiple combinations of signal and coaxial circuits in the same housing by accepting Multimate contacts, *order separately on this page.* Ideal for standard density applications, these connectors are unsealed units constructed of heat-stabilized, fire-resistant, and self-extinguishing thermoplastic, rated UL94V-1. Maximum wire insulation diameter: 0.100″ (2.54) except for arrangement 23-24 which will accept 0.150″ (3.81) diameter. UL recognized, CSA certified. *Order cable clamps, tools and accessories separately on this page.*

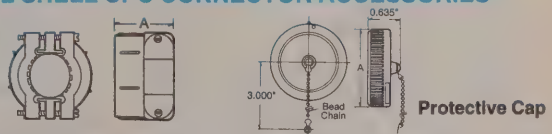
METAL SHELL CPC CONNECTOR ACCESSORIES



Cable Clamp — Protective Cap

For Series 1, 2, 3 and 4 metal shell CPC connectors. **Type 208945-X** cable clamps prevent excessive strain on cable/wire from being passed along to contacts inside connector housing. Zinc-plated aluminum alloy. Unassembled components include: body, 2 screws, 2 lock washers, 2 straps. Clamps thread directly onto metal shell plugs or receptacles. **Types 211903-1** and **211904-1** are nickel-plated zinc alloy protective caps for receptacles only.

UNIVERSAL MATE-N-LOK® II SOFT-SHELL CONNECTOR HOUSING KITS

Soft-shell pin and socket connector housings available in 2 thru 4 in-line and 6 thru 15 matrix circuit sizes for free-hanging or panel-mount wire-to-wire connection. Kits consist of front and rear caps or plugs. Mate with standard Universal MATE-N-LOK® housings and PC board headers and use standard panel cutouts and strain reliefs. Polarized nylon housings, rated UL94V-0. Contacts, *ordered separately on page 148*, are on 0.250″ (6.35) centerline spacing. Pins and sockets can be intermixed in the same housing. Housing design provides for complete contact insertion and features 3-point stabilization to control contact alignment and minimize stubbing. Voltage rating: 600VAC or DC. Dielectric withstanding voltage: 5.0KVAC or 10KVDC between adjacent circuits. Insulation resistance: 1000 megohms minimum between adjacent circuits. UL recognized, CSA certified, VDE approved. *Order application tools separately on page 148.*

CONTACTS FOR UNIVERSAL MATE-N-LOK® II CONNECTORS

Pin and socket "F" crimp contacts for use in Universal MATE-N-LOK® II plug and cap housings, *ordered separately on this page.* Pins and sockets can be intermixed in the same housing. Split pin 0.086″ (2.18) diameter. Stock thickness 0.012″ (0.305). Available in brass or phosphor bronze with pre-tin finish or plated with gold in mating area and tin-lead in crimp area over nickel underplate. Lanceless for tangle free handling. *Order application tools separately on page 148.*

UNIVERSAL MATE-N-LOK® CONNECTOR HOUSINGS

Positive locking plug and cap housings constructed of UL94V-2 flame retardant natural color nylon or UL94V-0 flame retardant white nylon. Available in in-line and matrix styles for free-hanging or panel-mount wire-to-wire connections. Feature positive polarization and rear-cavity identification. Uses standard Universal MATE-N-LOK® panel cutouts and strain reliefs, *ordered separately below.* Accepts removable, crimp snap-in pin-and-socket contacts, *ordered separately on page 150,* which can be intermixed in the same housing. Rated 600VAC/VDC. UL recognized, CSA certified, VDE approved under test report 14397-1431-1003. Cap housing requires two **type 641778-1** or **type 643182-2** adapters to attach strain relief.

MR SERIES MINIATURE RECTANGULAR CONNECTOR HOUSINGS

Free-hanging or panel mount, brick red UL94V-0 soft-shell nylon housings lock to prevent accidental disengagements. Pin or socket housing can be mounted in same panel cutout. Molded-in polarizing feature for proper mating and numbered cavities for easy circuit identification. Egg crate design socket housing half fully encloses socket contacts, *ordered separately below.* Molded skirt extension on pin housing protects pin contacts, *ordered separately below.* Strain relief, *ordered separately below,* is one-piece, black UL94V-2, molded nylon "clamshell" design. Use with flexible PVC adapting grommets, *ordered separately below,* to accommodate various wire bundle sizes and insulation diameters. UL recognized, CSA certified for 250V; 105°C operation.

MR SERIES MINIATURE RECTANGULAR PC BOARD PIN HEADERS

Permit cable connections to center of printed circuit board. Brick red UL94V-0 flammability rated nylon housing. Centerline spacing 0.165″(4.19). Phosphor bronze contacts available with tin or duplex finish. Duplex finish is plated with 30μ″ (0.762μm) min. gold in mating area, matte tin on solder tail end over 50μ″ (1.27μm) min. nickel underplate on entire contact. Solder tail diameter 0.040″(1.02). Mates with **MR series** socket housings listed in table below; *order separately on page 151.*

0.062″ (1.57) SOFT-SHELL COMMERCIAL PIN AND SOCKET CONNECTORS

Economical, commercial-grade receptacle and plug connector housings available in 1 circuit, 2 thru 4 in-line circuit, and 4 thru 9 matrix circuit sizes for free-hanging wire-to-wire connection. Natural color nylon, polarized housings, rated UL94V-2, feature cavity identification, low contact-mating force, dual-locking lances and detent and positive locking. Compatible with other soft shell connectors. Accepts wires with insulation diameters up to 0.110″ (2.79). Wire range from 30 to 18 AWG. Pre-tin plated brass contacts, *order separately below,* can be used in either plug or receptacle. Feature 0.062″ (1.57) pin diameter and are on 0.145″ (3.68) centerline spacing. Voltage rating: 250VAC. Dielectric withstanding voltage: 1.0kVAC. Durability: 10 mating cycles. Insulation resistance: 1000 megohms minimum initial. UL recognized, CSA certified. *Order application tools separately below.*

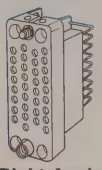
V.35 PRINTED CIRCUIT CONNECTORS



Right-Angle Receptacle

The 34-position V.35 connector is fully assembled and ready for placement on printed circuit boards. The connectors are also available in kit form for cable assembly *on this page*. Housing material: flame-retardant phenolic, except **type 213807-1** which is polyester. Housing color: black. Contacts are brass-plated 0.000030″ (0.00076) min. gold in mating area, 0.000050″ (0.00127) min. nickel underplate on entire contact. Contact spring is stainless steel; contact post is brass with tin-lead plating; boardlocks are copper alloy with tin-lead plating; jackscrews are stainless steel; nuts and lockwashers are steel with zinc plating.

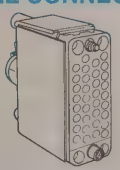
V.35 CABLE CONNECTOR KITS



Plug and receptacle connector kits come partially assembled. Kit includes: housing, 1-piece shield, 1-piece turnable jack screws, strain relief clamp, and mounting screws. The housing is flame-retardant black phenolic; shield is anodized aluminum; jackscrews are stainless steel; screws are steel with zinc plating; and cable clamp is steel with nickel plating. All housings accept size 16, Type III+ contacts *order separately on this page.*

SPARK PLUG JACK RECEPTACLE

Hermetic panel feedthrough coaxial connectors feature a hermetic glass seal and a metal-to-metal hermetic seal between the connector and package. Commonly referred to as a spark plug because the connector is torqued into place in a manner similar to an automotive spark plug. Rigid stainless-steel gasket is recommended for hard metal packages (i.e., kovar and steel) or aluminum packages with a wall thickness of 0.080″ or greater. VSWR: 1.04 +.009fGHz. RF leakage: –(100-fGHz) dB.

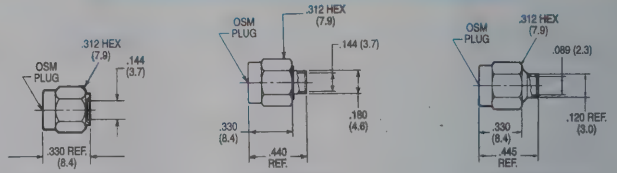
SMA STRAIGHT PLUGS FOR SEMI-RIGID COAXIAL CABLE WITH DIRECT SOLDER ATTACHMENT



2001-7941-02 2001-5003-02 2001-5032-00

Miniature coaxial connectors have direct solder attachments that produce highly reliable high-performance cable assemblies, especially suited for microwave system applications. Cable dielectric: solid PTFE. Housing finish: gold plated. Insulation resistance: 10,000 megohms min.

Stock No.	Type	RG/U	Dia.	Contact	Coupling Nut

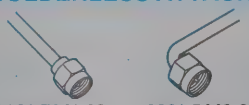
SMA STRAIGHT PLUGS FOR SEMI-RIGID COAXIAL CABLE WITH SOLDERLESS ATTACHMENT



2001-7641-02 2001-5443-02

Solderless compression crimp connectors meet high-performance requirements for microwave and other applications. **Type 2001-5443-02** is supplied with a center contact supported by a PTFE dielectric. **Type 2001-7641-02** comes without a center contact. Finish: passivated stainless steel. Insulation resistance: 10,000 megohms min.

50-OHM BNC JACKS

Bayonet-locking coupling provides reliable, quick connect/disconnect coaxial connections and low VSWR. Working voltage 500Vrms. Dielectric withstanding voltage: 1500VAC. Frequency range: single crimp 0-2.5 GHz; dual crimp, 0-4 GHz. Crimp versions are MIL-C-39012 Category B Type. *Order hand tools separately on page 163.*

ECONOMY SERIES 50-OHM BNC PLUGS

Ideal for most BNC applications, these economy 50-ohm plugs offer wide use in instrumentation, computer peripheral interconnections, 10BASE-2 network cabling, and premise wiring. Fully intermateable with standard BNC jacks. Coupling collar available in glass-filled thermoplastic or nickel-plated die-cast zinc. Lightweight plastic collar supplies circuit and user protection and is color-coded for quick circuit identification. Gold-plated brass stamped and formed center contact. "O"-crimp version; *order PRO-CRIMPER™ II hand tool and interchangeable die sets separately on this page.* Nickel-plated brass body. Thermoplastic dielectric. Working voltage: 500Vrms. Frequency range: 0 to 2GHz. Dielectric withstanding voltage: 1500VAC. Operating temperature: –25°C to +85°C.

50-OHM BNC COMMERCIAL TWIST-ON PLUGS AND JACKS

For use with solid-conductor cable. Not for applications where cable frequency moves or flexes. Bayonet locking coupling provides highly reliable, quick connect/disconnect coaxial connections and low VSWR. Fully intermateable with comparable BNC RG/U connectors. Feature gold-plated contact and nickel-plated body.

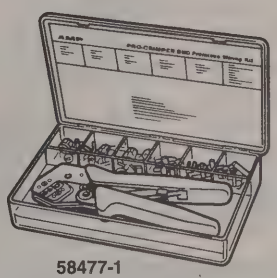
(8341) (de50142)

BNC COAXIAL CONNECTOR KITS

BNC connector kits for RG-58 or RG-59 cable. Each kit includes 20 BNC plugs, one SUPER CHAMP® BNC coaxial connector crimping tool, and sturdy steel storage box with four plastic containers.

66F3443 Type 314971-1 RG-58 Kit. **Each** 113.24
66F1127 Type 314972-1 RG-59 Kit. **Each** 114.89
(8342) (de50144)



58477-1

PRO-CRIMPER™ II BNC PREMISE WIRING KIT

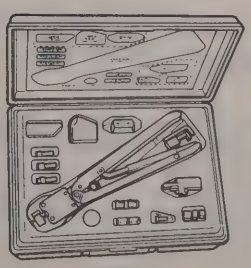
Type 58477-1 kit includes PRO-CRIMPER™ II hand tool assembly with **type 58435-1** die set, five each of the following plugs: RG 58, RG 58 plenum, and RG 59/62 plenum; ten RG 59/62 size plugs; two jack-to-jack adapters, two "T" adapters, and sturdy storage case.

97F9587 Type 58477-1. **Each** 116.73
(8220) (de03548)

SEMI-RIGID CABLE HAND TOOL KIT FOR SMA CONNECTORS

Type 59981-1 kit includes **type 59980-1** interchangeable die hand tool frame, **types 220220-2, 220221-2** plug locators, die set for RG-402/U cable, die set for RG-405/U cable, 6-pc. cable bend fixture assembly that contains two bend segments for RG-402/U cable (0.125″ and 0.250″ radius), bend segment for RG-405U cable, tool holder, limiting pin and conforming block. Plus one each of the following: jack locator, cutoff fixture, cable dressing fixture, trimmer tool, hex wrench, and carrying case.

84F1152 Type 59981-1. **Each** 1710.00
(8221) (de03554)



59981-1

SUPER CHAMP® CRIMP HAND TOOLS

47100-1

Type 47100-1 SUPER CHAMP® is made for use with insulated terminals and splices, 22-10 AWG. Features insulation crimping dies, electromechanical crimping dies, bolt cutter, wire cutter, wire stripper and gauge, stud gauge and cushioned handles.
92F5373 Type 47100-1. **Each** **16.59**

Type 604252-1 SUPER CHAMP® IV crimps insulated and uninsulated PLASTI-GRIP® and PIDG® terminals and splices, 22-16, 16-14 and 12-10 AWG. Makes a unique confined trapezoidal crimp that's more sound electrically and mechanically than those made with conventional dies. Has all the features of **type 47100-1** above, plus ignition crimp.

44F7960 Type 604252-1. **Each** **19.90**

Type 904135-1 SUPER CHAMP® V cuts and strips standard electrical wire, crimps closed barrel insulated or uninsulated terminals, and splices with or without insulation support and coaxial connector. It also cuts bolts of various common US thread configurations. Each function is marked on the tool.
83F9145 Type 904135-1. **Each** **9.87**

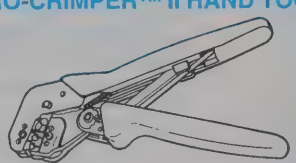
Type 29564 SUPER CHAMP® FT crimps uninsulated FASTON® push-on type terminals, 22-14 AWG. Special die crimps strain relief tabs firmly without damaging insulation. Has all the features of **type 47100-1** above, plus ignition crimp.
92F9040 Type 29564. **Each** **27.83**

Type 90287-1 AMP® Service Tool I crimps open- and closed-barrel uninsulated terminals, 22-10 AWG; FASTON® terminals (F crimp), 22-18 AWG; PIDG® and PLASTI-GRIP® terminals, and closed end splices, 22-10 AWG; M Series, M-R Series, MATE-N-LOK®, AMP-LEAF®, and AMP-UNYT® connectors and flat flex cable. Features separate open and closed crimp notches, bolt cutter and cushioned handles.
92F9096 Type 90287-1. **Each** **27.83**

Type 90330-1 AMP® Service Tool II made for use with the same terminals and connectors as **type 90287-1** above, has the same features plus special crimping notch for Tab-Lok FASTON® terminals.
98F7365 Type 90330-1. **Each** **57.49**

SUPER CHAMP® for use with coaxial BNC and UHF connectors using RG58 and RG59 cable and mini UHF using RG58/188 cable. Each tool is marked for accurate application and has cushioned handles.
66F6136 Type 220146-1 for BNC RG 58. **Each** **22.50**
66F6137 Type 220147-1 for BNC RG 59. **Each** **22.50**
66F6138 Type 220148-1 for UHF RG 58/59. **Each** **22.50**
92F4800 Type 58124-1 for Mini UHF RG 58/188. **Each** **22.50**
(8290) (ne06329)

PRO-CRIMPER™ II HAND TOOL



PRO-CRIMPER™ II tool frame requires less hand force to produce the same connection as comparable tools. With interchangeable die sets it can crimp many different types of connectors. Multiple terminal sizes are accommodated in one die. Has angled head for comfortable hand and wrist position. Ratchet control provides complete crimping cycle. Features emergency ratchet release and extra strong pivot pins for greater durability. Constructed of rugged high-carbon steel with cushioned handles. Various interchangeable die sets for the PRO-CRIMPER™ tool frame are available; *contact your local Newark sales office for details.*

Stock No.	Type	PRO-CRIMPER™ II Tool Frame	Each
97F9552	58433-3	With Die Set for Insulated Terminals and Splices, PIDG® and PLASTI-GRIP®, 22-10 AWG	79.26
50F1983	58433-2	With Die Set for Hex Crimp 50-Ohm BNC/TNC Coaxial Connectors, 58, 62, 59 RG/U	72.00

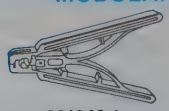
MODULAR PLUG TOOLS



231648-1, 231649-1

2-231652-0

Type 189710-1 SUPER CHAMP® hand tool for applying 2-, 4-, 6-, and 8- position AMP® modular plugs, 28-24 stranded and 26-24 solid AWG. Features separate nests for terminating wires and engaging insulation strain relief. Cushioned handles for comfort.
66F812 Type 189710-1. **Each** **39.00**

Economical Chordal hand tool strips and terminates cable. Lightweight design for easy handling. **Type 231648-1** terminates 2-, 4-, and 6-position modular plugs. **Type 231649-1** terminates 4- position handset modular plugs.
50F894 Type 231648-1. **Each** **32.00**
50F895 Type 231649-1. **Each** **32.00**

Professional production hand tool cuts, strips and terminates cable. Features CERTI-CRIMP® ratchet to assure proper termination. With interchangeable die sets the tool frame can accommodate all plug sizes. Cushioned handles for comfort. Choice of five complete tool assemblies consisting of tool frame and die set. Tool frame and interchangeable die sets *ordered separately below.*

Stock No.	Type	Description	Each
66F1143	2-231652-3	Tool Assembly with 4-Position Die Set	111.75
93F6988	2-231652-8	Tool Assembly with 4-, 6-Position Die Set	111.75
66F1144	2-231652-6	Tool Assembly with 6-Position (Offset) Die Set	111.75
98F7051	2-231652-1	Tool Assembly with 8-Position Die Set	97.00
66F3376	3-231652-0	Tool Assembly with Category 5 8-Position Die Set	111.75
98F6804	2-231652-0	Hand Tool Frame Only	106.55
50F887	853400-3	4-Position Die Set Only	45.00
50F890	853400-8	4-, 6-Position Die Set Only	45.00
50F888	853400-6	6-Position (Offset) Die Set Only	45.00
50F886	853400-1	8-Position Die Set Only	45.00
66F3374	1-853400-0	Category 5 8-Position Die Set Only	45.00
66F1145	231662-5	Replacement Blade for Tool Frame	7.68

TOOL KITS

AMPLIMITE® D-SUB HD-20 CONNECTOR REPAIR KITS

Type 787053 25-position RS232 repair kit contains 18 **type 207463-1** plugs, 6 **type 207464-1** receptacles, and 14 **type 749626-2** cable clamps. **Type 787054** multi-position repair kits contain 3 each: 9-, 15-, 25-, and 37-position receptacles, 6 each: 9-, 15-, 25-, and 37-position plugs and cable clamps. All kits include crimp snap-in contacts: 100 **type 66504-9** sockets and 100 **type 66506-9** pins, plus 1 insertion/extraction tool and 1 metal storage case. Kit type numbers with **suffix -2** also include 1 **type 90287-1** AMP® Service Tool I.

Stock No.	Type	Description	Each
96F9817	787053-1	RS232 Kit without AMP® Service Tool I	108.01
96F9818	787053-2	RS232 Kit with AMP® Service Tool I	139.71
96F9815	787054-1	Multi-Position Kit without AMP® Service Tool I	155.15
96F9816	787054-2	Multi-Position Kit with AMP® Service Tool I	186.85

SUPER CHAMP® HAND TOOL MODULAR PLUG KIT

Type 224685-1 kit is ideal for field service applications. Includes 25 each: **type 5-641335-7** 4-position, **type 5-641337-4** 6-position and **type 5-554739-4** 8-position AMP® modular plugs, **type 189710-1** SUPER CHAMP® modular plug hand tool, and a multi-compartment storage case with a cushioned tray and clear plastic hinged top.
66F6139 Type 224685-1. **Each** **73.59**

PROFESSIONAL PRODUCTION HAND TOOL MODULAR PLUG KIT

Type 1-231666-0 kit consists of **type 2-231652-0** production tool frame assembly, 4-, 6- and 8-position die sets, blade replacement kit, small screwdriver, and storage case.
92F4809 Type 1-231666-0. **Each** **190.68**

SUPER CHAMP® HAND TOOL TERMINAL KIT

Type 604200-1 500-piece PLASTI-GRIP® terminal hand tool kit consists of SUPER CHAMP® crimp tool, 225 ring and 200 spade terminals, and 75 butt splices in wire size 22-10. Packaged in heavy-duty metal storage case.
66F6140 Type 604200-1. **1-4** **93.00**

PRO-CRIMPER™ II HAND TOOL TERMINAL KIT

Type 55823-1 PLASTI-GRIP® and PIDG® terminal kit consists of PRO-CRIMPER™ II hand tool and 225 ring and spade terminals in 12-10, 16-14 and 22-16 wire sizes. Packaged in a sturdy storage case.
92F1358 Type 55823-1. **1-4** **89.25**

SUPER CHAMP® HAND TOOL COAXIAL KITS

Type 314971-1 BNC coaxial connector kit for RG58 cable contains 20 BNC58 plugs. **Type 314972-1** BNC coaxial connector kit for RG59, 62 cable contains 20 BNC59 plugs. **Type 314973-1** UHF coaxial connector kit for RG58, 59, 62 cable contains 20 UHF short collar plugs. All kits include SUPER CHAMP® crimp tool and steel storage case.
66F3443 Type 314971-1. **Each** **113.24**
66F1127 Type 314972-1. **Each** **114.89**
66F6141 Type 314973-1. **Each** **111.00**

PRO-CRIMPER™ II HAND TOOL COAXIAL PREMISE WIRING KIT

Type 58477-1 kit consists of PRO-CRIMPER™ II hand tool assembly with **type 58535-1** die set, 5 each; RG58, RG58 plenum and RG59/62 plenum size plugs, 10 RG59/62 size plugs, 2 jack-to-jack adapters, 2 "T" adapters, and multi-compartment storage case.
97F9587 Type 58477-1. **Each** **116.73**
(8294) (ne06333)

ORDERING GUIDE FOR 97 SERIES STANDARD CIRCULAR CONNECTORS

97 series medium- to heavy-weight, standard circular connectors feature a nonrotating contact design that simplifies soldering and helps lower termination costs. Standard MIL-C-5015 contacts are silver-plated with pre-tinned solder cups. Single key/keyway polarization. Shell components are constructed of high-grade aluminum alloy and feature strong threaded couplings. Diallyl phthalate inserts provide high arc and insulation resistance under both humidity and thermal stress. Your choice of 5 shell styles, environmental, solid or split shell construction, 128 contact arrangements (from 1 to 52 circuits), and alternate insert positioning. Standard, nonreflective cadmium-plated shell available in 3 finishes. Choose: olive drab chromate finish; shiny, clear cadmium-plated finish; or environmental-resistant black zinc cobalt finish. All shell finishes give the same high conductivity and resistance to corrosion. Operating temperature: –55°C to +125°C. Intermateable and intermountable with all **97 series** and MIL-C-5015 connectors. UL recognized File E115497; CSA certified File LR69183. Newark has a completely equipped Amphenol **MS** assembly center which allows the quick shipment of complete connectors from an extensive component inventory.

HOW TO SELECT A 97 SERIES CIRCULAR CONNECTOR IN 8 EASY STEPS . . .

Once you have determined that a **97 series** circular connector is required, just answer the questions posed in the following 8 steps to help you formulate the part number of your choice.

STEP 1 *How many wires are you going to connect and what gauge?*
The answer to this question determines which insert you need. The Insert Chart *on page 166* illustrates the 128 inserts available. Here's an example of how to use the chart. Say you want to connect 8 16-gauge wires. Just find the section of the chart marked 8 contacts. Under this section, find insert number 20-7— it's the one you want because it contains 8 16-gauge contacts. Your space limitations and voltage requirements also determine your choice of insert. The voltage capacity code for each insert is listed under its diagram *on page 166*. If you have more than one wire size to connect, the method is the same because you can always solder a smaller wire to a larger contact. However, soldering a large wire to a small contact is not recommended.

STEP 2 *What if several identical connectors have different functions?*
Here's a situation to watch out for! You have 4 identical receptacles on a panel. One carries high current loads. The others have low current functions. A plug mated with the wrong receptacle (cross-mating) could damage your valuable equipment. To avoid cross-mating, you can order identical inserts positioned in both the plugs and receptacles at various angles from standard. These variations from standard positions are called alternate Insert Positions, explained *on page 166*. The Alternate insert position is listed in parenthesis under each insert diagram in the Insert Chart *on page 166*.

STEP 3 *What kind of RECEPTACLE do you need?*
For wall mounting, use a Wall Receptacle, **type 3100**; *order on pages 171-172*. The elongated back of this receptacle extends through thick wall material. It is threaded to accept standard hardware fittings. For unmounted applications, use the Cable Receptacle, **type 3101**; *order on pages 172-173*. For box or panel mounting, use the Box Receptacle, **type 3102**; *order on pages 173-175*. This receptacle's back is short to conserve space. It is not threaded on the back end and is used when no accessories such as clamps are needed.

STEP 4 *What kind of PLUG do you need?*
For ordinary situations, the Straight Plug, **type 3106**, meets most connector requirements; *order on pages 175-178*. However, when space is critical you may want to consider using an Angle Plug, **type 3108**; *order on pages 178-180*. This type plug lets the cable enter your equipment at a right angle.

STEP 5 *Do you need a Plug with SOLID or SPLIT Back Shell?*
You can get both straight and angle plugs in solid or split back shell designs. With the Solid Back Shell, you have greater strength and save space, too. On the other hand, the Split Back Shell design lets you quickly inspect the solder terminals, which is important if you'll be subjecting the connector to rough handling and heavy use. The type identification for Solid Back Shell construction in a non-environmental style is the letter **A** immediately after the main shell type number, for example **3106A**. For a Solid Back Shell construction in the 97E environmental sealing style, the letter E should be placed immediately after the main shell type. Likewise, the type identification for Split Back Shell construction is **B**, for example **3106B**. Split Back Shell construction is available in non-environmental types only. Because of applicaton, receptacles are made in Solid Back Shell construction only. Their type identifications are **3100A/E, 3101A/E**, and **3102A**.

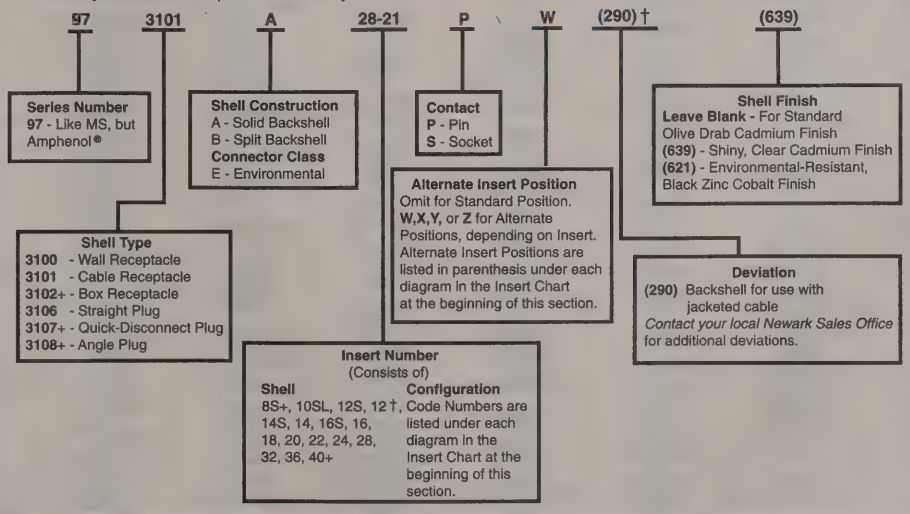
STEP 6 *Which connector gets the socket: the receptacle or the plug?*
Now you have to designate which inserts are used with which shells. Since either pin or socket inserts can be used with plugs or receptacles, now's the time to make your choice. Here's a good rule of thumb: Order the sockets for the connector at the "hot" side of the circuit. By having sockets at the power source, there's less chance that a wayward finger or screwdriver will short the circuit or cause personal injury. The code for Socket is simply an **S** following the insert code number. For Pins, it is **P**. Therefore, 20-7P insert would have Pin contacts while a 20-S insert would have Socket contacts.

STEP 7 *What kind of finish do you need?*
If you prefer the standard olive drab, nonreflective cadmium plate finish, no suffix number is needed. If you would rather have the shiny, clear cadmium plate finish, just add the suffix number **639** at the end of the part number. If you would like an environmental-resistant black zinc cobalt finish, just add the suffix number **621** at the end of the part number.

STEP 8 *Do you need any accessories?*
Accessories, such as cable clamps and protection caps and chains, are available; *order separately on page 181*.

BEFORE YOU ORDER . . .

Review the following example to correctly formulate the part number of your choice:



97
3101
A
28-21
P
W
(290)†
(639)
Series Number
97 - Like MS, but Amphenol®
Shell Construction
A - Solid Backshell
B - Split Backshell
Connector Class
E - Environmental
Contact
P - Pin
S - Socket
Shell Finish
Leave Blank - For Standard Olive Drab Cadmium Finish
(639) - Shiny, Clear Cadmium Finish
(621) - Environmental-Resistant, Black Zinc Cobalt Finish
Shell Type
3100 - Wall Receptacle
3101 - Cable Receptacle
3102+ - Box Receptacle
3106 - Straight Plug
3107+ - Quick-Disconnect Plug
3108+ - Angle Plug
Alternate Insert Position
Omit for Standard Position.
W,X,Y, or Z for Alternate Positions, depending on Insert.
Alternate Insert Positions are listed in parenthesis under each diagram in the Insert Chart at the beginning of this section.
Deviation
(290) Backshell for use with jacketed cable
Contact your local Newark Sales Office for additional deviations.
Insert Number
(Consists of)
Shell

(14227) (de50223)

97E SERIES ENVIRONMENTAL STANDARD CYLINDRICAL CONNECTORS

How to Order

97 — 3106 E 28 — 21 S

Series Number
97 - Like MS, but Amphenol®

Shell Type
3101 In-Line Cable Receptacle
3106 Straight Plug

Connector Class
E designates Environmental

Shell Size
10SL, 12S, 14S, 16S, 18, 20, 22, 24, 28

Insert Arrangement
See the Insert Chart on pages 205 and 206 of Newark Electronics® Catalog 116 for insert arrangement drawings or *contact your local Newark branch.*

Contact Style
P - designates pin contacts
S - designates socket contacts

97E series environmental service-class connectors feature the same cost-effective benefits of the general-duty **97 series**, such as the nonrotating contact design that simplifies soldering and helps lower termination costs. *Order 97 series general-duty connectors separately; contact your local Newark sales office.* Environmental sealing is accomplished with the addition of a sealing gasket in the plug interface. Environmental connectors are for use in a variety of industrial applications including automotive, robotics, machine tool, and welding equipment.

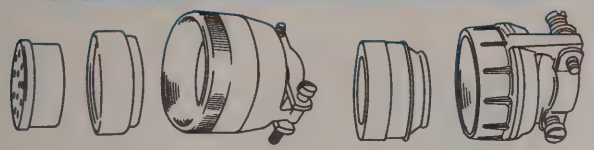
97 SERIES ENVIRONMENTAL BACKSHELLS



282 283

97E series backshells provide environmental sealing in the mated condition when used with the proper rear accessory hardware. **Type 97-282** wire sealing grommet and **type 97-283** cable sealing grommet provide environmental sealing with strain relief. These backshells can be used with any **97A series** connector. Additional shell sizes and insert configurations are available; *contact your local Newark sales office.*

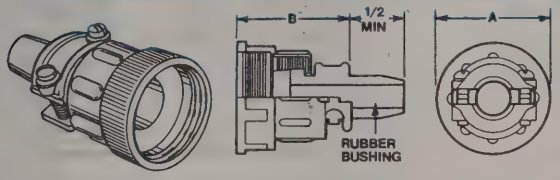
97 SERIES WATERPROOF CABLE CLAMPS



Waterproof cable clamp assembly includes **AN3057** cable clamp, rubber bushing, washer and adapter. To ensure the watertight integrity of this clamp when assembled to **97 series** circular plug, the plug must be ordered with type number **suffix 417**, which supplies a "W" washer on to the shoulder of the plug shell [Example: type number 3106-24-07P**(417)**]. Because **97 series** connectors do not include an inside tapered surface for sealing the rubber bushing, the waterproof cable clamp assembly is supplied with the adapter. The adapter may have a 1-to-1 ratio or be a reducing adapter, as illustrated above.

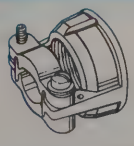
97 SERIES MS3057A CABLE CLAMPS



For jacketed cable or wire protected by tubing. Both clamping halves float for strain relief. For unjacketed cable or wire, *order* **MS3420** *rubber bushing separately on this page.* Two telescoping bushings supplied with shell sizes 24 and up. NOTE: For a shiny, clear, cadmium-plated finish, add **suffix 639** at end of type number.

(de90584 art)

97 series Poke Home® rear release contact connectors are intermateable and intermountable with existing **97 series** and MIL-C-5015 type shells in both plugs and receptacles. Rugged metal shell in your choice of solid or split construction. Shell available in your choice of standard, conductive clear chromate finish or olive drab chromate finish over cadmium plate. Choose from 24 insert configurations. *Insert arrangement diagrams can be found on pages 166-167.* Inserts molded of 94V-0. Underwriters Laboratory rated material. Wire sizes: 12-30 AWG. Operating temperature: –55°C to +125°C. Feature positive self centering of contacts—pins bent up to 20° will pick up. Can be adapted to handle circuitry with EMI/EMP shielding requirements. Greater contact to contact insulation, lighter weight and higher reliability. No re-design or re-work needed on existing equipment. Offers high speed, low cost termination, UL recognized, CSA certified. *Contacts for* **97 series** *are ordered separately on this page.*

Large	28.98	16.66	33.35	24.61	12.29	28.58	27.00	49.23

Miniature connectors are one-third the size and weight of standard MIL-C-5015 connectors with the same number of contacts. Quick, positive bayonet coupling. O-ring seals in both plugs and receptacles make connectors pressure proof and water protected when mated and meet MIL-C-5015, Class C pressure requirements. Shell components are fabricated from high grade aluminum with gray anodize finish. Contacts are copper alloy gold over nickel plate. Inserts are diallyl phthalate, providing high arc and insulation resistance under both humidity and thermal stress conditions. Connectors are factory sealed to prevent leakage. UL recognized.

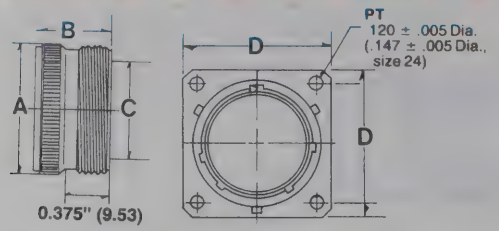
PT00 SERIES (MS3110) WALL MOUNT RECEPTACLES



These miniature general-duty wall mount receptacles have twice the number of contacts in half the space of a standard connector. Back shell is threaded for conduit attachment of MS3057 cable clamp. Feature 5 key/keyway polarization with quick positive 3-point bayonet lock coupling system to assure positive mating without cross-plugging. Aluminum shell with corrosion-resistant, electrically conductive cadmium-plated finish with olive drab chromate after-treatment. Spring tension provided by wave washer in coupling nut assures maintenance of interfacial seal between mating halves. Pin and socket solder contacts machined from low-loss copper alloy, gold-plated to eliminate corrosion. Socket contacts are closed-entry design. Molded neoprene insert and main joint gasket. **P suffix** in type number indicates pin contacts; **S suffix** in type number indicates socket contacts. Other sizes are available; *contact your local Newark sales office.*

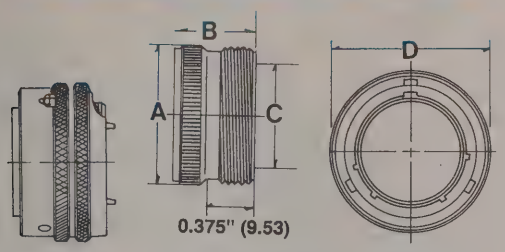
CONTACT YOUR LOCAL NEWARK SALES OFFICE FOR DETAILS.

PT06 SERIES (MS3116) STRAIGHT PLUGS



These miniature general-duty straight plugs have twice the number of contacts in half the space of a standard connector. Backshell is threaded for conduit attachment of **MS3057** cable clamp. Feature 5 key/keyway polarization with quick positive 3-point bayonet lock coupling system to assure positive mating without cross-plugging. Aluminum shell with corrosion-resistant, electrically conductive cadmium plated finish with olive drab chromate after-treatment. Spring tension provided by wave washer in coupling nut assures maintenance of interfacial seal between mating halves. Pin and socket solder contacts machined from low loss copper alloy, gold-plated to eliminate corrosion. Socket contacts are closed-entry design. Molded neoprene insert and main joint gasket. **P suffix** in type number indicates pin contacts; **S suffix** in type number indicates socket contacts.

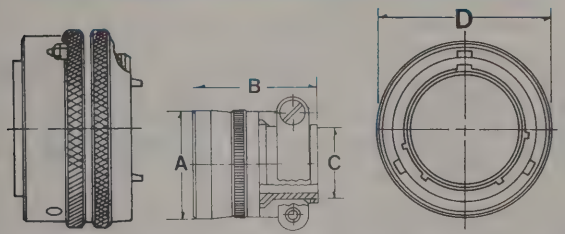
PT06 SERIES (MS3116) STRAIGHT PLUGS WITH ENVIRONMENT-RESISTANT STRAIN RELIEF



Offer the same quality features as **PT06 series** miniature general-duty straight plugs, *order separately on this page*, except in addition have environment-resistant strain relief clamp and grommet for moisture-proofing individual wires. Also provides added wire bundle support. **"P"** before **suffix (SR)** in type number indicates pin contacts; **"S"** before **suffix (SR)** in type number indicates socket contacts.

C091-A SERIES INDUSTRIAL CONNECTORS

Plug

Receptacle

Industrial connectors with sturdy screw locking. Nickel-plated brass shell with thermoplastic dielectric. Crimp or solder termination. 2-8 and 14 contact versions have silver-plated contacts; voltage rated (VDE0110): 250V; current rated: 5A. 12 contact version has gold-plated contacts; voltage rated (VDE0110): 60V; current rated: 3A. Male plugs feature 0.236″(6) or 0.315″ (8) max. cable outlet. Front panel mount female receptacles for 0.197″(5) max. panel thickness. Accept 20 AWG (0.5) wire maximum.

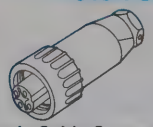
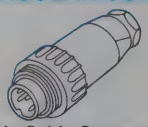
C16-1 SERIES CIRCULAR CONNECTORS



Female Cable Connector



Male Cable Connector

Female Receptacle

Designed to meet the high requirements of industrial applications under harsh environmental conditions. 3+PE and 6+PE contact arrangements for power and signal applications. High-grade plastic housings. Threaded coupling provides protection against unlocking. Cable housing straight with PG9, 11 and 13.5 cable outlets. Internal strain relief with screw clamp or clamping ring. **Prefixes T3108, T3109,** and **T3111** in type numbers indicate 3+PE contacts and screw termination. **Prefixes T3104, T3105,** and **T3107** indicate 6+PE contacts and solder termination.

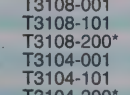
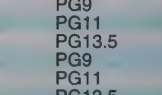
44 SERIES ENVIRONMENTALLY SEALED CONNECTORS



Plug



Receptacle

Insert Configurations

44 series high-performance environmentally sealed connectors feature a resilient, one-piece design incorporating crimp Poke-Home® contacts, *ordered separately below,* in six insert configurations. Primary and secondary mating seals and discrete wire seals resist liquids. Ideal for auto/truck, marine, industrial, traffic control, security, and mining ventilation systems. Voltage rating: 250VACrms. Current rating: 8A continuous. Temperature range: –40°C to +125°C. *Order tooling separately below.*

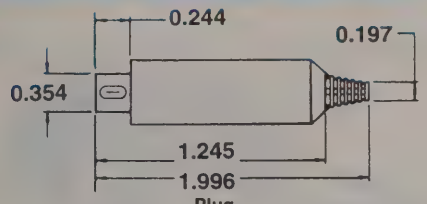
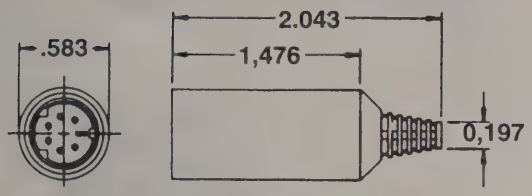
18 SERIES MINI DIN CIRCULAR CONNECTOR KITS



Plug



Receptacle

Kit contains Mini-Din I/O connector with fixed contacts, 2-piece shield, 2-piece plastic cover, and PVC strain relief. Black thermoplastic insulation, rated UL94V-0. Tin-plated brass shell/shield. Solder cup termination except straight plugs which are solid (solder turn). Plugs and receptacles have phosphor bronze contacts; all plated tin over nickel under plate. Current rating: 1A. Voltage rating: 30VAC. Contact resistance: 30 milliohms maximum. Temperature range: –55°C to +105°C.

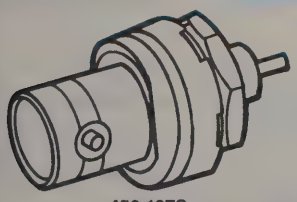
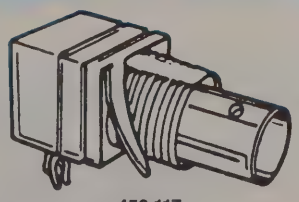
456 SERIES CAPACITIVELY DECOUPLED BNC FILTERED RF CONNECTORS



456-107S



456-117

Provides capacitive decoupling up to 10,000 pF between connector body and mounting panel to control EMI emissions and meet FCC Docket 20780 requirements. Filter does not affect signal contact, only shell-to-ground connection. Reduces ground loop problems and dissipates ESD into chassis. Impedance: 50 ohms. Working voltage: 200 VDC. Interchangeable and intermateable with standard non-filter RF connectors. **Type 456-107S** front panel mount, silver-plated phosphor bronze solder cup contact with Teflon® insulator, nickel-plated brass shell, thermoplastic insulator body. Dielectric withstanding voltage: 600VDC. **Type 456-117** rear mount, right angle with boardlock device. For 0.062"-0.093" PC board. Nickel-plated diecast zinc shell, thermoplastic insulator body, nickel-plated phosphor bronze ground device. Gold-plated phosphor bronze contact with Noryl® insulator. Dielectric withstanding voltage: 1000VDC.

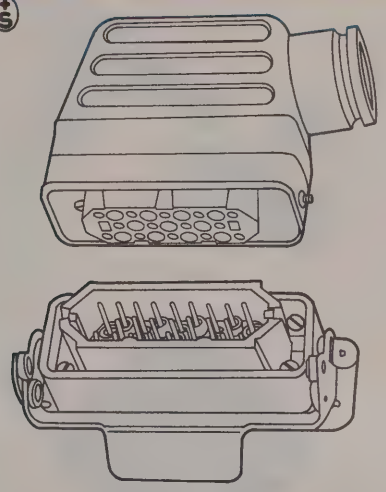
C-146 SERIES RECTANGULAR INDUSTRIAL CONNECTORS



C-146 series connectors can be used for many applications, such as control and power distribution, test and measurement equipment, and machine tools. Constructed of die-cast aluminum and environmentally protected by means of different latch-locking styles, neoprene gaskets, and cable strain relief options. Compatible and intermateable with other similar style products. Meets NEMA enclosures types 4 and 12. UL recognized. CSA certified. SEV and VDE approved.

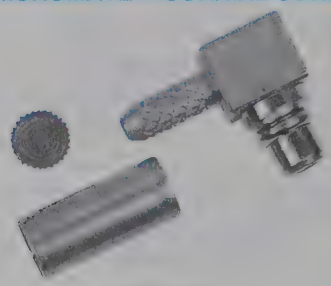
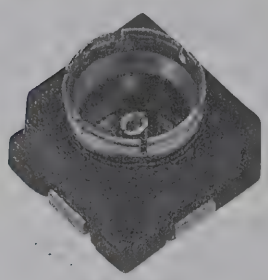
50-OHM MICROMATE™ COAXIAL CONNECTORS



908-43200



908-22101

908-41400

Microminiature connectors are designed for high-density, lightweight coaxial applications, such as wireless data, communication, and instrumentation. Feature a low-mated profile to help meet critical height requirements. Positive snap-on mating provides retention through 500 mating cycles. Connectors are compatible with all MMCX designs and accommodate industry-standard coaxial cable. Impedance: 50 ohms. Frequency range: DC-6GHz. Voltage rating: 170Vrms. Dielectric withstanding voltage: 500Vrms.

MINI-UHF CONNECTORS FOR CELLULAR ANTENNAS AND PC BOARDS

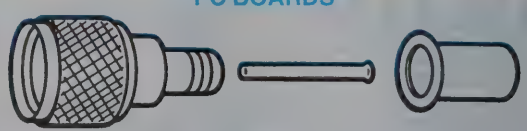

Fig. 1

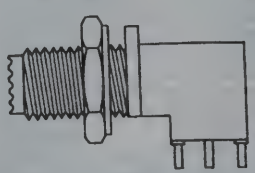

Fig. 2

Mini-UHF 50-ohm connectors for cellular antenna, phone, communication system, broad system, and LANS (local area network system) applications. Voltage rating: 335V peak. Brass crimp plugs available with bright nickel plating or black chromate finish with anti-UV conductive lacquer. Gold-plated brass contact. RG-58/U cable termination. Frequency range: 0-3GHz. Right-angle PC board bulkhead panel mount receptacle is tin-lead plated zinc diecast with tin-lead plated phosphor bronze contact. Frequency range: 1GHz.

BRASS SMA COAXIAL CONNECTORS

Brass SMA coaxial connectors are an effective alternative when stainless steel construction is not required. Provide repeatable electrical performance from 0 to 12.4GHz. Meet or exceed MIL-C-39012 requirements.

903 SERIES 75-OHM HIGH-DENSITY SMB COAXIAL CONNECTORS

SMB 75-ohm high-intensity subminiature coaxial connectors conform to the requirements of MIL-C-39012. Feature quick connect/disconnect snap-on mating. Operate to 4GHz with low reflection and are usable to 10GHz. Voltage rating for RG-188U cable: 335 volts. Dielectric withstanding voltage: 1000Vrms. Temperature range: –65°C to +165°C.

75-OHM BNC PC BOARD RECEPTACLES

Standard profile printed circuit angle bulkhead receptacles mount to board with two fork pins. Available with white valox or zinc housing. Gold-plated phosphor bronze center contact and nickel-plated zinc outer contact. White noryl insulator. Tin lead-plated brass mounting legs. Tin-plated copper signal and ground terminals, 0.190″ long into 0.035″ diameter mounting holes. Feature 2-stud bayonet lock mating. Voltage rating: 500Vrms. Dielectric withstanding voltage: 1500Vrms. Temperature range: –40°C to +100°C.

(8299) (ne06414)

75-OHM CRIMP-CRIMP BNC CONNECTORS

Designed for use in telecommunications. Mate with standard 50-ohm BNCs without damage. BNC-T1 provides constant 75-ohm performance with low VSWR DC to 4GHz. BNC-T2 is usable with low reflection DC to 1GHz. For applications above 1GHz, manufacturer recommends BNC-T1. *Order die sets separately; contact your local Newark sales office.*

MEDIUM-SIZE, WEATHERPROOF C COAXIAL CONNECTORS

Standard peak rating of 1500V and low VSWR to 10GHz. **Type 82-532** peak rating of 4000V and good performance to 2GHz. Coupled by two stud bayonet lock, connectors provide constant 50-ohm impedance and may be used with 75-ohm cable below 300MHz. Temperature range: –55°C to +165°C. Hermetically sealed. Meet MIL-C-39012.

MIL-C-39012 TWINAXIAL WEATHERPROOF COAXIAL CONNECTORS

Nonconstant impedance connectors for 78- and 95-ohm twin conductor cable. Improved shielding for use in balanced low level and high sensitivity circuits. 2 non-intermateable constructions available: BNC units (type numbers with **prefix 31**) are polarized contact design (1 male,1 female), 2 stud bayonet coupling, captivated contacts, 0-100Mhz, 100V peak voltage. Others polarized key/keyway construction, threaded coupling, 0-200MHz, 500V peak voltage.

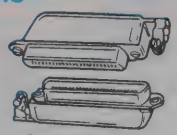
TwinHex Crimp Tool and Dies

57 SERIES MICRO-RIBBON® SOLDER TERMINATION CONNECTORS

Rack and Panel



Cable-to-Cable

57 series ribbon connectors are ideal for modems, multi-plexers, computers and peripherals, medical equipment, PBX devices and scientific instrumentation, telephone equipment, cash registers, vending machines and similar equipment. 5 amps per contact. 70 DC. Operating temperature: –55°C to +105°C. Wire sizes: 22 AWG solid, 24 AWG stranded. UL recognized, CSA certified.

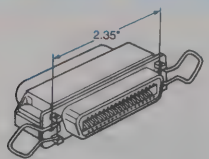
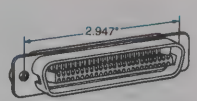
FCC57 SERIES FILTERED MICRO-RIBBON ADAPTERS



36 Size
Receptacle View



50 Size Plug View

Combines non-filtered adapter with discrete filter element (capacitor) to provide EMI noise protection and bring assembly into FCC compliance, Docket 20780. Withstand transient voltage spike of 700V. Rise time: 1 micro second. Choice of filter capacitance: 470 pF or 820 pF. High strength tin-plated diecast shell. Phosphor bronze contacts with 30µ" gold plating over copper underplate; 50µ" nickel barrier on 50 size adapter. Thermoplastic insert, rated UL94V-0.

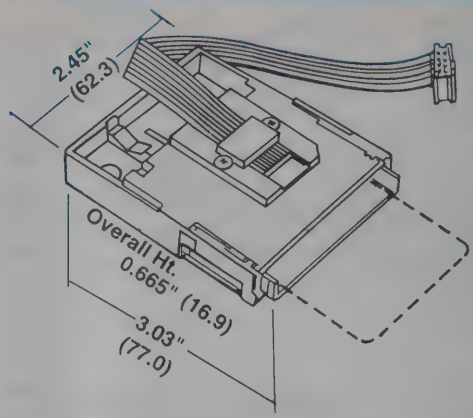
SMART/CHIP CARD ACCEPTOR DEVICE



Push-pull ISO-Standard model for vending, pay phone, POS, and access control applications. Credit card size ISO7816 smart/chip card is manually inserted until captured by card retention clip. Normally open card presence switch closes when card is fully inserted. Zero insertion force contacts land on card and read I/O to and from the 8 gold pads on the card. After transaction, the card is simply pulled out of the acceptor. Data is transferred via flat ribbon I/O cable terminated with 10 position IDC socket. Average 500,000 insertion cycle life. Copper tin contacts plated with copper nickel/selective gold. Thermoplastic housing, rated UL94V-0. Voltage rated: 32Vrms. Operating temperature: –25°C to +85°C. **This device does not accept PCMCIA cards.** Amphenol manufactures a wide variety of chip card acceptor devices; *contact your local Newark sales office for details.*

97F7891 Type C70210M0085142. **Each** **30.22**

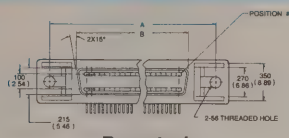
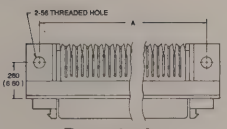
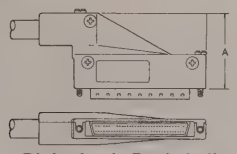
257 SERIES SCSI PCB MOUNT D-SUB RECEPTACLES AND BACKSHELLS



Receptacle



Receptacle



Right-Angle Backshell

PCB mount receptacles meet ANSI requirements for SCSI and are suitable for a variety of input/output applications. Low-profile design allows connector to be used in applications where space is at a premium. Contacts are a fork and blade type spaced at 0.050″. Features metal "D" shell for polarization and EMI/RFI shielding. Black thermoplastic insulator, rated UL94V-0. Phosphor-bronze contacts are plated 30µ″ gold in mating area, 100-200µ″ tin/lead on termination end, and 50-100µ″ nickel underplate. Current rating: 1A. Dielectric withstanding voltage: 500VAC. Operating temperature: –55°C to +125°C. **Suffix 1** in type number indicates 2-56 threaded hole as the board mounting option; **Suffix 2** in type number indicates boardlock as the board mounting option. Die-cast backshells with zinc, bright nickel plating are also available, *order separately below.*

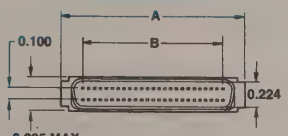
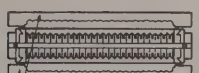
257 SERIES HIGH-DENSITY CABLE MOUNT CONNECTORS FOR SCSI II





Terminating Covers

Meets ANSI requirements for SCSI II in input/output applications to connect small computers to peripheral devices. Choice of 50- or 68-position, 0.050″ (1.27) pitch cable mount plug with termination cover. Tin-over-copper plated steel front "D" shell. Nickel plated zinc alloy housing. Black thermoplastic insulator, rated UL94V-0. Phosphor bronze contacts plated 30µ″ gold on mating end, 100-200µ″ tin/lead on termination end, over 50µ″ nickel underplate. Current rating: 1A. Dielectric withstanding voltage: 500V AC. Wire size: 28-30 AWG solid or 7 strand with insulation outer diameter 0.036″ (0.914) max.

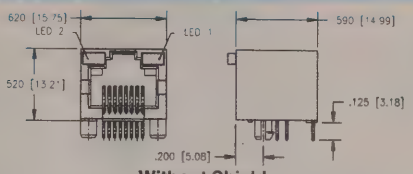
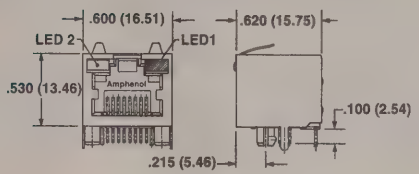
RJHS SERIES HIGH-SPEED MODULAR JACKS



Without Shield



With Shield

RJ-45 modular jacks with built-in LEDs. Available from 1 to 8 ports. Ideal for LAN applications such as adapter cards and routers. Designed for Category 5 performance. Copper alloy, tin/lead-plated shield. Stamped and formed selectively plated contact has 50µ″ gold on mating end and tin/lead in PCB tail. Thermoplastic insert, which complies with UL94V-0. Number of contacts: 8. Single port. Contact resistance: 10mΩ maximum. Insulation resistance: 500MΩ minimum. Current rating: 1.5A. Voltage rating: 125VAC. Dielectric withstanding voltage: 1000VACrms. 60Hz 1 min. UL recognized, file no. E135615; CSA certified, file no. LR68598.

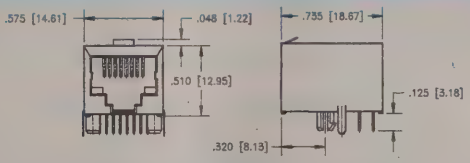
(8344) (ne08225)

FRJ SERIES SHIELDED AND FILTERED MODULAR JACKS



Offers low cost and effective EMC control within standard RJ-11 and RJ-45 connector footprints. EMC control is provided by completely shielded connector and/or with the use of high-resistivity, high-impedance ferrite block. Board layout changes are not required. Copper alloy, tin/lead-plated shield. Features fully enclosed contact body with a flat contact design that has 50µ″ gold mating side and tin/lead in the PCB tail. Thermoplastic insert, which complies with UL94V-0. Contact resistance: 20mΩ maximum. Insulation resistance: 500MΩ minimum. Current rating: 1.5A. Voltage rating: 125VAC. UL recognized, file no. E135615; CSA certified, file no. LR68598-11.

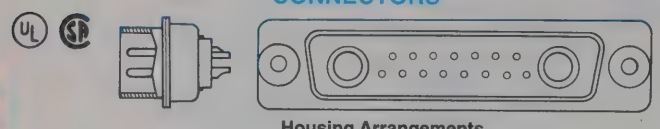
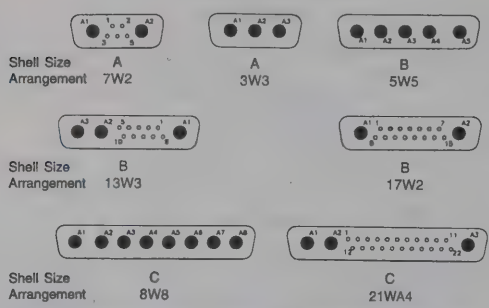
17TW SERIES D-SUBMINIATURE HYBRID CABLE CONNECTORS



Housing Arrangements



Combination (hybrid) D-subminiature metal shell cable connectors feature installed, non-removable screw-machine solder cup signal contacts combined with power and coaxial contacts, *order separately on this page.* Tin-plated steel shell. Gold over nickel-plated bronze female signal contacts or brass male signal contacts are fixed in the high-temperature, black thermoplastic insulator. Panel mount 0.122″ diameter holes. Current rating: 7.5 amps with 10 amp peaks. Voltage rating: 300Vrms at 50Hz. Dielectric withstanding voltage: 1000Vrms at 50Hz. Insulation resistance: 5000 megohms at 500VDC. Operating temperature: –55°C to +155°C with peaks up to 180°C. Flame retardant to UL94V-0. Choice of three shell sizes and nine housing arrangements. UL listed, CSA certified.

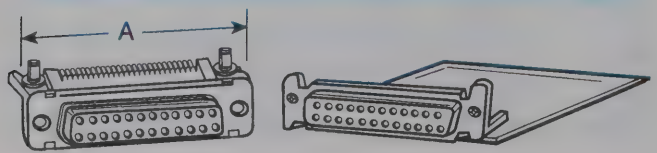
(8301) (ne07389)

D-SUBMINIATURE SURFACE MOUNT RECEPTACLES



Surface mount D-subminiature connectors can replace thru-hole D-subs as an I/O connector on PC boards where all other components are surface mount. This reduces PC board cost and eliminates the wave solder process required for standard D-sub connectors. Black, high-temperature thermoplastic rated UL94V-0. Voltage rating: 300VAC at sea level at 50Hz. Temperature range: –55°C to +125°C.

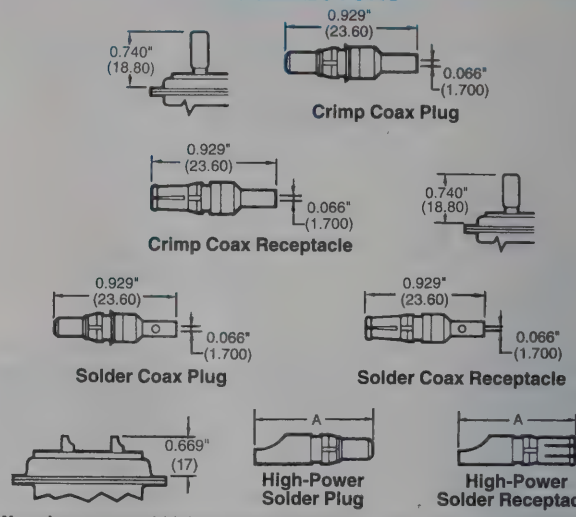
17TW SERIES COAX AND HIGH-POWER REMOVABLE CONTACTS FOR D-SUBMINIATURE HYBRID CABLE CONNECTORS



17TW series coax and high-power contacts (size 8) for use in combination (hybrid) D-subminiature cable connectors, *order separately on this page.* Machined copper alloy female contacts, machined brass male contacts. Both feature gold over nickel plating. Straight coax contacts available crimp or solder. Impedance: 50 ohms. Current rating: 0.5A. Voltage rating: 150Vrms at 50Hz. Frequency range: 0-1GHz. High-power contacts are solder type. Current rating: 10 to 40A. Voltage rating: 300Vrms at 50Hz.

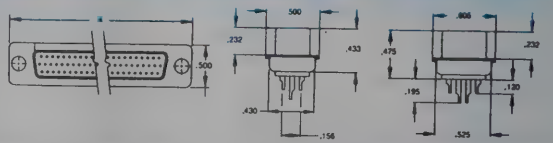
HIGH-DENSITY D-SUBMINIATURE CONNECTORS



15-62 position connectors have 3 rows, 78 position has 4 rows. **17HD series** cable mount D-Subs with straight solder cup termination. Fixed contacts plated gold flash over nickel in engagement area. Accept 22 AWG wire. Clear hole panel mount. Feature copper alloy contacts with tin/lead over nickel plating on termination end. 0.100″ (2.54) staggered spacing. Current rating: 5A. Voltage rating: 125VAC. Tin-plated steel shell has grounding indents on plugs. Black thermoplastic resin dielectric, rated UL94V-0. Dielectric withstanding voltage: 500VAC. *Order backshells separately on page 203.*

17D SERIES D-SUBMINIATURE CONNECTORS

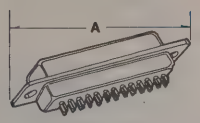

Fig. 1

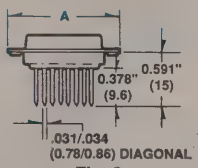

Fig. 2

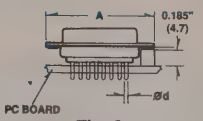

Fig. 3

Rack and panel D-Sub connectors for industrial use. Male and female brass, fixed screw machined contacts, both gold over nickel plated. Solder cup, solderless wire wrap, or straight PC solder mount termination. Yellow chromate plated zinc shell. 2-piece black thermoplastic dielectric insert, rated UL94V-0. 0.122″ (3.10) diameter mounting holes. Voltage rating: 300Vrms to 50Hz. Current rating: 7.5A. Wire: 20 AWG. Operating temperature: –55°C to +105°C. UL recognized E130160.

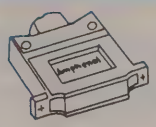
17 SERIES D-SUB METAL BACKSHELLS



2-piece die-cast zinc backshells (hoods) with clear zinc finish meet FCC docket 20780, shielding out EMI/RFI. PVC inserts accommodate a wide range of braided or foil-shielded cable. All units are jack screw models. Include clear zinc-finished steel mounting hardware.

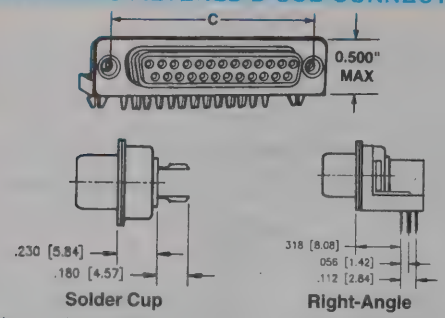
FILTERED CONNECTORS AND ADAPTERS

FCC17 SERIES FILTERED D-SUB CONNECTORS



Solder Cup — Right-Angle

Discrete filter element (capacitor) provides EMI noise protection and brings assembly into FCC compliance, Docket 20780. Designed to provide EIA RS-232 and RS-449 compatibility. Pin and socket styles with solder cup or right-angle PCB termination. Tin plated high-strength diecast shell with thermoplastic insert, rated UL94V-0. Phosphor bronze contacts plated with 15μ″ gold on contact area over 100μ″ nickel. 0.120″ diameter through mounting holes in flange. Current rating: 5A DC max., 2A RF filtering max. Operating temperature: –40° to +85°C. Intermate with standard non-filtered **17 series** D-Sub *ordered separately on page 203*, and connectors meeting MIL-C-24308. Other connectors are available in a variety of filter capacitance values; *contact your local Newark sales office.*

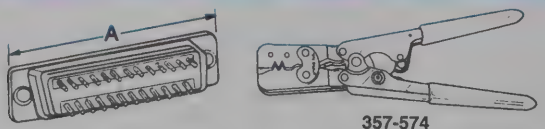
17RR SERIES REAR-RELEASE CRIMP D-SUB CONNECTORS



357-574

Shrouded contact and crimp protect against shorting or arcing. Meet EIA standard RS232C-RS449. Two piece black thermoplastic UL 94V-0 rated insulator. Voltage rating: 500VAC @ 5 amps. Wire types: 20 to 28 AWG. Temperature range: –55°C to +125°C. Shell plating: steel/tin plating, grounding indents on plug front shell. Polarization by "D" shape. *Order stamped and formed contacts and termination tools separately below.*

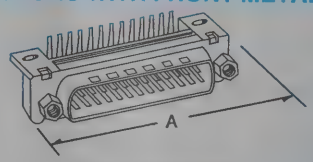
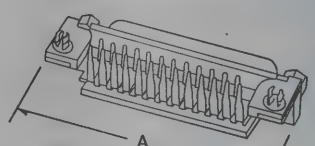
617 SERIES PCB MOUNT RIGHT-ANGLE D-SUB CONNECTORS WITH FRONT METAL SHELL



With Ground Strap



With Boardlock

Front tin-plated steel shell helps reduce EMI/RFI emissions. Precision formed copper alloy contacts plated with 30μ″ gold over nickel in engagement area, tin/lead over nickel in end area. Current rating: 5A. Voltage rating: 100VAC. Glass-filled thermoplastic dielectric, rated UL94V-0. Plugs feature grounding indents. Front mounting holes are #4-40 threaded. **617-A series** D-Subs have 0.120″ (3.05) diameter mounting hole with wrap-around ground strap and 0.318″ (8.08) footprint. **617-C series** D-Subs have split arrowhead boardlock and 0.318″ (8.08) footprint.

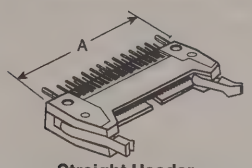
Right-Angle Header



Straight Header

High-density 0.025″ IDC connectors are designed for use in condensed FRC wiring applications on PC boards in computers and other electronic equipment. Cable mount IDC sockets feature an innovative 3-blade contact arrangement allowing mass termination of 0.025″ conductor center flat ribbon cable without costly preprocessing procedures. Each blade has a tapered tip and chamfered edges to help prevent wire and blade damage during displacement. IDC headers are fully shrouded and are available in either straight or right-angle solder tails. Feature a molded body key for positive mating with the corresponding socket connector, virtually eliminating the possibility of misalignment at every disconnect/reconnect cycle. IDC connectors have glass-reinforced PBT rated UL94V-0. Voltage rating: 185V. Temperature range: –20°C to +105°C.

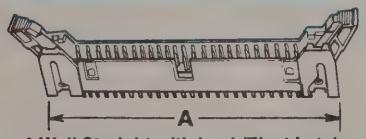
816 SERIES 4-WALL HEADERS



4-Wall Straight with Lock/Eject Latch

Headers for 0.062″ (1.57) PC boards meet MIL-C-83503. 1-amp phosphor bronze contacts 30μ″ gold-over-nickel plated in contact area, tin solder plated on tails. Glass reinforced thermoplastic insulation rated UL94V-0. 0.100 x 0.100″ (2.54 x 2.54) contact spacing. Lock/eject latches, *order separately below,* reduce strain on cable and boards when removing mating connectors. UL recognized. CSA certified.

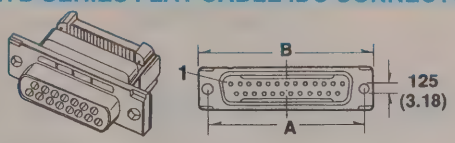
841-17D SERIES FLAT CABLE IDC CONNECTORS



For modern peripheral equipment. Mass terminates to 0.050″ (1.27) flat ribbon cable. Available plastic or metal flange. 1-pc. universal hood. Gray, glass-filled polycarbonate insulator, rated UL94V-0. Phosphor bronze contacts with gold over nickel plating. Current rating: 1A. Voltage rating: 25VAC (VDE 0100 group A). Operating temperature: –25°C to +105°C. Wire size: solid 26/ stranded 28 AWG. Compatible with MIL-C-24308 and IEC proposal 48B (CO) 118. RS-232 and RS-449 standard. UL recognized E64911.

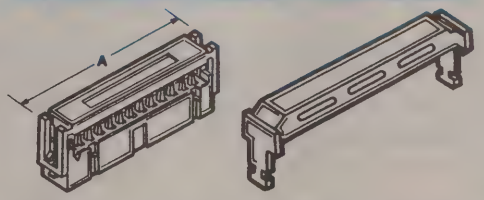
812 SERIES IDC SOCKET CONNECTORS



Meets MIL-C-83503/7B. Compatible with **816 series** headers. 0.100 x 0.100″(2.54 x 2.54) contact spacing terminates to 0.050″(1.27) flat ribbon cable. Center polarization and open-end covers for feed-through and daisy-chain applications. 1 amp copper alloy contacts have 30μ″ gold-over-nickel plate in contact area, tin on termination end. Glass reinforced thermoplastic insulation rated UL94V-0. Fit 26 AWG stranded, 28 AWG solid/stranded, 30 AWG solid wire. UL recognized, CSA certified. *Order strain reliefs and polarizing key separately below.*

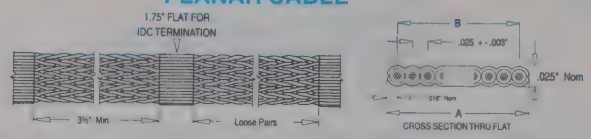
425 SERIES 0.025″ PITCH LOOSE PAIR TWIST'N'FLAT® PLANAR CABLE



For mass termination to industry standard 0.025″ IDC connectors. 30 AWG, 7/38 tinned copper conductors. Color-coded PVC insulation: first pair red/gray followed by blue/gray and repeat. Minimum 3½″ long twisted pair section with a constant 1.75″ laminated flat section on 0.025″ centers. Loose pairs, between IDC flats, allow increased airflow around assembly. Double-sided lamination for conductor strain relief. Voltage rating: 150V. Current rating: 0.75A. Impedance: 110Ω single-ended; 95Ω single-ended with one conductor of each pair commoned to one BUS (SCSI mode); 120Ω differentially. Temperature rating: 80°C. UL listed, CSA certified. **Sold in spools of 100′.**

"FAST 20" 0.050″ CENTER ULTRA SCSI CABLE

"FAST 20" compliant 50-conductor planar cable accommodates SCSI 8 bit narrow applications requiring a higher data rate to 20 MB. Offers higher impedance with a tighter tolerance on skew. 26⅞4 AWG tinned copper conductors. Gray 0.010″ PVC insulation. Red stripe edge identifies #1 conductor. Current rating: 1.7A. Impedance: 90Ω. Capacitance: 16.5pf/ft at 1 MHz. Maximum time delay skew: 0.036 ns/ft. Temperature rating: 105°C. UL recognized, CSA certified. **Sold in spools of 100′.**

SERIAL BUS CONNECTORS

UNIVERSAL SERIAL BUS INTERCONNECTION SYSTEM

Universal Serial Bus (USB) PC board mount connectors and cable assemblies provide designers with a single shielded "plug-and-play" interconnection system for computer peripherals. Designed to comply with the USB specification version 1.0, allowing compatibility and intermateability of components. **USB series** connectors have glass-filled thermoplastic insulation, rated UL94V-0; infrared and vapor phase compatible. Copper alloy contacts. Current rating: 1 amp. Dielectric strength: 1000Vrms at sea level. Temperature rating: –55°C to +125°C. UL recognized, CSA certified. **USB series** cable assemblies have glass-filled thermoplastic insulation material, rated UL94V-0. Current rating: 1 amp. Dielectric strength: 1000Vrms at sea level. Temperature rating: –40°C to +75°C.

1394 SERIES SERIAL BUS CONNECTORS

Primarily targeted at high data rate applications. Provides more than 100 MB data transfer. New, innovative interface simplifies PC I/O and is engineered to service digital video cameras, digital video disks (DVD), hard disk drives, and other high-bandwidth devices. Design advantages include more complete receptacle shielding for better EMI/RFI protection. Optional rear shield on receptacles prevents EMI and RF interference from entering through an unmated connection. Receptacles are available in high-temperature plastic for easy compatibility with surface mount technology. Insulation material: glass-filled thermoplastic, rated UL94V-0. Contact material: Copper alloy, 30µ" gold plating in contact area, tin-lead plating in termination area. Shield material: copper alloy, tin-lead plating. Operating temperature: -55°C to +125°C.

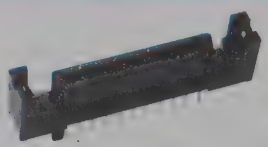
SCA-2 SERIES PC BOARD MOUNT RECEPTACLES



SCA-2 connectors are designed for direct attachment of SCSI and fiber channel disk drives to printed circuit boards. Mating force: 90g. Withdrawal force: 15g. Insulator: thermoplastic, rated UL94V-0. Contact plating: 30µ" gold selectively plated over mating area; tin-lead over tail area. 50µ" nickel underplate overall. Current: 1 amp. Insulation resistance: 1000 megohms min. Dielectric strength: 500VAC min. at sea level. Contact resistance: 35 milliohms max. UL recognized, CSA certified.

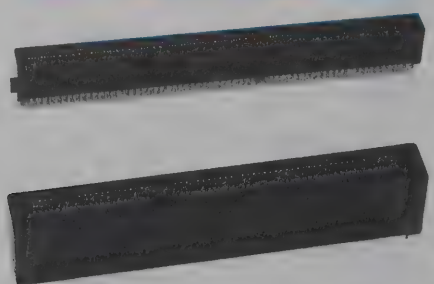
SLOT 1 AND AGP CONNECTORS



Intel®-approved Slot 1 and Accelerated Graphics Port (AGP) connectors are for use with all Pentium II® based computers, servers, and workstations. Ideally suited where flexibility is required for new paths to future processors. Feature lead-in chamfers for ease of card insertion. High-temperature insulator is suitable for reflow soldering processes and temperatures. Staggered contact design reduces card insertion force. Generous contact lead-in geometry eliminates card/contact stubbing. Insulator material: glass-filled high-temperature thermoplastic rated UL94V-0. Current rating: 1 amp per contact. Operating temperature: -40°C to +105°C. UL recognized, CSA certified.

IDC CONNECTORS

609 SERIES ANSLEY® LOW PROFILE PC BOARD BOX HEADERS

Mates with female socket transition connectors in PC board applications, which require repetitive connection/disconnection. Low profile design maximizes packaging density. Available with straight or right-angle solder tails for use with 0.062″ (1.57) thick PC boards. Fully shrouded to protect 0.102″ (2.59) long, 0.025″ (0.635) square mating pins and assure positive polarization. Center polarization slot mates with center polarization tab on female connectors. Blue glass-filled thermoplastic housing (UL94V-0). Phosphor bronze contacts with 30µ″ gold over 50µ″ nickel in contact zone; tin-lead over nickel in termination area. Current rating: 1A. Dielectric strength: >1000Vrms. Temp. rating: –55° to +125°C. UL recognized, CSA certified.

609 SERIES ANSLEY® PC BOARD STANDARD HEADERS

Square pin PC board male headers mate with center bump and dual-slot polarization female socket transition connectors with or without strain relief. Type number **suffix E** denotes short retainer/ejector latches for mating connectors without strain relief; **suffix ES** denotes long retainer/ejector latches for mating connectors with strain relief. To order type numbers with **suffix ES,** *contact your local Newark sales office.* Accommodates 0.062″ (1.57) thick PC boards. Blue glass-filled thermoplastic housing (UL94V-0). Phosphor bronze contacts with 30µ″ gold over 50µ″ nickel in contact zone; tin-lead over nickel in termination area. Current rating: 1A. Dielectric strength: >1000Vrms. Temp. rating: –55° to +125°C. UL recognized, CSA certified.

609 SERIES ANSLEY® FEMALE SOCKET TRANSITION CONNECTORS

Designed for mass termination of all types of flat cable to a variety of male headers in PCB applications which require repetitive connection and disconnection. Blue, glass-filled one-piece housing, rated UL94V-0. Mechanical side latched and polarization keyways. Tulip contacts provide up to four points of contact per conductor; 30µ″ gold plating in contact mating areas. Available with or without polarization tabs. *Order strain reliefs separately below.* UL recognized, CSA certified.

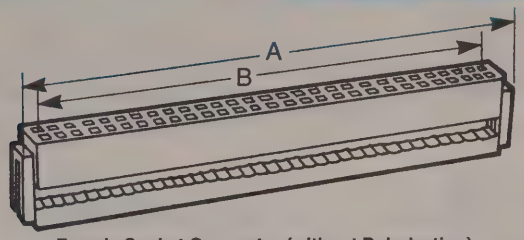
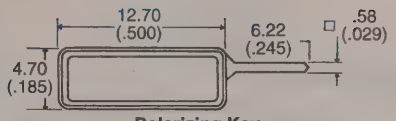
IDC SOCKETS

IDC FEMALE SOCKET CONNECTORS



Female Socket Connector (without Polarization)



Polarizing Key

636 series female socket connectors are available with or without strain reliefs and with or without polarization. Feature 0.100 x 0.100″ centers. Insulation: glass-filled thermoplastic. Flammability rating of UL94V-0. Contacts: phosphor bronze with 15μ″ (min.) gold over 50μ″ nickel in contact zone, and tin-lead over nickel in termination area. Temperature rating: –55°C to +125°C. Current rating: 1A. Insulation resistance: >1 x 10^9 ohms @ 500VDC. Dielectric strength: >1000Vrms at sea level. Color: black. UL recognized, CSA certified. *Order polarizing key, hand tool, and die separately below.*

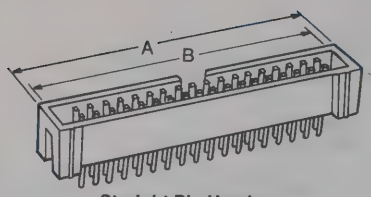
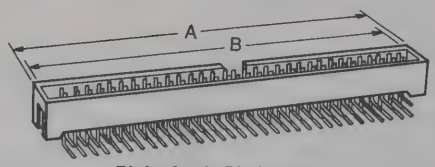
IDC HEADERS



Straight Pin Header



Right-Angle Pin Header

HIGH-TEMPERATURE, LOW-PROFILE IDC HEADERS

636 series headers come with either 0.102″ (2.59) long pins for 0.062″ (1.57) PC boards or 0.165″ (4.19) long pins for 0.125″ (3.18) PC boards. Feature 0.100 x 0.100″ centers. Insulation material: glass-filled high-temperature thermoplastic. Flammability rating of UL94V-0. Infrared and vapor phase compatible. Contacts: brass with 15μ″ (min.) gold over 50μ″ (min.) nickel plating. Current rating: 1A. Insulation resistance: >1 x 109 ohms @ sea level. Dielectric strength: >1000Vrms @ sea level. Temperature rating: –55°C to +125°C. Color: black. UL recognized, CSA certified.

NEW 501 SERIES ANSLEY® LOW-PROFILE PC BOARD HEADERS

Vertical ejector design permits end-to-end soldering and uses minimum PC board space. Accommodates 0.062″(1.57) thick PC boards. Straight- or right-angle solder tails available. Mates with female socket transition connectors with or without strain relief. **Suffix E** in type number denotes short ejectors for mating connectors without strain relief; **suffix ES** denotes long ejectors for mating connectors with strain relief. Blue glass-filled thermoplastic housing, rated UL94V-0. Phosphor bronze contacts with 30μ″ gold over 50μ nickel in contact zone; tin-lead over nickel in termination area. Current rating: 1 amp. Dielectric strength: >1000 VRMS. Temperature rating: -55° to +125°C. UL recognized, CSA certified.

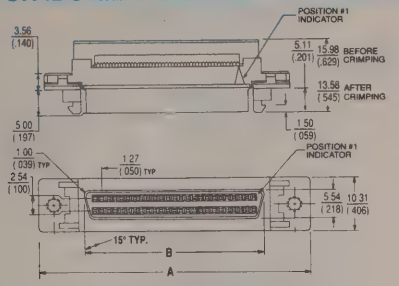
FINE-PITCH IDC METAL SHELL "D" RECEPTACLES



Available in 3 separate bulkhead mounting styles: 4-40 flush threads, 2-56 cable latch with rails or 2-56 cable latch without rails, in a variety of contact sizes. Contacts are beryllium copper, 30µ" gold over nickel plating in the mating area, tin-lead plating in the termination area. Glass-reinforced black thermoplastic housing, with a 94V-0 flammability rating. Current rating: 1 amp. Insulation resistance: 1000 megohms. Dielectric strength: 1000VAC. Temperature rating: –55°C to +125°C. UL recognized. CSA certified.

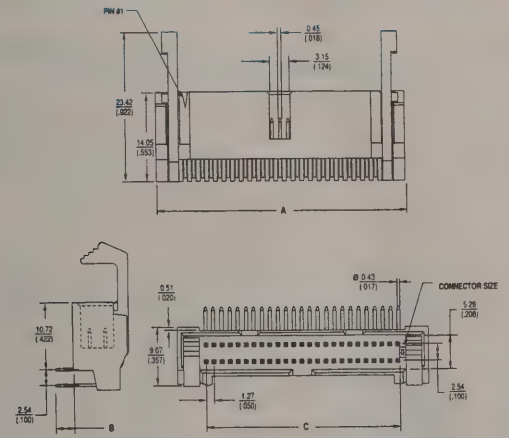
(8392) (de03893)

2-ROW HEADERS WITH RIGHT-ANGLE TAILS



Headers for 0.125" (3.18) PCB with space-saving vertical ejectors. Centers are 0.050 x 0.100". Insulation material is black glass-filled thermoplastic rated UL94V-0, and infrared and vapor phase process compatible. Contacts are copper alloy, 30µ" gold over nickel plating in mating area, tin-lead plating in the termination area. Retainer-ejector latches disengage the header and female socket, minimizing stress in the cable termination and solder joint areas. Tail length (Dim. B): 0.114" (2.90). Current rating: 1A. Insulation resistance: >1x10^{9}Ω. Dielectric strength: >1000VAC. Temperature rating: –55°C to +125°C. UL recognized, CSA certified. *Order headers with straight tails by replacing* **suffix D072E** *in type number with* **suffix D272E.**

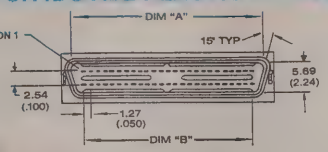
FINE-PITCH IDC ALL PLASTIC "D" PLUGS



Without Mounting Ears

Designed for reliable interfaces in modern, high-density applications. Connectors conform with SCSI 2/3 internal cabling specifications. Strong beryllium copper contacts and IDC slots that concentrate the insulation displacement capability to allow trouble-free termination of all insulation types — including Teflon®. Low-profile design maximizes available cabinet space. Glass-reinforced thermoplastic insulation material. Current rating: 1 amp. Dielectric strength: 1000VAC. Temperature rating: –55°C to +125°C. UL recognized, CSA approved.

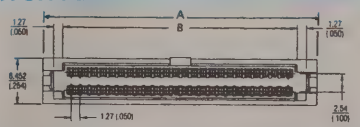
FINE-PITCH FEMALE SOCKET CONNECTORS



Fine-pitch mass-terminated IDC female sockets for 0.025" (0.635) conductor spacing. 0.050 x 0.100" centers. Female sockets accept 30 AWG fine-pitch IDC cable. Feature daisy chain capability, cable guides, positive locking latches, center polarization, and dual-beam mating beryllium copper contacts with 30µ" gold over 50µ" nickel plating. Black, glass-reinforced thermoplastic housing, rated UL94V-0. Current rating: 1 amp. Dielectric strength: >1000VDC. Temperature rating: –55°C to +125°C. UL recognized, CSA certified.

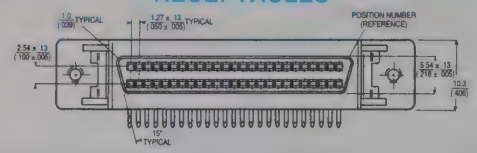
SCSI FINE-PITCH D CONNECTOR RIGHT-ANGLE RECEPTACLES



Insulation material is glass reinforced thermoplastic rated UL94V-0. Contacts are high-strength copper alloy, 50µ" nickel underplate with 30µ" of gold in the mating area, 100µ" minimum tin-lead on tails. Latch block material: nickel-plated zinc alloy. Metal shell material: tin-plated steel. Snap latch material: high-strength copper alloy. Tail length: 0.130" (3.30). Current rating: 1A. Insulation resistance: >1000MΩ. Dielectric strength: >1000VDC. Temperature rating: –55°C to +125°C. UL recognized, CSA certified. *Order receptacles with tail length 0.162" (4.11) by replacing* **suffix X1** *in type number with* **suffix X2.** Other mating styles are available.

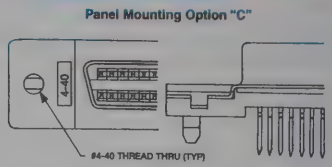
SCSI FINE-PITCH D PRESS-FIT PC BOARD MOUNT RECEPTACLES

NEW



Perfect for desktop computers, peripherals, and other equipment where space and weight are at a premium. Designed for high-density backplane or motherboard applications. Metal snap latches maintain ground screen to the PC board without soldering. High-temperature rated plastic housing will not degrade during reflow soldering processes. Available in metal shell and all other plastic versions. Requires only "flat rock"-type blocks for easy installation. UL recognized, CSA certified.

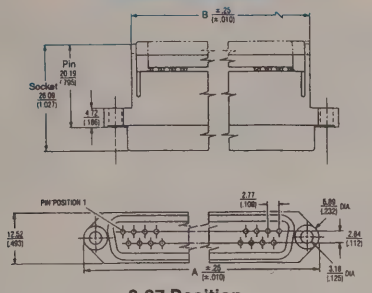
PERSONALIZED SERVICE FROM YOUR LOCAL NEWARK SALES OFFICE.

609 SERIES ANSLEY® PLASTIC SHELL IDC "D" CONNECTORS



9-37 Position

Used in panel-mounted I/O applications for mass termination. Available in pin (**suffix P**) or socket (**suffix S**) versions, both with strain relief. Beryllium copper contact enables mass termination to 0.050" (1.27) pitch flat cable while maintaining I/O compatibility with 0.109" (2.77) industry standard "D" connectors. 30µ" gold over 50µ" nickel plating in contact-mating zone; tin-lead over nickel in termination area. Blue glass-filled thermoplastic housing, rated UL94V-0. Current rating: 1 amp. Dielectric strength: >1000 VRMS. +125°C. UL recognized, CSA certified. *Order mounting hardware accessories separately on this page.*

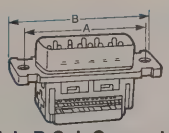
Female D-Sub Connector



Male D-Sub Connector

636 series D-sub connectors have 15µ" gold on contact area. Available in either 0.120" (min.) thru-hole or #4-40 threaded insert thru-hole mounting. Insulation material: glass reinforced thermoplastic rated for flammability per UL94V-0. Contacts: copper alloy with selective gold over 50µ" (min.) nickel underplate overall. Shell: tin-plated steel. Current rating: 1A. Insulation resistance: >1000 megohms @ 500VDC. DWV: >500Vrms @ sea level. Temperature rating: –55°C to +125°C. Color: black. UL recognized, CSA certified.

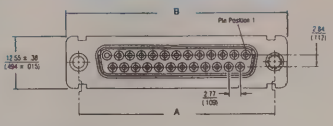
622 SERIES ANSLEY® LOW-PROFILE METAL SHELL IDC "D" CONNECTORS



Designed for reliable EMI/RFI shielding. Interfaces in high-density, low-profile applications. Blue glass-filled thermoplastic housing, rated UL94V-0, with tin-plated steel shell. Beryllium copper contacts plated with 30µ" gold over 50µ" nickel in contact zone, tin-lead over nickel in termination area. Type no. suffixes: **PM** = pin receptacle with 0.125" (3.18) thru-hole; **SM** = socket plug with 0.125" (3.18) thru-hole; and **SM1** = socket plug with #4-40 threaded insert. Current rating: 1A. Dielectric strength: > 1000Vrms. Temp. rating: –55°C to +125°C. UL recognized, CSA certified. NOTE: 50-position cable strain relief included with connector. *Order mounting hardware accessories separately on this page.*

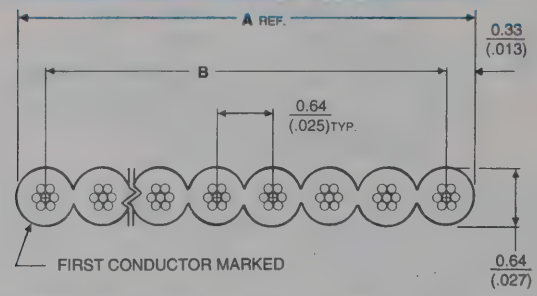
0.025″ FINE PITCH FEP FLAT CABLE



Fine-pitch flat cable provides the means to reduce mass and weight in flexible wiring assemblies. Polarizing stripe allows easy identification of number one circuit even in twisted or irregularly curved applications. **140 series** conductors are 30 AWG, 7/40 silver plated, stranded copper. Insulation material: flexible blue-gray PVC. Voltage rating: 150Vrms. Impedance: 95 ohms. Temperature rating: 150°C. **141 series** conductors are 30 AWG, silver plated, solid copper. Insulation material: extruded Teflon® FEP. Voltage rating: 150Vrms. Impedance: 90 ohms. Temperature rating: 150°C. UL recognized, CSA certified. **Sold in spools of 100′.**

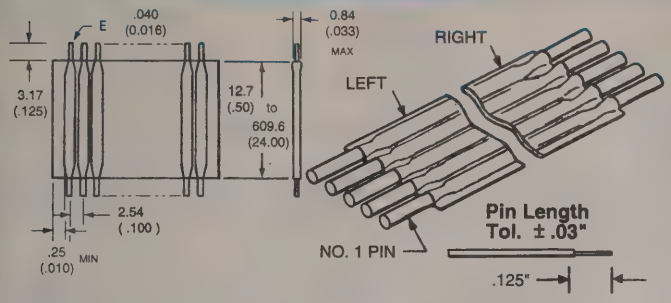
FLAT CABLE AND TOOLING

FLEXSTRIP™ JUMPERS



Ordering Information

FS - [N] - 2[2] - A - [30]

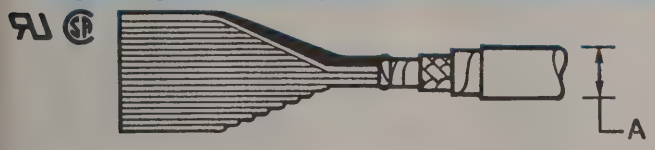
Insulation Material	Insulation Length	No. of Conductors
N= Nomex ™	(1", 2", 3")	(44 Maximum)
P= Polyester		

Multiconductor board-to-board interconnect devices are preplated and ready to use without wire stripping, cutting to length, or solder preparation. A convenient alternative to conventional point-to-point wiring for high-density, high-vibration PC board interconnect applications. One-piece construction provides vibration-resistant reliability and longer life than conventional wiring systems. Round-to-flat transition zone permits flexing stress to be distributed evenly throughout flat conductor area and acts as a hinge between PC boards. This allows boards to be opened for fabrication and servicing, then close for increased compactness.

To order FLEXSTRIP™ Jumpers, follow these instructions and insert your choices into the part number structure as shown in the boxes above:(1) Select either Nomex (N) or Polyester (P) construction.(2) Choose from 1″, 2″, or 3″ insulation lengths.(3) Specify the number of conductors for one piece (minimum of 2, maximum of 44).(4) Specify the quantity of FLEXSTRIP™ Jumpers required.(5) When ordering, use vendor identification number 8162. *Call your local Newark sales office for pricing.*

(8394) (de04293)

ANSLEY® CABLE FOR ROUND-TO-FLAT APPLICATIONS



300 series shielded and **301 series** unshielded tin-plated 28 AWG stranded cable offers the construction advantages of both flat and round cable under a single flexible PVC jacket. 360° plastic-laminated double aluminum foil shield with tinned copper braid shield overall reduces EM and RF interference and may be crimped to metal lining of backshell. Voltage rating: 300Vrms. Temperature rating: 80°C. UL recognized, CSA certified. Other conductor sizes available; *contact your local Newark sales office.* **Sold in spools of 100′.**

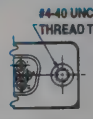
Mounting Style B Threaded Standoff



Mounting Style C Flush Insert

For use in vertical solder PC board applications. Intermate with all D-Sub connectors. 0.480″ profile PCB mount. Molded black glass-filled polyester housing, rated UL94V-0. Copper alloy contacts plated 30μ″ gold over 50μ″ nickel in contact area with tin/lead over nickel solder plating on tails. Mounting styles indicated by type number suffix: **B** = #4-40 threaded round standoff; **C** = flush insert #4-40 threaded insert. Board thickness: 0.062-0.093″ (1.57-3.18). Operating voltage: 600VDC. Current rating 5 amps. Operating temperature:–55° to +125°C. UL recognized, CSA certified. Mounting style A and J are available; *contact your local Newark sales office.*

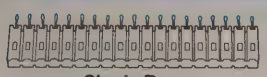
PC BOARD CONNECTORS

BOX-TYPE STRIP SOCKET CONNECTORS



Single Row

Double Row

Single- and double-row receptacle sockets on 0.100″ centers are designed for close PC board interconnect where plugability is desired. Create a between-board dimension of 0.285″. Insertion: 228 grams per contact typical. Extraction: 120 grams per contact typical. Insertion/extraction forces mated to 0.025 sq. in. pin. **Sold in packages of 5.**

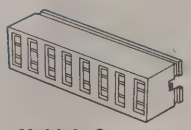
MICROSHUNT JUMPERS

Single Contact



Multiple Contacts

These versatile insulated shunt jumpers on 0.079 and 0.100″ centers are designed for field programming applications. Plastic is made of UL94V-0 material. Insertion: 200 grams per shunt position typical. Extraction: 120 grams per shunt position typical. Operating temperature: –65°C to +125°C. **Sold in packages of 5.**

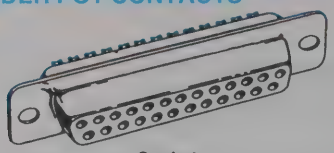
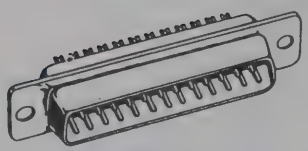
D-SUBMINIATURE CONNECTORS

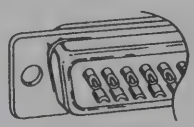
D-SUBMINIATURE CONNECTORS WITH SOLDER POT CONTACTS



Socket



Plug



Cutaway View

Designed for applications where space and weight are prime considerations. Connectors intermate with corresponding contact types. Steel shell with yellow chromate plating. Glass-filled thermoplastic insulator, rated UL94V-0. Insulator resistance: 1000MΩ @ 500VDC. Working voltage: 500VDC; high-density versions 300VDC. Current pin rating: 5A; high-density versions 3A. Solder pot machined or stamped brass contact pins. Gold- or tin-plated contact finish. Wire size: 24 to 20 AWG. Operating temperature range: –55°C to +105°C. *D-Sub connector punches are available; contact your local Newark sales office for details.*

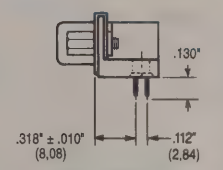
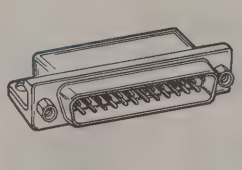
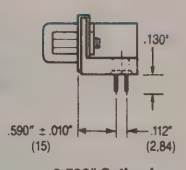
RIGHT-ANGLE SNAP-IN PC BOARD D-SUB CONNECTORS

VOLTREX™ brand



0.318" Setback





0.590" Setback

D-Sub connectors feature all-plastic housing and metal design. 2-piece, glass-filled thermoplastic housing. Steel shell with zinc plating and yellow chromate coating. Brass alloy contacts with gold-over-nickel plating. Working voltage: 500VDC. Dielectric strength: 1kV for one minute. Working current: 5A. Insulation resistance: 1000MΩ @ 500VDC. Operating temperature range: –55°C to +105°C. UL94V-0 rated.

1-pc. plastic covers fit all standard EIA cable and D-Sub connectors from most manufacturers. Half-moon insert system grips and prevents slippage or twisting of cable. Black polypropylene cover and insert. 1-pc. dual exit plastic cover features slotted thumbscrews and hinged snap-locking design in 25 positions. Black nylon 6/6 cover, UL94V-2 rated, with black zinc-finished steel screw machined thumbscrews. 2-pc. plastic covers feature split-jacket insert system that accepts most cable sizes. Gray or black styrene plastic cover, rated UL94V-0, with zinc-finished steel hardware. Metallized-plastic covers feature nickel-over-copper plating, UL94-HB rated, and PVC insert, UL94V-0 rated. Feature compression insert system that performs effectively with foil or braid shields. Metal covers feature compression insert system that produces a strong mechanical connection with most cable sizes. Straight or right-angle cable exit design. Accommodate standard D-Sub connectors from most manufacturers. Die-cast zinc cover with PVC insert, rated UL94V-0. Exceeds EMI/RFI FCC DOC#20780 Classes A and B.

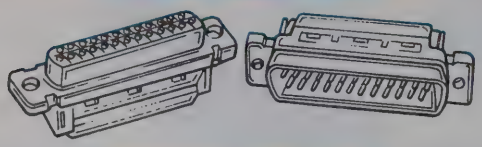
D-SUB CONNECTORS AND PANEL PUNCHES

PLASTIC AND METAL RIBBON CABLE IDC D-SUB CONNECTORS



PLASTIC IDC CONNECTORS

Special contact design allows usage of standard 0.050″ flat ribbon cable while maintaining standard contact centers of 0.050″. Low-profile, fully intermateable connectors are suitable for compact requirements of modern peripheral equipment. Contacts: copper alloy, gold plated over nickel. 1-piece universal hood provides 3 locking varieties: plastic latch for one-hand operation and quick disconnect; screw locking; and metal spring latch locking. Voltage rating: 300VAC. Current rating: 5A per contact. Insulation resistance: 5000MΩ min. Contact resistance: 5MΩ max. @ 1A DC. Wire size: 22-28 AWG. Hood accepts straight and right-angle cable entry. Operating temperature range: –55°C to +125°C.

METAL IDC CONNECTORS

D-subminiature pin and socket connectors allow highly reliable mass termination of standard 0.050″ pitch round-conductor flat ribbon cable. Gastight junction with each conductor at 4 places. Internal transition from standard 0.055″ contact spacing which allows termination of standard 0.050″ ribbon cable; no special cable preparation is required. Contact plating: gold over nickel. Mating area has duplex plating. Insulator material: blue, glass-filled polyester, rated UL94V-0. 22-28 AWG. Voltage rating: 300VAC. Current rating: 5A per contact. Insulation resistance: 5000MΩ min. Contact resistance: 5MΩ max. @ 1ADC. Operating temperature: –55°C to +105°C.

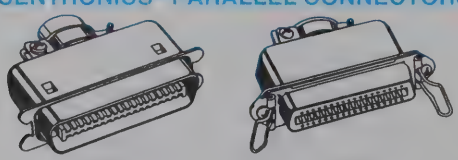
CENTRONICS® PARALLEL CONNECTORS



Plug Socket

Centronics®-type connector offers a fast, economical method to achieve electrical interconnection. A trapezoidal-shape shell provides correct polarity. Shell: nickel-plated steel. Spring latch: nickel-plated, black rubber bushing. Insulator: glass-filled thermoplastic. Insulator resistance: 1000MΩ min. @ 500VDC. UL94V-0. Working voltage: 500VDC. Current rating: 5 amps per contact. Copper alloy contacts with gold plating over nickel. Wire size: 22-24 AWG. Operating temperature range: –55°C to +105°C.

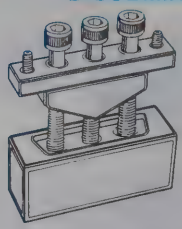
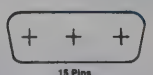
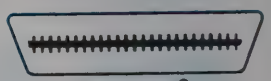
(8772) (de51304)

D-SUBMINIATURE CONNECTOR PANEL PUNCHES





Standard



Centronics®

- **Accurate Punch-Out Conforms to Plug or Receptacle**
- **Burr-Free on Panel Front**
- **Minimal Burr on Rear of Panel**
- **Quality-Built Punch/Die Set Can Be Re-Ground to Sharpen**

For use with Thomas & Betts Ansley®, Cannon/ITT, and Cinch plastic plugs and receptacles, as well as all other plastic and metal D-sub connectors; *see Product and Manufacturers Indexes for available selection.* The punch/die unit is machined of D-2 hardened tool steel with ground cutting edges. Punch and die are drawn together by 3 bolts which are tightened in a predetermined sequence. Adhesive-backed templates are included as guides for an accurate hole punch-out. Before the hole is completely cut, 2 hard point screws are tightened to both mark and punch the mounting screw holes. After the hole is cut, the slug is ejected from the die by use of 2 cap screws. All necessary screws and wrenches are provided. Punch cuts hole in 22- to 16-gauge steel or aluminum panel material. *Order replacement templates and repair kits separately on this page.*

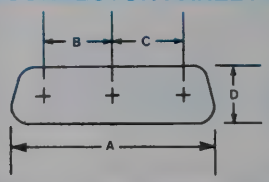
RIBBON CONNECTOR PANEL PUNCHES



Ribbon connectors feature the same trapezoidal shape as the D-subminiature connector but have buss-type contacts and require a larger panel opening. Punch and die unit is machined of D-2 hardened tool steel with ground cutting edges and are drawn together by 3 bolts which are tightened in a predetermined sequence. Adhesive-backed templates are included as guides for an accurate hole punch-out. All necessary screws and wrenches are also provided. **Type BBCMK-50-3M** is a special panel punch used for mounting the 3M Delta Ribbon connector, *ordered separately on page 257. Order panel punch repair kit separately on this page.*

D-SUB CONNECTOR KITS AND CRIMP TOOLS

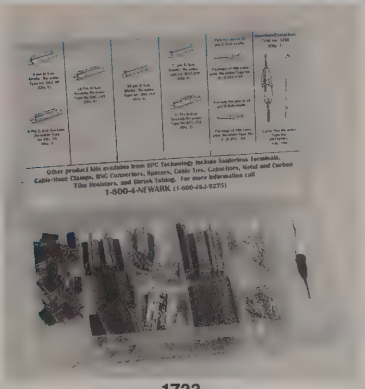
D-SUBMINIATURE CONNECTOR CRIMP TOOL KIT

BESTOOL™ brand

Type 8455-0662 D-Sub kit includes a crimp tool frame and pre-packaged D-subminiature contacts. Ergonomic tool design features a full-cycle mechanism which allows crimps to conform to industry standards. Easy-load positioner provides proper contact orientation. Kit includes crimp tool with positioner, 100 D-subminiature pins, 100 D-subminiature sockets, and a foam insert in a durable plastic storage case.

16N1881 Type 8455-0662. **Each** **258.34**
(8842) (ne08394)

D-SUBMINIATURE CONNECTOR KITS



1733

Type 1733 kit includes: 100 pins, male; 100 pins, female; 6 each: DB-9, DB-25, DB-37 plugs, male; 3 each: DB-9, DB-25, DB-37 plugs, female; cable ties; and metal tip pin inserter/extractor. **Type 1734** kit includes 100 pins, male; 100 pins, female; 16 DB-25 plugs, male; 6 DB-25 plugs, female; cable ties; and metal tip pin inserter/extractor.

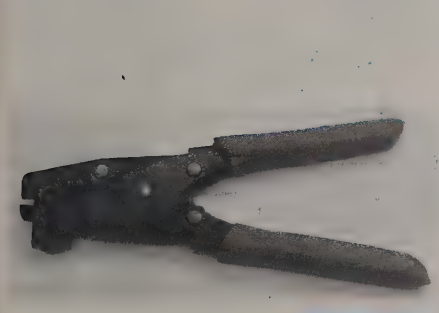
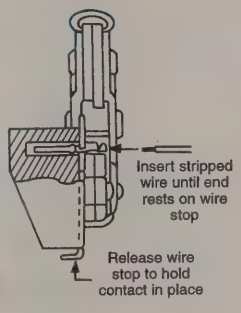
CRIMP TOOL FOR STANDARD D-SUBMINIATURE CONTACTS

BESTOOL™ brand





3-STEP CRIMP

1. Insert contact into locator. 2. Close tool carefully until connector is held in place without distorting ears. Insert stripped wire. Squeeze handles. 3. Raise locator and remove contact.

All crimp configurations are fully machined to maintain tolerances to industry standards. Straight-line jaw closure provides consistent crimp. Wide cushion grips provide user-friendly feel. Locator and wire-stop properly orient contacts. Crimps conductor and insulator portions of contacts in one closure. Heat treated for extended use. For open-barrel contacts in 30-20 AWG wire sizes. Rated at 5000 cycles.

90N3314 Type CT-200-DC-01. **Each** **53.82**
(8884) (ne53452)

OPEN-BARREL CRIMP TOOLS

BESTOOL™ brand

Crimp tools have full cycle ratcheting action for precise termination of open-barrel contacts. **Type 1748** has 3 crimping nests for AMP® Multimate contacts 5-20, 24-20, 18-16, and 28-24 AWG. A contact support and wire stop are provided. **Type 1749** has two crimping nests for AMP® D-Sub sizes 28-24 and 24-20 AWG. Locator and wire stop are provided. Both tools crimp wire and insulation in a single action.

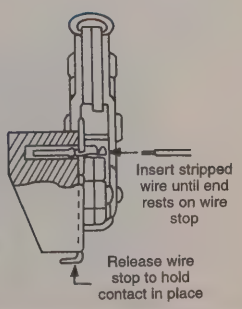
(18632) (ne10843)

HIGH-DENSITY D-SUBMINIATURE CONNECTOR CRIMP TOOL

BESTOOL™ brand



Crimps high-density D-subminiature pin and socket open-barrel contacts. Locator and wire-stop provide proper orientation during crimping. Conductor crimps are B-type. Insulation crimps are oval type, produced in two cavities: A is 22-26 AWG, B is 28-30 AWG. Other crimp tools available; *contact your local Newark sales office.*

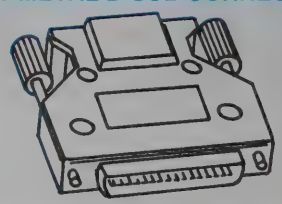
HIGH-DENSITY METAL D-SUB CONNECTOR COVERS



Rugged die-cast zinc D-Sub covers with nickel or zinc plating. Accept most 0.050 x 0.100″ centerline spacing D-type plugs. Meets SCSI-2 and -3, EIA RS-232, HSC and IPI standards. Exceed FCC DOC#20780 for Class A and B housings, maintaining attentuation beyond 1GHz. 50- and 68-position covers with thumbscrews utilize compression insert system, which provides superior shielding against EMI/RFI, and accommodate a wide variety of diameters, up to 0.490″. 26-position cover comes with spring latches and utilizes steel staple for strain relief.

VOLTREX™ BRAND TWIST-ON BNC CONNECTORS

Lightweight BNC plugs and jacks significantly reduce assembly time for cable connection because there is no soldering or special tools required for termination. **Figs. 6-8** are designed for solid wire except for **types CPFI-88SW-1**, and **CPFI-88SW-2** designed for stranded wire. **Figs. 9-15** are intermateable with all BNC units having a 2-stud bayonet locking coupling mechanism that meets military specifications MIL-C-39012. Frequency rating: 0-4GHz.

BESTOOL™ BRAND F-TYPE COAXIAL CRIMP TOOL

Type CT-100F parallel action coaxial crimp tool for F type connectors is an economical, rugged 2-cavity hand tool. Crimp capacity for front cavity is 0.260″ diameter and rear cavity is 0.429″ diameter. High carbon thru-hardened alloy steel jaws. High carbon steel handles with nickel-plated finish feature black cushion grips. Overall length: 9″.

81N5434 Type CT-100-F. **Each** **16.15**
(8737) (de04265)

BESTOOL™ BRAND F CONNECTOR TOOL

F connector tool combines two tools into one, a 7⁄16″ hex socket and #3⁄8-32 threaded end. The hex socket makes installation and removal of CATV F connectors easy. The threaded end makes it easy to install connectors on coaxial cable.

92N3775 Type 2037. **Each** **26.86**
(18630) (ne10840)

BESTOOL™ BRAND CATV CABLE STRIPPER AND CARTRIDGES

CATV cable stripper strips RG-6/59 to ¼″ x ¼″ preparation. Replaceable snap-in cartridges; *order separately below.* Spare cartridge holder built into tool.

VOLTREX™ BRAND 50-OHM UHF AND MINI-UHF CONNECTORS

All connectors have a voltage rating of 500V with a frequency rating of 0-2GHz, except **types 1532-1534**, which have a frequency rating of 0-500MHz and **type 1507** which has a voltage rating of 335V. Feature Delrin insulation except, **type 1532**, which is Bakelite and **types 1533, 1534** which are Teflon®. Type numbers with (*) have brass contacts. Type numbers with (+) have silver contacts.

EASY-ON™ BRAND 30-PC. UNIVERSAL COAXIAL ADAPTER KIT

Type 8589-0863 30-piece universal adapter kit allows mix and match of any 2 male or female coaxial fittings. Each connector has a common end and a universal end. Simply choose the 2 common connector ends needed and screw them together with the universal adapter. Kit contains 6 universal adapters, 2 each of the following: BNC male adapters, BNC female adapters, N male adapters, N female adapters, SMA male adapters, SMA female adapters, TNC male adapters, TNC female adapters, UHF male adapters, UHF female adapters, mini-UHF male adapters, and mini-UHF female adapters. All parts are silver plated with gold contacts and Teflon® insulation. Features handy zippered storage case.

COAX CRIMP TOOL KIT

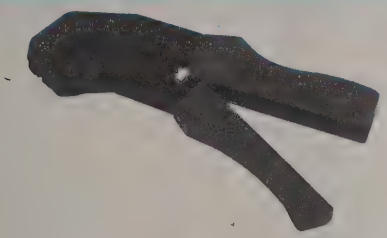
Type 8455-0663 coax kit features full-cycle mechanism which allows terminations to conform to industry standards. Die sets interlock to align crimp cavities and are easily interchanged with 2 mounting screws. Kit includes crimp tool frame, RG-58 and RG-59 die set, RG-58 and RG-59 die set with mini-center contact crimp, 3-level stripping tool, 10 RG-58 BNC connectors, 100 RG-59 BNC connectors, and a foam insert in a durable plastic case.

16N1882 Type 8455-0663. **Each** **325.00**
(18636) (ne10852)

STANDARD CRIMP TOOLS AND DIE SETS



Types 8400, 8500, and **8600** crimp tools and dies are designed for the professional that insists on the best commercial-grade, full-cycle crimp tool available. The ergonomic progressive pivoting design provides maximum crimping force with reasonable handle pressure. Accepts interchangeable dies. Molded grips. Positive ratcheting assembly with emergency release. Meets or exceeds all UL tensile requirements.

90N3315 Type 8405-015 Frame Only. **Each** **72.66**

Type CTR-8556-01 interchangeable die crimp tool comes with **type CTD-8556-02** die set. Crimps center pin to 0.068″ hex or 0.042″ square, certain outer ferrules of fiber-optic connectors to 0.100″ and 0.178″ hex, RG-174 ferrule to 0.178″ hex, RG-58 ferrule to 0.213″ hex, and RG-59 ferrule to 0.255″ hex.

84N1445 Type CTR-8556-01 Tool Frame & Die Set.. **Each** **102.99**
95N4331 TypeCTD-8556-02 Die Set Only. **Each** **37.68**

Type CTR-8572-01 interchangeable die crimp tool comes with **type CTD-8572-02** die set. Crimps outer ferrule to 0.324″ hex, RG-6 in one closure, and RG-59 outer ferrule to 0.360″ hex in the other closure.

84N1447 Type CTR-8572-01 Tool Frame & Die Set. **Each**..... **102.99**
95N4333 Type CTD-8572-02 Die Set Only. **Each**..... **37.68**

Type CTT-8627 interchangeable die crimp tool comes with **type CTD-8627** die set. Crimps D-Sub open-barrel contacts. "B" type conductor crimps and "oval" insulation crimps meet O.E.M. specifications and are produced in two cavities: front 28-24 AWG and rear 24-20 AWG.

97N8780 Type CTT-8627 Tool Frame & Die Set. **Each**..... **102.99**
97N8781 Type CTD-8627 Die Set Only. **Each**..... **44.41**

Type CTD-8567-02 die crimps the center pin to a 0.042″ square or 0.068″ hex and the ferrule on small cable to a 0.128″, 0.151″, or 0.178″ hex.

95N4332 TypeCTD-8567-02 Die Set Only. **Each** **37.68**

Type CTD-8565-02 die crimps the center pin to a 0.042″ square or 0.068″ hex, the RG-59 ferrule to a 0.255″ hex, and the 8281 ferrule to a 0.324″ hex.

97N9256 Type CTD-8565-02 Die Set Only. **Each**..... **37.68**

Type CTD-8569-02 die crimps the center pin to a 0.068″, 0.080″, or 0.100″ hex and the RG-8 ferrule to a 0.429″ hex.

97N9257 Type CTD-8569-02 Die Set Only. **Each**..... **37.68**

Type CTD 8568-02 die crimps two center pins to a 0.076″ hex in one closure and the RG-8 outer ferrule to a 0.429″ hex.

92N8958 Type CTD8568-02 Die Set Only. **Each** **37.68**

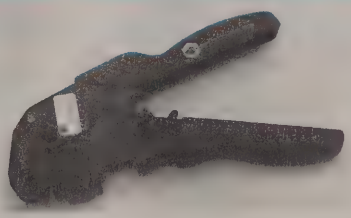
Type 1756 die crimps the center pin to a 0.044″ or 0.050″ square, the RG-58 ferrule to a 0.206″ diameter and the RG-59 ferrule to a 0.238″ diameter.

92N3751 Type 1756 Die Set Only. **Each** **38.25**

Type 1755 die crimps outer ferrule on most SMA, SMB, or SFR type fiber-optic connectors to a 0.151″, 0.178″, or 0.213″ hex.

92N3750 Type 1755 Die Set Only. **Each** **38.25**
(8736) (de04264)

COMPACT CRIMP TOOL AND DIE SETS



Type CTT-100L crimp tool frame features a compact design to provide a high level of efficiency and convenience for terminating small to medium size wire or cable. High carbon steel and quality construction provide the accuracy and longevity expected of a durable commercial-grade crimping tool. Compact, lightweight design for wire and contact handling convenience. This multipurpose tool frame accepts interchangeable crimp die sets, *ordered separately below.*

66N9835 Type CTT-100L Tool Frame Only. **Each** **74.01**

Type CTD-100-51 die set crimps center pin to a 0.068″ hex, RG58 ferrule to a 0.213″ hex, and RG59 ferrule to a 0.255″ hex. *Order* **type CTT-100L** *tool frame separately.*

66N9840 Type CTD-100-51 Die Set Only. **Each** **37.68**

Type CTD-100-52 die set crimps center pin to a 0.068″ hex, RG174 ferrule to a 0.178″, and 8281 ferrule to a 0.324″ hex. *Order* **type CTT-100L** *tool frame separately.*

66N9841 Type CTD-100-52 Die Set Only. **Each**..... **37.68**

Type CTD-100-54 die set crimps center pin to 0.042″ sq., RG58 ferrule to a 0.213″ hex, and RG59 ferrule to a 0.255″ hex. *Order* **type CTT-100L** *tool frame separately.*

66N9842 Type CTD-100-54 Die Set Only. **Each**..... **37.68**

Type 1757 die set crimps center pin to a 0.068″ hex, RG59 ferrule to a 0.255″ hex, and 8281 ferrule to a 0.324″ hex. *Order* **type CTT-100L** *tool frame separately.*

92N3752 Type 1757 Die Set Only. **Each** **38.25**

Type 1758 die set crimps center pin to a 0.042″ sq. or 0.068″ hex, ferrule on a small coaxial cable to a 0.100″ or 0.128″ hex, and RG174 ferrule to a 0.178″ hex. *Order* **type CTT-100L** *tool frame separately.*

92N3753 Type 1758 Die Set Only. **Each** **38.25**

Type 1759 die set crimps outer ferrule on most SMA, SMB, and SFR fiber-optic connectors to a 0.151″ hex, 0.178″ hex, or 0.213″ hex. *Order* **type CTT-100L** *tool frame separately.*

92N3754 Type 1759 Die Set Only. **Each** **38.25**
(18634) (ne10836)

RATCHET-TYPE BNC CRIMP TOOLS

Rugged 3-cavity crimp tools feature ratchet release mechanism that allows removal of incorrectly placed connector or crimp ring prior to completing crimp cycle. High carbon thru-hardened alloy steel jaws with black oxide finish are numbered for easy identification. Nickel-plated high carbon steel handles with black cushion grips. Overall length: 9″. **Type CTR-100-BNC-1** crimp capacity for front cavity is 0.068″ hex, center cavity 0.213″ hex, and back cavity 0.255″ hex. RG/U cable sizes: 55, 58, 59, 120, 140, 141, 142, 223, 400. **Type CTR-100-BNC-2** crimp capacity for front cavity is 0.068″, center cavity 0.178″ and back cavity 0.324″. RG/U cable sizes: 122, 180, 195, and 8381.

MICROPAX™ HIGH-DENSITY PC BOARD CONNECTORS

2-row, high-density connectors feature low insertion force for easy engagement/disengagement. Impedance controlled (shielded) for reliable electrical performance. Duplex plating. High-temperature plastic withstands IR, wave, and vapor-phase soldering. Connector-to-connector and connector-to-board polarization provides proper mating and application. Housing: zinc alloy. Current rating: 0.5 amp. Capacitance: 2.8pF. Impedance: 55 ohms. Vertical and straddle mount versions feature low-profile design to minimize board-to-board spacing. Crosstalk (near end at 500ps): 7:1 S:G = 8.5%; 1:1 S:G = 2.0%. UL recognized, CSA certified.

FLAT FLEX MALE/FEMALE CLINCHER™ CONNECTORS

For use with thin film conductive ink circuits whose total combined thickness of conductor and insulation does not exceed 0.006″ (0.152). Simultaneously terminate flat conductor, flat cable or flexible circuitry without cable stripping. Mate with 0.025″ (0.635) square or round pins on 0.100″ (2.54) centers. Dual-metal PV™ contacts ensure excellent electrical and mechanical performance. Clinching portion of contact forms gas-tight crimp to prevent contamination. Cupro-nickel contacts plated with 30μ″ gold or 100μ″ tin/lead finish. Current rating: 2A. Resistance: 15mΩ maximum. Maximum insertion force: 3N per contact. Minimum withdrawal force: 0.30N per contact. Blue polypropylene body, rated UL94V-0. Insulation resistance: $5x10^4$MΩ minimum. Temperature range: –65°C to +105°C. Withstanding voltage: >500Vrms at sea level. UL recognized. CSA certified. To order parts for conductive ink circuits less than 0.00″ (0.15) total thickness, change first digit after dash in type number from "0" to "1"; for example: 65801-039 would be changed to 65801-139. Male Clincher™ connectors are available, *contact your local Newark sales office.* (Available up to 32 positions.)

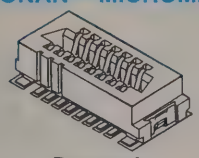
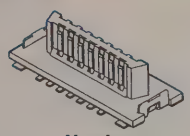
BERG'S CONAN™ MICROMINIATURE 1mm CONNECTORS



Receptacle



Header

- **Robust Blade-on-Beam Contact Design**
- **"Passive Latching" Contacts Provide Audible Click and Retention**
- **Headers Provide 5 Height Options with Standard Receptacle**
- **Surface Mount with 0.004″ Lead Coplanarity**
- **Duplex-Plated Contacts**
- **Polarized with Optional Non-protrusive Orientation Posts**
- **Surface Mount Metal Holddowns**
- **Tape-and-Reel Available to Support Automated Placement**

CONAN™ connectors are low-profile, surface mount connectors that feature dual rows of contacts on 0.039″ (1.0) pitch in sizes that offer from 9 to 69 contact positions. Available mated height of 0.163″ (4.15), allows for extremely close spacing of parallel circuit boards. Designs requiring additional clearance can be accommodated with taller header options for 0.177″ (4.5), 0.197″ (5.0), 0.236″ (6.0), or 0.276″ (7.0) mated height. Insulators withstand infrared and vapor-phase reflow soldering temperatures. Shipped in antistatic tubes or provided on EIA standard tape-and-reel to support automated connector placement. Reeled connectors have pick-up pads which provide ample area for pickup with standard vacuum nozzles, without increasing space requirements for the connector. Tin-lead finish in the solder areas and 0.004″ (0.1) lead coplanarity produce high-quality solder joints. Surface mount retainers increase mechanical strength after soldering, but don't require force to be applied during component placement. Polarized housings prevent mismating. Molded lead-in assists blind mating during final assembly. Integral passive latches protect against accidental disengagement from mechanical shocks or vibration. Gold flash over palladium nickel finish in the contact areas provides the highest reliable electrical performance possible under extreme environmental conditions. UL recognized, CSA certified.

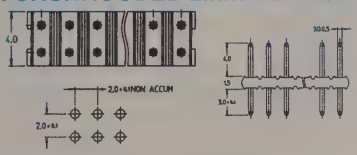
MINITEK™ II UNSHROUDED 2mm VERTICAL HEADERS



High density, 0.079″ x 0.079″ (2.00 x 2.00) pitch double row vertical headers. Utilize a 0.059″(1.5) low-profile design. 0.020″(0.5) square drawn wire, phosphor-bronze pin provide four smooth mating surfaces. Number directly after dash in type number specifies pin plating: **-0** = 0.008μ″ gold and **-1** = 0.030μ″ gold. Pin underplated with 50μ″ minimum nickel. Solder tail length: 0.118″(3.0). Mating length : 0.157″(4.0). Black, glass-filled nylon housing, rated UL94V-0. Wave solderable. Standoffs for easy PC board cleaning. Voltage rating: 200 VAC/DC. Current rating: 2 amps continuous. Insulation resistance: 1000 MΩ minimum. Withstanding voltage: 650V rms. Operating temperature range: –40° to +105°C. UL recognized, CSA certified.

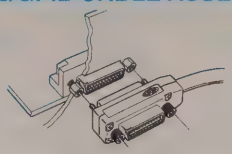
IEEE 488/GPIB CABLE ASSEMBLIES



General-purpose interface bus assemblies feature double shielded cable, metal cast connector housing and shield termination. Pre-loaded cantilever beam ensures low connector insertion force and minimum contact wear. Interface meets IEEE-488 specifications. 0.85″ (21.59) spacing. Connector has insulation resistance of 10GΩ minimum, 1A maximum current rating, and 1,000 cycles durability. Contact force of 1-1, 5N per contact, with 24 contacts per connector side. Housed in black glass-filled thermoplastic polyester rated UL94 V-0.Contact is beryllium copper with 30μ″ gold over nickel finish. Shielded cover is zinc alloy with nickel finish. Black oxidized steel captive locking screw and metric thread. Double shielded cable made of aluminum/mylar polyester film tape with braid and drain wire. Gray PVC insulation. Material conductors,AWG 26-7/34. Signal line resistance, 0.14Ω/m maximum. Bulk resistance braid:0,0085Ω/m maximum. Capacitance: 150pF/m maximum at 1kHz. Impedance: 70-75Ω.Operating temperature: 80°C maximum.

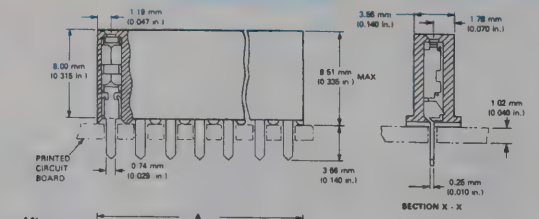
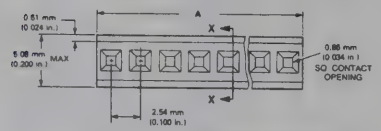
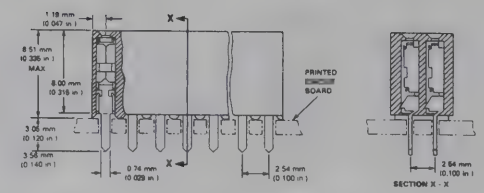
BERGCON® SYSTEM PC BOARD MOUNT VERTICAL CARD CONNECTORS

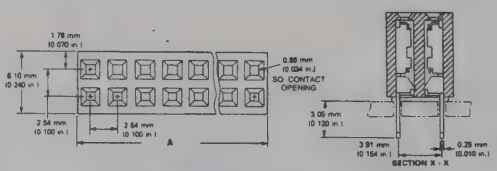




66951 Single-Row



66953 Double-Row



66956 Double-Row

Designed for parallel board-to-board stacking on 0.100 × 0.100″ (2.54 × 2.54) centerlines. **66951 series** wide base single-row, **66953 series** double-row with 0.140″ (3.56) solder tail length or **66956 series** double-row with 0.120″ (3.05) solder tail length versions. Feature 0.335″ (8.51) profile above board. Dual-metal PV™ brass contacts duplex plated with 30µ″ gold in contact area, 100µ″ tin-lead in solder area, and 50µ″ nickel underplated overall. Beryllium copper thermoplastic polyester housings, rated UL94V-0. Spring member plated with gold flash. Molded glass-filled. Wave solderable. Mate with 0.025″ (0.64) square or round pins. 0.190″ (4.83) to 0.300″ (7.62) pin length. Current rating: 3.0 amp maximum per contact. UL recognized, CSA certified.

66951 SERIES SINGLE-ROW — 0.140″ (3.56) LONG SOLDER TAIL

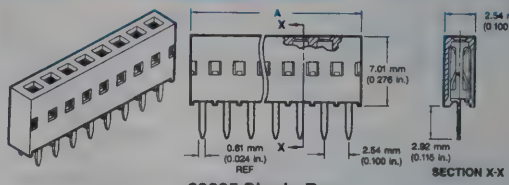
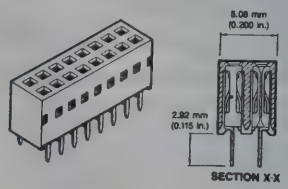
DUBOX™ SYSTEM PC BOARD MOUNT VERTICAL CARD CONNECTORS



68685 Single-Row



68683 Double-Row

Top-entry PC board mount receptacles can be stacked side-by-side on 0.100″ (2.54) centerlines. Available in **68685 series** single or **68683 series** double-row vertical, through-mount assemblies. Low profile, 0.276″ (7.0) allows closer stacking of parallel circuit boards. Preloaded dual cantilever beam phosphor bronze contacts plated with 30µ″ gold in contact area, 100µ″ tin-lead in solder area, and 50µ″ nickel underplated overall. 0.115″ (2.92) solder tail length. Molded housings, rated UL94V-0, feature beveled "lead-in" ramps to prevent pin stubbing. Wave solderable. Standoff for easy board cleaning. Mate with 0.025″ (0.64) square pins; 0.150″ (3.81) to 0.240″ (6.10) mating length. Current rating: 3 amp DC per contact. Withstanding voltage 1000VAC rms, 60Hz. Temperature range: –65°C to +125°C. UL recognized, CSA certified.

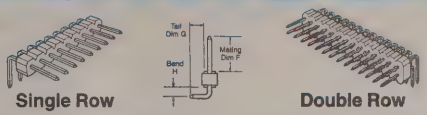
BERGSTIK® II RIGHT-ANGLE HEADERS



Single Row — Double Row

End-to-end and side-to-side stackable on 0.100″ centerline headers in right-angle single or double row versions. Fit 0.062″ PC board. Can be manually broken to desired length. Phosphor-bronze pin. Current rating: 3A maximum. Standard solder tail. Temperature range: –65°C to +130°C. UL recognized, CSA certified.

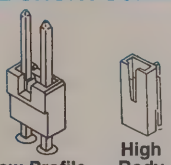
LOW-PROFILE SHUNT JUMPER SYSTEM



Low-Profile — High Body

Economical, stackable jumper systems are applicable for bussing, programming and switch replacement. Standard two-position for 0.100″ (2.54) centers. Low-profile shunt stands 0.200″(5.08) above PC board; high-body shunt stands 0.360″ (9.15) above PC board. Dual-beam, phosphor-bronze contacts, and black glass-filled thermoplastic polyester housing, rated UL94V-0. Shunts mate with 0.025″ (0.635) square and round pins. Contact resistance: 15 Megohms. Current rating: 2.5 amps maximum per contact.

QUICKIE™ IDC STRAIGHT 4-WALL SLIMLINE HEADERS

66506 series slimline headers feature 4-wall shielding to protect pins and prevent misalignment. Molded-in pins provide positive retention in housing and prevent flux contamination. Applicable to PC board thicknesses of 0.062″ (1.58) and 0.125″ (3.18). Centerlines: 0.100 × 0.100″ (2.54 × 2.54). Housing material: glass-filled thermoplastic polyester, flammability rated UL94V-0. Pin material: phosphor bronze with 30µ″ nickel underplating and 30µ″ GXT™ finish. Insulation resistance: 1 × 10^6MΩ min. Withstanding voltage: >500VAC rms at sea level. Current rating: 3A continuous. Temperature range: –65°C to +125°C. Meets MIL-C-83503. UL recognized, CSA certified.

QUICKIE™ III VERTICAL HEADERS WITH STANDARD LATCH

71918 series vertical headers feature four-walled shielding to protect pins and prevent misalignment. Dual-function latches lock and eject mated connector. Duplex-plated phosphor bronze pins with two-sided plating in contact area: contact sides of pin plated 30µ″ GXT. Polarization achieved by cutting off pin and adding polarization plug to mating Quickie™ III female connector.

Round Conductor-Flat Cable

QUICKIE™ IDC D-SUBMINIATURE CONNECTORS

Connectors feature 2-row: 9, 15, 25 or 37 total positions. Double-scalloped cover facilitates proper alignment over contacts. Preassembled cover for rapid assembly. Strain relief. IDC technique enables simultaneous termination, without prestripping, of all conductors of flat flexible, round conductor cable with 0.050″ (1.27) pitch. Housing material: metal shell with tin-over-copper finish. Contact material: copper-based alloy. Finish: 30µ″ (0.76) min gold. Color: black.

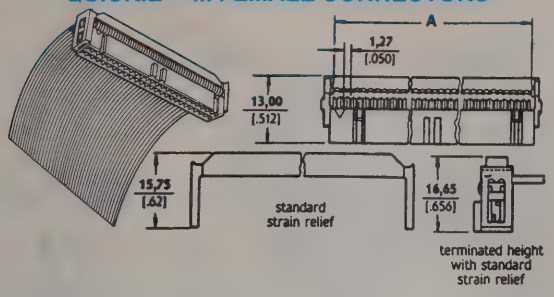
QUICKIE™ III FEMALE CONNECTORS



Pre-loaded bridge-type cover reduces assembly time, protects contacts and offers precise cover-to-base alignment. Feed-through design allows cable to be inserted either side of connector for cable-end terminations. Also allows connector to pass smoothly over cable for daisy chain applications. Serrated slots provide accurate positioning of cable over contacts during assembly. Grid: 0.100″. Gray, glass-filled thermoplastic polyester body, rated UL 94 V-0. Current rating: 1 amp. Withstanding voltage: 1000 Vrms. Temperature range: –65° to +125°C. UL recognized. Phosphor bronze contacts finished with 30µ″ GXT™ (palladium-nickel alloy with gold flash) over pre-plated nickel. *To order with 30µ″ gold over nickel plating, change type number prefix to* **71600-XXX** *and contact your local Newark sales office.*

QUICKIE ™ IDC 0.050″ (1.27MM) ROUND CONDUCTOR, FLAT CABLE

Compatible with the Quickie™ connector family. Conductor pitch is 0.050″ (1.27). **Type 76164** blue or **type 76825** gray both with identification stripe to indicate first position, UL 2651. **Type 76177** has sequentially colored conductors, UL 2884. PVC insulation, UL-rated FR-1. Resistance: > 104 megohms/3m. Temperature: 105°C maximum. Dielectric strength: 1500Vrms at sea level. Impedance: 105Ω stranded; 126Ω solid. Capacitance: 46pF/m stranded; 43pF/m solid. Voltage rating: 300VAC. Soft annealed copper conductor with tin finish. UL recognized, CSA certified. **Sold in spools of 100 ft. (30.48m).**

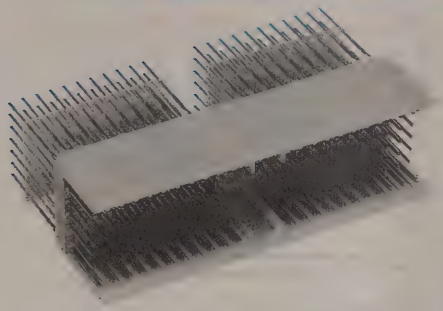
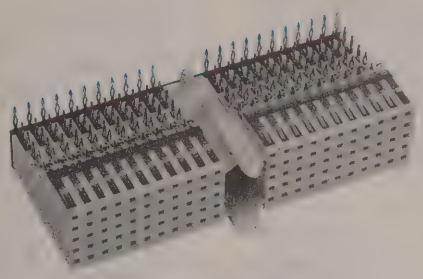
INTERCONNECTION SYSTEM

MILLIPACS 2™ POWER AND SIGNAL CONNECTORS



Vertical Header



Right-Angle Receptacle

Board-to-board or cable-to-board modular packaging on a high density 2 x 2mm grid. 5 rows of contacts with 2 additional rows of shielding/grounding allow for higher speed application. Insulator material: high temperature thermoplastic UL94V-0. Insulation resistance: 10,000 megohms initial. Operating temperature: -55°C to +125°C.

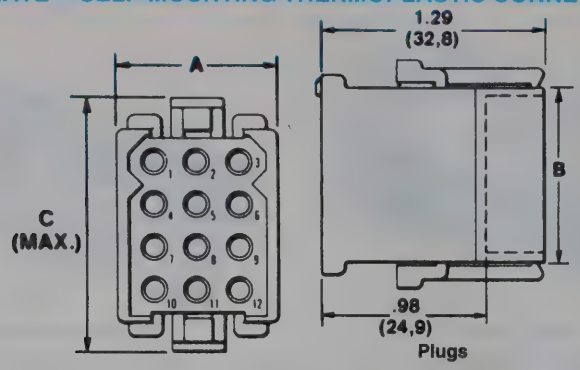
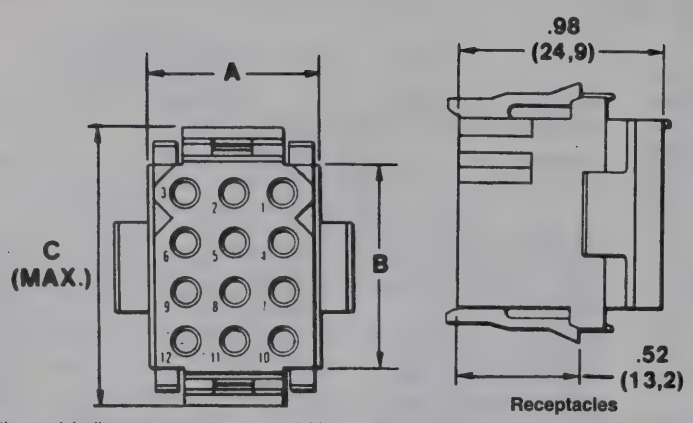
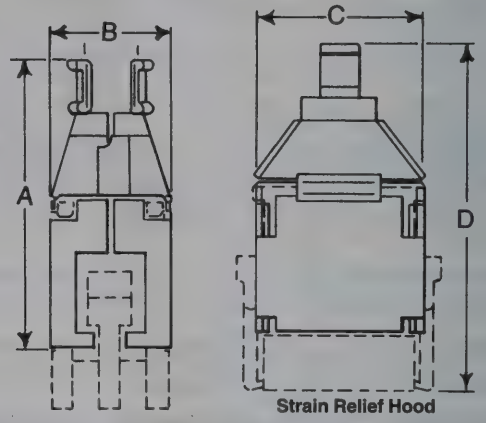
QIKMATE™ SELF-MOUNTING THERMOPLASTIC CONNECTORS







Self-mounting, quick-disconnect connectors quickly snap into a cut-out in the mounting panel and firmly lock into place without additional hardware. Receptacles accommodate panel thicknesses of 0.030 to 0.090″. Removal is accomplished by depressing the latches on the receptacle at the rear of the panel. Plugs and receptacles are fully polarized for error-free mating; "skirted" design protects against accidental damage to pins. Contacts are available in screw-machined, strip-formed, and signal power versions for subminiature coaxial cables or twisted pair cables. Available with accessory strain relief hoods. Operating temperature: –55°C to +105°C. Insulation resistance at 500VDC: 5000 megohms. Test potential: 2000VAC, 60Hz. Contact retention force: 10 lbs. minimum after 10 insertions/ extractions. Humidity: 240 hours at 40°C, 90-95% RH. UL recognized, CSA certified. For use with Trim Trio™ contacts and accessories, *order separately on pages 250-251.*

Designed to provide quick, reliable high-density interconnections of wire and cable. Fully compatible and intermateable with Lemo's B series. Quick-latching mechanism provides easy operation throughout the service life of the connector. Removable crimp contacts facilitate assembly and allow for repairability. The connector assembly is comprised of a shell fitted with the push-pull locking device; an insulation block which retains the contacts after crimping 2 half-liners for grounding and positioning of the insulator block; and a collet, which is compressed by the pressure sleeve for cable strain relief.

METALOK BANTAM™ CIRCULAR CONNECTORS

Circular connectors with metal bayonet couplings provide high reliability and durability. Accept any contacts in the Trim Trio™ Interconnection System. Plug connectors have CuZn nickel-plated bayonet coupling. Operating temperature: –55°C to +125°C. Insulation resistance: 5000 megohms min. Test potential: 2,000V–eff. Current rating: up to 13A. UL recognized. For use with Trim Trio™ contacts and accessories, *order separately on pages 250-251.*

UTP™ FULL PLASTIC CIRCULAR TRIM TRIO™ CONNECTORS

UTP series full plastic industrial circular connectors area range of multiway connectors using N° 16 Trim Trio™ 0.0625″ (1.6mm) diameter contacts. Vibration-proof plastic bayonet coupling ring incorporates a metal wave spring, which locks with an audible "click". Economical and lightweight. Fully intermateable, interchangeable and intermountable withTrim Trio™ **UTO series** (full metal) and **UTG series** (plastic with metal coupling ring) industrial connector families. Operating temperature: –55°C to +125°C. Insulation resistance: 5000MΩ min. Test potential: 2000VAC. Durability: 250 matings and unmatings. Degree of protection per DIN 40050: IP65 in mated condition. *See insert arrangements separately on this page.* For use with Trim Trio™ contacts and accessories, *order separately on pages 250-251.*

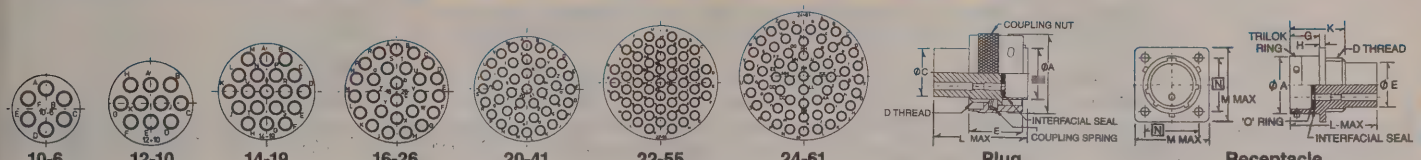
CIRCULAR CONNECTORS

SEALOK™ MINIATURE CIRCULAR CONNECTORS



MIL-C-26482 circular bayonet coupled connectors accept crimped, stamped-and-formed contacts accommodating wire sizes 20/22 and 24/26 AWG. Mates plug and receptacle with one action of the tri-lok coupling mechanism. Completely intermateable with MIL-C-26482 products. The connector is a single-piece molded thermoplastic shell and insulator with a nickel-plated metal coupling nut and tri-lok ring. Operating temp: –55°C to +125°C. Insulation resist: 5000 megohms min. *Order contacts and cable clamps separately on pages 250-251.*

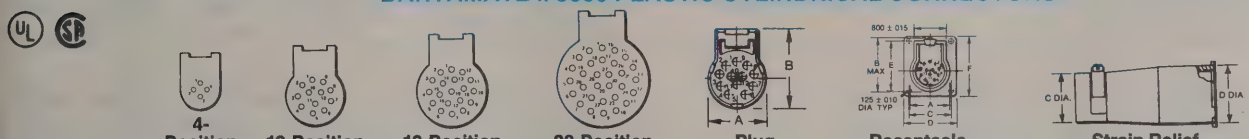
BANTAMATE II 5000 PLASTIC CYLINDRICAL CONNECTORS



BANTAMATE™ plugs are designed for applications requiring a high number of mating cycles and rapid connections and disconnections. Distinctive shape provides mating ease in blind or difficult-to-reach applications. A quick-release latching system simplifies disconnects. For reliability, the Bantamate II design utilizes the proven TRIM TRIO™ precision formed and machined contacts, *order separately on page 250.* Receptacles meet minimum durability requirements of 5000 mating/unmating cycles using a unique contact wiping system consisting of a lubricant saturated foam pad bonded to a spring-loaded stripper plate within the receptacle. Accommodates a full range of cable diameters. Strain relief can be added to either plug or receptacle. Operating temperature: –55°C to +105°C. Insulation resistance: 5000 megohms min. at 25°C. UL recognized, CSA certified.

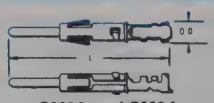
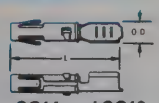
CONTACTS

TRIM TRIO™ FORMED CONTACTS

SM14 and SM16



SM20 and SM24



SC14 and SC16

SC20 and SC24

Strip-fed formed contacts are made of sheet copper base alloy with tin or gold plating. The contact retaining spring forms a closed entry cup on the socket. Contacts accommodate solid or stranded wire. Diameter: 0.0625″. NOTE: Any Trim Trio™ contact can be used in any contact position in any connector in the Trim Trio™ system. **Sold in packages of 100.** *Order spools of 3000 by replacing "ML" in type number with "M" ; contact your local Newark sales office for pricing and availability.*

TRIM TRIO™ MACHINED CONTACTS

Typical Pin

Typical Socket

RM20M12G4D28

RC20M12G4D28

Made of high-conductivity copper alloy. Springs are made of spring-temper, heat-treated, nickel-plated beryllium-copper. The socket spring supplies high contact pressure to provide low resistance contact between pin and socket. The socket contact features closed entry to prevent probe damage. Barrels have insulation grips for vibration support, a cable stop and inspection hole. Contacts are finished with 30μ″ min. gold over 75μ″ min. nickel. **Types RM20M12G4D28** and **RC20M12G4D28** sockets feature solderless wrap posts. Diameter: 0.0625″. NOTE: Any Trim Trio™ contact can be used in any contact position in any connector in the Trim Trio™ system. **Sold in packages of 100.**

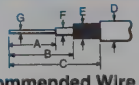
MONOCRIMP™ TRIM TRIO™ ONE-PIECE CONTACTS FOR SUBMINIATURE COAXIAL AND TWISTED PAIR CABLES

Female

Male



Recommended Wire Strip Lengths

Provides high reliability and quick, economical installation. Installs in approximately five seconds by inserting a properly pre-stripped cable (coaxial or twisted pair) and making a single crimp. Pins and sockets are fabricated of high-conductivity copper alloy, electro-plated gold over silver or nickel. Contact springs are tempered, heat-treated nickel-plated beryllium copper. Contact retention after five cycles of insertion and extraction: 15 lbs. min. Operating temperature in mated condition: –55°C to +125°C. NOTE: Any Trim Trio™ contact can be used in any contact position in any connector in the Trim Trio™ system.

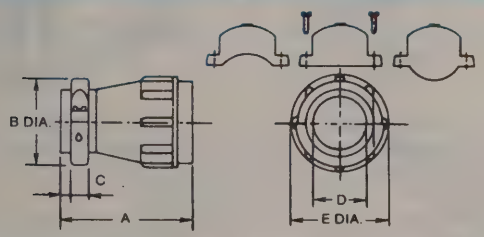
STRAIGHT CABLE CLAMP WITH STRAIN RELIEF



Glass-filled thermoplastic polyester clamps attach to the cable side of the connector to support the cable or wire bundle, providing strain relief and absorbing vibration and shock otherwise transmitted by the cable to the contact.

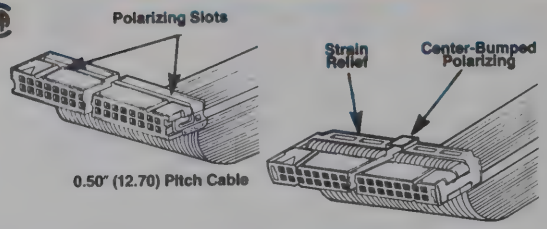
FLAT CABLE CONNECTORS

SOCKET CONNECTORS



0.100 × 0.100" (2.54 × 2.54) Scotchflex® polarizing socket connectors are available center-bumped or standard, in sizes 10 to 60 contacts, with open or closed end covers. Both standard socket and center-bumped socket connectors can be used with mating 3M headers and plug connectors. Accommodates flat cable or discrete wires. Wire accommodation: 26 AWG solid or stranded, 28 AWG solid or stranded, 30 AWG solid. UL recognized, file E68080; CSA certified. *Order clip-on strain reliefs separately below.*

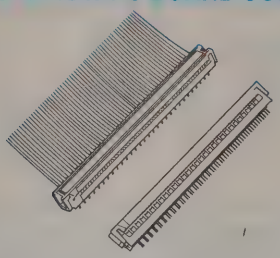
0.100 x 0.100″ 2-ROW PC BOARD CONNECTORS



2-row connectors fit standard 0.100 x 0.100″ header layout and use less board area than 4-row design. Come with cover and two-piece assembly with adhesive. Contact tail length: 0.108″ (2.75mm). Glass-reinforced polyester (PBT) insulation material with UL 94V-0 flammability rating. Wire accommodation: 26 AWG or 28 AWG solid or stranded, 30 AWG solid. Current rating: 1 amp. Temperature rating: –55°C to +105°C. UL recognized, CSA certified.

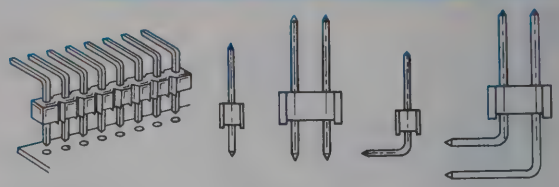
2300 SERIES PIN STRIP HEADERS



Straight and right-angle headers are available in a one-row version with 40 contacts or two-row version with 80 contacts. End-to-end and side-by-side stackable strips can be broken to any length for prototyping. Solder standoffs make it easy to wash flux residue, reducing rework. 10µ″ gold and gold flash plating on phosphor bronze pins. Black, glass-filled polyester insulation material. 100µ″ tin-lead plating on solder tails. Solder tail length: 0.120″. Current rating: 1A.

929 SERIES BOARD MOUNT SOCKETS

Fig. 1

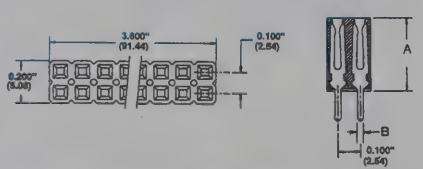

Fig. 2

Mate with standard 0.025″ round or square post headers. 0.100″ spacing between all contacts. Available in single- and dual-row with tin-lead plating or gold plating over nickel. Black polybutylene terephthalate (PBT) insulation, flammability rated UL94V-0. Solder standoffs facilitate production wave soldering. Current rating: 1A. Withstanding voltage: 1500Vrms. Temperature range: –40°C to +105°C. UL recognized.

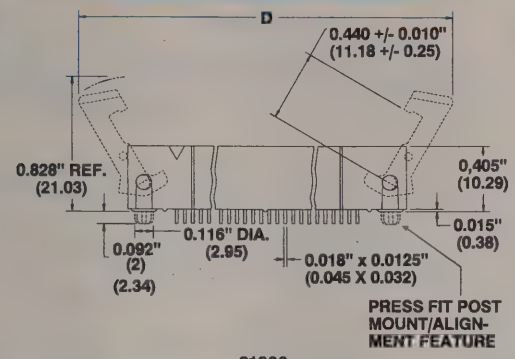
0.050 x 0.100″ (1.27 x 2.54) TRIPOLARIZED STRAIGHT 4-WALL HEADERS



81000

Specialized high-density system for internal or external interconnects from board-to-board. Unique "Hill-n-Dale" termination vertically displaces every other wire to allow use of 0.025″ ribbon cable without reducing size of IDC. Straight 4-wall design. High walls protect pins; 2-row design saves space. 0.050 x 0.100″ doubles board density. Headers have solder tail for 0.062″ (1.57) PC boards, except type numbers with **suffix 620303,** which are for 0.094″ (2.39) PC boards, and **suffix 660403,** which are for 0.125″ (3.18) PC boards. **81000 series** headers have latch and eject for rugged applications. **81040 series** header has molded-in latch, reducing board space. UL recognized, CSA certified. *Order* **type 82000** *sockets separately on this page.*

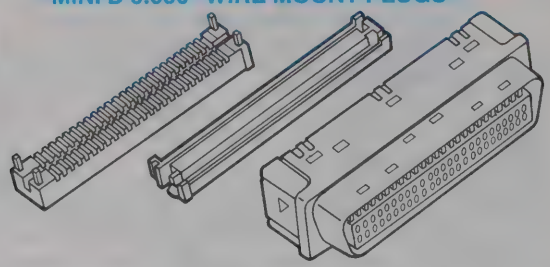
MINI D RIBBON CONNECTORS

MINI D 0.050″ WIRE MOUNT PLUGS



Mini D ribbon connectors are shielded I/O plug connectors with high-performance insertion/withdrawal cycles. Ribbon-type contact. Accept a variety of cable types including flat 0.050″ and 0.05″, shielded flat, round, and twisted pair. Underplate is 80µ″(2.0µm) nickel, which is QQ-N-290, Class 2. Wiping area is 30µ.″ (0.76µm) min. gold, rated MIL-G-45204, Type II, Grade C. Current rating: 1A. Insulation resistance: > 5 × 10^8Ω 500VDC. Withstanding voltage: 500Vrms for 1 minute. Available with a variety of junction shells. Color: black. UL recognized, CSA certified.

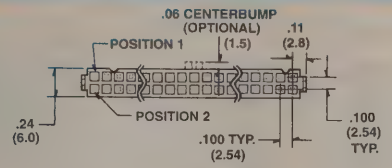
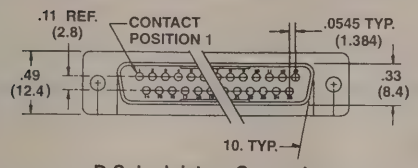
D-SUBMINIATURE AND IDC SOCKET CONNECTORS



IDC Socket



D-Subminiature Connector

Designed to reduce assembly costs for contract manufacturers and other high-volume connector users. Wire mount socket connectors are ideal for use in personal computers, printers, plotters, and fax machines. Standard footprint 0.100 × 0.100″ IDC sockets feature a cantilevered U-contact design to ensure a reliable IDC termination. D-subminiature connectors accept 0.050″ flat ribbon cable and discrete wire. Grooved cover ensures accurate cable alignment. IDC sockets are UL94V-0 glass-filled polyester with phosphor bronze contacts and 30µ″ gold plating in wiping area; will accommodate 28 AWG stranded wire. D-subminiature connectors are glass-reinforced polyester (PBT) with copper alloy contacts and 15µ″ gold plating in wiping area; will accommodate 26 and 28 AWG solid or stranded wire. Both IDC and D-subminiature connectors have 1-amp current rating and will withstand 1000Vrms. UL recognized, CSA certified.

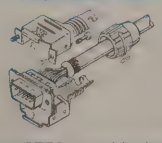
D-SUBMINIATURE METAL JUNCTION SHELLS FOR EMI/ESD PROTECTION



Designed for use with **types 3659** or **3750** round-jacketed flat cable, *order separately on page 258*. Provide EMI/ESD protection similar to aluminum die cast. Provide options in grounding for discrete wire applications. Easy assembly. Shell material: steel, nickel-plated top and bottom. Cover nut: glass-filled PBT. Jack screws: 2 each, nickel-plated steel. Retaining rings: 2 each, nickel-plated steel. Rated UL94V-0.

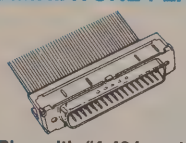
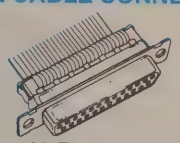
D-SUBMINIATURE FLAT RIBBON CABLE CONNECTORS



Plug with #4-40 Insert



Socket with Thru-hole in Flange

2-piece, open-cover plugs and sockets are fully compatible with all 0.050″ spaced flat cable with 26 or 28 AWG solid/stranded wire. Insulation material: glass-reinforced polyester. Contact material: beryllium copper. Contact plating (in contact wiping area): 30µ″ (0.76µm) gold MIL-G-45204, Type II, Grade C over .05-150µ″ nickel QQ-N-290, Class 2. Current rating: 1A. Temperature rating: –55°C to +105°C. *Order strain reliefs separately below.*

221°F [105°C] PVC INSULATION FLAME RETARDANT
BLACK LINE DESIGNATES DRAIN WIRE
RED LINE ON THIS EDGE DESIGNATES WIRE #1

Ground plane construction offers increased signal density or improved transmission properties. 28 AWG, 7 x 36 tinned, stranded copper conductors on 0.050″ (1.27) centers allow mass termination to various IDC connectors. Ground plane: expanded copper. Insulation material: gray polyvinyl chloride. Insulation resistance: >1 x 10^{10} ohms/10 feet (3m). Rated 300V. Temperature rating: –20°C to +105°C. Flammability rating: UL, VW-1; CSA-FT1. UL recognized, file no. E42769, style 2682. CSA certified. **Sold in spools of 100′.**

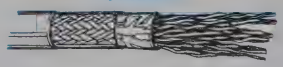
3750 SERIES TWISTED PAIR SHIELDED DISCRETE ROUND CABLE



3750 series cable comprises 26 AWG 7 x 34″ (7 x 0.160) tinned stranded copper wire, which can be terminated to a broad line of IDC connectors and carry higher power levels in long I/O harnesses. The twisted pairs reduce crosstalk for balanced drive applications or can be used as discrete wires for unbalanced drive applications. Dual shields consisting of 90% tinned copper braid and aluminized polyester wrap provide excellent EMI/ESD protection and aid in the compliance of FCC requirements. Voltage rating: 300V. Temperature rating: –20°C to +80°C. UL listed, file no. E118772, style 2464. **Sold in spools of 100′.**

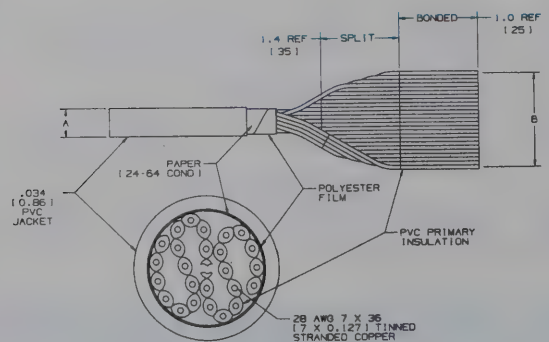
3759 SERIES 0.050″ (1.27) ROUND, JACKETED FLAT CABLE

NEC



Mass termination 28 AWG 7 x 36″ (7 x 0.127) tinned stranded copper in polyester film inner wrap. Flexible, black PVC outer wrap. Folded construction permits mass termination every 2.4″ (60.96). Temperature rating: –20°C to +80°C. UL listed, file no. E118773, Power Limited Circuit Cable CL2 or AWM style 20266. CSA certified. Meets NEC Article 725. **Sold in spools of 100′.**

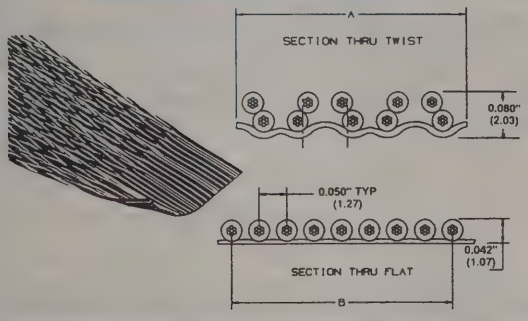
TWISTED PAIR FLAT CABLE

VW-1



28 AWG 7 × 36 (7 × 0.127) stranded copper conductors, insulated with color-coded PVC, are twisted into pairs and laminated to a clear PVC film to form a planar cable. 18″ twisted pair sections are alternated with 2″ parallel sections where the conductors can be mass-terminated to a broad line of insulation displacement connectors. The insulator material is polyvinyl chloride. Temperature rating: –20°C to +80°C. Voltage rating: 300V. Passes VW-1 vertical wire flame test. UL recognized, file no. E42769, style 20462. **Sold in spools of 100′.**

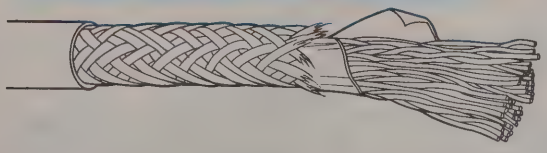
3600 SERIES DISCRETE WIRE CABLE



Flexible 28 AWG stranded wire. Twisted pairs to reduce crosstalk for balanced drive applications. Dual shielding with aluminum film foil and copper braid provides EMI/ESD protection. Voltage rating: N.E.C. 725, CL2 and CSA 150V. Insulation resistance (primary cable): $1 \times 10^{10}\Omega$/10 ft. (3m). Wires are color-coded for easy identification. UL listed, CSA certified. **Sold in spools of 300′, except types 3600B/80 and 3600B/100, which are sold in spools of 200′.**

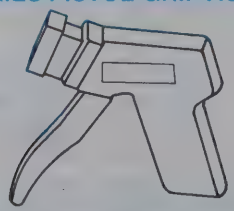
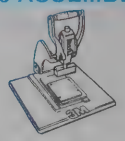
CHG SERIES PISTOL-GRIP ACTUATOR



Hand-held actuator is used with prototype and low-volume discrete wire terminations. Handy portable tool is a rugged, lightweight device especially suited for prototype and field repair applications. Accommodates assembly heads for **CHG series** body styles.

98F5872 Type 3586-12. **1-4** **183.60**
(33377) (ne33377)

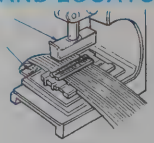
TYPE 3640 ASSEMBLY PRESS



Assembly press is an adjustable parallel-action device designed for proper displacement of cable insulation by "U" contacts as well as right cover seating. Features over-center handle design and 17:1 mechanical crimping action to reduce operator fatigue. Unit can be mounted on bench or table. Includes **type 3442-1A** standard platen. *Order additional platens and locator plates separately on this page. Order* **type 929025** *molded heads separately; contact your local Newark sales office.*

46F8355 Type 3640. **1-4** **322.77**
(8403) (de50809)

PLATENS AND LOCATOR PLATES



Platen
Locator Plate

For assembly press. Platens assure proper closure of connector bodies and covers; staging platform has tray to hold cable; locator plates assure proper positioning of connectors.

PC BOARD CONNECTORS

C-GRID HIGH-DENSITY DUAL ROW CONNECTORS

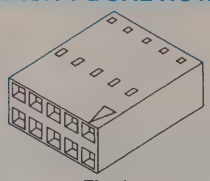

Fig. 1

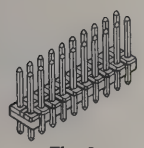

Fig. 2

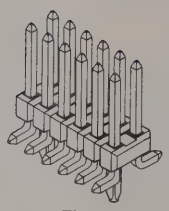

Fig. 3

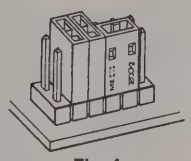

Fig. 4

C-Grid modular interconnection system is based on a 0.100″ (2.54) grid and designed for digital circuit boards. Comprised of **70450 series** low profile, stackable housings, **8624 series** breakaway headers, **11308 series** surface mount headers and **7859 series** two circuit shunts. Current rating: 3A. Insulation resistance: 1000MΩ. Dielectric strength is 600VAC rms for 1 minute. Operating temperature range: –40°C to +105°C. UL listed, CSA certified.

70450 SERIES DUAL ROW CRIMP HOUSINGS—FIG. 1

Stackable end-to-end and side-to-side on 0.100″ (2.54) grid. Accepts **70058** and **71851 series** female box crimp terminals; *contact your local Newark sales office for ordering information.* Mate with **8624 series** dual row headers, *ordered separately.* **Sold in packages of 10.**

8624 SERIES DUAL ROW STRAIGHT PIN BREAKAWAY HEADERS—FIG. 2

Easy breakaway to smaller sizes. Stackable end-to-end and side to side. Drawn 0.025″ (0.635) square wire provides 4-sided smooth surface for quality interface. Standoffs facilitate post solder cleaning. Pins plated with 15μ″ select gold, offer a 0.110″ (2.79) PC tail length with choice of mating end lengths: 0.240″ (6.10) or 0.320″ (8.13) long. Mate with **70450 series** connector housings, *ordered separately*, and **7859 series** shunts, *ordered separately.*

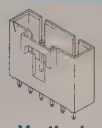
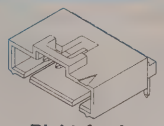
C-GRID SL™ HEADERS



Vertical



Right-Angle

Surface mount compatiable, single-row 0.100″ center shrouded locking headers are available in vertical and right-angle configurations. Rated UL94V-0. Pins are selectively gold plated in contact area and tin-lead plated in solder area. Current: 3A. Contact resistance: 15mΩ max. Durability: 50 cycles. Temperature range: –40° to +125°C. **Sold in packages of 10.**

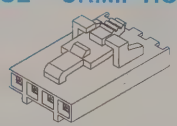
C-GRID SL™ CRIMP HOUSINGS



Single-row 0.100″ center locking housings are designed for wire-to-board applications. Designed with anti-entanglement ribs to prevent wire from catching under the lock during harness assembly. Alignment ribs prevent contact damage during mating/unmating. *Order crimp terminals separately on this page.* **Sold in packages of 10.**

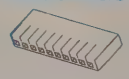
PC BOARD AND SLIMLINE D-SUB CONNECTORS

2139 SERIES 0.156″ (3.96) CENTER CRIMP TERMINAL HOUSINGS



KK® interconnection system PC board connectors. Locking ramp and polarizing rib features available. 94V-2 plastic material. Accepts **2478** and **2578 series** cantilever crimp terminals, *order separately on this page.* Mates with 0.156″ (3.96) center headers and 0.045″(1.14) staked pins in the board. Voltage rating: 250VAC. UL recognized, CSA certified. **Sold in packages of 10.**

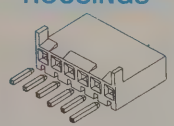
41695 SERIES 0.156″ (3.96) CENTER CRIMP TERMINAL HOUSINGS



With Ramp & Rib

KK® interconnection system PC board connectors. Choice of 2-10 circuits. Locking ramp and polarizing rib features available. 94V-0 polyester material. Accepts **2478** and **2578 series** cantilever crimp terminals, *order separately on this page.* Mates with 0.156″(3.96) center headers and 0.045″(1.14) staked pins in the board. Voltage rating: 250VAC maximum. Resistance: 20mΩ. Dielectric withstanding voltage: 1500VAC for 60 seconds. UL recognized, CSA certified.

1.25mm PITCH WIRE-TO-BOARD SYSTEM

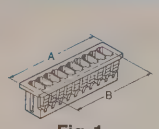

Fig. 1

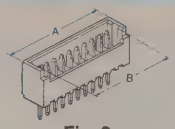

Fig. 2

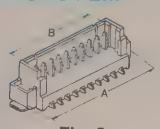

Fig. 3

These wire-to-board housings and headers are the smallest in the industry. They provide flexibility to organize a system to suit all requirements. PC board real estate saved for ten circuits is 50% over 2.0mm pitch versions. The volume saved is 66%. **Sold in packages of 10.** New hand crimp tool terminates from a strip; enables building prototypes with ease. *Order terminals separately, contact your local Newark sales office.*

SLIMLINE D-SUB CONNECTORS

89143-1251

89142-6251

Slimline D-Subminiature connectors feature a slim profile for 40% board space savings, terminal design to ensure co-planarity, metal shell to provide EMI/RFI shielding, and fork board locks to increase PCB retention. Current: 1A max. Capacitance: 1 picofarad max. Contact resistance: 35mΩ max. Dielectric withstanding voltage: 1000Vrms. Housing: black PBT, rated UL94V-0. Contacts: phosphor bronze. Shell: aluminum killed steel. Contact plating: 15μ″ gold. Temperature range: –55°C to +85°C. **Sold in packages of 10.**

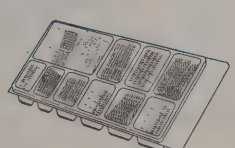
MINI-FIT, JR.™ CONNECTOR KITS

Wire-to-Board Kit



Wire-to-Wire Kit

MINI-FIT, JR.™ WIRE-TO-BOARD KIT

Kit contains vertical headers, right-angle headers, and crimp housing receptacles in 2 to 20 circuits. All three connector types are provided in each of the following quantities: five 2-circuit, five 4-circuit, five 6-circuit, three 8-circuit, three 10-circuit, three 12-circuit, three 14-circuit, three 16-circuit, two 18-circuit, and two 20-circuit. 100 18-24 AWG female crimp terminals are also included. Voltage rating: 600V. UL recognized, CSA certified, TUV approved. *Order hand tool separately on page 266.*

Stock No.	Type	1-2
01F1117	WM-39WB	104.39

MINI-FIT, JR.™ WIRE-TO-WIRE KIT

Kit contains crimp housing receptacles and crimp housing plugs in 2 to 16 circuits. Both connector types are provided in each of the following quantities: five 2-circuit, five 4-circuit, five 6-circuit, five 8-circuit, five 10-circuit, four 12-circuit, three 14-circuit, and three 16-circuit. 100 female and 100 male18-24 AWG crimp terminals are also included. Voltage rating: 600V. UL recognized, CSA certified, TUV approved. *Order hand tool separately on page 266.*

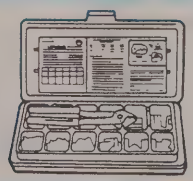
POWER CONNECTOR KITS



WM72 116-PIECE 0.062″ CONNECTOR KIT

Assemble male and female connector housings from single to 36-circuit. Kit contains the following: 25 single-circuit receptacles, 25 single-circuit plugs, ten 3-circuit receptacles, ten 3-circuit plugs, four 5-circuit receptacles, four 5-circuit plugs, four 6-circuit receptacles, four 6-circuit plugs, three 4-circuit receptacles, three 4-circuit plugs, three 8-circuit receptacles, three 8-circuit plugs, three 9-circuit receptacles, three 9-circuit plugs, two 12-circuit receptacles, two 12-circuit plugs, one 15-circuit receptacle, one 15-circuit plug, one 36-circuit receptacle, one 36-circuit plug, two 0.062″ pin diameter terminals, one crimping tool, and one terminal ejector tool. UL recognized, CSA certified.

Stock No.	Type	1-2
49F1268	WM-72	67.28

WM50 93-PIECE 0.093″ CONNECTOR KIT

Assemble male and female connector housings from single to 15-circuit. Kit contains the following: 25 single-circuit receptacles, 25 single-circuit plugs, five 2-circuit receptacles, five 2-circuit plugs, four 3-circuit receptacles, four 3-circuit plugs, four 4-circuit receptacles, four 4-circuit plugs, three 5-circuit receptacles, three 5-circuit plugs, one 6-circuit receptacle, one 6-circuit plug, one 9-circuit receptacle, one 9-circuit plug, one 12-circuit receptacle, one 12-circuit plug, one 15-circuit receptacle, one 15-circuit plug, two 0.093″ pin diameter terminals, one crimping tool, and one terminal ejector tool. UL recognized, CSA certified.

C-GRID® WIRE-TO-BOARD CONNECTOR KIT

Kit contains vertical shrouded headers, right-angle shrouded headers, and locking crimp housings in 2 to 10 circuits. All three connector types are provided in each of the following quantities: five 2-circuit, five 3-circuit, five 4-circuit, five 5-circuit, five 6-circuit, five 7-circuit, five 8-circuit, five 9-circuit, and five 10-circuit. 100 22-24 AWG female crimp terminals are also included. Plating on terminals is 15μ″ gold. UL recognized, CSA certified, TUV approved. *Order hand tool separately on page 263.*

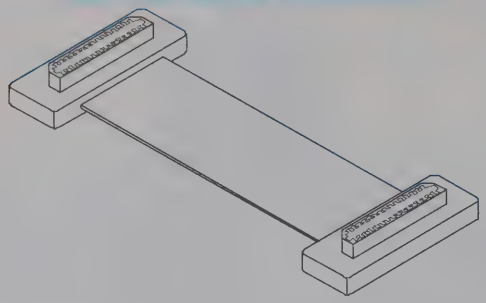
NEW CONNECTORS AND CABLE ASSEMBLIES

FLAT FLEX CABLE ASSEMBLIES



Flat flex cable assemblies suited for board-to-LCD interconnections. Space-saving, low-profile, overmolded strain relief designed for critical mechanical applications. Laminated cable 0. 5mm. Mate with 1mm dual row connectors; ZIF end to mate with 0.5 mm ZIF connector. Contact resistance: 30 miliohm max. Current rating: 0.50 AMPS, UL94V-1.Contacts: copper alloy with tin lead finish. Insertion force: 197 grams.

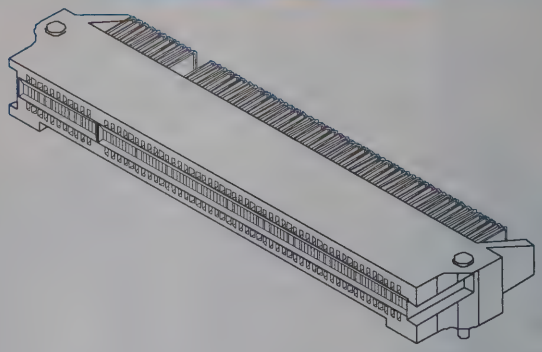
PCI CARD CONNECTORS



Right-angle 3.3V and 5V 32-and 64-bit connectors offer low-profile space savings and allow horizontal PCI card mounting. Thru-hole solder mount application compatible with wave soldering process. Meet all PCI local bus standards. Mate with .062″ PC Boards. Current rating: 1.0A. Insulation resistance: >1 x 10^9 ohm 500VDC.

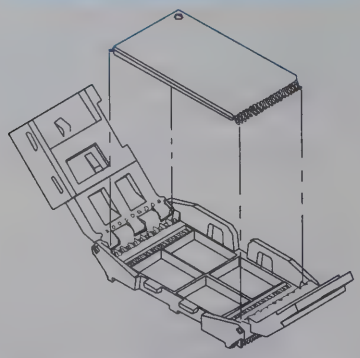
SURFACE MOUNT SOCKETS



PSOP, TSOP, and SSOP sockets have unique positive locking lid to secure devices to high normal- force surface mount contacts. Common land-pad footprint of socket and device eliminates need to modify a PC Board layout after development stage. Zero insertion force. Contact resistance: 30 milliohm max. Current rating: 0.5 A; Insulation resistance: 500 megaohm. Contact material: copper alloy with tin-lead plating; minimum insertion/withdrawal cycles: 50.

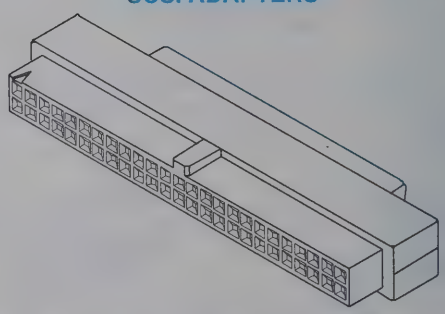
SCSI ADAPTERS



Allow reliable interfacing of 8-bit to 16-bit and 16-bit to 8-bit devices. Eliminates need for multiple cable assembly configurations. Short overall mating faces allow dense packaging, high withdrawal force contacts. Low inductance. Meet ANSI Spec X3-131-1986. Contact resistance: 15 millioh max. Current rating: 1.0A. Insulation resistance: >1 x 10^{12} ohms 300VDC.

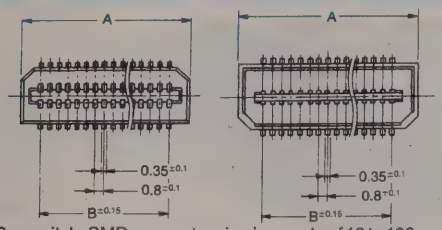
P8 SERIES NARROW PITCH CONNECTORS



High density, 0.8mm pitch, SMD connectors in pin counts of 16 to 100 positions. Stacking heights of 3 to 13mm allow for various stacking heights of PC boards. Rated: 0.5A 60VAC/DC. Unique bellows type contacts for increased reliability. Use socket and header combinations below to achieve proper stacking height. 11.5mm stacking height items are hermaphrodite (male and female combined in one unit) and you stack two of each same position size to reach the 11.5mm stacking height.

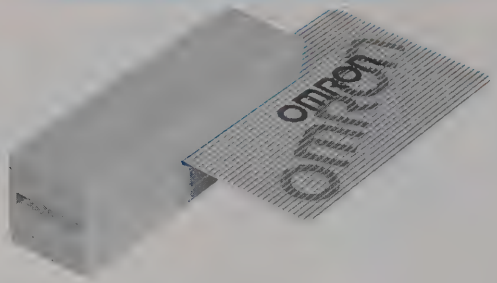
MANUAL SWIPE CARD READERS



Enclosed, compact-size designed for low power consumption. Magnetic card types ISO 7810-7813. Single, double, or triple magnetic track configuration. TTL (CMOS) signal interface. Card feed speed range: 10 to 120cm/second. Max. power consumption: 5 to 15mA @ 5VDC. Operating temperature: –10°C to +55°C. Service life: 300,000 passes min. Color: ivory. I/O interface: solder pad, 9-, or 12-pin Molex connector. Dimensions: (w/ cover) 90L x 28W x 26.5mmH; (w/o cover) 90L x 24W x 24mmH. Typical applications include remote terminals for computers, credit card readers, ID card checkers, electronic locks, automatic gate machines, and point-of-sale systems.

Stock No.	Type	Magnetic Tracks Supported (Reads)	1-9	10-24	25-49	50-99

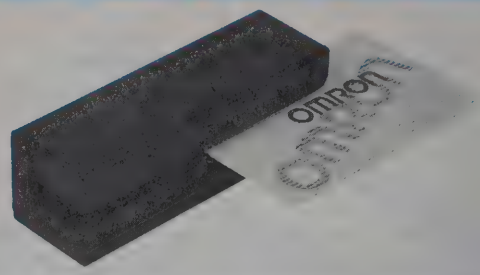
MANUAL SWIPE MAGNETIC CARD READERS



Manually operated enclosed card reader features easy-to-access slot. Magnetic card types ISO 7810-7813. Single or double magnetic track configuration. TTL (bipolar) signal interface. Card feed speed range: 10 to 150cm/second. Max. power consumption: 25mA (single track) @ 5VDC; 50mA (double track) @ 5VDC. Operating temperature: –10°C to +55°C. Service life: single track = 300,000 passes min.; double track = 600,000 passes min. Color: black. I/O interface: 5- or 9-pin JAE connector. Dimensions: (w/ cover): 100L x 32.5W x 32mmH; (w/o cover) 100L x 27W x 29.5mmH. Typical applications include remote terminals for computers, credit card readers, ID card checkers, electronic locks, automatic gate machines, point-of-sale systems. Open card readers (w/o cover) are also available; *contact your local Newark sales office.*

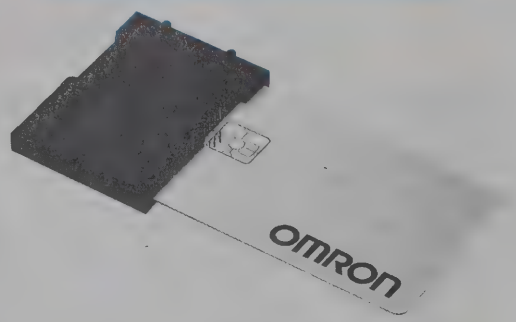
(28352) (ne28352)

MANUAL INSERT IC CARD READER



Ultra-compact design for IC card applications with limited space. Lifts IC card onto contacts to reduce wear on the card. Configured for front or rear ejection. Magnetic card types ISO 7816/1-2. TTL (bipolar) signal interface. Card feed speed: 100cm/second. Max. power consumption: 10mA @ 30VDC. Operating temperature: 0°C to +50°C. Service life: 300,000 passes min. Color: black. I/O interface: mounts to PC bar by flex cable. Typical applications include pre-paid card systems, IC credit card readers, time and attendance control, access control, telecommunications, vending machines, ID control, and data capturing.

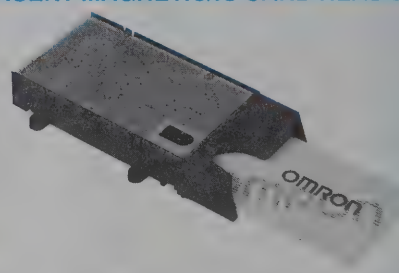
(28356) (ne28356)

INSERT MAGNETIC/IC CARD READERS



Compact insert reader with magnetic and IC card interface. Features red and green LEDs for operation indicator. Push or pull card read configurations. Solenoid-controlled IC card locking mechanism. Magnetic card types ISO 7810-7813. Single, double, or triple magnetic track configuration. TTL signal interface; RS-232C optional. Max. power consumption: 2.5 A @ 5VDC. Operating temperature: 0°C to +45°C. Service life: mag head = 300,000 passes; IC contact = 500,000 passes. Color: black. I/O interface: 26-pin connector. Dimensions: 126L x 76W x 25mmH. Typical applications include remote terminals for computers, credit card readers, ID card checkers, electronic locks, automatic gate machines, point-of sale terminals, ATMs, gas pump control, pre-paid systems, kiosks.

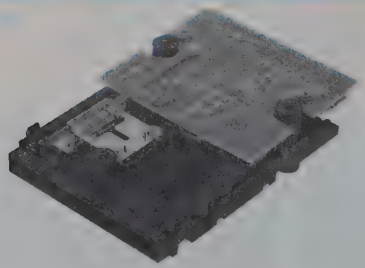
MOTOR DRIVEN CARD READER



Reads 62% of magnetic track. Effective strip length of 46.6mm max. Microswitches incorporated for card detection. Magnetic card types ISO 7810-7813. Single magnetic track configuration. TTL (CMOS) signal interface. Card feed speed range: 10 to 100cm/second. Max. power consumption: 5mA @ 5VDC. Operating temperature: –5°C to +55°C. Service life: 300,000 passes min. Color: black. I/O interface: 10- or 12-pin JAE connector. Dimensions: 78L x 60W x 21.5mmH. Typical applications include access control, time and attendance, ID card checkers, electronic locks, remote terminals for computers, telephones, and vending machines.

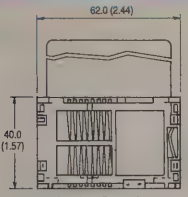
NEW SMART CARDS AND SIM/SAM CONNECTORS

CCM01 SERIES SMART CARD FRICTION CONNECTORS



Blade Card

Blade Card

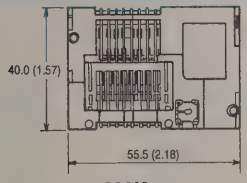
Sealed Card

Friction connectors comply with ISO and EMV certifications. Mechanical life: 100,000 operations. Available in either blade or sealed card detection switch for higher protection against dust and grit. Come standard with 8 contacts.

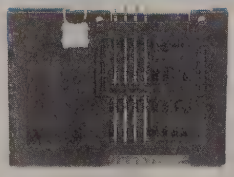
Stock No.	Type	Description	1-9	10-24
83F8524	CCM01-1NF	Blade Card Detection Switch/ Thru-Hole	1.59	1.35
83F8525	CCM01-2251	Sealed Card Detection Switch/ Surface Mount	2.72	2.31

(33006) (ne33006)

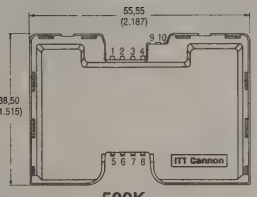
CCM02 SERIES SMART CARD LANDING CONNECTORS



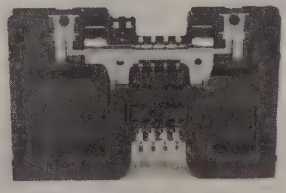
200K



200K



500K



500K

Connectors feature 8 landing type contacts with virtually zero insertion force, which provide an extended life of intensive use. Comply with ISO and EMV certifications. Come standard with a sealed switch. **Types CCM02-1NO-32** and **CCM02-1N0-33** offer up to 200,000 operations and **types CCM02-2503** and **CCM02-2504** provide up to 500,000 operations.

Stock No.	Type	Description	1-9	10-24
83F8526	CCM02-1NO-32	200K Cycle Landing, Thru-Hole	5.20	4.42

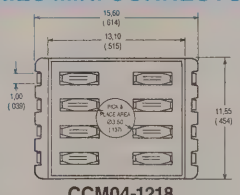
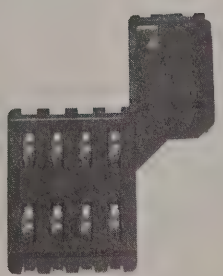
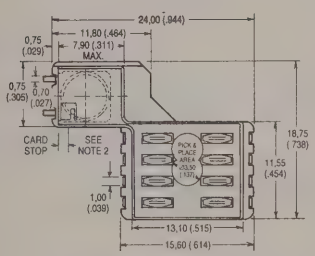
CCM04 SERIES MINI CONNECTOR FRAMES



CCM04-1218



CCMO4-1317



CCMO4-1317

Provide interconnection between card readers and the cards themselves with a mechanical life of 50,000 cycles. Comply with ISO and EMV certifications. **Type CCMO4-1317** offers added reliability with a sealed detection switch. Other heights also available; *contact your local Newark sales office for details.*

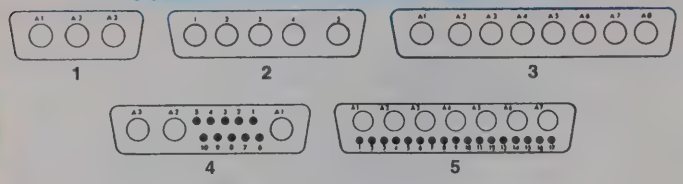
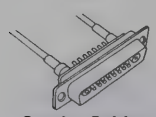
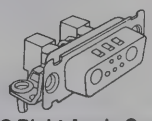
COMBINATION D-SUB CONNECTORS



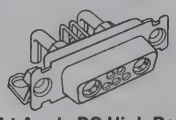


Combo Cable



PC Right Angle Coax

Straight PC Coax



Right Angle PC High Power

Integrate signal, 50- and 75-ohm coax, high power and high voltage, or mix red, green, and blue video lines with signal and up to 40 amps of power in the same package. Tin-finished steel shells with 94V-0 thermoplastic or diallyl phthalate insulators. Signal contact current rating: 5 amps. Right angle and PC board versions are complete with fixed coax or high power contacts installed. Combo cable connectors require high power or coax contacts *order separately on this page.*

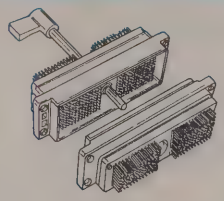
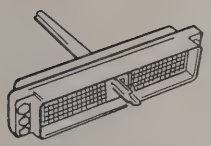
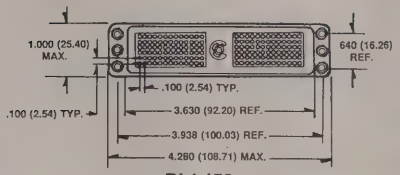
ZIF CONNECTORS AND ACCESSORIES

DL SERIES ZERO INSERTION FORCE CONNECTORS

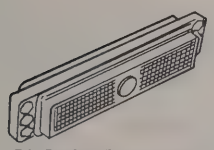




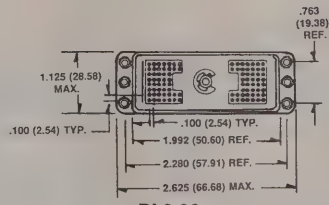
DL Series Plug



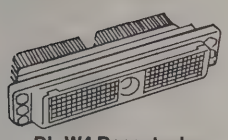
DL1-156



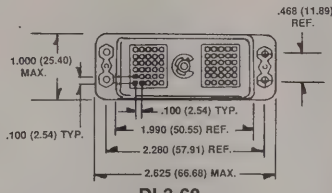
DL Series Receptacle



DL2-96



DL-W4 Receptacle



DL3-60

- **ZIF Design Enables Rapid Mating with Minimal Contact Wear**
- **For Cable-to-Cable, Cable-to-Panel, and Panel-to-Panel Interconnections**
- **Ideal for Multi-Cycle and Circuit Applications**

DL series rack and panel connectors feature zero insertion force (ZIF) design to enable long life and rapid mating. Ideal for any application requiring many cycles and circuits, for example medical, instrumentation and computer use. Glass-filled thermoplastic connector housing, rated UL94V-1, features stainless steel insulator retainer and camshaft. Zero connector engagement force minimizes contact wear as well. Contacts may be hand or machine terminated. Current rating: 5A. Capable of 8 lbs. minimum contact retention, 1200VAC dielectric withstanding voltage, and –55°C to +105°C operating temperature range. 18 to 32 AWG wire range. *Order actuating handle kit for plugs separately on this page. Order crimp contacts separately on this page. Order crimp tools separately on this page.*

Contact Arrangements
Mating Face View of Pin Insert Shown

CA-Bayonet MIL-C-5015 style connectors have positive, quick mating 3-point reverse bayonet lock coupling system. Completely sealed to withstand moisture, condensation, vibration, and flash-over. When connector halves are mated, rear sealing grommet and interfacial seal at front create an environmentally sealed assembly. Feature the same shell dimensions, contact layouts, and performance characteristics as the threaded coupling MIL-C-5015 connectors, but do not intermate. Standard plugs mate with box mount receptacles; *order separately below*. Available with pin or socket, solder or crimp silver-plated copper alloy contacts. Aluminum alloy body with olive drab chromate-over-cadmium finish. Polychloroprene insulator. Standard plugs have integrated cable clamp. Rated up to 13 amps. 500-cycle minimum mating life. Operating temperature: –55°C to +125°C. *Order crimp tool kit and wire hole fillers separately below*.

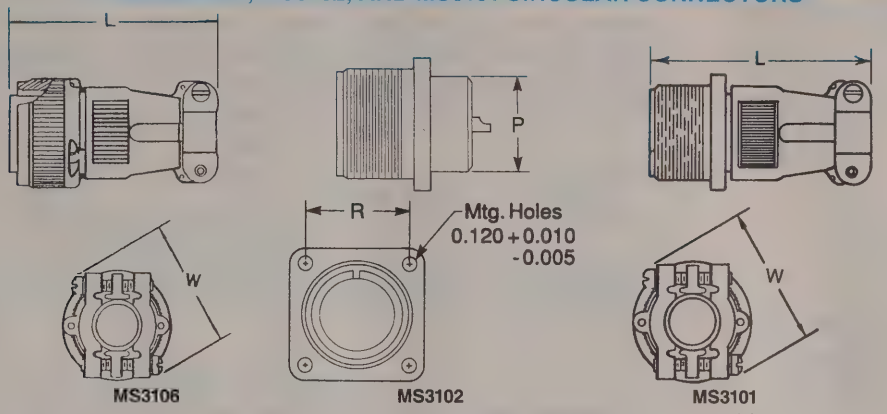
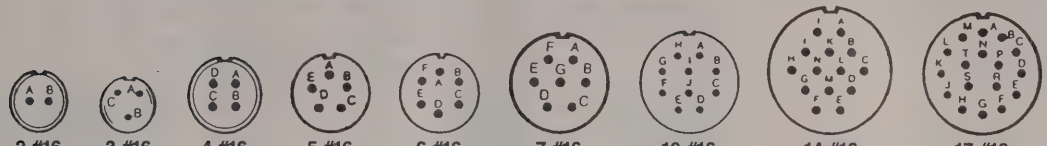
MIL-C-5015 CONNECTORS

TYPES MS3106, MS3102, AND MS3101 CIRCULAR CONNECTORS





Contact Arrangements
Mating Face View of Pin Insert Shown

MIL-C-5015 circular connectors operate in extreme environmental conditions of high altitude flight. Type numbers with **prefixes MS3106F** and **MS3101F** feature resilient grommets with internal restrictions in wire cavities that act as individual wire seals. They also include an integral cable clamp that provides strain relief, and type numbers with **prefix MS3106F** have an O-ring under the coupling nut. Aluminum alloy shells have olive drab chromate coating over cadmium plating. Silver-plated copper alloy socket or pin contacts rated 13A. Tinned solder pot termination. Polychloropene insulators. Temperature range: –55°C to +125°C.

TRIDENT NEPTUNE® CIRCULAR CONNECTORS

Multiposition Trident Neptune® interface connectors have all the features of Trident Ringlock® connectors, plus power contact positions for combining power and signal in a single package. Wire entry seals and O-ring interface seal provides added environmental sealing to meet IP67 classification. Strong metal bayonet coupling system for durability and reliability. Accepts standard Trident signal contacts, *ordered separately on this page.* For Trident power contacts, *contact your local Newark sales office for details.*

TRIDENT RINGLOCK® CIRCULAR CONNECTORS SEALED AGAINST WATERJETS IP67

Combination circular connectors offer economy of plastic body with ruggedness of metal ring coupling. Thermoplastic body, rated UL 94V-0. Nickel-plated copper alloy coupling ring. Accepts standard Trident signal contacts, *ordered separately on page 280.* Standard format requires male contact (pin) on plug side. Reverse format opposite. Sealed receptacles come fitted with O-ring seal and when used with sealed cable clamps, *ordered separately on page 280,* provide splashproof sealing to IP67. Intermateable and interchangeable with Burndy trim trio series. *Order crimp and extraction tooling separately on page 280.*

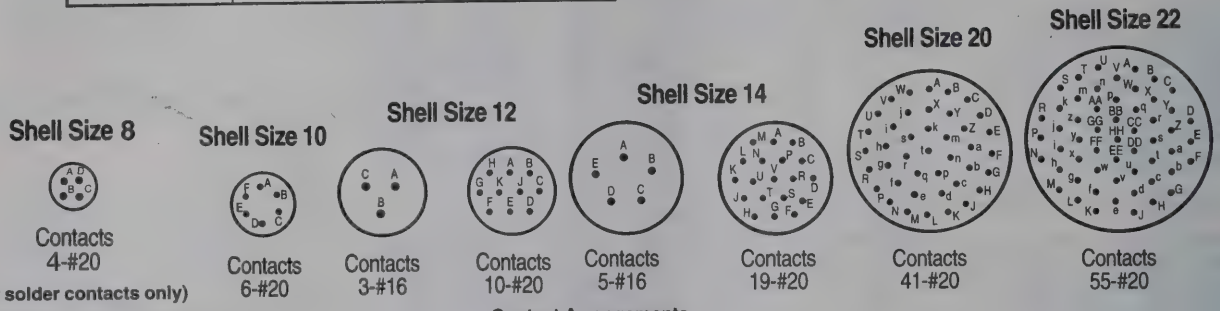
Straight Plug with Strain Relief



Contact Arrangements
Mating Face View of Pin Insert Shown

Environmentally sealed plugs and receptacles offer high-density contact arrangements in a miniature circular metal shell. Meet all MIL-C-26482 requirements and are intermateable, intermountable, and interchangeable with all MIL-C-26482 connectors, crimp or solder style. Feature aluminum alloy body with olive drab chromate over cadmium finish. Polychloroprene insulators. Copper alloy crimp or solder pin and socket contacts with gold plating per MIL-G-45204 Type II. Plugs with pin contacts mate with socket contact receptacles and plugs with socket contacts mate with pin contact receptacles. Quick disconnect bayonet coupling for rapid positive mating and unmating. Moisture sealing is achieved by 4 seals: shell, peripheral, interfacial and wire. 500 cycles minimum mating life. Operating temperature: –55°C to +125°C. *Order crimp tool kit separately below when ordering crimp connectors.* NOTE: Shell size 8 layout is only available in solder type.

One-piece elastomeric molded body and multiple moisture seals make these plugs and receptacles ideal for applications where outside contaminants must be excluded. Meet or exceed DOT requirements for shock, vibration temperature cycling, salt-water spray and immersion, petroleum derivatives, and industrial gas. Water submersible, sealed to requirements of IP67 and DIN 400 50.
Operating voltage: 400VAC max. Current rating: 15 amps max. 50 cycles minimum mating life. Operating temperature: -40°C to +105°C. UL recognized, CSA certified. Color: black. Tin-plated copper alloy pin and socket crimp contacts, ordered separately, below, for 14 to 18 AWG; *Order contacts, tools, and accessories seperately below.*

Indoor/outdoor connectors for industrial and marine applications. Non-corrosive, high-impact molded construction minimizes hazards of electrical shock and provides resistance to hostile outdoor environment. Suit wide range of non-environmental applications, such as communication systems, data processing, and entertainment devices. Available standard, miniature, and subminiature sizes; high-density connectors in cable end, panel mount or cable-to-cable. Solder cup contacts have gold-over-nickel plating. Type numbers with **suffix -3XX** include grommet seals. UL recognized. NOTE: When mating two cables, the cable-to-cable connectors need to be used in conjunction with the cable end connectors. For example: **type 5182-2PG-3XX** mates with **type 3182-2SG-3XX.**

Panel Cutout

Weathertight, high-density glass-filled nylon connectors have screw-machined solder contacts with gold-over-nickel plating. Flanged panel mount connectors are installed through back of panel and can be fastened by hex nuts, rivets or screws through four molded holes in flange. Mechanical type cable clamp securely grips cable. Rubber gland adds support and offers environmental protection. Cable end connectors include rubber grommet seal to fit up to 0.25″ (6.35) cable diameter and "O" ring; panel mount connectors supplied with hex nut and gasket. NOTE: When mating two cables, the cable-to-cable connectors need to be used in conjunction with the end connectors. For example: **type 15182-7PG-326** mates with **type 13182-7SG-321**.

Panel Cutout

Environmentally sealed molded glass-filled nylon connectors small enough to fit 0.5″ (12.70) opening. Reduce shock hazards and resist hostile indoor/outdoor conditions. Cable end version includes weathertight rubber grommet grip/seal; panel mount version includes hex nut and rubber gasket. Panel connectors mount 0.438″ (11.11) round or "D" shaped hole from behind and securely fasten with hex nut on front of panel. Socket or pin type screw-machine size # 20 gold over nickel plate solder cup contacts. NOTE: When mating two cables, the cable-to-cable connectors need to be used in conjunction with the cable end connectors, for example: **type 18282-2PG-311**.

Fig. 4

600V weathertight connectors for sensor, automotive, robotic, instrumentation and controls applications comply with UL, CSA, NEMA, ANSI and NFPA standards. Provide moisture-tight connection under 6′ water. Black anodized machine aluminum receptacle has epoxy-sealed contacts and mating plug includes metallic coupling ring. Gold-plated screw-machined brass contacts resist corrosion and perform in low current applications. Plugs with socket type contacts available in 3, 6 and 12′ lengths; receptacles with pin type contacts are designated by (*) and include 1′ leads. 16 AWG standard cable/wire size. UL recognized, CSA certified.

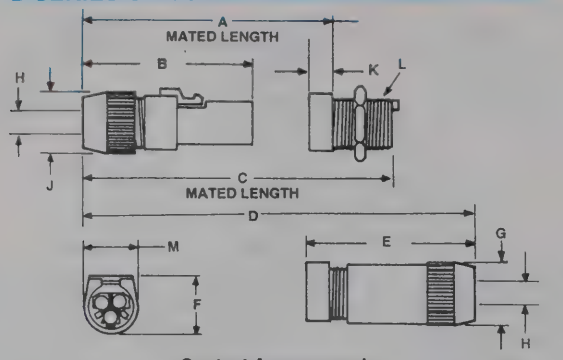
D SERIES CIRCULAR PLASTIC CONNECTORS



Contact Arrangement

[D01 Housing] [D02 Housing]

Design allows each connector half to accept pins or sockets. Feature low insertion/extraction force for high life cycles, 10,000+ operations. Quick disconnect push-button release. High impact, black polycarbonate housing available in D01 or D02 style. Solder cup and crimp contacts for 2-3 amps, 22-26 AWG, feature brass body, beryllium copper wires, and gold over nickel plating. Removable contacts 3-9 positions. Panel or cable mount receptacles available. Temperature rating: –40° to +85°C. UL recognized. *Order tooling separately on this page.*

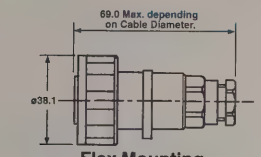
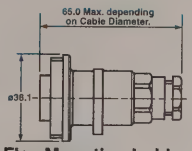
BUCCANEER® SEALED CONNECTORS

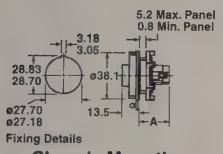
STANDARD BUCCANEER® PLUGS AND SOCKETS



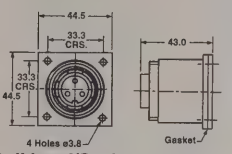
Flex Mounting



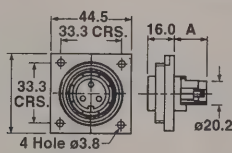
Flex Mounting In-Line



Chassis Mounting



Bulkhead/Surface Mounting



Low-Profile Flange Mounting

Buccaneer® connectors are designed specifically for use in demanding and harsh environments where water, dust, salt, spray and many common oils or chemicals can render other connectors useless. Connectors meet these demanding conditions with an all -molded construction that includes excellent sealing characteristics. Meets IEC enclosure IP68classification. UL recognized, CSA certified, VDE approved. All dimensions shown in mm. Color: black.

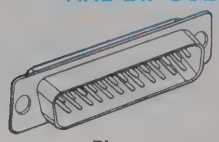
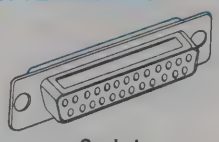
D-SUBMINIATURE METAL SHELL 0.109″ DENSITY CONNECTORS–SOLDER CUP AND DIP SOLDER TERMINALS



Plug



Socket

0.109″ (2.77) density D-subminiature series offers a wide range of terminal designs and intermates with all existing D-subminiature connectors of comparable pin count. All units have a current rating of 5 amps. Withstanding voltage: 1250VACrms. Contact resistance: 2.7 milliohms. Insulation resistance: 5000 megohms. Keystone-shape shell provides proper polarization. Shells feature zinc plating with yellow chromate finish. Insulator is glass-filled polyester rated UL94V-0. Operating temperature: –65°C to +125°C. 0.120″ (3.05) through-hole mounting is standard; however, connectors can be ordered with dual float bushings by adding suffix "Y" or 4-40 clinch nut by adding suffix "E" to the type number. *Order D-sub accessories on page 290.*

BASIC D COMMERCIAL GRADE, METAL SHELL D-SUBS WITH SOLDER CUP TERMINALS

Zinc-plated steel shell with yellow chromate finish. Phosphor-bronze contacts available in 2 platings: gold flash over nickel in contact area. Two-piece glass-filled polyester insulator material, rated UL94V-0. Operating temperature: –65°C to +125°C. Discrete cable to board; to panel; to discrete cable. UL recognized, CSA certified.

MIL-C-24308 METAL SHELL D-SUBS WITH CRIMP AND POKE TERMINALS

Intermateable with all D-subs of comparable pin count and complying dimensionally with MIL-C-24308. Brass plug contacts or phosphor-bronze socket contacts; both machined and feature 50µ″ gold over copper plating. Cadmium-plated steel shell with yellow chromate coating. Diallyl phthalate insulator material, per MIL-M-14, Type SDG-F, monoblock construction for improved electrical performance. Discrete cable-to-board; -to-panel; -to-discrete cable. UL recognized.

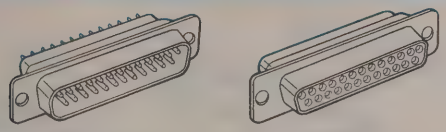
D*U SERIES CONNECTORS WITH TIN-PLATED STEEL SHELLS AND DIP VERTICAL SOLDER TERMINALS



Plug Socket

Commercial-grade metal shell D-sub connectors with choice of straight or right-angle dip solder tails. Longer rear insulator provides integral stand-off from PC board. Tin-plated steel shell. Black molded glass-filled nylon insulation material, rated UL94V-0. Plugs have grounding indents and brass contacts; sockets have phosphor bronze contacts. Both feature gold flash over nickel plating. 0.120″(3.05) mounting hole. Mate with industry compatible D-subs complying dimensionally with MIL-C-24308. Current rating: 5A. Withstanding voltage: 1000 VAC rms. Operating temperature: –65° to +125°C. UL recognized.

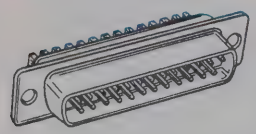
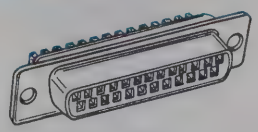
0.109″(2.77) DENSITY SUPER SOLDER D-SUBMINIATURE CONNECTORS



Plug



Socket

Commercial-grade metal shell D-subs intermate with all D-subs of comparable pin count. Discrete cable-to-board; cable-to-panel; cable-to-discrete cable applications. Steel shell provides grounding capability; available zinc-plated with yellow chromate coating or bright tin-plated. Glass filled polyster (black) insulator. Phosphor bronze super solder contacts with gold flash over copper plating. Current rating: 3A. Withstanding: 1100VACrms. Contact resistance: 2.7 milliohms. Insulation resistance: 5000 megohms. Operating temperature: –65° to +125°C. UL recognized. Other position configurations are available. Contact your local Newark sales office; *order D-sub accessories separately.*

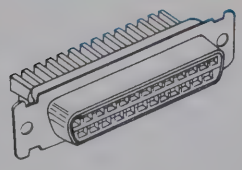
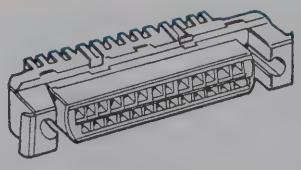
0.109″ (2.77) DENSITY SUPER D™ ALL-PLASTIC IDC D-SUB CONNECTORS





Commercial-grade all-plastic insulation displacement D-subs feature plain flange with mounting holes. Intermate with all D-subs of comparable pin count and complying dimensionally with MIL-C-24308. Accommodates 24-26 AWG solid or stranded wire. Glass-filled polyester insulation material, rated UL94V-0. Phosphor bronze contacts plated with gold flash over copper. Current rating: 3 amps. Withstanding voltage: 1000VACrms. Contact resistance: 5 milliohms. Insulation resistance: 5000 megohms. Operating temperature: –55°C to +125°C. Discrete cable to panel; to discrete cable. UL recognized.

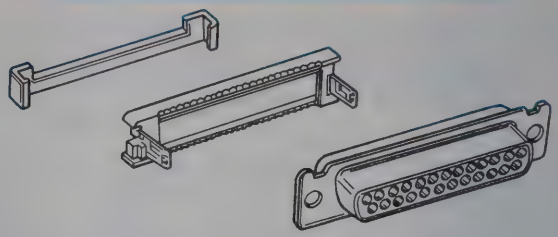
0.109″ (2.77) DENSITY FLAT CABLE IDC D-SUBMINIATURE CONNECTORS



Mass-terminated IDC D-sub connectors for 0.050″ (1.27) flat cable. Back cover fastens to shell with metal latches. Strain relief included. Intermate with all D-sub connectors of comparable pin count and complying dimensionally with MIL-C-24308. Steel shell provides grounding capability; available with yellow chromate coating over zinc. Glass-filled polyester insulator material, rated UL 94V-0. Beryllium copper contacts with gold flash over nickel plating. Accommodates wire 28 AWG stranded/30 AWG solid. Current rating: 1A. Withstanding voltage: 500 VAC rms. Contact resistance: 15 milliohms. Insulation resistance: 1000 megohms. Available in 15 position configuration. Operating temperature: –55° to +105°C.

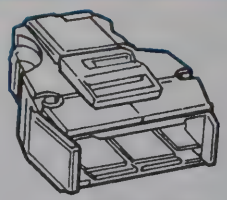
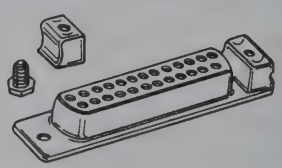
D-SUB CONNECTOR ADAPTER SYSTEM



Hood with Latches



Latching Blocks for Adapter System

Commercial-grade 2-piece, modified phenylene oxide snap-on straight adapter hoods captivate metal shell D-sub connectors, *ordered separately.* Available with latches or with filler ends. Standard cable opening. Latching blocks, *ordered separately below,* are constructed of diecast zinc and include nickel-plated steel SEM screws.

STRAIGHT ADAPTER HOODS WITH LATCHES*

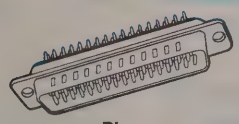
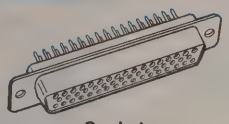
ECONOMICAL VERTICAL 0.109″ DENSITY METAL SHELL CONNECTORS



Plug



Socket

Mate with industry compatible connectors. Grounded tin-plated steel shell. Black, glass-filled polyester insulator material, rated UL94V-0. Plugs have grounding indents and brass contacts; sockets have phosphor bronze contacts. Both feature gold flash over nickel plating in mating area and tin/lead over nickel on straight solder dip tails to meet solderability per MIL-STD-202, Method 208. 0.125″(3.18) PC board thickness. Contact rating: 5A. Dielectric withstanding voltage: 1000 VAC rms. Operating temperature: –55° to +105°C.

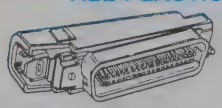
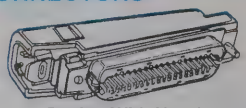
SUPERIBBON® 0.085″ (2.16) DENSITY COMMERCIAL-GRADE ALL-PLASTIC IDC CONNECTORS



Plug With Hood



Socket With Hood

Designed for cable-end applications. Variation available: InstaLatch mating and square end hood, InstaLatch mating and square end hood, captivated for 4-40 screw and InstaLatch mating with pointed-end hood, screw and dust cover. UL94V-0 rated glass-filled polyester insulation material. Copper alloy contacts with selective gold over copper plating. Current rating: 5 amps. Operating temperature: –40°C to +120°C. Accept 24-26AWG solid wire. (†) Denotes 30µ″ gold plating. Also available in 64 position version. UL recognized.

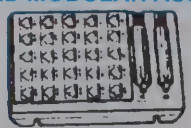
PRE-WIRED MODULAR ASSEMBLIES



SM125

Type SM modular assemblies constructed of gray, glass-filled polyester, rated UL 94V-0. Phosphor bronze contact material. Operating temperature: –40°C to +100°C. Modular jacks meet 1000VAC dielectric and telephone USOC requirements. **Type SM-125** provides input/output connection and two-wire modular access to 25-pair cable. Features 25 two-wire modular jack sockets bridged to predetermined contacts of an in-line pair of 50-position miniature ribbon connectors. Miniature ribbon: 5A.

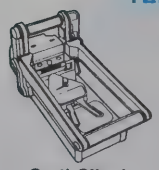
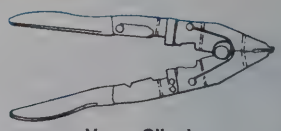
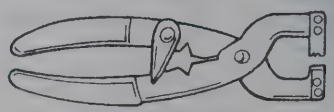
TERMINATION TOOLS



Certi-Clinch



Versa-Clinch



Repair Pliers

Type SCT-330 Certi-Clinch portable, manually-operated field termination tool for field assembly and low production installations. Terminates all-plastic and metal shell IDC miniature ribbon connectors up to 50 contacts (25 pair nest). Handles solid wire only.
91F1804 Type SCT-330. **Each**..... **1650.92**

Type SCT-343 Kit to convert 32-pair tool to 25-pair operation.
52F3323 Type SCT-343. **Each**..... **510.62**

Type SCT-649 Carrying Case.
91F1806 Type SCT-649. **Each**..... **50.75**

Type VCTT-361 Versa-Clinch hand-operated tool is used to perform four basic termination functions: (1) cuts off and terminates one wire at a time to miniature ribbon IDC connectors; (2) unlatches the all-plastic end entry hood for removal; (3) opens and closes miniature ribbon metal cable clamp; and (4) unlocks mated miniature ribbon IDC connectors.
43F155 Type VCTT-361. **Each**..... **91.96**

Type SRT-345 Hand-operated plier-type termination/repair tool cuts wires and terminates one wire at a time to replace damaged termination in the field. Black oxide finished carbon steel. Red vinyl dip handles.
91F1805 Type SRT-345. **Each**..... **43.50**

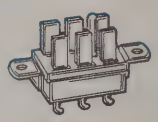
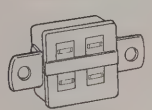
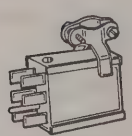
JONES 2400 SERIES MULTIPLE DENSITY SOLDER LUG/ SOLDER EYELET PLUGS AND SOCKETS



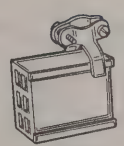
P2406AB



S2404AB



P2406CCE



S2406CCE

For medium use in cable-to-cable and cable-to-panel applications. Polarized to prevent wrong-way insertion. Brass plug, phosphor bronze socket. Contact plating: cadmium. Plug prongs are 0.250″(6.35) wide, 0.055″(1.40) thick. Black molded phenolic insulation material. Formed metal hood with dielectric liner to prevent shorting. Cable clamps of zinc and clear irridite-plated steel used for strain relief. Current rating: 15A. Withstanding voltage: 1700VAC rms. UL recognized, CSA certified. *To order plugs and sockets with cable clamp at 90° simply change type number suffix* **CCT** to **CCE**; to order plugs and *sockets with deep brackets for recessed mounting change suffix to* **DB**; for plugs and *sockets with shallow bracket for flush mounting change suffix to* **SB**.

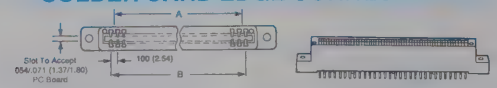
CARDCON™ 0.100″ (2.54) DENSITY COMMERCIAL DIP SOLDER CARD EDGE CONNECTORS



DIP solder tails on 0.200″ (5.08) row centers double readout. Accepts 0.062″ (1.59) thick PC boards. Available less mounting ears or with 0.128″ (3.25) mounting holes. Withstanding voltage: 650VAC RMS. Current rating: 3 amps. Contact resistance: 10 milliohms maximum. Insulation resistance: 5000 megohms minimum. Insulation material: UL94V-0 rated glass-filled polyester, black. UL recognized file E19071. Standard plating: 10µin. gold over nickel, 50µin. nickel in contact area, tin on tails. XT, AT plating: 30µin. gold over 50µin. nickel in contact area, tin on tails. Other sizes available; *contact your local Newark sales office.*

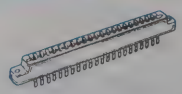
CARDCON™ 0.156″ (3.96) DENSITY COMMERCIAL SOLDER CARD EDGE CONNECTORS



Available with single readout 0.156″ (3.96) long DIP solder tail; double readout .156″ (3.96) long DIP solder tail with 0.200″ (5.08) row spacing; single readout solder eyelet; and double readout solder eyelet with 0.200″ (5.08) row spacing. Bifurcated semi-bellows type contacts constructed of spring brass-plated with gold over nickel. UL94V-0 rated glass-filled polyester insulation material. Rated 5 amps. Withstanding voltage: 1800VACrms. Operating temperature: –65°C to +105°C. Accepts single or double sided 0.062″ (1.57) thick PCB's. UL recognized File # E19071.

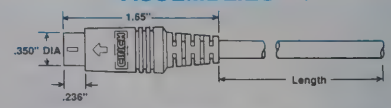
CIRCULAR MINI DIN PLUG SINGLE-ENDED CABLE ASSEMBLIES



Pre-assembled single-ended cable assembly meets FCC requirements for EMI/RFI suppression. Features phosphor bronze contacts with standard plating of gold flash over nickel underplate. Also available with additional gold plating over standard gold flash for a total 30µ″ thickness in mating area; *contact your local Newark sales office for details.* Current rating: 1A at 100VAC; 2A at 12VDC. Contact-to-contact resistance: 30mΩ maximum. Insulation resistance: 500MΩ minimum at 500 VDC. 0.197″ (5.0) OD black, PVC cable jacket over 28 AWG stranded wire conductors. Nylon plug insulator, rated UL94V-0 with black PVC plug overmold. Molded-in strain relief. Operating temperature: -40°C to +70°C. UL recognized, CSA certified.

500 SERIES LOW-PROFILE EMI FILTERED PC BOARD CONNECTORS

Filtered PC board connectors protect equipment from external EMI noise and help prevent system glitches. Filter circuits are feed-thru. Space-saving 0.318" footprint. Current rating: 5A. RF current rating: 0.3A. Operating temperature: –40°C to +125°C. Insulator resistance: 1GΩ min. Insulator: glass reinforced polyester (meets UL94V-0). Contacts: phosphor bronze, 30μ" gold-plated, over nickel. Shell: Steel, tin plated.

400 SERIES EMI/RFI FERRITE FILTERED D-SUB CONNECTORS

Prevents common-mode noise in signal lines of data communications terminals and digital devices. Effective in helping meet requirements of FCC, VDE and Japan's VCCI. 4-40 UNC locking insert eliminates loose hardware. Space-saving 0.318″ footprint. Current rating: 5A. Operating temperature: -40°C to +105°C. Insulator resistance: 1000MΩ min. 500VDC. Insulator: PBT +30% glass fiber (meets UL 94V-0). Contacts: gold plate over brass or phosphor bronze. Shell: steel (tin plate).

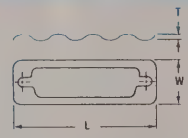
EMI FILTERED WAVED-METAL D-SUBMINIATURE GASKETS



Waved-metal gaskets adjust for irregularities in the mounting surface to maintain electromagnetic compatibility of D-subminiature connectors. Style "A" are front-pin, front-socket or rear-pin mounting. Style "B" are rear-socket mounting. Gaskets are normally 0.030″ thick uncompressed, 0.005″ compressed.

500 SERIES LOW-PROFILE EMI FILTERED CONNECTOR ENGINEERING KIT

Type PN56-5500-002 engineering kit contains six pieces representative of the 500 series low-profile EMI filtered connectors. Type number suffix indicates mounting option: **TI** indicates 4-40 threads on mounting flange; **GBL** indicates grounded board lock with 4-40 threads. *Individual* **500 series** *connectors sold separately on this page.*

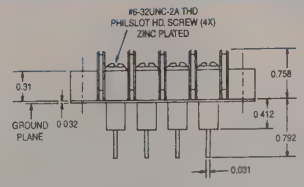
52 SERIES FILTERED TERMINAL BLOCKS



The **52 series** of filtered terminal blocks have been developed for DC power filtering applications. Working voltage: 100 VDC. Operating temperature range: –55°C to +105°C. Capacitance: 2,500 pF + 100% –0%. Current rating: 20A. UL 1059 recognized and CSA certified. *For latest mechanical details, contact your local Newark sales office.*

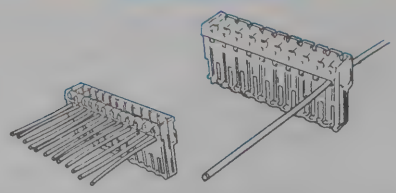
MAS-CON® 0.100″ AND 0.156″ CENTERLINE IDC CONNECTORS



For mass termination of discrete wire and notched flat cable. Pre-loaded insulation displacement copper alloy contacts are 200µ″ tin-plated over nickel. Durable 6/6 nylon housing, rated UL94V-2. Color-coded ribs for AWG size identification. Dielectric withstanding voltage: 2.0kVAC for 0.100″CL, 3.0kVAC for 0.156″CL minimum between adjacent contacts. Operating temperature: –55°C to +105°C. UL recognized; CSA certified. ISO 9001 certified. Available in circuit end or circuit through style. Additional circuit sizes and plating options are also available; *contact your local Newark sales office for details.* **Sold in packages of 100 and 500.**

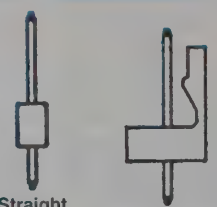
MAS-CON 0.100″ AND 0.156″ CENTERLINE MOLDED WAFER HEADERS



Straight Flat Straight Locking

Straight and right angle wafer headers in flat, polarized and locking versions. Polyester, UL 94V-0 rated. Formed square copper alloy pin is post plated with 200µ″ tin over nickel. Breakable to any length and end-to-end stackable. Current: 4.0 amps for .100CL, 12.5 amps for .156CL maximum per pin. Temperature range: –55°C to +105°C. Additional circuit sizes, header styles, and plating options are available; *contact your local Newark sales office.* UL recognized; CSA certified. **Sold in packages of 100 and 500.**

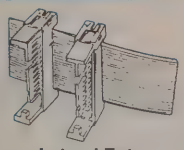
LAT-CON™ SHROUDED AND IDC HEADERS

Fully Shrouded



Lateral Entry

Fully shrouded headers with 0.114″ straight solder-tail contacts. Copper alloy contacts plated with 15µ″ gold over nickel. Pin spacing: 0.100 x 0.100″. Current rating: 3 amps. Lateral-entry IDC headers terminate to 28 AWG stranded, insulated 0.050″ flat cable for in-line splice, T-Tap design applications. Used as an I/O interface. Phosphor bronze contacts with 15µ″ gold over nickel plating. Current rating: 1 amp. Both types of headers feature glass-filled polyester housing, rated UL 94V-0 with short ejector latches for positive socket retention and easy socket unmating. Withstanding voltage: 1000V. Temperature range: –55°C to +125°C. Meet MIL-C-83503 specifications. 10-circuit position headers (*) have slot for center polarizing. All other header sizes have slot for military keying and center polarizing slot. UL recognized, CSA certified. Mate with sockets, *ordered separately on this page.* Easily installed with **type MCP5** termination press and **type CPD64F50HM** die, *ordered separately; contact your local Newark sales office for details.*

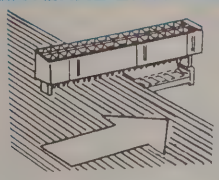
LAT-CON™ LATERAL-ENTRY IDC SOCKETS



Lateral entry reduces termination time up to 70%. Designed for 0.050″ center, 28 AWG, stranded flat cable (0.100 x 0.100″ mating spacing). Glass-filled polyester housing, flammability rated UL 94V-0. Insulation displacement contacts provide gas tight connections. Contacts plated with 15µ″ gold over nickel. Meets MIL-C-83503 specifications. Withstanding voltage: 1000vrms. Current rating: 1 amp. Temperature range: –55°C to +125°C. UL recognized; CSA certified. Mate with LAT-CON™ headers *ordered separately on this page.* Easily installed with **type MCP5** termination press and **type CPD64F50FM** LAT-CON™ die, *ordered separately; contact your local Newark sales office. Order optional strain reliefs separately; contact your local Newark sales office for details.*

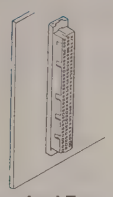
HI-CON™ EUROCARD DIN CONNECTORS



Standard Female-Backplane

Standard Male-Daughter Board

Female-IDC Flat Cable

Male and female 2-,3-,4-row connectors permit high-density PC board packaging. Intermateable to DIN 41612, VG95324, BS9525, and IEC 603-2 specifications. Compatible with VMEbus, STEbus, MULTIbus II, CIMbus, and NUbus applications. Available with wave solderable (WS) pins, insulation displacement contacts (IDC), and compliant pins (CP). Glass-filled polyester housings, rated UL94V-0. Current rating: 3-amp maximum on board-mounted connectors; 1.5-amp maximum on IDC connectors. Operating temperature: –55°C to +125°C. Meet DIN Level III performance unless otherwise indicated. Other performance versions are also available; *contact your local Newark sales office.*

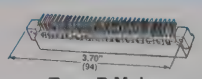
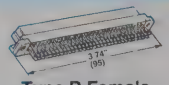
FRIENDLY, QUALITY SERVICE FROM YOUR LOCAL NEWARK SALES OFFICE.

Gds SERIES PRINTED CIRCUIT BOARD DIN CONNECTORS



Type B Male Right-Angle



Type B Female Solder Lugs

- **Meet Requirements of DIN Standard 41612**
- **CSA Certified, ISO 9001 Certified**
- **Types B and C are UL Recognized**
- **Order Type M Special Contacts Separately**

Male and female connectors available in many termination styles: Straight and right angle solder pins for printed circuits, solder lugs for discrete wiring, press-in for backplanes, and wrap posts for automatic wiring. Low insertion/withdrawl force and high vibration resistance. Includes glass-fiber filled thermosplastic resin molding. Copper alloy contacts are gold-plated in contact zone according to performance level 2 and tinned in termination zone for greater solderability. 0.100″ (2.54) contact spacing.

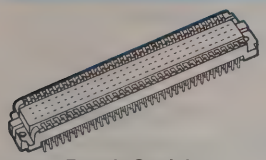
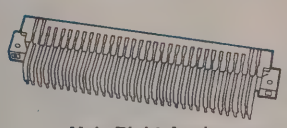
D-SUB AND FLAT CABLE CONNECTORS

HAR-BUS 64 VME64 EXTENSION CONNECTOR SYSTEM



Female Straight



Male Right-Angle

Har-bus 64 is 100% backward-compatible to existing Eurocard systems and Gds A-C connectors; *ordered separately, contact your local Newark sales office.* The additions of rows z and d provide these capabilities: 35 more signal ground return, +3.3V power, ±48V power, and 6-slot geographical addressing pins. Contact spacing: 0.1″. (2.54). Working current: 2A maximum. Temperature range: –65°C to 125°C. All part numbers have 160 contacts.

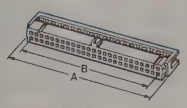
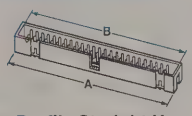
SEK 18 SERIES FLAT CABLE CONNECTORS



Female Connector



Low Profile Straight Header

Meet IEC DIN 41651. Female connectors with center polarization, strain relief clamp offer insulation displacement connection, wire 28 AWG 7x0.127″ (0.09^2) with 0.05″ (1.27) pitch. Low profile male headers with 0.100″ (2.54) pitch feature 0.114″ (2.9) long straight solder pins for PC board mounting 0.035″ (0.9) diameter hole. All versions: thermoplastic resin (PBTP) mouldings, rated UL 94V-0. Insulation displacement contacts gold-plated in contact zone according to performance level 2 per DIN 41651, Part 2 (200 mating cycles, 4 days gas test) tinned in termination zone. Working current: 1 amp. Temp. range: –55°C to +125°C. UL recognized, CSA certified. *Long or short locking lever, termination tool kit ordered separately below.*

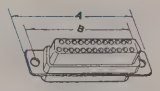
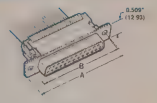
D-SUBMINIATURE CONNECTORS

Straight Solder



Crimp Terminal Housing



IDC

Comply with DIN 41652 and MIL-C-24308 specifications. Offer high packaging density. Tin plated steel shells with dimples on male versions provide shielding continuity. Copper alloy contacts gold plated in contact zone, tinned in termination zone. Thermoplastic resin, glass-fiber filled (PBTP) mouldings, rated UL-94V-0. Working current: turned contacts 7.5 amps maximum/stamped contacts 6.5 amps maximum. Test voltage: 1kV. Male and female connectors available with straight solder turned and 4-40 UNC retained nut in flange. Male and female crimp terminal housings for stamped crimp contacts, *ordered separately.* Crimp stamped contacts, termination tooling and hoods *ordered separately.*D-sub sconnectors 0.049″ (1.27) pitch. For insulation displacement connections, stranded wires 28/7, 26/7 AWG. Tinned mental shell, thermoplastic resin (PBTP) moulding, rated UL94V-0. Contacts gold-plated in contact zone per performance level 3, tinned in termination zone. Working current: 1 amp. Temp. range: –55°C to + 125°C. *Order corrosion-resistant steel strain relief clamp separately below.*

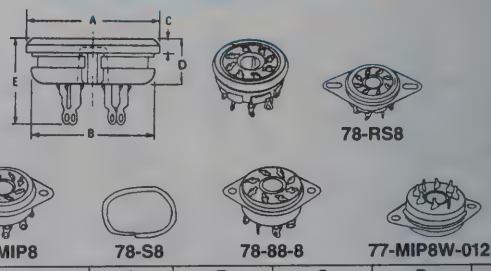
TUBE AND RELAY SOCKETS



Sockets	A	B	C	D	E
78-S4, -S5, -S6	1.25″	1.156″	0.135″	0.420″	0.844″
78-S8, -S11	1.25″	1.156″	0.145″	0.490″	0.875″

Type 78-S are type S sockets with retainer ring. Made of phenolic, they are screw and rivetless. Sockets are notched around circumference for rotation to wiring positions. **Type 78-RS** replacement type S sockets are assembled with retainer ring holding a nickel-plated steel mounting plate. Mounting plate centers: 1.50 to 1.859″ (38.10 to 47.22). **Type 78-88-8 MIP** octal-style compact sockets have phosphor bronze cadmium-plated contacts. Mount in 1.125″ (28.58) dia. hole, mounting plate holes on 1.313″ (33.35) centers. **Type 77-MIP** are molded-in-plate type; 2 holes in each contact provide easy wiring. **Type 77-MIP8W-0125** PC MIP socket-mount on boards to 0.125″ (3.18) thick. Rated 3A. Contacts are copper alloy with cadmium-plate finish. Contact tails: 0.125L x 0.063W x 0.016″ thick (3.18 x 1.60 x 0.406). Mount 0.063″ (1.60) dia. hole. **Type 146-103** is phenolic and operates up to +300°F. Rated 5A @ 1250Vrms. **Type 146-103** top mount relay socket does not have tie-point inserts. **Type 146-103** is 2.625W x 1.985D x 0.968″ H (66.68 x 50.42 x 24.59). UL recognized.

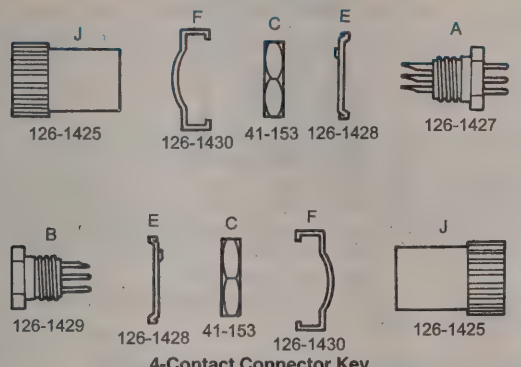
PLUGS AND HEXAGONAL CONNECTORS

126 SERIES MINIATURE HEXAGONAL CONNECTORS



Refer to the enlarged view drawing above to determine the components required. Note the identification letter, then order by the type number alongside the desired combination of components and the number of contacts. For example, a male 5 contact connector with rear hood, cable clamp and lock sleeve requires components A, G and H. In the column for male 5 contact assemblies, AGH indicates **type 126-217**, which contains all three components.

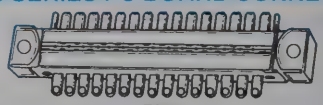
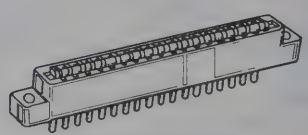
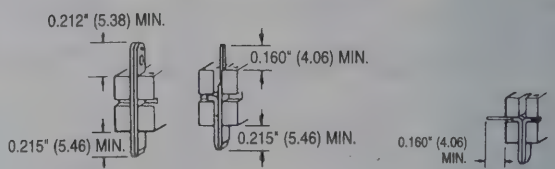
133/143 SERIES PC BOARD CONNECTORS



Plug



Card Edge Connector



133 and **143 series** PC connectors are rated 5 amps, 600VACrms. Dielectric material is diallyl phthalate per MIL-M-14 type MDG. Dielectric resistance: 5000 megohms minimum. **133 series** plugs have brass contacts, and **133 series** male plug adapters for PC boards are especially useful in situations involving board thicknesses other than 1/16″. **133 series** and **143 series** intermate. Type number suffixes in tables refer to tail style: for **143 series suffix -01** indicates solder eyelet; **suffix -03** indicates DIP solder; for **133 series**, *see drawings above.*

CARD EDGE CONNECTORS

Designed for 0.062″ thick printed circuit boards. Low insertion force. Mating contacts are gold over nickel-plated for reliability. 0.200″ pin row separation. Test voltage: 650VAC. Rated current: 3 amps. Contact resistance drop: 30MV maximum at rated current. Insulation resistance: 5000 megohms at 500VDC. Supplied with between-contact polarizing keys except **Type R644** , which has in-contact polarizing keys. All solder tail with eyelet termination *except* **type R644-3** which is wire-wrap termination – 0.025″ square. Pin length: 0.25″ (solder tail); 0.65″ (wire-wrap).

307

Low profile receptacles feature, phosphor bronze contacts with bifurcated nose. Selective gold over nickel plating in mating area with tin-lead tails. Solder hole or PC tab contacts. Flush mount, green glass-filled polyester insulator, rated UL94V-0. Parts are single read out with center line contacts. Accepts PC boards 0.054 to 0.070″ (1.37-1.78) thick. Current rating: 5A. UL recognized, CSA certified.

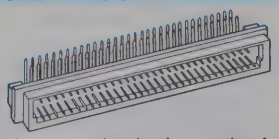
DIN BOARD MOUNT CONNECTORS



DIN connectors feature high contact density, low mating forces, and 2-piece design. Header and receptacle versions without keying in 3 row (3x32) configuration, except types with (*) 3 row (3x16). 0.100″ (2.54) grid. 0.025″ (0.635) square terminals. Standard and inverted (reverse) versions available for solder-in, wire wrap, press-fit, and surface mount compatible applications. Contact resistance: 20 milliohms. Rated 3A @ 20°C. Insulation resistance: 5000 megohms @ 500VDC. Operating temperature: –65°C to +125°C. Comply with DIN 41612. UL recognized, CSA certified, VDE approved. M55302/VG95324 approved. *Before ordering, refer to the Coding Key table below for an explanation of contact designation codes and variation codes.*

6208 SERIES FPC/FFC FLEX-TO-BOARD CONNECTORS

Straight type, ZIF (zero insertion force) units feature 0.039″ (1.00) contact spacing for flat printed circuit (FPC)/flat flex circuit (FFC) cable. Retainer ensures secure fit. Connectors fit 0.197″ (5.00) above board. Tin-lead plated phosphor bronze contacts. Glass-filled PPS insulator and slider rated UL94V-0. Rated 1 amp, 100 volt maximum. Dielectric withstanding: 500Vrms minimum. Applicable FPC/FFC: 0.012±0.002″ (0.305 ±0.05).

***First 3 digits are the contact code.**
†To order individual contact, use this part number.

Available with 20, 38, 56, 90 or 120 insertable/removable Verilok™ contacts. Actuating screw or nut lock mated connectors together. Guide pins and sockets provide correct alignment. Covers are aluminum with top or side cable entry. Rated 8.5A max. Contacts are phosphor bronze with 10μ″ min. gold plating over 30-100μ″ nickel. Polyester insulator material. *To order, locate the 3-digit* **variation code** *of the connector desired, and then use this code to complete the 13-digit ordering code shown in the table.*

APPLICATION TOOLING

CONTACT EXTRACTION TOOL

Extracts contacts from insulator quickly and easily, without damage to contacts or insulator.

69F310 Type 06-1877-040-000. **Each**..... **60.64**

CONTACT CRIMPING PLIERS

Designed for hand crimping of contacts. Well suited for maintenance, model shop, laboratory, and small-scale production purposes.

Stock No.	Type	Contact Capability	Wire Size and Type	Each
69F314	06-7852-010-000	60-8017-0313	18-26 AWG, Stranded	234.01
69F315	06-7858-010-000	60-8216-0313	22-30 AWG, Stranded	221.52

POLARIZATION TOOL

Small spanner wrench for **8016 series** connectors. Changes the position of guide pins and sockets to achieve different polarization combinations.

69F320 Type 06-1989-020-000. **Each**..... **77.07**

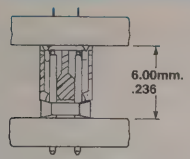
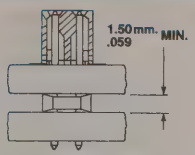
BOARD MOUNT AND IDC CONNECTORS

RN PAK-2 0.079″ (2mm) INTERCONNECT SYSTEM



Vertical Header/
Straight Socket



Bottom Entry Surface-Mount Socket/
Vertical Header, Board Stacking

Highly recommended system for disk drives, notebook/notepad computers, portable peripherals, printers, radios, compact disc players, telephones, VCR cameras, and every other application where dense, board-to-board packaging is required. **Headers:** Offer vertical or right-angle through-holes and 2mm pin-to-pin and row-to-row spacing or surface-mounting. Right angle insulator design with ribs stabilizes connectors on PCBs and facilitates IR processing. Temperature range: –40°C to +105°C. Insulation resistance 1000 Megohms. Flammability rating: UL 94V-0. Current rating: 1 Amp. Black thermoplastic construction, with ROBEX® plated phosphor bronze contacts. **Sockets:** Offer top and bottom entry option for greater flexibility for PCB stacking. Through-hole or surface mounting. Early point of contact ensures adequate wiping action and reliable contact. 2mm pin-to-pin and row-to-row spacing. Insertion force: 100 grams per contact. Temperature range: –40°C to +105°C. Insulation resistance: 1000 Megohms. Flammability rating: UL 94V-0. Current rating: 1 Amp. Black thermoplastic construction, with ROBEX® plated phosphor bronze contacts. Available in several configurations, with 4-60 positions and options to customize your application. Headers can be cut to desired positions.
